

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

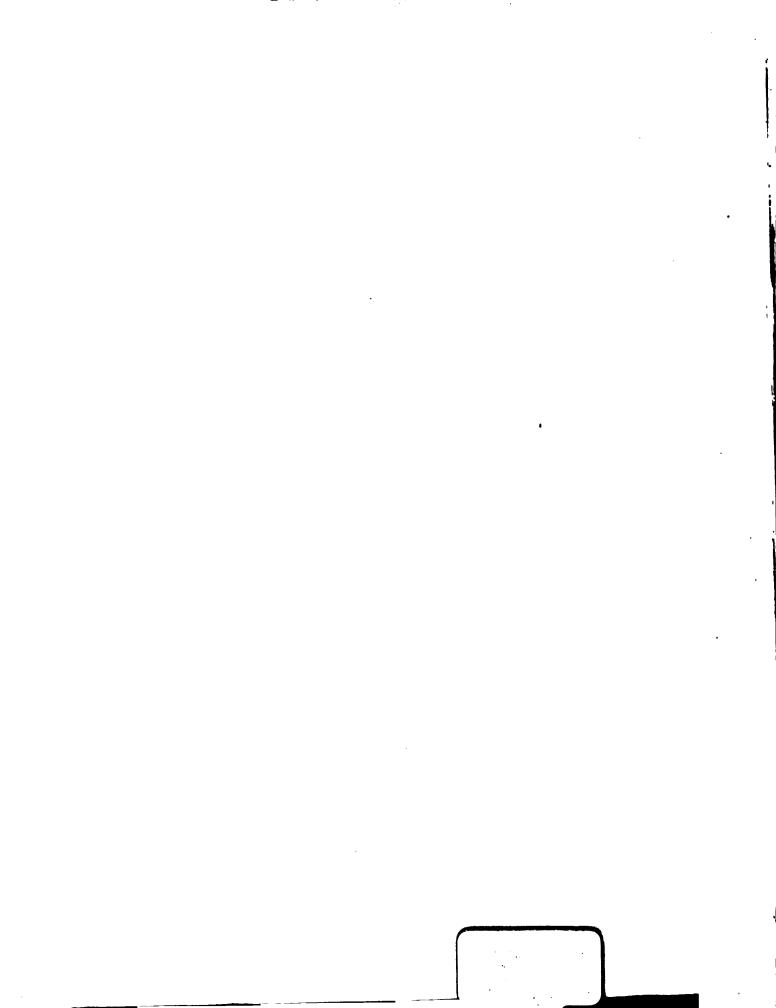

We also ask that you:

- + Make non-commercial use of the files We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + Maintain attribution The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

VOLUME II.

CAMBRIDGE:

PRINTED AT THE UNIVERSITY PRESS:
FOR RICHARD PRIESTLEY, 143, HIGH HOLBORN, LONDON.

1822.

302. h. 30.

v-IRTUS, v-IRTUE, ARETE, &c. (Lat. Eng. Gr.) The Nature or Quality of any thing—originally of the Soil or Earth;—Excellent Quality.

ARS, ART-is, ART, &c. (Lat. Eng.) The Nature or Quality of any thing, Excellent Quality, &c.

ARD, AERD, ART, (Germ.) The Drugs.

Nature or Quality of any thing.

Bast-ARD — Bat-ARD, &c. &c. (Eng. Fr.) Of a Base Nature. ARTzen. (Germ.) To Temper things, so as to make them of a due Sort or Quality.

ARZT. (Germ.) A Physician,
A Temperer or Mixer of
Drugs.

 ${f T}$ HE terms in Latin beginning with v, having RT, RD, &c. &c., may be considered as belonging to our Element 'RT, 'RD, by the addition of the labial sound v. We have seen the Latin v-IRID-is. and its corresponding terms v-End-ure, v-Ent, &c. (Eng. Fr. &c.) which, as we should all agree, would be naturally derived from the EARTH. In v-Ireo we have the form 'R. We shall likewise acknowledge, that the Latin v-IRTUE, would be naturally derived from the same spot. It may well be imagined, that the names for Moral Properties or Qualities would be deduced from the Properties or Qualities of Natural objects, either in their simple state, or as improved by Culture. In a term of this sort these ideas cannot be separated. The word v-IRT-us, in its original sense, signified, as I conceive, the Nature—Property or Quality of the Soil or EARTH; and it is thus perpetually used by the Writers on Agriculture. Cato, in the very commencement of his work, applies the word in its genuine sense, "Solo bono, " suâ VIRTUTE valeat," (scl. Prædium.) The word VIRTUE in English bears its genuine sense, when we speak of the VIRTUES

of the Soil—of Plants and Herbs. In the following passage of Lear it is brought back to its original Spot.

- " All you unpublish'd VIRTUES of the EARTH,
- "Spring with my tears! be aidant and remediate,
- "In the good man's distress." (Act IV. S. 1.)

If the Reader should be inclined to admit my idea respecting the origin of this word, that v-IRT-us belongs to the EARTH, though it appears with the stronger labial breathing, bearing the form of the Consonant V, before the radical ART; his conviction will be unshaken, when he remembers the form of the parallel term in Greek, where no such obstacle presents itself. In ARETE, (Aperty, Virtus,) we see at once the ARETZ, or EARTH. We know, that ARETE, (Apery,) as well as v-IRTus, relates to the qualities of Natural objects, During Apery, (Geopon. 14. 24.) In Arete, (Apery,) as in v-IRTUS, we appear to see simply the idea of the EARTH, as denoting Quality, without the action of Stirring it up, as in the verbs ARTuo, (Aetus, Paro,) and v-ERTO. We know, however, that the sense of Quality—Property may be derived from the EARTH, when the idea of its made up - meliorated or prepared state, by Stirring up or by Cultivation, has been annexed to it. Such distinctions are perhaps unnecessary; and it is sufficient for my purpose to shew, that the EARTH affords the origin of the term.

ARETE, (Agery,) means in Greek that peculiar Quality—Principle—Faculty—Power, inherent in or appropriate to any thing, by which it exerts the energies of its Nature. In the opening of the Discourse The Aperts: E. Marrow in the Socratic Dialogues of Æschines, the sense of ARETE is fully manifest*, as it denotes that

^{*} Αρα διδικτοι εστο ή αρετή η ευ διδικτο, αλλα φοσει εί αγαθε γεγευται αυδρες, η αλλο τια τραπή;

Ουα την ευτικ ει τη παροτή, ε΄ Συκρατής. - Αλλα ειδι σκεφαρείδα αυτό. Φερ, ει τις βιολείτο ταυτώ

Του ΑΡΕΤΗΝ γυσηθεί προδες η αγαδει εισο εί συβοι μαγοιρό, πόδο αι γυσιτό;

-- Δυλείστο ει παρα του

αποδει

that VIRTUE-Art-Quality, or Power, by which men become excellent in any ART, (Ayabos Typ APETHN,) as that of Cookery-Medicine, &c. It is impossible not to perceive in this explanation, derived from the above passage, the coincidence in sense of the Greek ARETE, (Apera,) and the English ART; and we shall instantly agree, that they are only different forms of each other. This coincidence is so striking, that it has been noted by the Etymologists. The Commentary of John Le Clerc, on the sense of ARETE, (Apery,) in the passage of Æschines, will sufficiently illustrate my Hypothesis:--"Coquinariam ARTEM cum vocat So-" crates APETHN," ARETen, "satis ostendit sic dici potuisse quamibet dotem, aut facultatem, quâ quivis fit cuipiam rei apueros seu Hinc et veteres Grammatici ano the APETHE," ARETES, " nomen Artis deduxerunt, quâ de re vide Ger. Joan. Vossium "in Etymol." The ordinary Lexicons detail every thing that is, important respecting this subject. "ARS, ARTIS," says R. Ainsworth, "(per sync. ab APETH, i.e. VIRTUS. Don. nam vett. "ARTEM pro VIRTUTE accipiebant. Diom.) 1. Originally and "properly, Power. (2.) VIRTUE. (3.) Afterwards, ART." here

αγαθος μαγείου μαθοί.—Τίδι; ει βουλοίτο αγαθος γιγείσθαι ιατέος; παξα τινα αι ελθωί γειοίτο αγαθος εατέος;—Δηλοί δη ότι παξα των αγαθωί τινα ιατέως.—Ει δι ταυτήν την ΑΡΕΤΗΝ αγαθος βουλοίτο γειεσθαί, ήναις εί σοφοι τεκτονες;—Παξα των τεκτονωί;—Ει δι ταυτήν την ΑΡΕΤΗΝ βουληθείη αγαθος γειεσθαί, ήναις εί αιδείς οί αγαθοί τε και σοφοί, ποι χέν ελθοίτα μαθείν;—Οιμαί μεν και ταυτήν, είπες μαθητός εστίς παξα των ανάθων των αγαθων ποθεί γας αλλοθείς;

[&]quot;An potest doceri VIRTUS, an vero secus, sed natura fiunt boni viri, vel alio quopiam modo?—Non habeo, Socrates, quod tibi nunc respondeam.—At id hic dispiciamus. Age, si quis velit ea VIRTUTE bonus fieri, quâ boni sunt periti coqui, unde fieri queat?—Nimirum, si a bonis coquis discat.—Quid vero? si bonus velit fieri medicus, ad quem ire queat, ut bonus fiat medicus?—Si, scilicet, a quopiam peritorum medicorum discat:—Si autem eâ VIRTUTE bonus fieri cupiat, quâ boni sunt periti fabri?—A fabris?—At si fieri vellet bonus eâ VIRTUTE, quâ viri boni et sapientes sunt præditi, quò eum oportet ire, ut discat?—Credo, et hanc, si disci possit, à viris bonis pariter disci. Quonam enim alio ex loco eam consequi posset?" (See Hesiod. Ec. 313. and Eustath. ad Hom. 661. Odyss. Ope ageron, &c.)

here see, that the nature and source of the word have been properly explained, though our Author has not understood the original sense of it.

The German corresponding word ART unequivocally directs us to the Spot, which is supposed in my Hypothesis. ART is explained by my Lexicographer to be "The Nature, Property, " Quality, Temper, &c .- The Kind, Species, Sort, Race, Gender, "Origin," &c. In a French and German Lexicon now before me, Art is explained by "La Sorte, Espéce, l'Origine, le Genre, " la Nature, le Naturel, Temperament, la Complexion, Pro-" prieté, Qualité," &c. If we should endeavour, by a train of reasoning à priori, to discover from what source a term conveying this train of ideas would be derived, we should concur, I think, in referring it to the Nature, Property, Quality, or Temper of the The Adjective Artig denotes "Quaint, Curious, Pretty, "Spruce, Agreeable, Handsome, Fine, Genteel, Polite, Comely, Neat, "Apposite, Proper, Cleverly," as my Author explains it. These senses, though apparently remote from the original sense, all concur in the general idea of A Good Nature or Quality. We know, that Poor and Eυφυης have a similar meaning. Φυσις denotes a Good Nature or Quality, Understanding, Cleverness—Genius, &c. The ordinary Lexicographers explain Euquic by "Bene ac læte crescens, ut Arbor, &c.-"Ingeniosus; -- Bene à Natura constitutus et factus. -- Facetus, "Jocosus, Dicax." Appropries means likewise of a Bad Nature— Dull. Menage, on a passage of Diogenes Laërtius, where this word is used, observes thus: "Aquomos, id est, minime ingeniosus. " Φυσις pro Ingenio usurpatur priscis scriptoribus. Ita apud Thu-" cydidem, teste H. Stephano, Φυσεως ισχυς Vis ingenii. 56 in Phædro. Δοκει μοι αμείνων η κατα τους περι Λυσιαν είναι λογους τα της. " φυσεως. Id est, Cicerone interprete, Majore mihi Ingenio videtur " esse quam ut cum orationibus Lysiæ comparetur. " cule dicimus, Il n'a point de Naturel, et contra, Il a un bon naturel."

"turel," (Diog. Laërt. Lib. vii. Seg. 170.) The German verb Arten brings us again to the original idea. It is applied to Natural productions, and means, "To thrive, bear the climate;" or, as my French Lexicographer explains it, "Ressembler, con-"server le Naturel, la qualité, ne pas degenerer.—Er Arter "seinem Vater nach, Il ressemble à son pere, il imite son pere.—"Der fremde Weinstock Artet hier nicht, La vigne etrangere "ne profite pas, ne conserve pas sa qualité dans notre pays." There are some German terms, derived from Art, in which the Earth directly appears; as Art-Acker, Art-Feld, "le labour, "le Champ, qui porte; Artbar, Arthaft, Fertile, qui porte—Art-"Land, La Terre labourable." Ard, a frequent termination in English words, as Stink-Ard, &c., is acknowledged to belong to the German Art, and the Belgic Aerd.

We shall now understand the origin of our word BastAnd, which means of a Base Nature or Kind. Though the Etymologists have given us various derivations of this word, they have not failed to record the present. The term occurs in the French Bastard or Batard, the Italian and Spanish Bastardo, the Belgic Bastaerd, and the Welsh Bastardd. Some derive these terms from Base, or its parallel word, and the Saxon Steort, Ortus, or the Welsh Tarddu, Oriri. Others derive these words from Best and Aerd, "quia tales plerumque optima indole præditi sunt." It is curious, that in deducing these words from the idea of Base, the Etymologists have recorded its parallel terms, in other Languages, as Bose, (Germ.) Bas, (Fr.) Busta, (Isl.) Bas, (Welsh,) &c. &c. Base and Bad are only different forms of each other, and of Bose, &c. Bastard-Wine is not from Passum, as Skinner conjectures; but it means, "Vinum spurium, quia sc. non ut fieri solet, ex uvis recentibus, sed ex resiccatis fit," as this Etymologist likewise conjectures. In French, Abat-Andir, To degenerate, is used in its original sense, as applied to the productions of Nature. In the French and German Dictionary, which has supplied me with

with the above quotations, I find "Aus der Art schlagen De"generer, s'AbatArdir." The French BatArdiere, "A Place in
"a garden prepared for the placing of Fruit trees, as they come
"out of the nursery," as Deletanville explains it, is properly,
I believe, the Nursery itself, "La Pepiniere," as Duchat explains
it; and in this word, Bat or Bas is taken in the other sense of
Base, as the Fundamental—Original, Earth or Ground, in which
the plants are brought forward. Duchat derives this word from
the "petits Batons ou arbrisseaux sauvages ou autres dont il est
"planté."

The French Bat Andeau, a Dam, or, as some write it, Bat And-eau, means a Base or Foundation of EARTH, to support any thing. Duchat explains this word by "Une cloison de Bastons repliés en " forme de claye sur des pieux fichés dans l'eau; et c'est de la " que vient le nom de Bastardeau, diminutif de Bastard, produit " de Bast, fait de Bastum, d'ou nous avons fait Baston." explains it by "Une closon d'ais, de terre glaise, ou d'autre chose, "qu'on fait dans l'eau pour y batir quand elle est épuisée. "Voyez Baston." Bastion, Baton, Batir, all belong to the Base, or Foundation, the Support; and are derived from the Element BD, denoting the Ground, Boden, (Germ.) &c. &c. Some seem to think, that Eau, the final portion of Bastardeau, is expressive of Water: but this I do not imagine. The Germans have precisely the same composition as BastAnd, with a different turn of meaning, as Bos-Artig, A person of a bad disposition. In English. and in other Languages, Bastard, &c. is applied to the productions of Nature, and it is then used in its original sense, though it has often happened, that the writer, in adopting it, has conceived the expression to be metaphorical and allusive to the illegitimate offspring *.

ARTist,

^{*} The word Art, though taken, as we have shewn, from the great storehouse of Nature, is now applied as a term in direct opposition to it; and our books abound with enquiries

Artist, Artisan, with their parallel terms Artista, Artisan, (Fr.) Artegiano, (Ital.) &c., are acknowledged to belong to Ars, though

enquiries on the different operations of Nature and of ART, not only in the productions of moral excellence, but even of those perfections, which the natural world itself exhibits to the view. The terms Culture-Cultivation, &c. have experienced the same fate; which, we know, are at once applied to moral and mental improvements in opposition to the effects of Nature; and likewise to the labours, which belong to Natural objects. The Culture, or the amelioration of the Qualities or Nature of the Soil by the industry of man, supplies the first exertions of Human ART; and from this humble source, as may well be imagined, is derived the greater portion of those terms relating to the progress of man in refinements and in ARTS, which are totally dissimilar to the original object of his cares and attention.—The great question about ART and Nature may be considered, like most of our enquiries, as a confusion of ideas arising from the use of similar terms, apparently differing from each other; and even the facts of Etymology will serve to furnish us with an important truth, that in Life. as in Language, ART and Nature are inseparably connected in the same object, and differ only by the variety of modifications, which are appropriate to the same materials.

Our great Bard, whom no topics of Human reasoning have escaped, has thus decided on the question; and he has supplied, moreover, a vein of illustration so peculiarly connected with the train of ideas, which I have just unfolded, that I cannot refrain from transcribing the whole of this exquisite discussion.

" Perd. Sir, the year growing ancient,-

- " Not yet on summer's death, nor on the birth
- " Of trembling winter,-the fairest flowers o' the season
- " Are our carnations, and streak'd gilly-flowers,
- "Which some call, Nature's Bastards: of that kind
- "Our rustic garden's barren, and I care not
- " To get slips of them.
- " Pol. Wherefore, gentle maiden,
 - " Do you neglect them?
- " Perd. For I have heard it said,
 - "There is an ART, which, in their piedness, shares
 - "With great creating Nature.
- " Pol. Say, there be;
 - " Yet Nature is made better by no mean,
 - " But Nature makes that mean: so, o'er that ART,
 - "Which, you say, adds to Nature, is an ART
 - "That Nature makes. You see, sweet maid, we marry
 - " A gentler cyon to the wildest stock,
 - " And make conceive a bark of baser kind
 - "By bud of nobler race: This is an ART
 - "Which does mend Nature,-change it rather; but
 - "The ART itself is Nature:

though some refer us to Aqu, Apto. The preceding terms to these in Skinner are Artillery and Artichoke. Some derive Artillery, Artillerie, (Fr.) from Ars; others from Articulare, Arcualia, Attillare, (Ital.) &c. &c. The word is French; and Menage has, I think, justly derived it from the ancient word ARTILLER, which, as he says, properly signified, "Rendre fort par ART, et garnir" d'outils et d'instrumens de guerre." The following quotation from an ancient Romance is produced by Menage.

- " Près de la marche de la mer
- " Avoit fait son Castel fermer,
- " Qui moult estoit bien batilliez,
- " Si fors et si bièn ARTILLIEZ,
- "Qu'il ne creinoit ne Roy ne Conte."

The word here signifies Provided with—Furnished with, as by ART; and perhaps it would be too minutea distinction to enquire, whether the idea annexed to ARTiller, Garnir—par ART, if I may so say, was that of Garnir or of ART; as it would in fact be only to enquire, whether the word ARTiller belonged to ART, as a substantive, or ARTer, as a verb, if such a verb had existed. We see, that the sense of ARTiller, To Prepare, Furnish, &c., conveys the sense of ARTuo, (Aetua, Apparo, adorno, Instruo.)

In Dr. Jamieson's Scotch Dictionary, the succeeding word to Artailye, Artillery, is Artaion, "Excitement, Instigation," which seems to belong to the sense of the Element, when it signifies 'To Stir up.' Dr. Jamieson, however, properly produces the Latin "Artaio from Arto, used for Arcto, are, To constrain." I have supposed, on a former occasion, that Arto is derived from the idea of the certain Earth, as the Enclosed Spot, which is probably right. I must observe, however, that the idea of Painful or Sharp Constriction is often connected with that of Stirring up or Vellicating

[&]quot; Perd. So it 1s.

[&]quot; Pol. Then make your garden rich in gilly-flowers,

[&]quot;And do not call them Bastards." (Winter's Tale, A. IV. S. 2.)

Vellicating a Surface; and thus Arto might belong to the race of words signifying 'To Stir up.'—The very term Constriction is connected with Stringo, To "Grate upon" a Surface,—Strigmentum, "The Scraping, &c. Strix;" (a Strigo pro Stringo,) "A channel, "Furrow, hollow gutter, or strake," &c. In the preceding column of Dr. Jamieson's Dictionary to that, in which Artation is, we have Art, Ard, "The termination of many words," as in Bast-Ard, &c.—"Art and Part, Accessory to." The Art and Part, as referring to crimes, means the same, in Scottish Law, as the combination Ope et Consilio does in Latin, where "by Art is understood the "mandate, Instigation, or advice, that may have been given "towards committing the crime." Here we see, that Art has the same meaning as Artation.

The German Arzt, a Physician, has been derived by some from Ars, Artista. It should be considered probably, as directly belonging to the German Ant, "The Nature, Property, Quality, "Temper," &c. The verb Arzenen signified in old German, 'Condire,' "Win ARTZEN mit kalk." (Sherzii Gloss. sub voce.) This word might directly be attached to ARZT, under the idea of Medicating any thing, as we express it; though it is probably referred to the more general sense belonging to ARZT, and to ART, as denoting the Temper, &c. Hence Arzt might mean 'The ' Temperer—the person who Mixes or Compounds drugs, so as to 'make them of a due Temper—Quality, Sort, ART or v-IRTue, fit for producing a certain effect.' I shall shew, that MEDICUS is the MIXER-MASHER, or Temperer. We see, in the terms Arzt and ARzenen, how the sense of ART connects itself with ARTUO, (Aptuu, Apparo.) The Greek Iatros, (Iarpos, Medicus,) is supposed to be derived from Iaouas, Medeor, which may perhaps be the fact.

^RT, &c. ^R.

Terms which convey the idea of Stirring up—of Devastating, Disturbing, Annoying, Aggrieving, Vexing, &c.— Of Excitement—Commotion—Agitation—Irritation—Strife—Contention, connected with the action of Stirring up the Earth, &c. Era, (Eqa.) &c. by the Herse, (Fr.) &c. Harrow, (Eng.) &c. &c. &c.

HARROW. (English,) The Instrument; as a verb,

To HARROW up the Soul.

HERSE — HERCKE, HARCKE,

HARRE. (Fr. Belg. Ger. Dan.)
The Harrow.

HARASS—HARASSER. (Eng. Fr.)
HERGIAN. (Saxon,) To Harrow, Vastare, spoliare, prædas
agere.

HARRY. (old Eng.) To Harrow, To Rout, Tear, or Pull up about—away, &c.,—Drive away, about, &c.

HARIER—HARCELER. (French,) Vexare, &c. HERGE. (Sax.) Turma, Prædatores, The Harrowers.

The Harrowing of Hell. The Name of one of our ancient Mysteries.

Hurry. (Eng.) To be Agitated,

—To Move hastily.

HARIER. (English,) The Dog, which Harries or chases game.

HARDY—HARDI, ARDITO, ARDUR. (Eng. Fr. Ital. Run.)
Stirred up—Impetuous—Violent.

Ardeo—Ardor. (Lat. Eng.)
To be in a state of Excitement—Agitation, &c.

Hortor. (Lat.) To Stir up—to Excite to any action.

Eretho — Erethizo — Erizo, Eris, Eridos. (Gr.) To Stir up—Excite, Exasperate.

IRRITO—Irritate. (Lat. Eng.)
ERITHEUO. (Gr.) To Labour,
Contend.

ERITHOS. (Gr.) A Labourer, Husbandman.

ERK-ites.

ERK-ites. (Greek,) A Labourer, Servant.

Up=EERETES. (Gr.) A Servant. Eresso. (Gr.) To Row, To Stir up the Water.

ERESCHELLEO. (Gr.) To Contend with, Scoff at.
ARIXO. (Lat.) To quarrel with.

w= ^RATH. (Eng.) Insian. (Sax.) Irasci.

ORGE. (Gr.) Working up, Anger. The Quality of any thing.

ORGazo. (Gr.) To Work up as into a passion, To Work up, or Macerate.

ORGAS. (Gr.) The fertile Field, well Worked or Cultivated.

I SHALL now proceed to examine the race of words belonging to our Element A. C., D., &c. which are derived by a metaphorical application from the action of Stirring up-Routing up-Tearing up—Breaking up the Ground or EARTH, &c., and which express the idea of Stirring up in general-of Excitement-Commotion-Agitation—Irritation, or of Disturbing—Aggrieving—Vexing, &c. From this source have been derived those terms in Language, under different Elements, which relate to actions of Violence to HARSH and Grating Noises, &c., as Grind, Grunt, Crush, Crash, Grate, Clash, Dash, Pell, Mell, &c. &c. I shall shew, that the words, which I have adopted, belong to names for the Ground or EARTH, under different Elements; as Grind and Grunt to Ground, &c., Mell to Mould, HARSH to EARTH, &c. &c. My Hypothesis is. that such words originally signified, 'To Ground or EARTH,' if I may so express it; either under the idea of reducing to Ground, EARTH, or Dust, or of 'Stirring up the Ground or EARTH;' and that from terms of this meaning, other words, conveying the ideas above unfolded, were either directly or more remotely derived.— We know, that the term HARROW conveys at once the sense of Stirring up the Ground, and that it is adopted likewise by a metaphorical application, as in 'HARROW up the Soul,' to express the most

most violent state of Agitation, by which the mind can be Excited and Disturbed. We have seen, moreover, that the terms Solicitude and Solicito denote in their primitive sense the action of 'Stirring' up the Ground,' or Solum.

The explanatory word Agitation is derived, we know, from Agito and Ago; and I shall shew, that Ago, under the form of our Element ^C, ^D, ^G, &c., belongs to Ager, from a similar idea of Stirring up the Ground. I have been obliged to anticipate other terms, likewise, IRRITATE and ROUT, which are attached to our Element 'RT, RT, with or without the breathing before the R. I shall reserve for a separate article, the investigation of those terms, where there is no breathing before the R, because, when the breathing is once lost, it may be considered as a separate form, and capable of generating a race of words distinct from those under the other form. We shall see, however, that the forms are perpetually passing into each other, and should be considered as originally the same. Rout, we know, refers particularly to the action of 'Stirring up the Ground;' and it means likewise 'To Stir up,' in a metaphorical sense, with the idea of Disturbance or Violence. Rout belongs to the Saxon WROTAN, Versare Rostro, where we have the regular form 'RT, with the breathing before the R. We perceive now, that Rostrum belongs to Rout, and that both these words directly connect themselves with the form 'RT, with the breathing before the R. Let us mark the explanatory word v=Ens-are, which belongs to ^RT. &c. The term Irrito must either be considered as attached to the Element 'RT, with the breathing before the R, or the Ir is for In, and the Rito must then be regarded as belonging to the Element RT, with no breathing before it. I shall adopt the terms IRRITATE and Rout in my discussion, as most expressive of the ideas, which I am desirous of conveying. Some derive Irrito from Ira, or Hirrire; though others imagine, that there

was an old word Rito, from whence Irrito and Provito were taken.

The term Harass is directly connected with the metaphor of the Harrow, or Herse. The Etymologists, under Harass, refer us to the French Harasser, the Saxon Hergian, the German Heeren, Populari, devastare; and this latter word Skinner derives from the Saxon Here, and the German Heer, Exercitus. To these he refers the French Harceler, and Harier, Vexare; and he observes, "Alludit, Gr. Equalitation, Scommate Illudo, Rixor, à nom. Equ, Contentio. Vide et ab eodem fonte ort. verb. Hurry vel Harry." The French Etymologists refer Harasser to the Greek Arassein, (Aquaroun, Pulsare,) which must be added to this race of words, and Harceler, to the German "Harke, qui signifie Rateau." Let us mark the term Rateau, under the form RT.

To the Saxon Hergian, which Lye in his Saxon Dictionary explains by "To HARROW, Vastare, spoliare, prædas agere," the Etymologists have justly referred the old English word HARRY or HARRIE, "Depopulari, Hostiliter invadere, vastare;" and they have moreover produced, as parallel, the Danish Herge, the Spanish Harrear, the French Harier, and the Saxon Herge, Here, Exercitus. The Saxon Herge means "Turma—Prædatores;—Depopulatio," the HARROWERS or Plunderers; and to this belongs an adjacent Saxon term Here, Exercitus, Turma, An army or company in general, &c., from which is derived the German Heer, a Host. Lye explains the Saxon Here-geat by "Militaris apparatus, Armamen-"tum, (ab Here, Exercitus, et Geotan, Reddere, erogare);" and he adds, "Inde etiam quodcunque patrono suo præstitit vasallus ad " arcendos grassatores, et prædatores, vocabatur Here-Geat. " denique patrono præstitum ab omni novo vasallo idem obtinuit " nomen, unde vox nostra Heriot." Again in Saxon, Here-geold, or gyld, is "Militare tributum," from which Here-geld is derived. Here-Toga is the "Exercitûs Dux," from which the Germans have

have their Herzog, a Duke. Tog, Zog and Dux belong to each other. The German Herr, a Lord, or Master, may perhaps mean the Chief person of the Here, or Company of Men; and if such be the origin, the Latin Herus must be derived from the same The succeeding word to the Saxon Here, Exercitus, is source. Here, Fama, from Herian, or HERGan, Laudare. These words denoting Honour, &c. might be taken from the Honour-Reverence or Respect, which Soldiers, the HERE or HERGE, pay to their superiors; but as these words belong probably to the German Ehre, Honour, and Ehren, To Honour, we must refer them to a different idea. The German Etymologists derive Ehre from Eqa, Terra. Aehren, Colere, or from Her, Altus, or when, Curare. Ehren belongs to Aehren, Colere, which is probably the fact, it is the same metaphor which Colo bears of 'Honouring and Respecting,' from the sense of Cultivating the Soil. attached to Aro, Ear, the Saxon Erian, or Enigan, Arare, which means likewise 'To Harrow up, or Stir up the Land.' This is a very probable conjecture; and if so, perhaps Herian and Hergan must be referred to the same idea. This point cannot be decided, unless by passages, which would unfold the peculiar turn of meaning annexed to these words, denoting Honour or Respect *.

HARRIE

^{*} As the following terms belong to the Element 'R, and are not directly connected with the spirit of the discussion, they are inserted in a Note. In Saxon, Here-Berga means "Exercitus mansio, statio militaris, tentorium, castrum," says Lye; who adds, "Unde Chaucero, Herborow, Mansio, Diversorium: et recentior nostra Harbour." Under the English word Harbour, the Etymologists produce the parallel terms in other Languages, as the Belgic Herberghe, the German Herberg, the French Auberge, the Spanish Alvergue, and the Italian Albergo. The Etymologists derive these words from Her, (Germ.) Huc, or Here, Exercitus, and Bergen, Tegere. These terms, I think, all belong to each other, and they are derived from Here and Bergen. Harbinger the Etymologists have rightly supposed to be quasi Herberger, "qui alicui "de Hospitio prospicit." Herberg, in German, is "An Inu;—Your Lodging, "Harbour, shelter, dwelling-place; der die Herberge zu bestellen voraus gesandt "wird,

HARRIE and HARROW are terms used in old English to express various degrees of Disturbance—Annoyance, &c. HARRY occurs in Shakspeare. Cleopatra says of the Messenger,

"I repent me much,
"That I so HARRIED him." (Ant. and Cleop. A. III. S. 3.)

On which Mr. Steevens observes, "To HARRY is to Use roughly. "I meet with the word in The Downfal of Robert Earl of Hun-"tingdon, 1601.

" Will HARRY me about instead of her."

And Mr. Malone adds, "Minsheu in his Dict. 1617, explains the "word thus. 'To Turmoile or Vexe.' Cole in his English "Dict. 1676, interprets Harried by the word Pulled; and in "the sense of Pulled and lugged about, I believe the word was "used by Shakespeare. See the marginal direction in p. 481. "In a kindred sense it is used in the old translation of Plutarch; "'Pyrrhus seeing his people thus troubled, and Harried to and "fro.'" We perceive how the interpretations of Minsheu and Cole,

[&]quot;wird, a Harbinger," as my Lexicographer explains it. The word HAUBERK, with its parallel terms, might be the same as HerBerga, and mean 'A Covering for Soldiers.' The Etymologists produce the parallel terms to Hawberk, as Haubert, Haubergeon, (Fr.) Usbergo, (Ital.) and Halsberg, (Belgic.) If the Belgic Halsberg belongs to these terms, which is extremely probable; then the Etymologists are right in supposing, that they are derived from Hals, Collum, and Bergen, Tegere. Arbour may belong to Arbor, the Tree, as some imagine, "Pergula Arborea," Arboretum; though others think, that it belongs to Herberg, Harbour, &c.

I cannot quit the term Here, "Exercitus, Turma, Cohors," and its derivatives, without remarking on the word preceding this in my Saxon Dictionary,—Here-Dracan, "Militares Serpentes, sagittæ," as they are explained by Lye. Darts, we see, are called 'Military Dragons,' which we instantly perceive to be derived from their property of Piercing the skin. I shall shew, that Dart and Draco, Dragon, belong to each other, and to the same idea of Thrusting—Striking, &c. &c. In the Eumenides, Opic is applied to a Dart, by the same metaphor, Πτινοι αργιστι ΟΦΙΝ. (*). 181.) It is curious, that Bochart attributes a fable, in the Adventures of Cadmus, to a confusion arising from this metaphor. He supposes, that the Serpent's Teeth, in the story of this personage, meant only Darts. "Phœniciâ linguâ, quæ partim fuit Syra, partim fuit "Hebraica, "Ur "SNI, NCS, "Dentes serpentis etiam erant æreæ cuspides, quali-" bus primus in Græcia Cadmus armavit milites suos." (Geograph. Sac. p. 447.)

Cole, Turmoil, Vex, and Pull, and the use of the word in "HARRIED to and fro," agree with the metaphor annexed to the action of Harrowing the Ground. Let us mark how words under different Elements, derived from the same idea, perform the same office. I shall shew that Turmoil and Trouble belong to Turma and Turba, and are derived from the metaphorical application of the Turr, if I may so express it, or Dirt in a state of Agitation. All agree, that Tumultus belongs to Tumulus, the Heap of Dirt. Skinner, in the same column with Harry, has the phrase "A See HARR," which is a Lincolnshire term, as he says, for "Tempestas à mari ingruens;" and he derives it either from the Saxon Harn, Flustrum, Æstus, or from Harry. They all, we see, belong to each other; and the n in Harn presents to us a similar form, as Orino, (Opon, Excito,) which is derived from Oro, (Oes, Excito.) John Florio explains the Italian Tartassare by "To rib-baste, to bang, to tugge, to hale, to HARRIE," as Mr. Malone has observed in his Appendix, pag. 668. strongest sense annexed to these words is expressed in old English by the word Harrow, when it is applied to the Decastation of the powers of Darkness by Christ. Christ is said to HARROW Hell. The Commentators on Shakspeare have quoted this expression, so common to our ancient Writers, on the following passage in Hamlet.

" Born. Looks it not like the King? Mark is, Horatio.

On which Mr. Steevens has remarked, "To Harnow is to "conquer, to subdue. The word is of Saxon origin. So in the "old bl. l. romance of Syr Eglamoure of Arrays.

In the passage of Hamlet, Hannow is a metaphorical use of Hannow, as applied to the Operation on the Ground; nor is in necessary

[&]quot; Her. Most like :-- it Harrows me with fear and wonder." (A.L. S.1)

[&]quot; He sauce by him that Harrywan Hall."

necessary to refer us to a Saxon origin, any more than in the speech of the Ghost.

" I could a tale unfold, whose lightest word

" Would HARROW up thy soul."

The Saxon word and the English word, as we have seen, are the same, and are used in a similar sense. Skinner quotes, in an Appendix Vocabulary of Ancient Words, the expression "By "him, that Harrowed Hell, (i. e.) per Christum," and justly refers it to the Saxon Hergian, Vastare. The familiarity of this expression arose from one of the ancient Mysteries, which was called the Harrowing of Hell. The representation of which is, "Christ entering Hell, triumphantly," says Mr. Malone, "delivering our first parents, and the most sacred characters of the Old and New Testament, from the dominion of Satan, and conveying them into paradise." (See Historical Account of the Stage, p. 14.)

We have seen, that Skinner, under Harrass, refers us to Hurry and Harrie. The term Hurry is another form of these words, and has a less violent meaning. In the phrase Hurry-Scurry, the word is used in a stronger sense; and Junius explains Hurry by "Violenter Disjicere, raptim propellere," who reminds us only of the Teutonic Huri, the "interjectio festinantis, quod loquitur Auriga "equis, quando pellit currum, vel redam, vel hujusmodi." Skinner however justly refers it to the race of words which we have just discussed, Hergian, Vastare, &c., and the French Ahurir, which is another of these terms. My Lexicographer explains Ahurir by "To Surprise, to Astonish, to Maze, to Tease." In the Poems attributed to Rowley, Harrie is used in its gentler sense of Hurry, and its stronger sense of Harrow. In the Tragedy of Ella we have,

[&]quot;As Elynour bie the green lesselle was syttynge,

[&]quot; As from the sones hete she HARRIED,

[&]quot;She sayde, as her whytte hondes whyte hosen was knyttynge,

[&]quot;Whatte pleasure ytt ys to be married." (* 208, &c.)

Again in the same play it is used for HARROW.

"O! didst thou see mie breastis troublous state,

"Theere love doth HARRIE up my joie and ethe." (*. 1039, &c.)

Dean Milles explains it here by Tear up. In the Englysh Metamorphosis, the word is used, in its genuine sense of HARROWING or Tearing up the Ground, and the objects upon it. The Giant Knight is thus described:

"He tore a ragged Mountayne from the Grounde,

"HABBIED uppe noddynge forrests to the skie." (*.81-2.)

Chatterton explains HARRIED by Tost. We perceive, that the word is adopted in this passage with most singular force and propriety.

We shall now understand, that the Dog called the HARRIER is the Animal, which HARRIES up—Hunts up or Pursues other Animals, &c. Nathan Bailey derives it from the French Harrier, To Hurry. Skinner, under HARIER, says, "Nomen canis, Ridero "Ladon, credo potius Lagon, Gr. Aayuuv, (i. e.) Leporum In-" sectator, v. Hare." This would lead us to suppose, that he imagined Harrier to be derived from Hare, and to signify, 'The The term HARE belongs to this race of ' follower of Hares.' words, and means 'The animal, which Hurries along with a fearful ' trepidating motion.' HARE occurs in the Saxon Hara, the Danish Hare, the Belgic, the German, and the French Hase, and the Arabic Hazaz. We perceive in Hase the form 'S of our Ele-Junius derives these words from Har, Pilus, or Hair, because, as Pliny says, "Villosissimum animalium Lepus." This Lexicographer records likewise the term Auroi, (Augoi,) in Suidas, for Hares, or harpwor. I have added, in my interpretation of HARE, the idea of the Fearful-trepidating Motion, as in Skinner we have next to this term HARE, the verb To HARE, which he explains by " Perterrefacere, consternare, metu percellere;" and which he derives from the race of words now under discussion, the French Harier, Vexare, and the Saxon Hergian, Vastare. Skinner does not refer the verb and the substantive to each other; and Junius, in the next article to Hare, which is Hare-brained, seems to doubt, whether this expression and the phrase 'As mad as a March 'Hare,' do not belong to the Teutonic Hader, Haer, Lis, contentio. We may perceive, by these phrases, that the idea of the Hare is connected with the sense of Hurry, in its more intensive meaning of Agitation—Trepidation. Skinner refers Hare-brained to the verb 'To Hare.'—The Arabic term, to which Skinner has alluded as the name of a Hare, is, I believe, jack Ajooz, to which Mr. Richardson has affixed sixty-seven meanings, all apparently different from each other. I have produced this word on a former occasion.

The ancient French word HARO, which denotes 'A Hue 'and Cry, to beg assistance,' belongs to these words HARRIE and HARROW, &c., and denotes the Noise made under circumstances of violent Disturbance-Agitation, the cry which is to HARRY up—to Raise and alarm the Country. The Etymologists produce terms denoting a Cry, as Hareet, Clamat, Haremees, Clamamus, Haren, Crier, which belong to the same idea.—The word Herald, Fæcialis, caduceator, and its parallel terms Herault, Heraut, (Fr.) Araldo, (Ital.) Heraldo, (Span.) Herold, (Teut.) have been derived by the Etymologists from the Saxon Here, Exercitus, and Held, Heros,—from the Belgic Herr-Alt, Senator seu Senior Exercitûs,—from Here, Exercitus, and Ald, Servus, or from Haren, Crier, and Alt, Nobilis, q. d. Praco Nobilis;—"Vox Fran-"cica et primigenia est, Hero vel Haro, Gloss. Boxh. Fora-Haro, " Præco," says Wachter. The Reader must form his own judgment on the matter. I cannot find, in the French Etymologists, who have been most ample on this subject, that the original nature of the office is sufficiently understood. Whatever be the origin of this word, we must refer to it the familiar Saxon name Harold.

The succeeding word in Junius to Harrie and Harrow, is HARSH, which we shall understand to belong to the metaphor of the Herse or Harrow. The Etymologists produce the Danish Harsh, Rancidus; the Belgic Heersch, Imperiosus; the Islandic Herskar, Severus, sævus, nocens; the Spanish Arisco, Asper; the Flemish Hersch, and the Saxon Has, Raucus. All these terms belong to the same idea. Skinner derives HARSH from Herbisch, Subasper, or from the Welsh Garro, Asper; and Junius seems to refer it to Barsch, (Belg.) Burrasca, (Ital.) &c. Meric Casaubon derives it from Engos, siccus. HARD is, I believe, only another form of HARSH. We might have supposed, that HARD was derived from the EARTH, under the idea of the Solid Dirt; yet I imagine, on duly considering the words connected with HARD. that it must be referred to the train of ideas now before us. The Etymologists refer us to the parallel terms to be found in other Languages, as the Saxon Heard, the Gothic Hardu, the Danish Haard, the Belgic Herd, the German Hart, the Runic Hard, which they derive from the Latin Arduus, or the Greek Καρτερος. Skinner, however, adds, "Mallem ab a priv. et ρεω, q. d. " Αρυτος, quæ enim dura sunt non diffluunt. Sed nec huic pro "Etimo fido." The Saxon HEARD seems to be employed in its original sense in the compound HEARD-Heawa, Scalprum, the Sharp or HARD-Hewer. In German, HART signifies HARD or 'Solid,' as in English; yet my Lexicographer explains HARTE Kalte by "a Sharp, Severe, Biting, Nipping, Searching, Tickling Cold;" where terms are employed, which lead us to the Metaphor which I have supposed. He explains, likewise, "HART mit einem verfahren, "To treat one HARDly, HARSHly, roughly, sharply," &c. short, we cannot doubt that HARSH and HARD belong to each other; and in Harsh, we see the true—original idea, without the notion of Solidity. In the column preceding that in my German Dictionary, where HARSCH and HART are found, we have HARKE, "a Rake,"

"a Rake," and HARKEN, "To rake, or HARROW." In the same column we have HASCHEN, "To catch, cage, attack, apprehend, "lay hold on;" where, in the explanatory word Catch, we see the idea of 'Vellication, Plucking up or away,' which I have supposed to be attached to this race of words. I shall shew in another place, that Carpo and Capio belong to Scrape. In the same column we have HARZ, "Hard Rosin," as my Lexicographer explains it; where HARZ belongs to HART, HARD, Solid.

The English word HARDY, "Audax, animosus," &c., and its parallel terms, must be referred to this race of words, which denote Impetuous motion—Turbulence and Violence of action. phrase Fool-HARDY, we see the term in its strong sense. The Etymologists record the parallel words, as the French Hardi, the Italian Ardito, the Runic Ardur, and the Greek Ardalous, Agoanous, which Hesychius interprets by Emaious. Skinner derives HARDY, &c. from the Latin Ardeo. The French Etymologists refer HARDI to the German Hart; and Wachter, the German Etymologist, gives us the same derivation, and reminds his Readers of the Welsh Hydr, which, as he says, "non solum fortem et stre-"nuum, sed etiam Audacem significat." Mr. Richards explains the Welsh Hydr by "Bold, stout, strong, valiant." Again, in Welsh we have Hyder, "Trust, confidence, boldness." HYDERU, "To be bold, to trust, to rely upon," and Hyderus, "Undaunted, "bold, confident." Let us note, as we pass on, the Latin Audax, where the r of our Element rD is lost, which must be referred to the same idea.—The Latin Ardeo is another term, denoting a state of Agitation or Irritation. The English Hor and the Latin Æstuo are derived from the same idea, and belong to the Radical rT, when the r has disappeared. Among other senses of Ardeo, in the ordinary Lexicons, we have "To be Tormented, Troubled.— "Podagræ doloribus Andere." I shall shew, that Trouble belongs to Turba—the Agitated Dirt of the Turf or Ground; and the

the first sense of its parallel French term Troubler in Deletanville's Dictionary, now before me, is "To Trouble, to defile, to "make thick or Muddy." The Etymologists derive Ardeo from Aridus and Areo. The id in Aridus seems to be only the addition for the adjective form from Areo, which belongs to the Era, (Eqa.,) the Ground. Ardelio, the Busybody, is rightly derived from Ardeo, "quod Ardore quodam omnia occipiat, nihil peragat."

With respect to the adjacent term Ardea; we cannot, I think, doubt, that Andea, and the Greek Enodies, (Epublics, Ardea,) belong to each other. The Etymologists derive Ardea from Arduus, " quod volando Ardua petat." Bochart thinks, that Epudios is quasi Ελωδίος, " φιληδεί γαρ τοις Ελωδεσί τοποις, Locis enim palustribus " delectatur." (Hieroz. Pars Poster. Lib. ii. c. 28. §. 1.) some, this bird is considered as an angry—Irritable bird; and hence, as it is supposed, the Hebrew name Anapha is derived, "quod facile ad iram concitetur." Under this notion, Ardea and Erodios, (Equilios,) might mean the same as Ardeo. Perhaps, however, this bird may be so called, because it delights in places abounding with Mud or EARTH. It is called Tarabusco, or Tarrabusa, says Martinius, "quasi Terram perforans. Rostro enim. "inserto palustri terræ vocem edit horribilem." To confirm this. I must add, that in Austria, as the same Writer observes, it is called Endbull, "quod Terræ inserto rostro sonet." The End in Endbull brings us at once to the spot, supposed in my Hypothesis, and to the Andea, and Enopios, (Equidios.) Many think, that Heron, Hern, &c., with their parallel terms, are derived from Erodios, (Ερωδίος.) Heron, Hern, &c. belong, I believe, to Arundo, because these birds delight in places abounding with Reeds. Martinius derives some of the names of this bird from Rohr, a Reed.

An adjacent word to Eropios, (Ερωδιος,) in the Greek Dictionaries, is Εκοταο, (Ερωταω, Interrogo, rogo,) which means literally

mode

literally 'To EARTH'-or, if we refer it to the form of the Element 'R, 'To ERA,' (Eqa, Eqa.) Most of the terms which signify to Enquire—Search—Ask, are derived from the idea of Routing into Dirt. Scrutor, To Scrutinise, is taken, we know, from Scruta, Eruere; - Rimor, To Search, means to Rout into Chinks, Crevices, &c., and belongs to the Metaphor of Rimari Terram rastris. Ask is attached to our Element ^rS, ^rT, ^S, ^T. The Os, Ot, in Er {os, Ot-os, (Ερως, Ερωτος,) are terminations only, derived from the analogy of the Language; and this would induce us to refer En=otao, (Epwraw,) to the Radical form 'R, as in Enao, (Εραω.) The term Ereo, (Ερεω, Interrogo,) must be added to these words, when the sound of r is lost. Another Greek word for Enquire or Search, is derived from Seeking for Metals, Metalleuo, To Metal, if I may so express it, To Search for Metals, by Digging into the Earth, (Μεταλλευω, Metalla Eruo;—Scrutor et Investigo, Μεταλλαω, Scrutor.) I shall shew, that Search and Scrutor belong to Scratch, and that they are all derived from operations on the Creat, (Celtic,) the Ground. I shall shew, moreover, that Rogo belongs to Rout, under the form RG, with the breathing after the R; unless we suppose, that in the original form, the breathing was before the R, as in the Saxon HRUTAN, To 'Rour; Stertere, Ronchisare.

In the same opening of my Dictionary, in which Erotao, (Ερωταω,) is, we have Erros, (Ερρωος, Aper, Aries,) which means the Router, under another idea, as relating to a Violent action of Annoyance.—The term directly adjacent to Erotao, (Ερωταω,) is Eros, Erotos, (Ερως, ωτος, Amor; quo Prosequimur aliquem,) which belongs, as we have seen, to the idea of Searching after—Longing for, &c. &c., and is directly attached to Erao, (Εραω, Amo, Amore Prosequor,) derived from the form Era, (Εραω, Terra.) Let us mark the explanatory Latin term Prosequor, in the phrase Amore Prosequi, and remember another

mode of using it, Odio Prosequi; and we shall see, how the metaphor belonging to Prosequor, which is similar to that in the race of words now before us, is at once applied to Love, and to actions of Annoyance. Sequor, in one sense, says R. Ainsworth, is "To "Love," &c.; where we have the same metaphorical meaning of ". To Seek for," which I have supposed to exist in Erro, (Equil.) I shall shew, that Sequor and Seek are only different forms of each other, and that they both belong to Search, Scratch, &c.—The Greek Eurisko, (Evento, Invenio, Investigando et Inquirendo,) is attached to the same idea; and we are to decide on the modus concipiendi, whether it should be referred to the form of the Element 'RT, 'RS, &c., or to 'R, &c. as in Euron, (Eugov.) Latin h=Ortor, To ex-hOrt, must be added to this race of words, under the idea of Stirring Up—Exciting, &c. That h-ORT-or is derived from the EARTH, we shall little doubt, when we call to mind a word under the same form, h-ORT-us, The piece of EARTH, denominated a g-Arden, where we are directly brought to the original Spot. The Etymologists derive Hortor from Ope, Perf. Pass. Now, Excito; which Greek term must be considered to belong to the same idea, either as attached to the Radical 'RT, Martinius derives ORTOS, (OPTOS, Ara, Cypriis,) from Open, "tanquam in altum excitata," which we now see is the EARTH, either as the raised EARTH, or as that, which lies low on the We see how Ara, the low altar, belongs to Aro, and they are both taken from the E_{RA} , $(E_{\rho\alpha}$,) under the form ${}^{\Lambda}R$. the Greek Koni=Ortos, (Konoptos, Pulvis, Pulvis excitatus,) we see the ORT connected with its original idea.

I shall now examine certain words, attached to our Element, which express Contention—Strife—Anger; such as the Greek Eretho, Erethizo, Eris, (Ερεθω, Lacesso, Irrito, Provoco, Ερεθιζω, Irrito, Lacesso, Ερις, Contentio,) which convey a similar idea to Harrow, Harass, Herser, Harasser, and which belong, as I imagine, to the

same metaphor of Stirring up the ERA, (Eqa, Terra,) or EARTH. Perhaps the Reader will be inclined to imagine, that the Greek words beginning with EP, ER, directly belong to ERA, (Eea); and I shall leave him to decide, whether the Is in Eneis, and the th or eth in these words, be an organical addition to the R, or a significant addition arising from the analogy of the Language, as the izo in Ereth-izo undoubtedly is. In the same column of my Greek Vocabulary, where these words are found, I see likewise Ergon, (Εργον, Opus,-Labor in Agro,) and Erdo, (Ερδω, Facio,) which I have before referred to the same Spot. We may remark, that the parallel English term w=ORK, which under other forms we find to be w=ORHTE, w=YRTHA, &c., has a similar sense to Eretho, (Ερεθω,) in the phrases 'To Work up a Person'—'To 'Work him well,' &c. Let us mark the explanatory term IRRITO, which, as I before observed, if it be not considered as belonging to the Element 'RT, with the breathing before the R, must be referred to the same Element with the breathing after it,—to Rout, &c. &c. In the same column of my Greek Vocabulary, I find EREIDO, (Epesow, Figo, firmo, fulcio, Trudo, Ingruo, Pugno; pass. etiam Fundi, sc. Humi, Sterni,) Ereiko, or Eriko. (Epenu, Frango, Confringo, Confundo, Scindo, Epinu, Frango, Scindo,) which mean To Era, (Eqa,) or Earth, or be Earthed— To be thrown upon the EARTH—To Stir up, Break up the EARTH, &c. with the idea of a violent motion, annexed to those actions. In the succeeding column I find Eresso, or Eretto, (Eperow, vel Ερεττω, Remigo; - Impello,) and Erescheleo, (Ερεσχελεω, Cavillor, scommate illudo, ludificor; -- Contendo, Rixo.) We shall not wonder to find, that the term Eresso or Eretto, (Ερεσσω, Ερεττω,) 'To Row,' was connected with a race of words, which denoted in their original sense, To Era, (Equ.,) To Earth, or 'To Stir 'up the EARTH,' when we know, that 'To Plough the Main' is the most familiar of our metaphors. Let us mark the explanatory

term Rixo, and the English Row, in Belgic Roeden, with its kindred word Rudder, where we have the form RS, when the breathing before the R is lost. If we consider the esso and etto, in Er=]esso, etto, as additions from the construction of the Language, the Er might be regarded, as belonging to Oar, which certainly relates to the Ground, or Era, (Epa,) under a similar idea. In the same page of my Greek Vocabulary, where Eresso, (Epsoow,) is found, we have other terms, which directly bring us to the spot, supposed in my Hypothesis. Eritheuo, (Epsowa, Litigo, Contendo;—Lanam tracto;—Laboro; Servio,) not only signifies to Contend, but to Labour; and Erithos, (Epsoo, Lanificus, textor, vel textrix; Agricola, Messor, minister, famulus,) which belongs to it, actually denotes a Labourer on the Ground or Earth.

In the succeeding column of my Greek Dictionary, I find Erkites, (Equity, Servus,) where we have the form 'RK. Hence we have up-EERETes, and up-EERETeo, (Tangerns, Minister, Famulus, Taperen, Ministro, Inservio, Operam alicui navo,) words relating to Labour-Servitude. These terms the Etymologists derive from ERETes, (Egerns, Remex.) the Rower: We may observe, however, that the action of Rowing is not sufficiently familiar, to afford a term for a Labourer or Servant, in general; and therefore we must recur to the more original idea annexed to the word. Perhaps the sense of Exitheuo, (Epileuw, Lanam tracto,) as relating to an operation with Wool, is not derived from the notion of Labour, but from that of Pulling or Teazing Wool, which brings us to the original idea of Irritation, Vellication, &c. Adjacent to ERITHEUO, (Epileua,) . I find ERIZO, (Epila, contendo, certo,-Exaspero,) which belongs to Eris, Eridos, (Eug, Epidos, Contentio); and we now fully understand their relation to each other, which every view of the subject tends to confirm. As we see the ideas of Contention, and the Cultivation of Land by Ploughing. Harrowing,

land,

Harrowing, &c. &c. to be combined in ERITHEUO and ERITHOS, (Εριθευα, Contendo, Laboro, Εριθος, Agricola,) we shall not wonder at this origin of Eris, (Eos); yet we do not want evidence of another kind to shew, that this word bore a similar meaning to the double sense conveyed by its adjacent terms. It should seem, from a curious passage in the commencement of the Egya xau Huspan of Hesiod, that Eris, (Epis,) had not lost its original idea, as relating to the Labours of Agriculture. To the ERITHOS, (Equilios, Agricola,) belong probably the Latin Erus, Servus, and ERITUdo, Servitudo. Some derive these words from Egos, "unde," says Martinius, " E19890; δουλεια," and others from E19ω, Necto. Arabic — Herk, "Burning,"—Herek, "Fire.—Rage," must be referred probably to this race of words. In the preceding column of Mr. Richardson's Dictionary, I find جرص Hers, "Splitting, Tear-"ing."—Hyrs, "Desiring greatly," and בرن HERS, "Rough "Ground," where we are directly brought to the Spot, supposed in my Hypothesis. Let us mark the explanatory word Rage, where the breathing before the R is lost.

The English term $w={}^{\Lambda}RATH$, $w={}^{\Lambda}ROTH$, must be referred to the race of words now before us; and we shall instantly grant that the sense annexed to this word would be most naturally and obviously derived from the idea of Stirring up—Exciting—Agitating. The form w=RATH is the same as $w={}^{\Lambda}ROUGHT$, belonging to w=ORK; and it contains the same idea as this word, in the phrase 'w=ORK'D or 'w=ROUGHT up into a Passion.' The parallels to Wrath, produced by the Etymologists, are the Saxon Wrath, Wrathe, the Danish Vrede, Vred, the Belgic Wreed; and the Etymologists refer us to Rethos, (Pslos, Facies,) ERETHO, (Eschw.) and Wrythan, (Sax.) Torquere. We shall now understand, that $w={}^{\Lambda}RYTHan$, Torquere, to which belong our terms Writhe and Wreath, must be referred likewise to this race of words. Thus we see, how $w-{}^{\Lambda}REATH$, the Chaplet or Gar-

land, may be attached to a term, expressing the most violent action of Agitation; and how such terms may be derived from w-ARITHING up or about, if I may so express it, or AROUTING up the Earth. We know, that Torquis belongs to Torqueo, Torsi, from which the most forcible of our terms to express an action of Violent Agitation is derived—Torture. I shall shew in a future Volume, that Torqueo, Torsi, belongs to the Element TRS, &c. under a similar idea, and that it must be referred to such words as Dirt, Trace, Track, &c. &c. Robert Ainsworth explains Torqueo by "To WRITHE, WREATHE, to twist .- To wind, or whirl "about;" where, in the sense of 'Whirling about,' or Stirring about, we have the genuine idea.—This Lexicographer, under the sense of "To bend, or bow; to Turn about," produces the following passage from Cicero, "Versare suam naturam, atque huc, et illuc " Torquere et flectere;" where we see that Torquere is used as a synonymous term to v=Ensare, which I have shewn to be derived from Stirring up the EARTH. I shall examine more particularly, in a future page, the words in English-Saxon, &c., which begin with V, W, &c. In the Latin IrA, we have the form AR, and in Irascor and Iratus" we see the sc and t, as derived from the construction of the Language. In Saxon, Irra, or Yrra, is "Ire, " Ira," where we have the Radical 'R; but in the succeeding term in Lye's Saxon Dictionary, Insian or Ynsian, sometimes written Ionsian, "Irasci, Irritare, Lacessere," we again see the form ARS. The succeeding term in my Saxon Dictionary to Yrsian, Irasci; -- Irritare, Yrsinga, Iracunde, Yrsung, Furor, Ira, is "YRTH, the EARTH. Fundus arabilis, Ager novalis," which will decide, I imagine, our opinion on the origin of these words. Though Skinner has referred WRATH and WROTH to each other, yet by Junius they are placed in separate articles. The preceding term to Wroth, in the Lexicon of this latter writer, is WROOTE. "Suffodere,

"Suffodere, vel Subigere Humum Rostro," which belongs to 'Rout, 'Root up, &c. &c., where we see the original action, from which the metaphorical meaning of these words is taken.

The Greek Orge, (Opyg, Ira,) must be referred to this race of words, though it requires a more detailed explanation; as it appears to embrace two different ideas belonging to our Element. or rather it attaches to the idea of a certain action the consequence of that action. ORGE, (Opyn,) is explained in Hederic's Vocabulary by "Ira, Iracundia; -- Ingenium, quo quis præditus; --" Mores, Studium; -- Superbia, arrogantia; -- Sævitia, Acrior quis-"que et vehementior impetus et ardor." In some of the senses of this word we plainly perceive, as we should imagine, the idea of Excitement or Irritation, in its strongest sense. "Acrior quisque "et vehementior impetus et Ardor;" and yet in others we seem to perceive the Genius-Nature or Quality of a thing, derived, as it might be, from the Nature or Quality of the Soil. All this will be reconciled, if we imagine, that both ideas are contained in ORGE, (Opyn,) or that the notion of Stirring up the Land is connected with the effect of that action in Cultivating it, or Improving the Quality of it. The term w=ORK will, I imagine, best lead us through the turns of meaning annexed to this term, and those which belong to it.—Thus, then, ORGE, (Ogyn,) as I suppose, is derived from the idea of the Ground, w=ORKed up, as we express it, into a state of Cultivation. The expression w=Orked up will lead us to the sense of Irritation conveyed by this term; and a Soil w=Orked up, for the purpose of acquiring a certain Nature or Quality, brings us at once to the sense of Nature—Quality— Genius, &c. The original meaning of these terms, as derived, according to my Hypothesis, from Natural productions, and the Ground, does not appear indeed in the term ORGE, (Opyn,) but it is directly expressed in the words belonging to it. Orgao relates to Natural productions swelling with juice, as it might be from the

the effects: of a Rich—Cultivated Soil; and Orgas absolutely signifies a Rich—Fertile Soil, (Ogyaw, Succo vel humore turgeo;—Venereâ cupiditate flagro, prurio, Ogyas, Terra pinguis, fertilis.)

Hence, we know, is derived the Medical term Orgasm, which has been judiciously adopted from a due impression of the peculiar sense, annexed to these words, to express Venereal Irritation as connected with the Natural quality of the subject, in which it exists. Now it is curious, that Orgasmos, and Okgazo, (Opymomos et Oppala,) are explained in some of their senses by the Lexicographers after a manner, which we cannot so well express as by the phrase w=ORK up. ORGasmos, (Οργασμος,) is explained thus in Hederic's Vocabulary. " Præparatio, Emollitio, Subactio; "(2.) Irritatio, Concitatio; (3.) Irruendi impetus;" and ORGAZO, (OpyaZa,) is interpreted by "Instigo, Incito; -- Mollio, Subigo, Macero, "Contempero." We see, that the sense of Praparatio, Emollitio, Subactio, and Mollio, Subigo, Macero, Contempero, precisely corresponds with the sense of w=ORK up; and what is still more curious, in the very instance produced by this Lexicographer, under Orgazo, (Opyazo,) to exemplify the sense of Mollio, &c., the term is actually applied to the w=Orking up of Dirt, IInhor-Ocyasor, Pelon Orgason, "w=Ork up the Clay, or Dirt." We have seen, under the Saxon w=IRKan, the following phrase produced by Lye, "He w=ORHTe fenn of his spatle, Elaboravit lutum ex "sputo, 'He made or w=ORKed up clay of the spittle.'" sense of Subigo-Mollio, annexed to the above Greek word, is indeed curious; and we may observe, that without the intermediate idea, which I have proposed, the sense of Subigo-Mollio, would not only be altogether foreign to that of Instigo, but even totally opposite to it. We now shall understand, how Ergon, and Ergazomai, (Egyor, Opus-Labor in agro, Egyazouai, Opus Facio. &c.—Colo agrum,) are only different forms of Orge. Ongas, and Ongazo, (Opya, Opyas, Opyaso.) Let us mark the explanatory planatory term Subigo, from Ago, which I shall shew to belong to the form Ag-er, under the same notion. Whatever be the origin of Ago, we know, that Subigo contains this union of ideas, supposed in my Hypothesis; namely, that of Cultivating of Land, and of Macerating—Softening—Breaking, &c. R. Ainsworth explains Subigo in one sense by "To Break, Ear, Till;" and in the next, by "To Beat, or Stamp—Ante Jovem nulli Subigebant area "coloni.—Subigere mortario farinam.

In the Greek Origia, we see the 'Rites peculiar to each Deity,' with the idea of Irritation or Commotion connected with it; and hence it is peculiarly applied to the Rites of Bacchus, or, as we express it, by a term derived from it, the Orgies of Bacchus, (Ogya, Orgia, proprie Sacra Bacchi; —Sacra aliorum Deorum; — Mysteria, Sacra arcaniora.) The Greek Orkia, (Opaus,) has sometimes the same meaning with Orgia, (Οργια,) as in Orpheus Μετα. J'OPKIA μυσταις, &c.—OPKIA τ' Ιδαιών, &c.—OPKIA φριντα θεών, &c: (Argonaut. 11. 25. 465, &c.) This would lead us to suppose, that Orkion, and Orkos, (Opnior, Proprie victima feederis sanciendi ergo cæsa; — Fædus jurejurando sancitum; — Jusjurandum. Opnog, Jusiurandum, Juramentum, Sacramentum, Fœdus, Religio,) originally related to the Orkia, Orgia, (Opera, Oppra,) the Religious Rites, and afterwards to the solemn Pledges or Oaths, attached to those Rites. I have however given on another occasion a different origin of Orkos, (Oexos,) and have supposed, that it belongs to a Race of words, denoting 'Enclosures,' or Places of Security, as ERKOS, (Epros, Septum,) &c.; so that ORKOS, (Opros,) would mean the Pledge of Security for the performance of any thing. In the same column with ORKOS, (Opxos,) in my Greek Vocabulary we have ORKane, (Ognavn, Septum,) the Enclosure. That these words all belong to each other, we shall, I trust, at once agree; yet it is not easy to adjust the precise notion, by which they are connected. The original idea annexed to Orkos, (Opeos,) may perhaps

perhaps be found in the sense of Orkizo, (Opaico, Adjuro,) To Adjure—Conjure—the term of Excitement to action by violent Imprecations or Curses, &c. In the term Ex=Orcise, we see the Violent action of Driving out or away by strong Adjurations. If Erkos, (Equos,) should denote the Enclosure; not simply as the Earth, but in a sense of Excitement, as of Driving out—away or off, &c., which I sometimes suspect; then we shall see how all these terms originally conveyed the idea of an action of Excitement. The further I proceed in Language, the more prevalent do I find this notion to be. I have conjectured, in a former page, that Orcheomai, (Oqxeomai,) relates to the Erkos, (Equos,) as denoting the Circular motion, which is extremely probable; yet I ought to suggest, that it may possibly refer only to the idea of Excitement, in the Motion of Dancing.

An adjacent word to ORGE, (Oppg,) in the Greek Vocabularies. is Organon, (Opyavor, Instrumentum, Fistula, Organum,) an Organ, or Instrument, by which any thing is w=Orked up or Put into action. Here the Etymologists refer us to Ergon, (Epyov,) as the origin of this word. The term ORGanon, (Oeyavov,) and its Derivatives, still preserve the idea of Excitement or Commotion, which is attached to their kindred words; and hence it seems particularly applied to these instruments, in which actions of Excitement or Commotion are to be found. Thus Organa denotes in an especial manner Water and Wind Instruments, ORGANA ad hauriendam aquam—Organum Pneumaticum, as the Musical Instrument, the Organ. In short, Organon, (Ogyanon,) seems to partake of the sense, belonging to a word under the same form, ORGAINO, (Opyawa, Irrito, Ira accendo; — Tumeo, Æstuo, Incitor.) The n, in Organ and Organic, is only an Organical addition to the G. Let us mark the term, which I have here purposely used. ORGANical, where we are again brought to the Pneumatic ORGAN of the Voice. It is marvellous to observe, how words continue to preserve a portion of their original idea, however various may be the purposes to which they are applied. In collecting under one view the above words, denoting Anger, Strife, &c., as WRATH, ORGE, (Off), &c., I do not mean to say, that they all directly belong to each other, as attached to the same series of terms; but I mean to assert, that they all belong to our Element AT, AG, under a similar train of ideas, such as I have unfolded in the preceding discussion.

Terms expressing actions of Force and Violence, as Breaking—Striking, Pushing, Pressing, &c., derived from the operation of Breaking up the Ground, the Era, (Eqa.) or Earth.

EREIDO. (Gr.) To Dash, clash, push, press hard or violently upon; To throw on the *Earth*.

EREIKO. (Greek,) To Break to pieces.

ARASSO, ARATTO, 'RASSO. (Gr.) To Strike violently, to Break to pieces.

ERECHTHEO, ORECHTHEO. (Gr.)
To throw about, to strike against, dash against.

*Rasso, *Regnuo. (Greek,)
To dash one thing against
another, To Break to pieces.

EREUGO, 'RUCTO. (Gr. Lat.)
To Break up, as wind from the stomach.

Aries, Hurdd, Urz, &c. (Lat. Celtic,) The Ram, Pusher, Striker.

HWRRDU—HYRTHU. (Welsh,)
To attack, thrust, push, drive.

Heurter, Urtare. (Fr. Ital.)
To Strike, Dash against.

HURT-HIT, OUTAO, OTHEO, Ico. (Eng. Gr. Latin,) To Strike, &c.

Ares. (Gr.) The God of War, the Dasher, Destroyer, &c.

URGEO, URGE. (Lat. Eng.) To Push, press upon.

Arguo—Argue. (Latin, Eng.)
To Urge or press by words,
&c.

AIRGaim, AIRGim. (Gal.) To Plunder, spoil, Urge.

WE have seen the terms expressing actions of Violence, as EREIDO, (Epsidu, Trudo; Ingruo, &c.) EREIKO, ERIKO, (Epsidu, Frango, Confringo, Confundo, Scindo, Epine, Frango; Scindo.) While I am examining these words, I cast my eyes on Erechtho, (Eperflu, Scindo, Agito, Jacto,) which belongs to the same race. ORECHTHEO, (Opex Hew, Cupio, desidero; Sternor, Mactor; dicitur etiam de sonitu fluctuum ad littus allisorum,) is another form of ERECHTHO, (Ερεχθω.) It is well known, that the proper sense of ORECHTHeo, (Ορεχθεω,) is that of Dashing any thing against the Ground or EARTH with noise; or, in other words, that it signifies " Το ΕΑRTH," if I may so say, just as Εδαφιζω, Solo allido, belongs to Εδαφος, Solum. We all remember the saying preserved by Athenæus, " Μυκαισι δ' ωρεχθει το λαινον πεδον, Fungis allisis resona-" bat lapideum solum." It is not necessary to enquire about the precise meaning of this sentence: It is enough to see the application of the word, and to be aware of the fact, which Casaubon has noticed, "Id verbum," Ορεχθεω, " de sono rei in Solum projectæ "dici norunt eruditi." (Athen. lib. ii. c. 19.) The term ORECH-THEO, (Ορεχθεώ,) in its gentler sense of Cupio, Desidero, brings us to a term before produced, OREGO, (Opeyo, vel pedes vel manus extendo, Porrigo, præbeo, tensa manu præbeo; Opeyouas, Porrigor, extendor; in Med. Appeto, Cupio, porrectis manibus Capto, item commoveor lætitia); where we see likewise the gentler action conveyed by these words. Yet we perceive, in the sense of "Commo-"veor," and that of "Appeto," the idea of Agitation-Excitement, &c., and likewise in the sense of "Porrectis manibus Capto." If the first sense of the word had been expressed by 'Jacto, Moveo, ut manus ' pedes,' we should have seen the primitive meaning. (Opyvia, Spatium interjectum vel inter pedes divaricantes, vel ambas manu expansas-Ulna;-Passus,) the Step, we are brought to the original spot, from which I suppose these words to be derived.

We perceive, likewise, how the idea of Agitation or Excitement, annexed to Orego, (Ορεγω,) connects that word with Orge, Orgazo, &c. (Οργη, Οργαζω, &c.) before produced. The English 'Retch, 'Reach, belong to Orego, (Ορεγω,) as I shew in a future page. In Greek we have Arrichasthai, (Αρριχασθαι, manibus et pedibus sursum tendere); and the succeeding word to this, in my Greek Vocabulary, is Arrichos, (Αρριχος, Cophinus, vas vimineus,) where we have the Enclosure, as in Arkus, Erkos, (Αρκυς, Rete, Ερκος, Septum;—Ερκη, Retia,) Arca, &c. In Hebrew, yny ORG, or HRG, means "To Stretch out, extend," which Mr. Parkhurst refers to Orego, and Orgao, (Ορεγω, Οργαω.) In Hebrew, likewise, yn IKG, or IKH, means "To Strain, Stretch, distend," as Mr. Parkhurst explains it; but from what idea it is derived, I cannot decide. In Welsh, Hercyd means "To Reach, to extend," as Mr. Richards explains it.

The Greek Arasso, Aratto, (Αρασσω, Αραττω, Illido, Pulso,) is another of these terms, which express actions of Violence; and hence we are brought to RASSO, (Pasou, Allido, Collido, deturbo,) where we again see how the form ARS passes into the form RS. when the breathing before the R is lost. Hence we come to the terms Regnuo, Regnumi, (Pηγνυω, Ρηγνυμι, Frango, Rumpo, Scindo,) and a great race of words, under the form RS, RG, &c., which will be fully considered in a separate portion of my Work. The term in my Vocabulary, adjacent to Arasso, Aratto, (Αρασσω, Αραττω,) is Aratroforeo, (Αρατροφορέω, Aratrum fero,) where, in Arotron, or AROTron, (Aporpos,) we are directly brought to the ERA, (Eqa.,) or In the preceding column we have ARADOS, (Apados, Pulsus cordis post vehemens exercitium,) which is placed in great letters, as a Root, but which, as we now see, belongs to ARATTO. (Apattu, Pulso.) An adjacent term to Arados, (Apados,) is an acknowledged derivative from this verb, as Aragmos, (Apayuos, Collisio, Pulsatio.) In the same column with Arasso, (Aparra,)

we have Arachnes, (Apaxins, Araneus, Aranea,) the Spider, which belongs to the idea of Earthing, if I may so express it,—of Crawling upon, or Scraping about the Earth. The idea of Scraping or Scratching has been perpetually annexed to this animal. To the Spanish Arana, the Spider, belongs the verb Aranar, "To Scratch, to Scrape," &c. In the form Aranea, &c. we have the organical addition of N to Ar. In the same column of my Greek Vocabulary, where Arachnes, (Apaxins,) is, I find, belonging to our Element, Arakidna, (Apaxidia, Species plantæ,) and Arakton, (Apaxioi, Atramenti sutorii species.) Whether the Plant has any thing to do with the Spider, I cannot decide. Perhaps the term denoting a species of Blacking, may belong to the Black Dirt of the Earth*.

The

^{*} The form ERECHTHO, (Egexto, Scindo, Agito, Jacto,) will remind us of the proper name Erechtheus, (Equiton) which we shall see to be unequivocally connected with the ERA, (Eea,) or EARTH, though we shall not be able to unravel the facts, with which Mythology has involved his history. He is supposed by some to have first introduced at Eleusis the Mysteries of Ceres—the Goddess of the EARTH. He is considered, likewise, as sprung from the EARTH, and is called Ericthonics, or ERICTH= Cthonios, (Egyz60005,) in which term Cthon, (x600,) the Ground, is acknowledged to be a part of its composition; however idle and shocking the mythological origin of this word may be, as recorded by the Scholiast on Homer, (Il. B. y. 547.) He is supposed to have sacrificed a personage, called Othonia, or Chthonia; where we again see the Chthon, (XOur.) or Ground. The Athenians are called the ERECHTHEIDE, and perhaps their name of Autoxbons may be derived from this source. ERECHTHeus, or ERICHTH-Chthonios, belongs perhaps to $E_{RECHTHeo}$, $(E_{\ell i} \chi \theta_{io}, Agito,)$ and means the Stirrer up, or Plougher of the Ground, or EARTH; and he was probably considered as the first or principal person, who introduced among the Athenians improvements in Agriculture. The name ERISI-Chthon seems to be only another form of ERICHTH-Chthon, with another story annexed to him, which is still connected with the EARTH. The latter personage is supposed to be a Thessalian, the son of Triops, who derided the Goddess of the Earth, Ceres, and cut down her groves. Callimachus and Ovid have amply supplied us with the extraordinary narrative, which details the crime and the punishment of the son of Triops; and let us not fail to observe, that the name of the father Triops is likewise derived from the operations of Agriculture. Triops has the same meaning as the Trip in Trip-Tolemus. The Trip in this word belongs to the Trib in such terms as Tribo, (TeiBe,

'or

The Greek Ereido, (Epeido, Figo, Firmo, Fulcio, Trudo;-Ingruo, pugno; - pass. etiam Fundi, sc. humi, Sterni,) in the sense of Firmo, Fulcio, appears to have a different sense to that proposed in my Hypothesis, and to the other senses of the word; yet we are at once brought to the original spot in that meaning of the term, when it is explained by 'Fundi, sc. Humi, Sterni.' The genuine idea of the word is that of Dashing-Clashing-Striking-Pushing—Pressing any thing with force and violence, as at or on the Era, (Epa,) Earth—or Ground; or as the Earth is Struck-Pushed-Pressed upon, &c. by the Feet-of men and animals passing over it, or by Instruments in the Labour of Agriculture. Hence it is explained by the Lexicographers, Humi, Fundi, Sterni, 'To be EARTHED—To be as objects which are Struck-Pressed or Thrown on the EARTH.' It is brought to its original spot in such expressions as Ερεισατε δ'ιχνια γαιη. sense of Firmo, Fulcio, it means, when objects are 'Pressed vio-'lently and strongly against each other,' so as 'To be Supported, or ' Firm.' In the passage produced by the Lexicographers under the word; Ασπις αρ'ασπιδ' Ερειδε, κορυς κορυν, ανερα δ'ανηρ, (Il. 13. V. 131.) 'Shield, Clashed, Dashed-Struck or Pressed violently upon Shield,

(Τειβω, Tero,) relating to the operations on the Ground in Ploughing—Harrowing, Tribula, &c.; and the Tolem means the Ground. This form of Tellus appears in the Irish Talamh, "The Earth, Ground, Soil." To this same form for the Ground belongs the Greek Thalam-e, os, (Θαλαμα, Cubile ferarum, Θαλαμος, Cubiculum,) Thelumn-on, (Θιλυμος, Fundamentum,) &c. &c. To the form Tribula, which is a compound of the Elements TRB and BL, belong our terms Tribulation, Trouble, &c. &c.; and thus we see, that w=Ark, Dolor, and w=Ork, Solicitude, and Solicito, To Stir up the Land, Tribulation and Tribula, belong to each other, under different Elements, for the same feason. The Etymologists derive Tribula from Tero, which is extremely probable. I shall not stop to discuss this point on the present occasion; but shall only observe, that it is perfectly indifferent to the spirit of my Hypothesis, whether the Element TR or TRB supplies the first syllable in this word. I shall shew, in a future Volume, that Tero belongs to Terra, for the same reason.

or was Jammed close to Shield, Helmet to Helmet, Man to Man,' we see the idea of Support, or of Fulcio, Firmo, &c., as connected with the action of a Violent Pressure or Concussion. The word Pressure is a proper term on this occasion, since it gives us the idea of Fulcio—Firmo, as proceeding from an action of Violence. We shall own, that a word, which in its original sense signifies 'To Clash or Press with force and violence one object against 'another,' would be admirably applied to the Violent collision of Wrestlers. It is thus applied by Homer, when Achilles exhorts Ajax and Ulysses to desist from this exercise.

Mηκετ' ΕΡΕΙΔΕΣΘΟΝ, μηδε τριβεσθε κακοισι.
Ne amplius lucta obnitimini neque conterimini malis. (Il. τ. γ. 735.)

I shall shew, that the word Tribo, (TpBo, Tero,) and its explanatory term Tero, belong to the same spot, for the same reason, to Turf and Terra, &c. Let us mark the explanatory words Push—Press, which I shall likewise refer to the same Spot—to the Pedon, (Isdo.) I shall shew, that Clash belongs to the Clod, &c.—Dash to Dust, &c., and Strike, Trudo, to Dirt, &c.; to which we must refer Tread, Track, Trace, Thrust, Thresh, Dregs, Drag, &c. &c. The term Equoate, which is produced above, and which relates to Firmness, is adopted by the Poet to express the most Violent action of Pressure on the Ground or Earth. When the Ship Argo was for the first time to be launched into the sea, and by sticking in the sand had resisted the efforts of the Argonauts to move her, Orpheus exhorts them again to exert their strength, with this instruction for accomplishing their purpose.

Ειδ' αγε νυν στερροισιν υπο στερνοισι καλωας Βρισαθ' ομορροθεοντες, ΕΡΕΙΣΑΤΕ δ' ΙΧΝΙΑ ΓΑΙΗ, Ταρσοισιν ποδος ακρον υπερβληθην τανυσαντες Και χαροπον ποτι χευμα γεγηθοτες ελξατε νηα.

(Argonaut. v. 253, &c.) "Eia

"Eia age, nunc firmis sub præcordiis funes urgete impetu simul "facto, plantis imprimite terræ vestigia, extrema pedum ultra "modum extendentes, et feros in fluctus læti trahite navem."

To these terms, expressing Violent actions of Annoyance-Breaking-Striking-Pushing, &c. EREIDO, EREIKO, (Epsilou, Trudo, Ingruo, &c. &c.), we must refer the Latin Aries, Arietis, the Ram. In Greek, Erroos, (Eqquos, Aper, Aries,) means at once the Boar and the Ram, from the same idea; and Hesychius has recorded the term ARICHA, Αριχα, αρρεν προβατον, the Ram, which is another form of these words. I find in Lhuyd for ARIES, the Welsh Hurdh, the Armoric Urdh, Urz, and the Cornish Hordh. I find, in the Welsh Dictionary of Mr. Richards, HWRDD, "A Ram," "An Assault, Onset," &c. &c., and HWRDDU, and HYRTHU, "To "make an assault, or onset, to attack, to Thrust, to Push or "Drive forward." This is only another form of the Welsh ARDDU, "To plough." The Welsh Scholars will now understand the origin of another term in their Language, Horrio, "To Slander, To detract, to backbite, to traduce," which signifies, we see, to Hurt, and belongs to Hyrthu, and Hwrddu, in their metaphorical application. In Welsh, likewise, Hurtio means "To Stupify, to stound or stun, one; also, to be astonished, to "be in a dump," as Mr. Richards explains it, where we have another of these words.

We perceive, that the Welsh Hwrddu agrees exactly in sense with the Greek Ereido, (Epedos,—Trudo,—Ingruo, pugno;—Etiam Fundi, sc. humi, sterni.) These words will likewise suggest to us the French Heurter "To Hit, or strike upon, to run against, "to rush against, to jostle—Se Heurter, To Hit, knock, or dash one against another." The French Etymologists have understood the terms to which this word belongs. They have seen that Heurter has a similar sense to the Latin Arieto. "Quis proterve nostras ædes Arietat?—Heurter à la porte;" and they

they produce the Italian URTare, a word of the same meaning the Celtic Hwrdd, a Ram—the German Hurten, Trudere, impellere—the barbarous Latin word ORTare—the English word HURT, and the Latin URGEO. We now understand, that h=URT is to be referred to this race of words, and that h=1 is only another form of h=UrT, when the sound of r is lost. The English Etymologists, under Hurt, refer us to the Saxon Hyrt, Læsus, vulneratus; the French and Italian Heurter, Urtare; the Belgic Hurten, Horten, Pulsare; and the Latin Urgere, &c. From Horten, Junius properly derives the Belgic Hortig, Hurtig, 'Expeditus promptusque ad 'res gerendas;' and hence we have the German Huntig "Agile, "Active, Steady, &c. &c. In Arabic, هرس Heris, signifies "A contusion, a severe blow;" and in the same column of Mr. Richardson's Dictionary, we have هرز Herz, " A violent blow "or squeeze with the hand"—OF HERID, "Tearing;" and in the preceding column, we have ورج Herij, "Tumultuous, seditious, " destroying one another."

The Latin Urgeo, Ursi, must be referred to this race of words. It has been derived by some from Ergon, (Egyon); and by others from Orgao, (Ogyaw,) which are kindred terms. The Latin Urgeo is used in its original sense, when it is applied as in the following passage of Horace.

"Et tamen Unges
"Jampridem non tacta ligonibus arva, &c."

The Glossaries explain Urgeo by the Greek Epeigo, $(E\pi \epsilon i\gamma \omega)$, where in the Eigo we see a term belonging to the race of words before us, when the r is lost. The Ep belongs to the preposition Epi, $(E\pi i)$ There is another compound of the preposition Epi, $(E\pi i)$ and a term attached to the words now under discussion, Epereazo, $(E\pi \eta \rho \epsilon \alpha \zeta \omega)$, Noceo, injuriam facio;—Infesto, calumnior.) The Ereazo belongs to these words, denoting Violence of action—Annoyance, to Erizo, $(E\varphi i \zeta \omega)$, &c. relating to an action on the Era,

ERA, (Eqa.) If this be not the origin of the word, the Eper is another form of Uper, $(\Upsilon_{\pi \iota \varrho})$, Ubris, $(\Upsilon \beta_{\varrho \iota \varsigma})$, &c. &c. The E160 will remind us of our English word Egg, as in Egg on. The Saxon Eggian, To Egg, Excitare, is in the same column of Lye's Saxon Dictionary with Egean, Occare, which will be fully considered in a future page.

Arguo is only another form of Urgeo, or Urgueo, from which, we know, Argue, Argument, &c. are derived. Arguo is a very strong term to express the idea of Exciting—HARASSING— Unging, by Speech, &c. "To prove, or make proof of, To Argue-"To Accuse, To reprehend," says R. Ainsworth. Angutus and Argutatio belong to Arguo, as the Etymologists justly understand. Argutatio the same Lexicographer explains by "A Rea-" soning, debating, jangling, or quarrelling; a creaking, (as of a " bed, chair, &c.) prattle, tittle tattle;" and Argutus, in two of its senses, by "Accused, Charged;" and "HARSH, Screaking." Let us mark, in the explanatory term HARSH, another word belonging to our Element; and we perceive, that in the sense of a HARSH noise, we are brought to the idea of Scratching upon the EARTH, or Ground. I shall shew, that the explanatory words Creak, Screak, and Scratch, belong to each other, and to the idea of Stirring up the CREAT or Ground. The Etymologists derive Arguo, which in its first sense they suppose to be "To show, " or declare," from Argos, (Aeyoc, clarus, manifestus,) Clear, In this sense of Shewing, "Degeneres animos Timor "Arguit," we have the idea of 'A Sharp Proving or Probing.' In Scotch, Argie means "Assertion in a dispute," says Dr. Jamieson; who observes on this term, that it seems on the first view "to be corr. formed from the E. v. Argue. But Su. G. Ierga is " used in the same sense, semper eadem obgannire, ut solent "aniculæ iratæ. Ihre. Isl. Iarg-r, Keen contention." words, as we see, belong to each other. The succeeding article

in Dr. Jamieson's Scotch Dictionary is "To ARGLE-Bargle, To "contend, To bandy backwards and forwards. S. Aurgle-Bargin, "Loth," who observes, moreover, "This may be referred to the "same fountain as the last word. Besides the terms mentioned, "we may add Isl. Arg, Enraged; Iarga, To contend. In Gl. Ram-"say, however, EAGGLE-Bargin is given as synon. If this be " well authorised, the term may properly signify to Haggle in a "Bargain." The word Haggle belongs to the form HACK, under the same idea, as Argle—Arguo, Argie, &c. are related to each other. We shall now understand the origin of the term ARGAL, adopted in the Logic of the Clown in Hamlet, "Now thou dost "ill, to say, the gallows is built stronger than the church; ARGAL, "the gallows may do well to thee;" where ARGAL means the same as Argle, the Assertion or conclusion in an Argument.—In Spanish, Arguir is used, as in other Languages, in the metaphorical sense of "To Argue, to dispute;" but Argue means a "Machine " for moving large weights, windlass," where we see its genuine sense in expressing what relates to an action of Force and Violence. The French Ergoter, "To Wrangle, To cavil," is derived by some from Argutari, and by Menage from the Latin Ergo. In such cases it is difficult to decide; yet the term Ergot, "A Cock or "Dog's Spur," which is surely attached to Ergoter, would lead us to conclude, that it belongs to the race of words before us, Argue, &c. We cannot doubt, that Ergot is attached to such terms as Urgeo, &c. The French Etymologists see no connexion between Ergoter and Ergot, who inform us, that Ergot was anciently written Argot; and they remind us of the Italian Artiglio, "les ongles crochus." Artiglio belongs to Articulus, -Artus, &c.

In Mr. Shaw's Galic and Irish Dictionary, we have AIRGim, "To plunder, spoil, drive away;" and in the same column we have "AIRG, A Prince—AIRIGH, Chief, Sovereign—AIRGim, To Ask, "seek,

"seek, demand—AIRGad, Silver, Money—AIRGHE, A Herd;" the succeeding word to which is AIRGhean, "A Bridle, rein. "Symptoms," "Airgheanna a bhais, Symptoms of Death." another place we have "Argnaim, To Rob, plunder-Arg, "A Champion — ARIGH, Chiefs—ARGuin, An Argument." succeeding word to Argnaim is Argairim, "To Keep, Herd." The terms denoting Plunder—A Chief—Champion—Prince, must be referred, I imagine, to these words of Violence, which the Saxon HERGian, " Harrow, Vastare, spoliare, Prædas agere," most fully In Saxon, HEARGE is Hercules, which belongs probably directly to HERGian. We might perhaps imagine, that HERC, in Hercules, or HERC=Cules, belonged to the Element ^RG, under the same idea; but here some difficulty occurs. The name Her=Cules surely belongs to the Welsh Ar=Glwydd, "A Lord; "A Master, one that hath the rule and property of a thing, an owner," where the AR is probably the articular prefix, or part denoting 'The Illustrious Personage.' The same difficulty occurs in some other terms, which I here produce, as in Airig, where the Air may denote 'The Illustrious Personage;' and the Ig may be a termination, as in Aireach, Noble, from AIRE, "A name to the "different ranks of nobility." As I consider the forms 'R and ^RG, &c. to coincide with each other, this distinction will be, in one point of view, unnecessary: Yet still it is right to recur to this distinction, when the G more evidently presents itself, as a significant addition to terms which belong to the form 'R. We see, that Arguin coincides with Arguo, and Airgim, "To "Ask, seek, demand," or, as it might have been, 'To Solicit;' and they belong to a similar notion of Stirring up-Urging, &c. We know, that Solicit or Solicito, a parallel term in its meaning, is derived directly from the metaphor of Stirring up the Ground. I have produced the adjacent terms signifying the HERD in this place, that the Reader may exercise his own judgment on the original

original idea annexed to these words. Some perhaps may think, that the HERD, the Keeper or Possessor of Cattle, might sometimes become the Driver away or Plunderer of Cattle; and that these terms denoting Plunder might be derived from that source. In the same column with Airgim, To Ask, &c., are Argeadh, Regard, Argeadham, To Regard, which may denote the object that men 'Ask—Seek, or are desirous of obtaining;' or they may belong to Airghe, the HERD, Keeper, Guarder, under the same metaphor, as re-GARD itself bears. "AIRGad, Silver, Money," might seem to be attached to the ideas conveyed by some of these words; and yet it is difficult to decide on the origin of this The Greek Arguros, (Apyupos,) and the Latin Argentum, must certainly be referred to the Celtic term, whatever be its original idea. Lye produces, under Argentum, the Welsh Arian, Ariant, where the G is lost, the Cornish Argan, Arghans, the Armoric Arghant, and the Irish Airgid, Airgead. In the same opening of Mr. Shaw's Dictionary, we have Asscam, "To request, "crave, search for," Aisc, "A request, petition," which is derived from the same idea as Airgim. Here we see the r is lost, as it is in our corresponding term Ask. The word Assc likewise signifies "Damage, trespass, reproach, chastisement," where it corresponds with the terms of violence under the form 'RG, Airgim, "To Plunder," &c.

The Greek Ares, (Αρης, Mars, Gradivus;—Prælium, bellum; vulnus, plaga, cædes, ferrum,) belongs to this race of words, and means, either in its violent or more gentle sense, that which Harrowes—Routs—Destroys—Pierces—Wounds, &c. The Etymologists derive Ares, (Αρης,) from terms of Violence, which belong to the race of words before us, as the Greek Arasso, or Aratto, (Αρασσω, Αραττω, Pulso,) and the Hebrew Did HRS, Destruere, and γτην ORIZ, Violentus. The Greek Arasso, (Αρασσω,) brings us to the form Rasso, (Ρασσω, Allido,) and its kindred

kindred terms Regnuo, Regnumi, (Pyyvua, Pyyvuju, Frango); and we all remember such expressions as Patameros—στιχας, &c. &c., with the compound Paknyup, Viros frangens, &c., applied to the Warrior. The Hebrew הרם HRS, signifies "To break through, break in;" and to this Mr. Parkhurst has justly referred the word HARASS; that is, he has properly understood, that these words belong to the same train of ideas. In the same opening of Mr. Parkhurst's Lexicon is הרג HRG, "To Kill," with which he compares the old Latin word HARUGA, a Sacrifice, a Victim, both which must be added to the words before us. Some derive Haruga from Hara, and others from Apixa, Aries. HARUSpex is derived by the Etymologists from HARUGA, or from Ara, and Inspicio. first derivation is probably right. In Welsh, ARAGU means "To "quench, extinguish, or put out." In German, Wurgen is "To "Choak, strangle, throttle, or stifle;—To kill, cut the throat." In Mr. Shaw's Galic and Irish Dictionary we have Orcam, "To "kill, destroy," ORCADH, "Killing, Destroying." In the same column, where this latter word occurs, we have ORC, "The Cramp," which must probably be referred to the idea of that, which Annoys-Disturbs—Pains, &c. In the same column we have Orch-radh, "Grief, Sorrow." ORC likewise means "A Hen Egg," "A Salmon, "A Whale," the same as OIRcain, "A Young Pig," "A Prince's "son." They are placed by Mr. Shaw as separate words, and I must leave the Celtic Scholar to decide on the peculiar ideas; from which they are derived. While I am examining one of these words, I cast my eyes on Oirceart, "A Hurt, Wound." Again in Galic, URCHoid means "Hurt, Harm," &c. &c.

The Hebrew γγν ORZ, signifies "To Agitate, shake vio"lently;—To Terrify, to shake or agitate others with fear;" and
from this word Mr. Parkhurst has derived the Greek Arasso,
(Αρασσω,) Ares, (Αρης,) and with the M prefixed, Mars, the Latin
URGeo, the English URGE, and the French ORAGE, a storm,
which

which must all be referred to the words of Violence and Commotion, which I am now unfolding. I have represented the Hebrew y Gnain, or Oin, simply as a vowel breathing, which others have done. It has oftentimes, however, the force of the consonant G; and thus it is difficult in many cases to decide, whether the Hebrew term, beginning with y Gnain or Oin, should be referred to those words in other Languages, which begin with a vowel, or with the Consonant G. If you ARZ does not belong to our Element 'RT, it must be referred to GRT, and the terms under that Radical, denoting the same object, the Creat, the Ground. succeeding term in Mr. Parkhurst's Lexicon is yor ARK, which in Chaldee, as he observes, signifies "To flee," and in Arabic, "To Gnaw;" and the next word, yay ARS, means "A Couch, "Bed, Bedstead." These terms all belong to each other, and to the Ground, either as the Scratched—Fretted Spot, or the low Spot. If the original idea of the word, denoting the Bed or Mattress, is that of Interweaving, as Mr. Parkhurst supposes, it may be derived from the notion of Stirring up or about—Mixing together, &c. Mr. Parkhurst refers us to the Hebrew pry ORS, "To Knead," where we unequivocally see the idea of Stirring up. about, or together, which is explained in Castell by "Commiscuit, "Implicavit, Implexuit;" and the Arabic word, which corresponds with the Hebrew term, denoting the Mattress, signifies "To construct a trellis or lattice-work," as Mr. Parkhurst ob-The succeeding term to the Hebrew wy ARS, is wy AS, "To Consume, Destroy.—A Moth;" where the r, we see, is lost, but the true sense of the Element 'To Scratch—Fret—Destroy,' &c. still remains.

The Greek Ares, (Apps,) has been compared with another Greek word, Arren, or Arsen, (Appp, Apop, Mas, Masculus): We see in Arren and Arsen, how the sounds of R and S are connected, and how the forms AR and ARS pass into each other. I must leave

leave the Reader to decide, whether the 'S in Ares be derived from this process, or whether the Es be not a significant addition derived from the analogy of the Language. In Area, (Appa,) we have the form 'R. The AR in AR=Istos, (Apirtos,) belongs to the An in An=es, (Apps,) and the Istos represents the superlative addition, as the Eion in AR=Eion, (Apeium,) does the comparative. The word Ariston, (Apiston, Prandium,) the Dinner, might belong to Aristos, (Aprotos,) and mean the Best or most agreeable part of the day. The Etymologists derive Apiotov from Appiotov, "quod " tempus ei non esset definitum; - ab App, quod daretur profi-"ciscentibus ad bellum." That my Hypothesis respecting the original idea annexed to Ares, (Apr.,) is right, will receive confirmation, from considering the sense of the word Aris, under a similar form, (Apic, Instrumentum fabrile; -- Herba quædam, Ang. Friers Cowl,) the workman's Instrument, which Martinius calls the Scobina, a File; where we are directly brought to the idea, conveyed by the Element, of Scratching or Fretting a surface. Can we imagine, that the ARIST, in Ariston, (Apiστον,) bears the same idea of Fretting or Tearing any thing to pieces; and denotes a Meal, from the action of Eating? I shall shew, that the German Fressen, To Devour, belongs to Fret, and that Eat belongs to our Element 'T, under the same idea of Scratching or Fretting a Surface, as when we talk of a Corroding substance Eating into any thing. The explanatory term Corrode has the same double meaning. Martinius refers Aris, and Arisaron, (Apic, Apicapou,) the Herb, to Aris, (Apus,) the File. Robert Ainsworth explains Aris by "An Herb of a Sharp and biting taste;" where we have again the sense of the Element. The Aris, the Herb, is the Aris, the File, the Sharp Scratcher—the Fretter or Biter. Perhaps the Saron in Arisaron, (Aparagos,) belongs to Sairo, (Sauge, Scopis Purgo,) a term, which relates to a similar action of Scratching or Sweeping over a Surface. The succeeding word to Aris, in Robert Ainsworth's

worth's Vocabulary, is ARISTA, the Beard of Corn, where we have a similar idea of the Scratcher or Pricker.

Arsenicon, (Aposición,) Arsenic, is not derived from Arsen, (Aposic,) as the Lexicographers imagine, but is quasi Senicon, or Sernicon: and it is taken from the Persian terms Ser-Nic, signifying Gold and Paint, Auripigmentum, زرنيخ Zur Neekh, "Orpiment, Arsenic." This will be more fully unfolded in its due place. In the same column of my Greek vocabulary, where Ansen, (Apony,) occurs, we have Ars, Arnos, (Aps, Apros,) which must perhaps be referred to the same idea of Vellicating or Carping a Surface, in the mode of Eating peculiar to the Sheep. This mode of Eating, we know, is called Nibbling. In Yorkshire; a Sheep is said to Nep or Nip. Thus, then, ARES, (Apps,) Mars, and ARS, (Aps,) the gentle Lamb, belong to each other, under the idea of the Carper and Nipper, in the stronger or more mild sense. In Agnus, the r is lost, and the *n* is an organical addition to the G. In Arnos, (Apros.) the characteristic radical S, &c. is lost. When the R is lost in Arnos, or the G in Agnus, the 'N would then represent the name of this animal; and hence, perhaps, we have Amn-os, (Auros, Agnus,) with the organical addition of the m. In Spanish, Arisario is the herb called Arisarium; and in the same opening of my Spanish Dictionary, where this word occurs, I find, belonging to our Element, Arisco, "Fierce, rude, &c. Harsh," &c. Ariete, "the Ram," ARIGA, "the Mill Dust," i.e. what is beat to EARTH or Powder, Aricar, "To plough across the Ground, sown with "corn; to clear it of weeds," Arigo, "Light, easily tilled, ap-" plied to the Ground or Soil."

In the same leaf of my Vocabulary, where we have Ereiko, (Epenco, frango,) &c., I find Ereugo, (Epenco, Ructo; Emitto, vel evolvo, quasi Eructando, effundo,) To Eructate, which belongs still to the same spot; and it is derived from the metaphor of Routing up—Stirring up—Breaking up the Ground. We use Break, as applied

applied to wind, precisely in the same manner; and the Germans employ Brechen in a similar way,—"Sich Brechen, To vomit, "disgorge, cast up." Break, we know, is particularly applied to Breaking up the Ground. We shall not wonder, that Ereugo, (Ερευγω,) To Eructate, is surrounded by a race of words, which relate, as I have supposed, to Breaking up the Ground, when we remember the coincidence of Vomo, to Vomit, with Vomer, the Plow-share.—The Etymologists acknowledge the relation of these words to each other, though they imagine, that Vomer contains the secondary and metaphorical idea, 'Vomer dicitur, quod Terram "Vomat." We shall now understand, that Vomer contains the original idea, and that the sense of Vomo is Metaphorical. curious, that in Persian we have a word belonging to our Element, which at once signifies the same as Eructo, and an Excavation of the Ground. Mr. Richardson explains ارغ Акедн, in its first sense, by "A Canal;" and in another sense we have ARUGH, "Belching." In Persian, we have the form RG, without the breathing before the R, نغ Rugh, "Belching, Eructation:" The succeeding term in Mr. Richardson's Dictionary is the Arabic Rugha, "Crying (as an Infant); roaring, braying, &c. (as "a hyena, camel, or ostrich,)" where we have the idea of Noise, such as we find it in Rugio, &c. Mr. Richardson has marked وروغ WERUK, as an Arabic word, signifying "Belching, Eructing." Hebrew, ירק IRK, means "To Spit, Spit out," to which Mr. Parkhurst refers the English Retch, and the Saxon Hracan. The preceding word in the Lexicon of this Writer is Yr IRG, "To be Broken, afflicted;" where, in the sense annexed to Break, we have the true idea. Let us note the Latin Ructo, the Persian Rugh, and the English Retch, under the form RC. familiar expression "To RAISE phlegm," we have the precise idea; and I shall shew, that "To RAISE up" belongs to Stir up— To RAKE—ROUT up, &c. &c. The Latin Eructo, and the English Eructate, Eructate, are compounded of E and Ructo.—In the same column of my Greek Vocabulary, where Ereugo, (Ερευγω,) is, I find Erechtho, (Ερεχθω, Scindo, Agito, Jacto,) which I have before produced, as belonging to this race of words, signifying 'To Stir up or about, 'To cast here and there, To Break,' &c. Let us mark, that Cast up is used in a similar sense for to Vomit; and 'To Cast a Pond,' is 'To Cast out the Mud of a Pond.' Cast and Jacto belong to the same race of words, and are derived from the same spot. We have seen the term Werugh, "Belching, Eructing;" and in a preceding column of Mr. Richardson's Dictionary, we have the Persian (Werkerden,—"To pull up, tear out, extirpate.—"To throw away."

Adjacent to the word Ereugo, (Eproyu,) in our Greek Dictionaries, we have EREUTHOS, (Epwlos, Rubor,) REDness, to which, we know, belongs Eruthros, (Ερυθρος,) Red. Ereuthos, (Ερευθος,) means a colour belonging to a certain species of EARTH, or Soil. We may imagine, that the names of Colours would be derived from the various kinds of Soil. Let us note the very word Colour, and mark its affinity with Soil, Solum. This will explain to us, why Color is adjacent to Colo, in our Latin Vocabularies. In Hebrew, ארם ADM, has this double sense of Red, and the Ground, from which is derived the name Adam.—The Hebrew ADM belongs to the Element DM, denoting the Ground.—The bird called ERITHakos, (Eosbaros, Erithacus, avis quædam solitaria, quæ à quibusdam Silvia, ab aliis Rubicula dicitur,) is probably derived from ERUTHros, (Ερυθρος,) for the same reason as it is called Rubicula. The adjacent word Erithake, (Εριθακη, Erithace, cibus apum, vel gluten ad conficiendos favos,) is derived by Martinius from the same source; "Ergo a Rubedine (quæ Græci Ερευθος,) dici videtur, " quasi Erithaca." We perceive, that RED, the term directly corresponding with Eruth-ros, (Ερυθρος,) belongs to the Element RD, with no vowel breathing before the R.

I cannot leave the word ERUTHros, (Keubeos,) without noting an adjacent term, Enusipelas, (Epvornelas, Tumor de tenui ferventique sanguine ortus, ignis sacer, Erysipelas,) which is supposed to be derived from Eruo, (Ερυω, Traho,) and Pelas, (Πελας, prope, vel in Vicinia); and hence it has been called Vicinitraha, and Vicini-The Latin words Vicinus and Traho are a translation of the supposed origin of the Greek term; and perhaps the Rubia may represent the opinion of those who imagine, that the Erus in ERUSIpelas, (Ερυσιπελας,) belongs to ERUTHros, (Ερυθρος.) The Medical writers give us but a feeble reason, why the word should be derived from Equa and Medas, "quod vicinas partes ad se trahat, "easque quasi diffluendo occupet." Perhaps the Enus belongs to ERUTHros, and the Pelas to Plesso, (Пλησσω, Percutio,) To strike or afflict; so that Erusipelas may mean 'The Red Scourge or 'Plague.' Now the explanatory word Plague belongs to Plesso, Plege, (Πλησσω, Πληγη, Plaga); and what is curious, the very combination Red-Plague, which, according to this idea, precisely coincides with Erusi-Pelas, occurs in Shakspeare, and is applied in our old writers to the same species of disorder. Caliban says,

"The RED PLAGUE rid you,

" For learning me your Language."

on which Mr. Steevens remarks, "The Erysipelas was anciently called "the Red-Plague." If my derivation should be true, it is curious, that a similar combination should have been afterwards formed.

The Greek Orrodeo, (Oggadew, Timeo, Formido,) To be in a state of Horror, Fear, &c., is derived from the Metaphor of Harrowing up the mind. Orros, (Oggos, pars subjects testiculis;—sacri ossis extremum; podex,) is the part in contact with the Era, (Ega,) or Earth, in sitting, or the part belonging to the Tail in animals. Orros, (Oggos, Serum,) the Whey, from the curdling of the Milk, is derived from the Metaphor annexed to Orrodeo, (Oggadew.) The process of Curdling is either taken from the idea of Coagulating—or of Separating from the Agitation of its particles. The strongest

idea of Agitation is connected with that of Horrow, and the metaphor of Harrowing. We know, that the word Curdle is combined with the idea of Horror-Fear, &c., as " My Blood Curdles with " Horrow, Fear," &c. The Lexicographers derive Orrodeo, (Oeewδεω,) from Orros, (Ορρος, pars subjecta Testiculis.) Orropugion, (Oρροπυγιον, idem quod Oρρος, in Avibus Cauda,) means the Tail in Birds.—In Saxon, Herth-Belig means "Pellis in quâ includun-Scrotum, ab Hærthan, Testiculi, et Belig, "tur testiculi. "Venter."—I shall shew, that Tail belongs, under another Element, to the same spot, and that Puge, (Ilvyn,) in the compound Orropugion, (Opposition,) and the Latin Podex, belong to the Pedon, (Hedor,) &c. We cannot but remember, what I have before produced, the vulgar word for the part on which we sit; and we should be reminded of the Greek Arche, (Apxn, Princeps, Dux.;— Podex, Intestinum rectum,) both which terms belong to the EARTH, as the Base, or Foundation. We must not fail to recollect, that this part is called likewise the Bottom; and, by another word, Fundament, derived from Fundamentum, which belongs, we know, to Fundus, the Ground. The Latin Horreo must be considered as belonging to these words, and to the Element ^R. the term Orros, (Oppos,) the Os arises from the construction of the Language, and the Odeo in Orrodeo, (Oppubeu,) will be a termination, as the Or and Idus, in the Latin Hon-Or and Honn-Idus. An adjacent word to Orrodeo, (Oppubeu,) in my Greek Vocabulary, is Orsai, (Ορσαι Æol. pro Οραι, ab Ορω, Excito,) which they tell us to be an Æolic form for Orai, from Oro, (Oew,) "To Excite;" where we see how the forms 'R, 'RS, pass into each other. ceeding column of my Greek Vocabulary to that, where these words occur, we find belonging to our Element AT, AS, &c. Orusso, ORUTTO, (Ορυστω, Ορυττω, fodio,) which signifies To ERA, (Ερα,) or to Earth, as I have before shewn, Oruza, (Ορυζα,) Oryza, Rice, which belongs to the same spot; and we shall note, likewise, that in Rice, the breathing before the R is not found. We have likewise in the same column Ortux, (Ορτυξ, Coturnix; — Herba,) Ortalis, (Ορταλις, Pullastra, vel Gallina,) and Ortalizo, (Ορταλιζω, Incipio alas explicare; incipio in altum ferri.) Ortux, (Ορτυξ, Coturnix,) the Quail, may be so called from the Noise which this animal makes; and should perhaps be referred to the race of words belonging to our Element, which denote Noise. The c-Ot in Cot-urnix might belong to Ort in Ort-Ux. The verb Ortalizo, (Ορταλιζω,) may be taken from the idea of Agitation, in the first attempt to move the wings in flying. From this, Ortalis, (Ορταλις,) the young animal, may be taken. There is a bird, under a sound similar to this, called the Ortolan, (Fr. Eng.) Ortolano, (Ital.) which the French Etymologists derive from Hortulanus, because this bird frequents Gardens.

Terms belonging to our Element w= ^RT, &c., connected with the action of Stirring up or about, Turning up—Breaking up the Ground or Earth, as with force, violence, &c., or as an action of labour.

Work. (Eng.)

WEORC—WARK—IRK. (Saxon, Eng.) Pain.

WRECAN, WREAK. (Sax. and Eng.) To Work in a violent sense.

WRACK—^RACK. (Eng.) Torquere, To Torture.

WRECK. (English,) What is Broken to pieces.

WRITHE. (Eng.) To Turn up or about, with force, Torquere.

WREATH. (Eng.) The Garland, What is Writhed or wound about, without force.

WREST, WRESTEN, &c. (Eng. Sax.) To force one thing from another by Writhing or Twisting about.

WRIST, WYRST, &c. (English, Sax.) The part able to Wrest.

WRESTLE. (Eng.) To Wrest, or Twist about.

WRIGGLE.

WRIGGLE. (Eng.) To Stir about here and there.

WROOTE, — 'ROUT, 'ROOT.

(English,) To Stir up the
Ground, as pigs do with
their Snout, or

*Rostrum. (Lat.) The Router up.

WROT. (Sax.) The Proboscis of the Elephant—the Wrooter or Router.

WRITE. (English,) To Wroote,
Rout—or Scratch up.

I SHALL now produce various words in Saxon and in English, belonging to our Element ART, which commence with the letter W. This letter must be considered only as representing a stronger vowel breathing. These words I have inserted in the present article, because they are in general connected with the idea of Stirring up the Ground, and are employed to express actions relating to the notion of Exciting — Disturbing — Annoying — Plaguing - Aggrieving, &c. I shall however introduce other words, which present themselves under this form, and which are connected with the same object, under a different idea.— We have seen the English words Work and Wright—with the parallel Saxon terms Weorc, Opus, Wircan, &c. &c. Operari, and the Greek Ergon, (Eoyor,) referring to the idea of Working or cultivating the Land, as in the phrases, "Land vel EORTHan WYRcan, Ter-" ram elaborare, colere."—" Man næs the tha Eorthan Worhte, "Homo non erat qui terram coleret." We have moreover seen, that Weorc means "Dolor, cruciatus, Anxietas," and that the parallel English terms are WARK, IRK, &c. &c.

The English word WREAK—To WREAK Vengeance upon a person, is nothing but Work, with its more violent sense of Exagitation—Persecuting, Aggrieving. In our phrases, "I'll Work "him well—I'll Work him to an oil," Work is applied in a similar manner. The Latin ex-Encere, we know, is used in the

the same sense, "To Vex or Trouble." The term Work is sometimes applied as WREAK is, as "He will Work vengeance "upon us;" and sometimes Work and Wreak are both used on the same occasion. In Titus Andronicus, we have the following line: "By Working Wreakful vengeance on thy foes." In old English, WREAK is used as a substantive, as in Coriolanus, "Then "if thou hast a heart of WREAK in thee, thou wilt revenge," &c. &c. The Etymologists refer us, under Wreak, to the Saxon Wracan, Awracan, the Gothic Wrekan, the Belgic Wreken, the German Rechen, vindicare, ulcisci, Raach, Ultio, &c. &c. In German, RACHEN signifies "To avenge;" and in Rechen we are directly brought to the action supposed in my Hypothesis. RECHEN means "To RAKE, To RAKE together;" and RECHE denotes "Harke, a RAKE, RAKER, Harrow," as my Lexicographer explains it. We perceive, that RAKE, and its parallel terms Rostrum, &c., belong to the form RK, when the breathing before the R is lost. We see in the German HARKE, or Harake, Rake, how readily these forms pass into each other. The word preceding Rachen, in my German Dictionary, is RACHEN, "A great "and wide throat or gullet, a voracious beast's open and deep "Mouth, extended Jaws, Cheeks or Chops," which perhaps belongs to RETCH-REACH, signifying 'To Stretch out,' &c. Lye, in his Saxon Dictionary, explains WR Ecan, &c. by "To "WREAK, Exercere, Agitare, Infligere," which is a very just interpretation; and in exEncere we see the genuine word. Hence we have the adjacent term in Lye's Dictionary, Wracian. "WRAcnian, Exulare, peregrinari,—WRÆC, Peregrinus—Miser;" and hence we have the English WRETCH, which the Etymologists understand, who remind us likewise of the Greek RAKistes, (Payiστης, Dissector, Carptor; —Mendax, &c.) which the Lexicographers justly refer to Resso, (Pyoou, Frango,) where we have the form RK, as in the German RACHen. The term WRETched might

be expressed by a metaphorical application of any of the terms, belonging to this train of ideas, as 'The Broken up or down personage—' the personage w=Orked down or to pieces, the Vir miseriis 'Fractus—Exagitatus, Exercitus;' and it would be idle to select a peculiar notion from this train of kindred ideas.

In the English WRACK and WRECK, A Ship-WRECK, &c., we have the idea of Breaking to pieces, such as we have seen in ^ Resso, ^ Regnuo, and ^ Regnumi, (Pησσω, Frango, rumpo; — Vehementer Ferio, Allido, Pyyruu, Pyyruu, Frango,) where the breathing The Etymologists record under these before the RT, &c. is lost. English words the French Varech, the Swedish Wrak, the Islandic The Sea WRAK, with its parallel terms Vrag, (Dan.) Vrac, (Norman,) &c., may mean the Vile—Wretched plant—Vilior alga; or it may belong to the idea of Agitation, and mean the Plant Driven or Thrown upon the Shore. The Etymologists produce the Belgic Wraecken, Rejicere. The term WRACK, or RACK, To Torture, is nothing but another form of these words, signifying "exErcere, Agitare, Infligere." Lye has produced, under WRACK, "Torquere," the Saxon Wracan, bearing this sense; and he has moreover added the Gothic terms Gaurikan, Ulcisci, and Wrican, Persequi, &c. &c. The interpretation of WRACK by Torqueo will remind us of WRITHE, WREATH, and WREST, which belong to the same idea of Stirring—Turning, or whirling up or about, &c. &c. Torqueo precisely corresponds in sense with these words; and it is explained in Robert Ainsworth, among. other senses, by "To WRITHE, or WREATHE; to twist.—To "wind, or whirl about; -To RACK, torment, or torture. -To "WREST, to pervert, to distort." WREATH, in the sense of a Garland, is used in its most gentle meaning, To turn about; but in WRITHE, To WRITHE in Agony, it is applied in its most violent sense, to extreme Agitation in Stirring or Turning about. Skinner has justly referred WRATH, WROTH, and its parallel terms,

terms to Watthe, &c.; and I have on a former occasion examined the word Wrath, and compared it with the Greek Eretho, Eris, Erid-os, &c. (Epolo, Epis, Episo,) &c. &c. We shall all agree, that the sense conveyed by such terms would be most naturally derived from that of Stirring up—Agitation, &c. In Hebrew, Dr IRT, is "To turn aside, turn over;" and to this word Mr. Parkhurst has referred the English Writhe, Wreath, and with a Quære annexed, the Latin Verto. I have shewn, that v=Erto means likewise to Earth up, &c. &c. In Wrest we see the idea of violent Stirring or Turning about, for the purpose of forcing asunder one thing from another. The Etymologists refer us, under Wreathe, Writh, to the Saxon Wreothian, Obvolvere, or, as sometimes written, Wrathian, Wrythan, Torquere, Wrida, (Swedish,) &c.

Under WREST, they produce the Saxon Awrestan, Wræstan, Intorquere, the Belgic Writseln, Torquere, &c.; and from hence they refer us to Wrench and Wring, where the n is only an organical addition to the C and G, quasi Wregch, Wrigg. The English WRIST is referred by Skinner either to the Saxon WYRST, WYRREST, Carpus, or to the verb To WREST; "quia sc. vis illa, " quâ res extorquemus, in Carpo præcipue sita est, sed prius "præsero." We see, that WRIST and WYRST, &c. mean the strong part, able to WREST. The Etymologists, under Wrench and Wring, refer us to the Saxon Wringan, the Belgic Wringhen, the Danish Vrenge, the German Ausringen, "et inde Ringen, "Luctari, nisi malles hoc," says Skinner, "a Ring, Circulus, deflectere, quia sc. luctatores in corona seu Circulo spectatorum "vires experiuntur." We shall now understand, that the German Ringen, "To strive, struggle, Wrestle," &c., means to WRENCH about here and there. Ring, the Circle, means that which is Wrung or Twisted round, in its gentler sense. Ring, Circulus, has the same relation to Wring, that WREATH has

to WRITH. Ring, Pulsare, Tinnire, denotes the action of Striking, and the Noise belonging to the term of violence, Wring. Let us mark the word WRESTle, belonging to WREST.

The succeeding word in Skinner to Wring is WRINKLE, which seems to belong directly to Wring; and thus the Wrinkled countenance denotes the Wrung—Distorted—or Deformed countenance. Ruga is attached to the Element RG, under the same train of ideas, and denotes the Rough-Rugged Countenance. The Etymologists refer us, under the word Wrinkle, to the Saxon Wrincle, the Belgic Wrinckel, the German Runtzel, &c. Wrinkle is likewise explained by "Turbo, seu Cochlea marina," which is so called, "à testæ Ru-"gositate," though it is not derived from Wilk, as some imagine. WRONG is that, which is Wrung or Perverted from the right course. as the Etymologists understand, who derive it from the Saxon Wringan; and they produce likewise the Saxon Wrange, Injuria, to which we must add Wrenc, Fraus, Dolus, &c. While I am examining this Saxon word in Lye's Dictionary, I observe the Saxon term Wrinc, sc. Eagas. "Ictus oculi," which means the Wringing or Turning about of the Eyes. In Junius, WRENCHES occurs as a term in Chaucer, which he explains by "Deceitful trickes, Fraudes," &c., and which Lye properly refers to the Saxon Wrenca. The succeeding word in Junius is WRENN, "Regulus, Trochilus," which he derives from the Saxon "Wræn, Lecherous." In Saxon, WRENNA is a Wren, and Wræne, Libidinosus, Lascivus, Wrænnes, Lascivia. The Wren, the bird, may be derived from Wrane, Libidinosus, or the contrary order may have taken place. If Wræne be the original, it may be taken from the idea of Exciting or Stirring up, from which this sense of Libido is commonly borrowed. Wren, however, may belong to this race of words, denoting Twisting or Turning about, precisely for the same reason, as its name in Greek, Trochilos, (Τροχιλος,) belongs to Trochos, (Τροχος, Rota,) the Wheel. The English Wrangle, Altercari, I conceive to

be quasi Wraggle; and that it should be classed with these words, denoting Agitation, &c. The Etymologists produce under this term the English Wrong, the Islandic Rangur, Rangligur, Iniquus; and they remind us of the Greek ERESKELein, (Epsoxedew, Cavillari,) where we see the true form. In WRIGGLE we have the same idea of Agitation, though applied to a different purpose; and here we see our Element 'RG. The Etymologists justly remind us, under this word, of the Belgic Writselen, Motitare. In Wrestle, as I before suggested, we again see the same notion; and this word is properly referred by Skinner and Junius to Wræstlian, Wraxlian, (Saxon,) the Belgic Worstelen, Wrastelen, Wratselen, and to the English WREST. In Saxon, WRIXL is Vicis, vicissitudo, &c., and WRIXLan, and WRIXLian, Permutare, which sense of change must be referred to the same notion of Agitation, &c. The Latin Luctor, To WRESTLE, belongs to Lutum, with a similar metaphor of Stirring up the Dirt, &c. In the same column of my Saxon Dictionary, where WRATH, Ira,—Vehementia;—Vehemens, Urgens, WRESTAN, Intorquere, intrudere, WRESTLian, To Wrestle, &c. occur, I find likewise the terms Wræst, Firmus, Stabilis, and Wraste, Firmiter. These words must all belong to each other, and this idea of Firmness and Stability must be attached to an action of Violence, as we see it in Wresting, Wreathing, &c. This will be more fully explained, when I examine its parallel word Rest; yet we cannot at present but understand, when we observe the term Arrest, that the idea of Rest is unequivocally connected with an act of Violence. The terms belonging to our Element 'RT, which are in the opening of Lye's Saxon Dictionary, where Wrenc, &c. occurs, relating to the idea of Agitation of HARROWING - Stirring up or about - Driving on or about-Plaguing, Persecuting-Destroying, &c., are the following; the Gothic Wrikan, Persequi; the Saxon Wrigan, Tendere, Conari, Niti; WRIcan, WREOGan, Ulcisci; WREOTan, Crepitare, Strepitare; WREHTAN,

WREHTan, URGere, Instare, Instigare, Incitare, Allicere; WREGan, Accusare, Insimulare, Deferre; WRECON, Exercere, Infligere, Ulcisci; WRECan, Vindicare, Exulare; WRATHE, Vehementer, Graviter, Furiose; WRATHmod, Iratus animo; WRATHlic, Infestus, vehementer Ungens, WRATH; under which Lye refers us to WRÆTH, WRETHIAR, Munimen, Ligare, to WRETH, Ira, and the Gothic WRAKGA, Persecutio: This latter word is next to the Saxon WRANG, Wrong, Injuriæ, (which I consider to be quasi Wragg, Wrogg,) and WRAXLian, To WRESTLE. The Saxon Scholar will not forget other words in that Language, bearing a similar idea, as Wurthian, Perire, For-Wurthan, Perire, &c. For-Wyrcan, Perdere, from Wyrcan, Operari, Wyrdan, Corrumpere, Fædare. Violare, Infringere. In the same opening of Lye's Dictionary, where Wrikan, &c. occurs, we have terms belonging to our Element, with a different meaning, as the Saxon WRIGAN, to Rig, Tegere, Induere, Vestire; WRIDan, Fruticare, Germinare, Pullulare; Wreon, Wryon, Tegere, operire; Wrætte, Miraculum; WRETTE, Veratrum, Helleborus; the Gothic Wraiua, Curvus, and the Gothic Wraton, Ire, Iter facere. These latter terms seem remote from each other, and from the race of words which I am discussing; but a little consideration will unravel to us the mystery in which they are involved, and shew, that they all belong to our Element, under one of its senses.

In the Gothic Wraton, Ire, Iter Facere, we see simply the idea of 'To Earth, or Pass upon the Earth.' Under another form of the Element, we have the same sense in the Greek Erchomai, (Eqxoquai, Eo,) as I have before shewn; and in the explanatory word Iter, we see likewise our Radical, when the r has disappeared. The Gothic Wraina, Curvus, will remind us of our English term Wry, or Awry, which I consider with the Etymologists to be quasi Writhed, Turned or Distorted out of its course. The Etymologists likewise record the Greek Roikos,

(Pomos.

(Poixos, Curvus,) and the Danish Vrie, Inflectere, Torquere. The Saxon WRÆTTE, Miraculum, Mirandum opus, seems to belong directly to WREATH, and to mean 'that which is finely WREATHED -Done in fine, Contortive devices,' if I may so express it. If we were to say, that it meant 'Finely Wrought out,' we should nearly come to the same point, as 'WROUGHT up' and 'WREATHED up' belong to the same operation, and only differ from each other in their peculiar mode of application. The passage, which Lye produces, is the following. "Is thæs middangeard missenlicum " wisum gewlitegad WRÆTTUM gefrætwad. Est hic orbis variis "modis decoratus, mirandis operibus ornatus." The term ge-FRÆTWad, or FRETTED, is drawn from the same spot, with nearly the same metaphor, as WRÆTTE in the sense of WREATHED. Fretted belongs to the sense of Scratched or Stirred up; and WREATHED belongs to that of Stirred up or about, or Turned up or about. Perhaps some may imagine, on seeing these terms together, that Wrætte and Fret must be referred to the same Radical; and if that such be the case, the form FRD, or f-ARD, must be referred to our Element 'RD. This must be a subject of future investigation. The Saxon WRETTE, "Veratrum, Hel-" leborus," should be directly referred to WREATH, WRITHE, To Twist, or Contort,' as denoting the Twisting—or Contorting Drug, a very proper source for the name of so Drastic a Medicine. Here again, if WRETTE' be referred to WROUGHT, &c., we shall come to the same point, as it will then denote the Drug, which powerfully Works, as we express it, or, according to the same metaphor, is Drastic, or powerfully operative. It will be instantly granted, that the Latin VERATrum is only another form of the Saxon WRETTE. Some think, that VERATRUM is so called, "quod "Vires habeat;" and others, "quod mentem Vertat."

The terms Wrecan, or Recan, Enarrare, Exponere, and Wrigan, "To Rig, Agere, induere, vestire," as they are to be found

found under the form RG, shall be fully explained on a future occasion. We cannot doubt, however, that they belong to the same fundamental idea, existing in the words, by which they are surrounded, whatever peculiar turn of meaning these terms may have received. Lye explains Recan by "To Reckon, Curare, "Solicitus esse, I Reck not, I ne Reck, Nihil Curo;" where we at once see, by the explanatory term Solicitus, which is derived from the idea of Stirring up the Ground, from what source Reck, &c. may be derived. We cannot but see too, how WRIGan, "To "Cover," may be derived from the idea of Stirring or Turning up, over, &c. &c., when we consider its connexion with WREATH, 'To turn up or over, To Twist, wind, or wrap over.' A term, under the same form as WRIGan, Tegere, means "Tendere, con-"tendere, niti," where we see the idea of Excitement. action of Stirring, Turning up or over, necessarily includes in it the two effects of 'Bringing or Drawing out,' and of 'Covering over;' and hence it is, that Appareo and Operio are attached to each other. The term immediately preceding Wrigan is WRIDAN, or. as it is oftener written, WRITHian, "Fruticare, germinare, pullu-" lare," which seems to belong to WRIGan, WREATH, &c., and to denote the Covering or Cloathing of trees, by the budding-blossom-The terms directly preceding WRITHian, Fruticare, &c., are WRITHels, Fascia, Velamen, and WRITHAN, "To WRITHE, "Ligare," &c. In the Saxon Wreon, Wrijon, "Tegere, Operire, "Celare, Abscondere, Protegere," we have the form WR, which we may consider, if we please, as the simpler form of Wrigan, To Rig, Tegere, &c. Lye has justly referred us, under Wreon, to WRIGan. An adjacent word to the latter in Lye's Dictionary. is WRIGyls, " pro Hrægle, Vestis, velamentum," says our Lexicographer. The form most consonant with the origin of these words is WRIGyls, as derived from WRIGan. Lye has justly referred it to hRægle, the dress of Women called a RAIL. Skinner

has properly produced the Saxon form Regl, where we have the intermediate step; and he has recorded likewise the Latin Ralla, which belongs to these terms.

To this race of words, denoting Stirring up — Scratching up, &c., we must refer WRAY, in the compound Be=WRAY, which Skinner explains by Detegere, and Nathan Bailey by "To "reveal or discover a secret; also to Foul with ordure;" and in another article, by "To Betray, to discover." Remote as the sense of the word appears to be from the original meaning, supposed in my Hypothesis; yet even the Etymologists have conducted us to this idea. Skinner refers Bewray to the Saxon Bewregan, Wregan, the Belgic Wroeghen, Accusare, Prodere, deferre; and Lye gives us a similar origin, with the following explanation: "Turbatæ Vellicantisque conscientiæ stimulis prodere " seipsum." We cannot but see, that the sense of 'Discovery' or Detection, which Be=WRAY conveys, is commonly connected with an idea of Exagitation-Vellication, self-compunction, by which that 'Detection' is produced or attended, as "To Be= "Wray his own shame."—"And not Be-Wray thy treason with " a blush," (Shaksp.) &c. &c. Thus, then, Be=WRAY means, in its original sense, 'Quasi Exagitando, Vellicando, Urgendo, &c. Pro-'dere, vel Arguere,' and afterwards 'Prodere, Detegere,' in general. I have selected the term Arguere, "To shew, to "declare,—to accuse, reprehend," as precisely corresponding with the metaphor conveyed by Be-WRAY. I have shewn, that Arguo belongs to our Radical ARG, under the same train of ideas; and that it is only another form of URGeo, &c. - (URGESligonibus arva,) where we are at once brought to the original action. and the metaphorical application. Arguere means 'Quasi Ur-GENDO, Exagitando, probare, monstrare, detegere.'-The term Be=WRAY is said to signify "To foul with ordure," which does not seem directly to belong to the sense of the words, which I am here

here unfolding. If the term has really this meaning, we must recur to the original idea, supposed in my Hypothesis; namely, that these words are derived from the action of Stirring up Dirt. We see, that Lye has used Turbantis in his explanation of the word; and thus, if the interpretation of "Foul with ordure" should be just, we might explain the word Be-WRAY by 'Tur-' bare, Turpare, Turbando Exagitare, Vellicare, Turbando, et 'Exagitando Prodere.' Perhaps, however, the meaning of the Proverb, on which this sense is apparently founded, has been mistaken. The proverb runs thus: "It is an ill bird, that Be=WRAYS its "own nest;" which may mean only, that it is an ill bird, which is so much its own enemy, as to Discover or Betray its own nest, ' Mala est avis, quæ quasi semet ipsam Exagitando, Accusando, &c. suum nidum Prodit.' I believe, that the Proverb sometimes runs. "It is a Faul bird, which Be=WRAYS its own nest;" where the equivocal word Foul would contribute to affix the sense of 'Fouling with ordure,' to the term Be=WRAY.—We perceive, in the y of Wray, that it has been directly taken from a word under the form 'RG.

Though WRAY, considered by itself, agrees in its fundamental idea with the race of words which I am now unfolding; yet the combination of Be=WRAY does not accord in its turn of meaning with combinations apparently of the same kind, as they are explained by our Lexicographers. The Saxon Bewregan, recorded by Skinner, I do not find in Lye's Dictionary; though he produces the compound Be=Wreon, which he explains by "Operire, "Tegere," where we have a sense opposite to that conveyed by Be=WRAY. The compound Be-Wreon has the same sense as the simple term Wreon, Wryon, "Tegere, Operire;" and this will shew us, that Be-WRAY is not a compound, in which the Be has a negative sense, quasi 'To Un—or Dis-Cover,' as some might naturally suppose. This sense has been obtained, we see, by a

very different process:-The action of Covering, I must again observe, is inseparably connected with that of Stirring up or about - Turning up - about or over; and perhaps the Saxon Scholar may discover, that Be=WREOn at once means Aperire and Operire, or Eruere and Obruere. The term Wreon has, according to the confession of the Etymologists, &c., this double sense. Though Lye in his Saxon Dictionary assigns only to WREON the sense of "Tegere, Operire," &c.; yet, in his Edition of Junius, under "WRIE, WRIE, Tegere, Velare," we have as parallels, "WREON, Wryon, Wrigan. item Prodere," where we see the other sense Prodere, as well as Tegere. Thus, then, we may safely explain WREon by Eruere, Vertere, Eruendo, vel Prodere vel Tegere. In Scotch, the term WRIE signifies at once "To "Twist," and "To Cover, to conceal," as Dr. Jamieson explains it, though he has placed the word with these senses in separate Thus we see, that the Saxon Wreon is, in fact, nothing but our English 'To WRY, or AWRY,' if I may so say, 'To Turn, 'or Pervert, Eruere, vel Vertere;' and Dr. Jamieson has accordingly an article, Be=WRY, which he explains by "To Per-"Vert, or Distort." In "VEER round," VIRer, (Fr.) En-VIRON, En-Vinonner, (Fr.) we see the same idea of Turning or Wrying, if I may so say. Let us mark the WRy and the VER, corresponding with each other; and again, in another state, VERTO and WREATH. The term adjacent to this Latin word Vergo probably only means 'To Turn or Bend-downwards;' and in VERGE—the VERGE of a Court, we have the En-Virons. In some tenses of Be=Wreon, the form 'RG is assumed, as Be-Wreogen. Be-Wrigen, Be-Wrogen, Tectus; Be=Wruge, Protexisti.

In the Poems attributed to Rowley, the term *Enrone* occurs, and seems to mean the same as 'Unsheath.'

[&]quot;Thus I Enrone mie anlace; go thou shethe,

[&]quot;I'll potte ytt ne ynn place, tyll ytte ys sycke wythe deathe." (Ella, y. 660.)

618

Dean Milles imagines, that Enrone is "perhaps Enwryne, from "Wreon, To Display, Draw out." Here, we see, Dean Milles has given the same sense to Wreon, Prodere, "To Display," which I have supposed; and in the phrase Draw out, corresponding in sense with Ervere, he has brought us to the metaphorical application, which my Hypothesis supposes. With these two senses, annexed to the term Wreon, of Prodere and Tegere, we cannot well decide, which of these senses is applied in En-Rhone and En-Wryne, if these words signify to Unsheath. The words may denote what Dean Milles supposes, or the En may be negative, and the meaning may be 'Un-Cover,' or 'Un-Sheath.'

In the same Poems, the term Υ =Wrinde is considered to mean in three passages Hid or Covered; yet in two other passages, Υ -Wrinde and Υ -Wreene unequivocally mean Disclosed. The term Υ -Wreen signifies, likewise, in two passages, Covered; but the words Be-Wreen, Be-Wryne, &c. mean, in a variety of passages, "Express, declare, display." In one place, Υ =Wrynde, Covered, seems to mean the same as en-Vironed.

"Or bee the erthe with lyghte or merke Y-WRYNDE. (St. of W. C. y. 34.)
In another place, Y-WRYNDE seems to signify Kept off, or, as

explained under the original turn of meaning annexed to the word, Cast out—off—or away, just as Expello signifies to Cast out—or away;—and as the kindred term Eruo, (Equo, Traho, Custodio, Vito,) denotes at once 'To Draw out, or Cast out or 'off,—To Keep off, from,' &c. The term Eruere, 'To Rout out,' has the same idea, though it expresses the sense in a stronger manner. In the Song of the Minstrels, the prudent damsel says to her Lover,

Thus, then, if such senses should be readily annexed to the terms which I have produced, and if Be-WRAY does indeed signify

[&]quot; But manne, hee moste bee YWRYNDE,

[&]quot;Tylle syr preeste make on of two."

"To Befoul," their force and spirit may be explained in the following manner. "To Cast, Throw, Draw, Turn up, out, "off, away, aside, over, about, &c.; as the Dirt of the Earth, &c. "1. To Bedaub, to Befoul, Bespatter. 2. To Cast, Throw up, "out, &c., so as 'To Produce, Bring forth, Display, Betray,' &c. &c. &c. g. To Cast, Turn, or Throw about, or over, so as "'To Cover, Conceal,' &c. 4. To Cast off, out, away, &c., so "as 'To Keep off, Separate,' &c. 5. To Turn up, over, or round "about, so as 'To encompass or En-Viron.' To Turn aside, "To make Wry or aWry." I have applied considerable diligence in endeavouring to trace the various meanings, which are annexed to these words, as they have caused great difficulty and embarrassment. It is for want of such arranged explanations, that all our difficulties in Language have arisen.

In Junius, we have the term WROOTE, which he explains by "Suffodere, vel subigere humum Rostro, Humum Rostro Vertere "instar suis," and which he properly refers to Root, Radix, and to Root, "To Root as swine do," to the Saxon Wrotan, Subigere, to the Belgic Wroeten; and Lye likewise records the Islandic Rota. We perceive, that 'ROOT, 'RADIX,-ROOT up, or *Rout up, all belong to this race of words. In the preceding column of Junius is our familiar word WRITE, which, we shall instantly agree, originally signified 'To WROOTE, 'ROOT - or Scratch up a surface, as some Etymologists acknowledge. We know, that Exaro, To WRITE, belongs to the same metaphor of Turning up, or Ploughing up the Ground. I shall shew in a future Volume, and the Etymologists allow the coincidence, that the Greek Grafo, (Γραφω, Scribo,) and the Latin Scribo, belong to Grave—EnGrave—Graban, (Goth. Fodere.) Under WRITE, the Etymologists refer us to the parallel terms in other Languages, as the Saxon Awritan, Writan, the Gothic Wruta, and the Islandic and Runic Rita; and though some refer these words

to Pyrov, Dictum, yet Skinner justly observes, "Mallem deducere " ab A.S. Wrotan, Belg. Wroeten, Terram Suffodere, Versare, fere "ut Lat. Exarare, ab Arando; qui enim scribit chartam quasi " Arat et Fodit." Rostrum is the Rooter up; and accordingly we find, that the preceding term to WROTan, "To Root, Subigere, "Rostro versare," in Lye's Saxon Dictionary, is WROT, "Ele-Again, we mark the explanatory term " phantis Promuscis." Versare, or Vertere, belonging to these words, as I have had perpetual occasion to observe. In the same opening of Lye's Dictionary, where these words are found, are the following, belonging to our Element, WRYHTA, A WRIGHT, Opifex, i. q. WYRHTA, WROHT, Accusatio, (Sax.) WROHS, (Goth.) Accusatio; WROHJan, (Goth.) Accusare; WRITS, (Goth.) Litera; Proboscis; WRITHAN, TO WREATH; WRIXL, Vicis, Vicissitudo, Alternatio, reciprocatio; WRIXLan, Permutare, &c., which I have before produced. In the same opening I find WRITH, Uncia, which belongs to WRITHA, Lorum, and WRITHIAN, "To WREATH, " or Confine, Ligare," &c., as Uncia belongs to a race signifying to Confine, Uncus, Hank, &c., whatever be the precise idea from which these terms are derived. In the same column I find the Gothic WRITHUS, Grex; and we have likewise the Saxon WRETH. Grex, which perhaps directly belong to the idea annexed to WRÆTH, WREATH, Ligamentum, Fascia; as a set of animals WREATHED or Confined together in one spot, company, &c. They may belong however to HERD, and may be derived from the idea of Spoil or Plunder. The HERDS-Man might be the Plunderer. and afterwards the Keeper of Cattle, and then a Keeper in general. In the same page of Lye's Dictionary with HERGian, To Harrow, Vastare, we have "HERGE, Turma; Prædatores "Depopulatio." The Saxon HERD, "HERD, Grex, Armentum," is in the same column with HERE, Exercitus, Turma, Cohors. Hence we have HERR, Master, (Germ.) HERUS, originally denoting, as I imagine,

0) 0)

13

i, j

 J_{-1}

 z_{il}

1

I imagine, the HARROWer, Plunderer. On this derivation I finally repose, as on such an Hypothesis we shall find every thing uniform and consistent*.

The Verruca, the Wart, Verrucosus, "Full of Warts, tumps, or hillocks," &c., are acknowledged to belong to Verro, and to mean the Terra, que sursum Verritur. The corresponding term Wart, with its parallels Weart, Wartze, Weer, (Sax. Germ. Belg.)

^{*} Though the form of the Element AT, &c. v-AT, &c. &c. is now the peculiar object of my discussion, yet it is necessary for us to understand the mode, in which the forms AR and v-AR are related to these, and how indissolubly they are entangled with each other in their points of union. We shall from hence see, how the forms v, b, &c. \AR, ART, &c., or VR, BR, &c. VRT, &c. BRT, &c., are connected likewise with our Element AR, ART, &c.; though, when once generated, they may be considered as constituting distinct Radicals, and they will be accordingly fully unfolded in a separate Work. As these forms do not belong to the general tenor of these discussions, they will be examined in a separate Note. Among the terms in Latin, in which VER appears, as constituting the word, or beginning it, which are to be referred to the Element AR, v-AR, under the train of ideas now unfolding, which VERRO may justly represent, are VER, VEReor, VERetrum, VERu, VERvex, VERRes, VERRUcca, VERRunca, VERto, VERgo, VERmis, VERpa, or VERpus, VERber, VERus. The Ver, v-Er, EAR, EER, (Eag, Ver, Hg, Ver; Diluculum,) belong to the idea of Stirring up, Raising or Rising up, for a similar reason, as the Spring Time conveys the sense of Rising or Springing up. The term EER, (He, Diluculum,) means the Morning, from the same idea of Rising; and hence we have Aur=Ora. The Element AR is doubled to express the idea more strongly, as in OR=OORO, (Oewew, Concito.) The simpler form is seen in ORO, (Oew,) which is nothing but 'To ERA,' (Eew,) 'To Stir up the Ena, Anare,' &c. &c. The On, in Onior, belongs to the same idea; and perhaps we may imagine, that it has assumed the Passive form OR-IOR, from having the Element doubled. In Ver-Bero we have quasi Ver-Ver, or Verro-Verro, for the same reason of adding to the force of the idea expressed. VERRES, the Boar Pig, is the animal, "qui terram VERRIT," as the Etymologists suppose; BOAR is only another form of VERRes, where we have the Element BR. The VER, in VERPa, VERetrum, and VERU, has a similar idea, and means "Id quod VERRit, Fodit," &c. VEREOr, To be in Fear, is quasi VEREOr. Fear is only another form of VEREOr. We see how FEAR connects itself with Fret. The FERRet, the Scratcher up of the Ground, attaches itself directly to Fret, as the vi-VERRa does to VERRo. We here see, how the Element AR passes from VR into BR, FR, and how the T is added under the form FR, so as to become FRT, as it is added to AR, so as to become ART. All this is done without error and confusion; and we see, moreover, at once the general relation, existing between all these forms, clear and distinct, as well as the peculiar relation, by which the words under each form are more particularly attached to each other.

Belg.) &c., attaches itself to words of the same idea in the Teutonic Dialects. In Scotch, WART or WARD means "A tumulus or mound thrown up on high ground, "in the Orkney and Shetland islands, for the purpose of conveying intelligence." Here we have the Tumulus or Tump of Earth, corresponding with the interpretation of Verrucosus; and in the phrase Thrown up, we have the very metaphor, from which I have supposed the term to be derived. The idea of the Crawling or Creeping animal, as VER-mis, I find to be commonly derived from the idea of Scratching up the Ground. 'I shall prove, that Creep belongs to Scrape, &c. &c.; and we have seen, that Arana, the Spider, and Aranar, To Scratch, are connected with each other for the same reason. The Etymologists have justly referred v-ER-mis to ER-po, (Egru,) Repo. I have some reason to imagine, that the form 'RM, 'RP, &c., or 'Rm, 'Rp, &c., is connected with AR, just as ART, &c. ARt, &c. is with AR; and that from hence we have the form RP, as we have that of RT. Thus we see, how Repo is connected with Erpo, (Egra.) This, however, is a point of Hypothesis; and the Element RM, RP, &c., when once existing, may be considered as a separate Element, just as RT is. To Vermis belongs Worm, with its parallels Wyrm, (Sax.) Orm, (Dan.) &c. Hence our name Orme is derived. We see, in Verpa, the form ^{A}Rp . In the English term WARP, and its parallels WERfen, (Germ.) "To throw, cast or fling a thing some-"whither," as my Lexicographer explains it, we have the idea of Stirring up-VERRendi, supposed in my Hypothesis; but in the Mould-WARP, Animal, quod Terram in tumulos Verrit, we are brought to the very action. In considering the terms WREON, WRIE, and its parallels, VRIE, (Danish,) Inflectere, Torquere, we cannot but note other Latin terms, belonging to the Element v-AR, as VIERe, "To bind with Twigs, To hoop," &c., which means, we see, "To Turn about, " or round, to Wind round with twigs," &c. Vietor, Vietus, are supposed to be derived from this word, by the analogy of the Language. When Vietus is applied to a Person "Bowing or stooping with age," as my Lexicographer explains it, "Vetus, " Vietus, Veternus," we cannot but mark, how this term connects itself with Vetus, &c.; and thus we see, how by the most natural process words, which appear most unlike, may belong to each other. This however must be more fully examined in a future Work. We see, likewise, how the Latin VARUS, which means in one sense 'Crooked,' and in another 'Various,' &c., belongs to WRIE, VRIE, &c., and how this brings us to VARius, VARio, VARious, &c. &c. The Latin VARiare means nothing but To Stir about, To Scratch about here and there; and hence it is applied to Scratches -Marks, Specks, commonly of a foul kind, as VARi, "Pits, or marks, made by the " small-pox or measles." VARIO is explained in the first sense by R. Ainsworth, "To Draw with, or be of, divers colours; to mix, to Streak;" where, in the terms Draw and Streak—To Draw Streaks, we are brought to the original idea of Scratching upon a Surface. Let us mark the term Divers, which will shew how VER-to, sus, VARio, coincide in idea with each other, as they, in fact, both mean 'To Turn up or about—here and there.' From the phrase Variare Virgis, we might conjecture, that the VIR-ga was related to VARio, as denoting the Streak—Line, and hence the Rod. I have before supposed, that v-IRGA belongs to the EARTH, as denoting the appropriate Spot of Ground. Perhaps the Reader may imagine, that when we

have brought a term to the Spot, from which it is originally taken, the purposes of Etymology are performed, and that any further attempt to adjust its origin is an unnecessary minuteness. Still, however, as I am desirous to attain as much precision as the case will admit, I have proposed to the consideration of the Reader this idea.—R. Ainsworth explains Virga, in one sense, by a "Streak," which brings us, we see, to the idea conveyed by Vario. When Virga relates to a Piece or Measure of Land, it is in the same sense, as when we talk of a Strip of Land, which belongs to the Stripe, the Stroke or Streak. I shall shew, that Rod belongs to Radius, the Streak, or Stripe, for the same reason; and that from hence we have Rood, the Stripe of Land.

While I am examining this word VIR-ga, I cast my eyes on VIR, VIReo, VIRidis, VIRago, VIRgo, VIRes, VIRus, where the VIR in these words contains the same fundamental idea. The sense of Power and Strength is derived originally, as I imagine, from the Metaphor of Stirring up with force and violence. Hence we have the Strong man—Person—and Strength in general, VIR, VIRus, VIRes. What is Green and Flourishing means only what is Lusty and Strong; and hence we have VIReo, VIRidis. R. Ainsworth explains VIReo, in one sense, "To be lusty and Strong." The VIRgo belongs to VIRago, and to VIR; and in Celtic these words appear under the form GU-R, as Gur, Gureg, Man, Woman, &c.; and sometimes we have the form FR, as Fear, Frag. Hence we have the Teutonic Frau, in the simpler state, as Vira. We cannot but see, how VIRtus belongs to Vir, &c.; and I have shewn, that v-IRtus, v-IRtus, and Arete, Arete, (Agern,) denote the Quality of any thing, as attached to the Stirred up or Cultivated Era, (Ega,) or Earth.

The Latin VERus belongs to such terms as the German WAHR, "True, certain, sure," as I before observed, which connects itself with the race of words denoting Defence— Security, &c. &c., under the forms WR, WRd, WRn, &c. "R, ARd, ARn, &c., as aWare, Wary, Warren, Warrant, Warn, Ward, g-Uard, &c. &c., produced in a former page, (55.) I have supposed, that all these words belong to the EARth, as the peculiar and appropriate spot, Enclosed for the purpose of Protection and Defence. Perhaps, however, these terms for Defence may be derived from actions of Violence, under the idea of Driving away-off, Routing, &c. &c., and may therefore belong to the ERA, EAR-th, EARTH, considered as in a state of Agitation, in the sense of 'To 'HABROW—To HARRY, HERGian, Vastare, Spoliare, Prædas agere,' &c. I must own, that on the maturest deliberation I am inclined to this idea: yet I have justly arranged these words, denoting Security, in a separate portion of my Work, as generally representing a vein of meaning, in which no idea of Violent action or Agitation was manifest. If this idea should be just, we see how Verus, What is True—Sure—or Secure, may belong to such terms which express Violent actions, Driving off-Sweeping off, or Away, &c., as VERRO. We shall perceive, under this notion, how WARY, WARD, &c. agree in sense with the race now under discussion, with which they seem to be altogether entangled. In the phrases "To WARR a per-"son off your Land"—"To WARd off a blow," we see how the sense of Driving off is connected with that of Defence. The very term Defendo means in the first sense, as R. Ainsworth explains it, "To Strike, or Keep off, out, or away;" and in another sense we have, "To avouch a thing, to maintain and stand to it;" from whence we see how we pass at once to the sense of VERUS, To aVER, or Avouch as True.

This union of ideas between Defence and Driving away is perpetual, and it is particularly conspicuous in many of the terms belonging to the race of words now before us. Thus, Wengan is 'Defendere,' and likewise 'Prohibere, Arcere;' and Wengean means 'Maledicere,' where we see the violent sense of Driving away. Let us mark the term Arcere, another of these words.—The term between WER, the Wear, and WERAN, Tueri, in Lye's Dictionary, is WER, War, Bellum; and in the same column we have WER, WARY, and WER, Vir, and WER, Capitis redemptio. We shall now see how WER, belonging to the Latin VIR, and WAR, Bellum, are attached to the same idea, and mean the HARRowing and HARRower. We know, that WAR and GUERRE have passed into each other, as VIR, WER, and GUR, &c. (Celt.) have done. In Dr. Jamieson's Scotch Dictionary, we have WER. WERE, To Defend, to Guard; WERE=Wall, A Defence; WER, WAR, Aware, Wary; and in the same opening of his Dictionary we have Wendie, The feeblest bird in a nest; Were, Wer, &c. Doubt, hesitation, Apprehension, Fear; and Were, Wer, &c. WAR; and To WERY, WERRY, &c. "To Strangle, To WORRY;" WERY, Cross, Vexatious, &c.; where the same fundamental idea exists. The sense of Doubt—Fear, is derived from the idea of being Agitated—WORRIED, &c.; and the Etymologists have accordingly seen, that it has some relation to War. Let us mark the term Worky, belonging to these words. Dr. Jamieson seems unconscious of the affinity of these Scotch words to each other, and appears to have referred each of them to different origins. In the same opening we have WERK, To Ache, and WERK, To WORK. To WERE, signifying Doubt, Apprehension, belongs the compound Den=WERE in old English. It occurs in the Poems attributed to Rowley, and from its manifest sense is justly explained by Chatterton, "Doubt-Tremour." WERRY, To Strangle, appears again in Scotch under the form WYRRIE; and in the same opening of Dr. Jamieson's Dictionary, where this last word occurs, we have Wir, An Arrow; where let us mark Arrow, belonging to the same idea of a Violent action, with motion and noise; To WYR, To sling down-WYROCk, a sort of corn in the foot; i.e. the Annoyer, WIRRY-Cow, a Bug Bear-WYRRY-Hen, applied to the idea of a Destructive creature. Let us here remember our term WHUR, "The fluttering of Partridges and Pheasants, " as they rise," says N. Bailey; who produces, in the succeeding article, "WHUR, To "snarl as a Dog does." The WHURRing Pheasant will shew us, that WYR, the ARROW, conveys the idea of Noise—with that of Violent Agitation.—These terms will sufficiently shew the fundamental idea annexed to the Element WR, and will lead us to conclude, I imagine, that the words for Defence are involved in the same notion, But the Etymologists themselves have directly brought us to this idea. Dr. Jamieson, under "To WER, &c., To Defend, to Guard," produces a long list of the acknowledged parallel terms, Waerian, &c. (Sax.) &c. &c. - Moes G. "WAR-jan. To Forbid;" and he adds " Ihre has observed, that, in most Languages, 'these two ideas of Prohi-" bition and Defence have been conjoined, the same words being used for expressing " both.' And indeed, what is a Prohibition but the Defence of some object in a " particular way; by the interposition of the authority of him who claims a right to " forbid

"forbid the use of it to others; the Prohibition being generally enforced by a certain penalty? Hence Ward, Custodia, Guard."—We shall now understand, how such terms as the Greek Erkos, (Egree, Septum,) Eruko, (Egree, Inhibeo,) Eirgo, (Egree, Ineludo,) Erruo, (Egree, Inhibeo,) Arkeo, (Agree, Auxilior,) &c., in which latter word we see the idea of Driving off, connect themselves with the terms of Violence, Erruko, (Egree, Frango,) Eriko, (Egree, Frango,) Erik

In Lye, we have in different articles, succeeding each other, Wenian, Wenigan, Defendere; Wentan, i. q. Warian, Cavere; Wenian, To Weary, Fatigare, Conterere, which, we see, have the same fundamental idea of some action more or less Violent, of Annoying, Destroying, &c. &c. We here perceive the origin of our word WEARY, whose primitive idea is well expressed by Conterere. I shall shew, that Tero belongs to Terra; for the same reason. In the sense of Warian, Gerere, we see the origin of our term WEAR, the primitive idea of which appears in the phrase "To WEAR and " Tear." We know, that WEAR sometimes signifies, in a simple sense, Gerere—'To "WEAR cloaths;" yet, in the passive signification, when we talk of "Cloaths "Worn out," we again see the original notion. Thus we see, that "To WEARY "a person," is nothing but "To WEAR or Tear him;" and thus the Commentators on Shakespeare need not disturb themselves with efforts at emendation, as they call it, when they change Wearing into Wearying, as in the following passage; "WEARING thy "hearer in thy mistress' praise." The Etymologists understand the union of WEAR and Whary. While I am examining these words in Lye's Dictionary, I cast my eyes on Werse, Werst, Worse, Worst, which, as we see, belong to the same idea. In the phrase 'To be WORSTED in a battle,' &c. we see the original idea of being ROUTED, &c. The word then passes into the sense of the Vile object, WIRESTA, WORST, Pessimus, &c.; and hence we have the WORSTED Stocking, as applied to the Stocking with the Vile, Coarse Thread. The Etymologists derive it from Worsted, a Town in Norfolk. I find in the same column of Junius, with Worse, the term Worry, Vexare, where we unequivocally see the original idea annexed to these words; and Wort, Mustea cerevisia. Next to Werst, Worst, in Lye's Saxon Dictionary, we have, in separate Articles, WERT, Mustum, and WERTS. WORTS. Herba.—The term Wort, Herba, with its parallels, Wyrt, &c. (Sax.) Urt, Ort, (Dan. and Swed.) Wunzel, (Germ.) Radix, &c. &c., denoting a Herb, Root, &c., we should naturally conceive to mean simply the Production of the EARTH, as I before observed, (page 52); yet we cannot but note, how the terms, parallel or related to these words, RADIX, Root, belong to the idea of being Rooted or Routed up; and such perhaps is the notion annexed to Wort, &c. Wort, Mustum, as I before observed. means the Liquid fresh from the WORT or Vegetable, from which it is made. Our familiar

familiar name Warton is derived from the Warton, Wyrt-Tun, "Herbarium septum, "Hortus," as I before remarked. The term Weed may directly belong to Wort; but if it does not, it is assuredly derived from the idea of Eradicating, or Scratching up a Surface. We see its true sense in the use of the verb To Weed, To Root up; and the meaning of Dress, which it bears, is precisely for the reason, that Dress is at once applied to Cloathing, and to the clearing out of Ground—To Dress a Garden, &c. &c.

In Junius, WARIE is produced, as a term in Chaucer and Gawin Douglas, for "Execrari, Detestare;" and he justly refers it to the Saxon Wyrgan, Wirian, &c. Maledicere; and Lye records the Gothic Wargjan, Damnare. Lye has an article, adjacent to this,-" WARR one's Money, Pecuniam impendere," which belongs to WEAR, To Waste away. Again, Junius has WARRY, as used likewise by Chaucer, which he explains by "Errare," and refers to the Saxon Worian, bearing the same meaning. Lye records Vargus, Bargus, Latro; the Islandic Vargur; which he refers to the Gothic Wargjan, Vargus, &c., where we pass into the form BRG. The preceding word in the Lexicon of Junius is a term produced by Lye, WARROK, WARRORS, and explained by "Jumentum," which may mean the animal "Labore " Fatigatum, Vexatum," It is used too, as Lye tells us, "De cane ringenti rabi-"doque," in which sense it manifestly coincides with the words before us, WOREY, &c. &c.; and thus the Jumentum and the Mad dog will mean the animal WORRIED. or Worn down by labour, and the Wornwing animal. He refers us, however, to the Swedish Warok, and the Islandic Varok, which, as he says, mean "Jumentum ad-" arandum tempore Verno; quod componitur ex Var—Ver, et Ox, Bos."

Terms expressing what is Grating—Rough—Harsh—Hirsute, &c., connected with the idea of Grating upon or Scratching upon the Earth, or relating to the Earth, as being in this Grated—Scratched state.

HARSH, HARSK. (Eng. Dan.)
HIRTUS, HIRSUIUS, IRTO, IRSUIO,
ERTO. (Lat. Ital.)

HARD, HART, &c. (Eng. Germ.)
HEURTer, HURTLE. (Fr. Eng.)
The Violent, Harsh, or Hard
collision of objects.

HURTLE Berry, (English,) The Berry upon Rough Plants.

HURDE, HURDLE. (Germ. Eng.)
... The Grate, Crates.

Hürst. (Scotch, &c.) A Rough

Crag-like spot, a Wood of Rough brakes.

HIRSE, HERSE. (Eng. Germ.) A Grain or Grit-like substance.

HOURDER. (Fr.) To Rough cast. HIRCUS. (Latin,) The Hirsute Animal.

Enuggos. (Greek,) The Rough Goat's Beard.

Eric-e, a. (Greek, Latin,) The Rough Prickly plant.

ERICIUS, HORTS, IRCING, ERSCEN, HERISSON, URCHIN, &c. (Lat. Belg. Sax. Fr. Eng.) The Hedge-Hog.

HERISSER — HERSE. (Fr.) To stand an end, as bristles, &c. The *Harrow*.

URSUS, ARKTOS, ARTH, ORS, &c. &c. (Lat. Gr. Welsh, Corn.) The Bear, the Hirsute animal.

In this article I shall first produce a race of words, which denote what is Harsh or Grating to the touch, &c., or in its effect; and hence, what is Hirsute or Rough in general, as to form, appearance, &c., and which, I imagine, are connected with the idea of Grating upon,—Scratching up—Vellicating, Harrowing up—the surface of the Earth. I shall then produce a race of words, which

which relate to the Harsh Noise, or to Noise in general; and which, as I suppose, are directly connected with the Noise made in this action, or, if I may so express it, with the Grating or Scratching Noise, made by objects Grating—Grazing or Scratching upon the surface of the Earth or Ground, or from the Earth or Ground, being in this Grated—Scratched, Rough—Rugged state. We perceive, that Grating and Scratching at once relate to the Action and the Noise. I shall shew, that Scratch—Grate and Graze belong to each other, and to the Celtic name of the Ground, Creat.

I have been already obliged to anticipate two terms belonging to our Element 'RT, &c., HARSH and HIRSute, or HIRSutus.-The Etymologists have produced, as parallel terms to HARSH, various words, belonging to another Element, which I shall not produce. They justly record, however, the Danish Harsk, Rancidus; the Islandic Herskar, Severus; the Spanish Arisco, which my Lexicographer, Mr. Neuman, explains in one sense by "HARSH, unpolished, churlish." The adjoining words in his Spanish Dictionary are Arigo, "Light, easily tilled; applied "to the Ground or Soil;" and Arija, "Mill-Dust, that part " of the flour, which flies about the Mill." The latter word simply signifies Dust or EARTH; and in the same column we have Aricar, "To plough across the Ground, sown with corn: " to clear it of weeds." In the same column with Arisco, we have Arista, "Beard of corn, sharp prickles growing upon the "ears;" which, we know, belongs to the Latin word under the same form; and which means the HARSH - Scratching -Pricking object. Next to Anija is Aniete, "The Battering "ram," which, as I have shewn, is applied to the most violent action of the Element, when it signifies to HARROW up-Tear up-Break up, or Break to pieces any thing.

The Etymologists should have observed to us, that Hanen is only another

another form of HARD, which occurs in various Languages, as in the Gothic Hardu, the Saxon Heard, the Belgic Herd, the German Hart, &c. The idea annexed to HARD, or Solid, might have been derived from the notion of Solidity, annexed to the EARTH, as the terms denoting this idea commonly are; yet, on considering the word HARD, and its parallel terms, I have given, as I imagine, the true turn of meaning annexed to them. Whatever is HARSH or Scratching to the touch is afterward applied to that, which gives any unpleasant sensation to the touch, as HARD or Solid substances do, when struck against; and hence it denotes Solidity in general, without any notion of its original sense. Junius justly explains HARD by "Durus, solidus, Austerus, tetricus, "Prafractus," only that the latter words should have been placed as the original idea, and Durus, Solidus, as the secondary. The German Lexicographer, now before me, has justly explained HART, in one of its senses, by "Sharp, severe, biting, nipping, " searching, tickling;" where we see the metaphor annexed to HARROW, &c., or the idea of Vellication. He justly likewise explains HART by HARSH-ly, and the German HARSCH, by "HARSH, Rough;" and adds, "s. Rauh, HART." Here we are at once brought to the sense of Hirsutus. I have suggested, that the succeeding word to HARSH in Junius's Lexicon, HART, the animal, and its parallel terms Heort, (Sax.) Hirsch, (German,) &c. &c., denote the animal, which possesses the Harsh-Pricking -Pushing or Goading Horns. We here see the idea of the Scratcher or Pricker. Let us mark the explanatory term Austerus, Austere, which belongs to the form of our Element 'S, when the r is lost, with precisely the same metaphor. Austerus is properly explained by "HARSH, rough, sharp." The English word HEARSE, in barbarous Latin Hersia, means perhaps the clumsy Carriage, which makes a HARSH Grating upon the Ground. The great difficulty in determining the origin of a word consists

in knowing its original sense. Junius explains it by "Cenota-" phium, tumulus honorarius;" and he derives it from the Saxon Are, Honor, vel Herian, Laudare. He observes, likewise, that it signifies, what we call 'the Pall;' but Lye justly remarks, that it now denotes "Feretrum ab equis tractum," which might be its original meaning. The term HERSE seems to have the same fundamental idea as Horse, which certainly belongs to this race of words, denoting HARSH or Rough, whatever may be the precise idea attached to it. It seems to have been originally applied to the coarse animal used in laborious occupations, Husbandry, &c. It might have meant the Rough-looking animal, or the animal making a HARSH Noise on the Ground, in moving or Drawing any thing upon its surface. In the phrase 'HARD trotting ' Horse,' we express the Harsh moving animal. I shall refer HACKney to the idea of HACKing up the Ground, in its motion. The word Cart has the same relation to Grate, Cratio, as I conceive HEARSE to have to HARSH, &c. The succeeding word to Hors, in my Saxon Dictionary, is Hors, (Goth.) Adulter; and I find as adjacent terms, Horrung, Whoring, mæchatio, fornicatio, adulterium; Horg, Horh, Sordes, fimus, &c. Sordidus; to which we must refer Hoar, Hoary, Whore; and we shall moreover understand, that they belong to the form of the Element 'R, denoting what is Foul-Filthy, as derived from the dirt of the Era, (Epa,) or Ground. The Etymologists refer us to the parallel term's for Horse, as Hors. (Sax. and Dan.) Ors, (Belg.) Hross, (Run.) Ros, (Germ.) Roussin. Rozin, (Fr. Span.) Ronzino, (Ital.) I shall shew, that these words, under the form RS, for a Horse, belong to Rough, &c.

The Latin Hirtus means "Rough, Shaggy, Hairy;" and Hirsutus, "Rough, Hairy, Prickly, Shaggy. Met. Rugged, unplea"sant, of a Harsh argument," as R. Ainsworth explains them. In Italian, we have Irto, Irsuto, Erto, and in French, Herisser, To Stand an end, and Herisson, the Hedge-Hog. The term Herse.

HERSE, the Harrow, adjacent to this, will shew us the source, from which these words are derived. Another adjacent term, HEURTer, Se HEURTer, "To Hit, knock, or dash, one against "another," belongs to the same idea, and means the HARSH Stirring up or together, Agitating—or Striking one thing against another. This I have produced on another occasion, and compared it with HURT, and HIT, the Greek OTHEO, (Olea, Trudo, Pello, Pulso,) &c. In Italian, the parallel term is URTare. In English, Hurtle signifies Harsh collision or violent Agitation of objects Stirred or Struck against each other, with the idea of Noise, annexed to such actions. The HURTLE Berry, in Danish Hiorte=Bar, and in another Teutonic Dialect Heydelberrien, Heydel-besien, "quod in Ericetis sponte suâ crescant, "Heyde, Ericetum," says Junius, means the 'Berry growing upon-'HARSH or Rough Plants.'

The term HURDLE seems to connect itself with HURTLE; but if it does not belong to that word, it is derived from the idea of an Enclosure, as I have suggested on a former occasion, (p. 88.) The parallel terms produced by the Etymologists are Hyrdl, (Sax.) Hurde, Horte, (Belg.) Hurde, Hurd, (Germ.) Crates; who give us the derivation of Meric Casaubon from Κορδυλη, "quicquid eminet, "et convolutum est;" to which Skinner adds, "Alludit et Enyu, "Claudo, Includo." My German Lexicographer explains HÜRDE by a "Hurdle, Hord, Pen, Fold, Grate." The word Hord now conveys to us the idea of the Enclosure; and this would lead us to suppose, that HURDE and HURDLE had the same idea: But let us note the explanatory term Grate, which might lead us likewise to suppose, that Hurde and Hurde belong to the idea of Scratching or Grating upon a Surface, and that they must therefore be referred to the race of words before us. Grate signifies at once the Instrument, sometimes used for an Enclosure, though not derived from that idea; and it means, moreover, to Grate or Scratch

Scratch upon a Surface. I have observed, that Grate and Scratch, &c. belong to the Element GRT, denoting the Ground, to the Celtic Creat, &c. &c. Now we shall instantly agree, that the Latin Crates belongs likewise to these words. Robert Ainsworth explains Crates by "(1.) A Bundle of rods wattled together. "(2.) A Drag or HARROW to break clods. (3.) A Grate of brass "or wood;" and the verb CRATIO he explains by "To cover "with Hurdles or Grates; to Wattle, to Harrow, or break "clods." This explanation is extremely curious; and hence we should conjecture, that HURDE and HURDLE belong to the HAR-Row, the HERSE, &c.; and thus HURTLE would express that which is annexed to the action of the Hurdle or Harrow. In Saxon. HYRDL is interpreted by Lye, "Crates et Plectrum;" and we now see, that these instruments, apparently so opposite to each other, point out the original idea, by which they are connected; namely, that of one object Grating or striking upon the surface of another. The HURDLE then, as Crates, meant that which HARROWS or Scratches up the Ground; and it then signified the Wattled Instrument, of a Grate-like form, because this instrument was originally used for that purpose, or because the Gratelike form resembled the Grating or Scratching in regular lines upon the surface of the Ground. I shall shew, that the RACK for Hay is connected with the RAKINGS or Scratches upon the Ground, for a similar reason. Whatever be the precise idea, by which the Grate-like form is connected with Grating upon the Ground, we see, that it does exist; and thus, I imagine, is the Hundle connected with the Harrow, Hense, &c.

HURTLE, we know, is used by Shakspeare, &c.; and the Commentators have duly explained its meaning.

"The Noise of Battle HURTLED in the air." (Julius Casar, A. II. S. 2.)

[&]quot;To Hurtle," says Mr. Steevens, "is, I suppose, to Clash or "move with violence and noise." The idea of Noise cannot be separated

" 1. To

separated from the action of Violence in Tearing up—Breaking up— Grating over a Surface. Thus Crash, Crush, Screak, Scrietch, &c., belong to Grate, Scratch, Cratio, &c.; and I shall shew, that Clash, the explanatory term of Mr. Steevens, belongs to the Clod, for Meric Casaubon, as we have seen derives the same reason. Hurdle from Kopouly; and he then adds Huddle, as another term, connected with this Greek word, by a process worthy of an Etymologist. "Est etiam Κορδυλη περιειλημα της κεφαλης, Involucrum Capitis. "Anglis a Hood est Cucullus; unde et To HUDDLE est obtegere, "involvere tanquam pileolo." HUDDLE, which Skinner explains by "Præpropere, temere, et confusim aliquid agere, multa simul "confundere, et sine ordine miscere," certainly belongs to the idea of Agitation, and Tumultuous—Disorderly action, annexed to HURTLE, and the original sense of HURDLE. Skinner justly refers us to the German Hudeln, which my English interpreter explains by "To bungle, HUDDLE, shuffle, hurry, spoil a work, "do it helter skelter." Junius, under Huddle, refers us to HURDLE, for the derivation of Meric Casaubon; though he adds. " Nisi putes esse ex illo Hood, unde Hood wink Anglis est Caput "obnubere pileolo." Milton appears to use the word HUDDLE, as at once connected with Agitation, or a Hurried motion, and the Noise produced by such a motion.

"Thyrsis? Whose artful strains have oft delay'd "The HUDDLING Brook to hear his Madrigal."

In Scotch, Hurdys means Hurdles; and the succeeding word to this in Dr. Jamieson's Dictionary is Hurdle, "'To Crouch "'or bow together like a cat, hedge-hog, or hare; Shirr. Gl. "If not an error of the press, for Hurkle, it appears nearly allied. "V. Hurkill," as that Lexicographer observes. Hurdle and Hurkle are only different forms of each other; and however remote the substantive and verb Hurdle may appear in sense, we shall find, from my Hypothesis, that they have ultimately the same meaning. Dr. Jamieson explains Hurkill, Hurkle, by

4 L,

"1. To Crouch, to draw the body together, as a lion brooding over his prey.—2. To be in a Rickety or decrepit state.—
"3. To be contracted into folds." Dr. Jamieson produces the parallel terms in other Languages, as the Swedish Huka, Inclinatis clunibus humi incubare, "Teut. Hurck-en, Inclinare se; Belg. Hurk-en, To squat, to sit stooping. Fris. Horck-en, contrahere membra ut calefiant. Isl. Hruka, Corrugatio, &c.—
"Hrok, Corrugor, &c.—A. Bor. Ruck, To squat or shrink down."

Here we are brought to the genuine idea. I have supposed, that HURDLE conveys the same metaphor as Grate and Crates, which unequivocally relate to the Ruge, Ruts, Furrows, Gratings or Scratching upon the Grounds; and HURDLE, HURKLE, we see, mean, "In Rugas sese contrahere,-To be contracted "into folds;" and thus we perceive, how the substantive and the verb Hurdle may belong to each other. R. Ainsworth explains Ruga by "A crumple, plait, a Fold;—A wrinkle, a Furrow;" where, in the term Furrow, we are brought to the primitive idea. We shall now understand, moreover, that the very term Ruga belongs to hRuka, hRok; and thus we shall learn, how the forms ARC, &c. and RC, &c. pass into each other. Ruga, we see too, connects itself with its adjacent Latin word Rus, the Ground. Let us mark the explanatory term Rickety, adopted by Dr. Jamieson, which belongs to this race of words, hRuka, &c., denoting the Contracted, Crooked form. Let us note, moreover, the explanatory term Crouch, and the word, which I have adopted, Crooked, which belong to each other, and to Crates, Grate, Scratch, &c. for the same reason. In Scotch, Crouchie is "One that is "hunch-backed;" that is, Crochu, (Fr.) Crooked, &c. &c.; and the preceding word to this in Dr. Jamieson's Dictionary is "CROTE, "the smallest particle," where we are brought to the genuine idea of GRIT, Crotte, (Fr.) Dirt, &c. &c. The preceding term to Crote in the same Dictionary is Croot, "A puny, feeble child," which may belong to these words for the same reason as Rickety does

' bane.'

does to the terms above produced, or it may directly be taken from Crote, as meaning the 'Little, diminutive object.'

The term preceding Hurdys, Hurdles, is Hurdies, "The "Hips, buttocks," which still belong to each other. On this latter word, Dr. Jamieson observes, "Mr. Chalmers gives Hurdies, "referring to A. S. Hurdel, plectrum. But I do not perceive the "connexion between this part of the body, and a Hurdle, or "Wattle." The Hurdeis, the Hips, mean the parts which Hurd, Hurk, or Hurkle, Hurdle out, if I may so express myself, which project Harshly out, if I may so say, as the Rough rising Ridges of the Hurd or Hurdle. I beseech the Reader not to imagine, that the explanatory terms here adopted, Harsh and Hurkle, are remote from the idea annexed to the Hurdies, and that they have been selected only for the purpose of supporting an Hypothesis; as these very terms are applied to a similar object, the Harches and the Hucklebones, in a quotation produced by Dr. Jamieson, under the word Hurkle.

"The Hanches HURKLIS with Hukebanes HARSH and haw."

Dr. Jamieson produces this passage under the second sense of Hurkle; but this point it is not necessary to adjust. The term Hanches belongs to Hunch, as denoting the projecting part. Dr. Jamieson explains Hurkle-backit by "Crooked," or, as he might have said, 'Hunch-backed;' and thus we see, that Haunch belongs to Hunch, as Hurdels does to Hurkle, or Hurdle. In the same opening of Dr. Jamieson's Dictionary, where these words occur, I find Hunkers, "To sit on one's Hunkers, To sit with the "hips hanging downwards, and the weight of the body depending "on the knees," and "To Hunker down, To squat down;" where we see how Hunker, belonging to the Haunches, connects itself with another sense of Hurkle. Every part of Language is consistent with itself; and the same object still continues to be united with the same train of ideas. I shall shew, that 'Huke-

bane, Huckle bone, belong to the form Hack, Occo, &c., and relate to a similar idea of HACKing up or Scratching up the surface of the Ground. In the same column of Dr. Jamieson's Dictionary, where Hurdeis is, I find Hurcheon, or, as it is sometimes written, Hyrchoune, A Hedge=Hog, Hurcham Skin, "A skin "like a Hedge-Hog;" and Dr. Jamieson duly understands, that these words belong to Urchin, Herisson, &c., which I shall produce on a future occasion, and which unquestionably mean the Hirsute animal. In the same column, likewise, we have To Hun, To snarl, to growl, which Dr. Jamieson has justly referred to the Latin Hirr-ire; where we have the form 'R, belonging to Aro, Ear, (Eng.) &c. &c. The preceding term to Hyrchoune is "HIRCH, (ch. hard;) v. n. To shiver, to thrill from cold.—Per-"haps radically the same with Hurckle," as Dr. Jamieson observes. Our Lexicographer is right in his conjecture. In Mr. Grose's Glossary, Hurkle is "To shudder;" and we perceive, that HIRCH, HURKLE, in this sense, relates to the HIRSute—Corrugated—Contracted appearance, with the idea of Agitation attached to it. In the Contractus-leget of Horace, we have the Contracted form only, arising from cold. The Latin Horreo, Horror, &c., belong to the Element 'R, under the same idea; and thus we see how Hirrio and Horreo are attached to each other. The sense, which the ordinary Lexicographers give us of Horreo, fully unfolds the nature of words, bearing this idea. "(1.) To set up its bristles, to have the hair stare, to be Rough, "and look terrible. (2.) To shiver and tremble for fear at. "(g.) To shake, or quake, for cold;" Horresco. "To be Rough "and Rugged." In the "Horret iratum mare," we have the Corrugation of an Agitated surface; and in the following passage we are brought to the original Spot, and the primitive idea.

" Et campum Horrentem fractis invertere glebis."

That is, Arare campum, ita ut Horrest fractis glebis. Let us mark

mark the word derived from Ira, belonging likewise to the same metaphor and the same Element.

There are other terms in Scotch, belonging to our Element ARS, &c., which denote, as I imagine, what is Hirsute, Rough, Dr. Jamieson explains HIRST, HURST, by "1. A Barren "height or eminence, the bare and Hard summit of a hill. "S. A. Bor. Hirst, a bank or sudden rising of the ground; "Grose.—2. A Sand-bank on the brink of a river." Here we have the Locus Hirsutus, Locus Præruptus, the Rough—Rugged, Craggy Spot. Let us mark the epithet HARD, used by Dr. Jamieson; and in a quotation produced by this writer from Gawin Douglas, it is combined likewise with a term expressing the very idea, which my Hypothesis supposes, "With HIRSTIS, "HARSK:" Dr. Jamieson, under HARSK, explains it by "HARSH, "Rough, sharp, pointed." Under the third and fourth senses, Dr. Jamieson explains HIRST by "Equivalent to a Shallow, in " relation to the bed of a River," which he refers to the Islandic " Hriost-ur, Terra inutilis, Verel. Hreyst-ur, barren places."— "It is used for a resting place," where he observes, that "This " is only an oblique sense; as travellers frequently sit down to "rest on an eminence." In these senses, the term signifies EARTH, or Ground, with the idea of the Rough treading in the Ford or Shallow, and the Rough place of rest—the Bare HARD Ground. The word means in another sense, "A small wood;" on which our Author observes, "A. S. Hurst is rendered silva, "whence L. B. Hursta, id. V. Spelman. Germ. Horst, Locus " nemorosus et pascuus, ab opos, mons; Wachter. Teut. Horscht, "Horst, Virgultum: sylva humiles tantum frutices proferens."— "HIRST, without any transposition, might be traced to Su. G. " Har, which exactly corresponds to the common idea with respect " to a Hirst Locus lapidosus, ubi solum glarea et silicibus constat. "Ihre. Or, the term may have been primarily used to denote " the

" the barrenness of ground, as manifested by its producing only "useless twigs and brush-wood, from Isl. Hreys, Hrys. For in " pl. it is rendered, Loca Virgultis obsita et sterilia. G. Andr. "p. 123. Teut. Horst, Virgultum. Afterwards it may have " been transferred to such places, as from their elevation and " bleak situation, are unfit for cultivation." The sense of Brushwood gives us the true idea of the word, and it denotes a Wood, only as it signifies 'Locus Virgultis et Dumetis Asper, Horrens 'et Hirsutus; - The Aspretum,' which R. Ainsworth explains to be "A rough place, craggy, or full of bushes; a Brake." Let us note the term Brake, which belongs to Break, To Break up the Ground, or to the Rough, Broken Ground, just as HIRST belongs to such words as Hirsutus, Herse, &c. &c. Let us mark too the word Craggy, which belongs, for the same reason, to Crates, Grate, Scratch, Crouchie, Crochu, Crooked, &c. &c. &c. before produced. The term HURST occurs in old English; from this term our familiar surname Hurst is derived. words immediately preceding Hurst in Dr. Jamieson's Dictionary are Hirst, the Hinge of a Door, and Hirsp, To Jar; Hirsill or Hirsle, which actually express the Harsh Noise. "HIRST is the place," says Ruddiman, "on which the cribs or " crubs (as they call them) ly, within which the Mill-stone " Hirsts or Hirsills."

HIRSE means Millet, which Junius refers to the German Herse, or Hirs, the Danish Hirsz, the Belgic Hirs, Heers; and to these words we must add the French Ers, a species of Pulse, taken from the same idea. These terms precisely answer in meaning to the word Grit, which signifies little particles of Creat, or Dirt, in a rough Grating state. Ers, Hirs, &c. have precisely this relation to Earth—Harsh, &c. Perhaps Hordeum, Barley, and Oruza, Oryza, Rice, (Opuça, Oryza,) may mean the Grit, Grain-like substances, and relate to a similar idea. Let us remember,

member, that ORUZA, (Opuζa,) is adjacent to ORUSSO, (Opuσσω, Fodio,) To Scratch up, or Dig up the EARTH. In French, we know, Orge is Barley, belonging to Hordeum, and in German it is Gerste. In Greek, we know, it is Krithe, (Kpiby,) which, I think, directly belongs to Grit, Grate, under the idea of Grain. The notion annexed to Krithe, (Keily,) will be little doubted, when I have produced the adjacent word Krizo, (Kei (w., Strido,) which, as we see, directly relates to the Grating Noise. The only difficulty is to decide, whether these words Hordeum and Orge do not belong to the Element CRT. In Hordeum, the H perhaps may exhibit the record of that step in the process, when the Consonant C or cH is passing into the vowel form. shew, that Grain, Granum, &c. belong to the Ground, Grind, Groan, Grunt, &c., for the same reason as Grit is attached to Creat, Cratio, Grate, Scratch, Scrietch, Krizo, (Kaila.) - In French, Hourder signifies To Rough-Cast a wall, which belongs, we see, to HIRTUS—HIRSUIUS, &c. The French Etymologists refer HOURD, a word in Picardy for a Scaffold, and Hourdes, a species of Rustic Shoe, to the German HURDE, "A Hurdle, Hord, pen, fold, grate." The French Hourd and Hourdis may denote perhaps the Rough boarded place, and the Rough coarse Shoe.—The adjacent word in Menage, Hourer, "Mauvais chien de chasse," may perhaps mean the Course-Rough Dogs, "Hourets Galeux," Mangy curs, as they are called by Moliere in a passage produced by Menage.

The terms adjacent to Hirtus in the Latin Dictionaries, which belong to the Element 'RS, 'S, must be referred to the same idea, such as Hircus, or Hirquus, the Goat, Hirquus, the corner of the eye, Hirudo, Hisco, Hispidus, and Historia, remote as the meanings of these words may seem from each other. Hircus, or Hirquus, is the Hirtus or Rough animal. In Greek, we have Iorkoi, (Ioproi, Caprearum genus,) belonging to the same

The Hirquus, the corner of the eye, is so called from the lascivious side glances of the HIRCUS, HIRQUUS, or Goat, "Trans-" versa tuentibus Hircis." Some think, that the animal is the derivative. The Hirquus, or Hirquitallus, is properly explained by Festus, " Hirquitalli pueri, primum ad virilitatem accedentes, "à libidine scilicet Hircorum dicti." The Greek Teayoghas a similar idea. The HIRUDO, "the Horse-Leech, a blood-sucker," is the Hirsutus, the Pricker. I consider the adjacent word Hirundo, the Swallow, to be quasi Hirupo, and to signify the Noisemaking animal. The name of this Bird has been perpetually taken from the Noise, which it makes, Φθεγγομενη λαλος ορνις, as Nonnus calls it; and hence the Etymologists have, among other conjectures, derived it from Epew, Loqui. The English word Swallow, and the Greek Chelidon, (Xeridar,) belong to the same idea of Noise, and must be referred to the English Call, the Greek Kaleo, (Κάλεω, Voco,) and the terms for the Voice in the Eastern Languages, attached to the Element CL. Perhaps Arundo, the Reed, is quasi Arudo, and belongs to REED, which I shall explain in a future page, and refer to the idea of the Rough Bristly appearance.

Hisco signifies, according to Robert Ainsworth, "To gape, to. " open the mouth, to Speak.—To Mutter. To Chark, Chap or "open." Here we have at once the idea of Noise with that of Breaking up or open, as the Ground, &c. Let us mark the explanatory word Chark, which belongs to Grate, Scratch, &c. &c. The Etymologists derive Hisco from Hio, in which latter word the Radical consonant is lost. Hispidus is acknowledged to be connected with Hirsutus. Perhaps the p in this word is an organical addition to the S, and Idus, the termination, as Utus, in Hirs-Utus.—Historia is assuredly derived from the idea of Stirring up-Routing into, annexed to these words; but whether it belongs to the Element AST, or ST-R, is not so plain. If it belongs to

the Element ST-R, it must be referred to the explanatory word Stir, the Latin Struo, &c.; and the genuine form is in the English word Story, &c. The first sense of Istoreo, (Ιστορεω,) is properly given in the ordinary Dictionaries, "Inquiro, sciscitor, "exploro." Many words, relating to Search and Enquiry, have been derived from Stirring up or Routing into Dirt, as Scrutor belongs, we know, to Scruta; and I shall shew, that Scrutor— Search and Scratch all belong to each other. Istoreo, (Iotopew,) should probably be considered as attached to the Element ST-R. HISTRIO, The Player, or Dancer, "Ludio, qui ad tibiæ sonos motus "edebat compositos," means probably the Stirrer about — the Mover, or Dancing Gesticulator. In the same column of Martinius, where Histrio is, I find HITTio, Vestigo, where we are brought to Motion on the EARTH. The Glossaries explain it by Ichneuo, (Ixyeuw,) where in the Ich we again see our Element. The n in this word is an organical addition to the C. The next term to Hittio is Hittus, φωνη κυνος, Vox canis; where we find the sense of Noise.

While I am examining the term Arundo in Martinius, I cast my eyes on the adjacent word Aruncus, which he explains by "Villus, qui dependet à caprarum mento." Aruncus is surely quasi Arucus, and belongs to Hircus, Hirsutus, Rough. Martinius has justly observed, that Aruncus is taken from the Greek Eruggos, Houppos, Villus dependens ex mento Hircorum. Quasi ab Equor, Lanugo, as the ordinary Dictionaries explain it. The terms immediately preceding and succeeding this word, in Hederic's Greek Vocabulary, will establish the ideas, which I have above unfolded. The preceding term is Eruggion, Houppoor, Eryngium, "Herba, Angl. Eryngo, or Sea Holly." The Eryngo, or Eruggion, is the Hirsute, or Prickly plant. The Etymologists have got this idea. Martinius says, that it is "Herba ex genere Aculeata-" rum."—It is called, as he says, by Nicander, Eruggos, Houppos,

"Ea vox alioquin est barba seu villus caprarum, spirillum. " ejus similitudine Herba dici videtur. Hesychius Heuppion exponit " aliquam festucam spinosam, qualem etiam supra acervos fru-"menti soleant ponere." The succeeding word to Eruggos, (Heuryos,) in Hederic, is Eruge, (Heurs, 3. sing. aor. 2. ind. act. ab Eρευγω,) from EREUGO, ^Ructo, which I have before referred to the EARTH. It would be idle to enquire, whether EREUGO, (Ερευγω, ^Ructo, Emitto vel evolvo, quasi Eructando, evolvo,) is more directly to be referred to the idea of Stirring or Casting up the EARTH, or to the Noise accompanying that action. ceeding word to Eruge, (Heuye,) is Erugo, (Heuya, Mugio,) To low. as Oxen; where we are unequivocally brought to the idea of Noise. The succeeding words to ERUCTO, in Martinius, are ERUCA, The Worm, and ERUCA, The Herb. ERUCA, The Palmer, or Canker Worm, is the Corroder or Fretter of Leaves, &c. The Etymologists derive it from eRope, where the Rope has the same notion. I shall shew, that Enugo, Rust, belong to a similar idea.

In the same page of Martinius, where Eruca, &c. is found, we have Erusimon, Equation, "Wilder Senf," as he explains it, a species of Wild Mustard; where, in the Erus, we have still the idea of the Harsh—Pungent, Vellicating Herb. The Etymologists have the same idea respecting the meaning of the word, when they derive it " απο του ερυείν, quod ob caliditatem trahendi facultate præditum sit." The Latin Erica means the Hirsute, or Prickly plant. The Greek Erike, (Equan, είδος φυτου,) is the same or a similar species of Plant; and the Etymologists justly refer it to Ereiko, or Eriko, (Equina, Equina, Frango, Confringo, confundo, scindo,) though not for the true reason, "quod facile frangi, et scindi possit," sed quod frangendi vi polleat. The verb Eriko has the stronger sense of Scratching—Tearing—or Breaking to pieces; and the Erike, the plant, is the Rough Scratcher in a weaker sense, 'quod 'Frangendi vi polleat,' not as applied to its medical effect on

the constitution, as the Etymologists suppose, but as relating to its touch and appearance.

The Latin Erica is interpreted by "The sweet Broom, Heath, " or Ling;" where let us note the explanatory word HEATH, which is either only another form of ERICA, or if it is not immediately connected with this word, it must be referred to our Element 'S, 'T, without the r, denoting what is Rough. parallel terms to the word HEATH occur in various Languages, as Hæth, (Sax.) Hæd, (Dan.) Heyde, (Germ.) &c. The term Heyde, or Heide, means in German "HEATH, or Sweet Broom,— "A Pagan, Gentile, Heathen;" and Heidel-Beer, 'A Billberry, Blackberry, &c., which means only the Berry upon the Rough or Thorny Plant, as we have seen in Hurtle=Berry, another form of this word. We perceive that Heide means an Hea-THEN, as well as a HEATH; and I imagine that this name for the people was meant to denominate the Rough—barbarous people, as they were thus considered by the Christians, from their ignorance of the blessings of the Gospel. The word Barbarian was used in a sense equally comprehensive, as a term of contempt, to denote the nations who were not Greeks. Pagan, we know, was another term of Contempt, adopted by the Christians to denote those who did not believe in Christianity, from the idea of living in the obscure Village—the Pagus. The term Heathen occurs in va-. rious Languages, as in the Gothic Haithnai, the Saxon Hæthen, the German and Belgic Heiden, Heyd, the Danish Hedninge, the Runic Heidner, which the Etymologists have produced. have understood, that Heathen, and its parallel terms, have belonged to Heyde, Erica, Ericetum, "quia, cum in urbibus Chris-" tiana religio passim vigeret, ruri in pagis sc. et locis agrestibus "diu observabantur Ethnicorum ritus, hinc orta est vox Lat. "Paganus." It is impossible not to observe with others, that Ethnicus and Ethnos, (Elvos, Gens, Natio,) belong to Heathen; and

in the Latin and Greek words we see nothing of the HEATH, but only the idea of the Nation, as Gentile, Gentilis, belongs to Gens. This perplexity is extremely difficult to unravel. We might imagine, that Ethnos, (Ebros,) has only an accidental coincidence with the Saxon Hæthen,—that the Latin Ethnicus was directly taken from the Greek word; and that Heathen, &c. belonged more directly to the Teutonic.

Artichoke, though a word of considerable difficulty, might be examined in this place. The Etymologists have produced the parallel terms, as the French Artichaut, or, as it is sometimes written, Artichault; the Italian Articiocco, or Arciocco; the Danish Artiskock, the German and Belgic Artischock, the Spanish Artichofa, as Junius represents it, or Artichoca, as Skinner. If we considered only the form of this word in the Dialects of the Teutonic, we should conceive, that Artichoke meant the Plant, which was of a Choaking Nature, where Arte denotes the same as the German Art and the English Ard. When we see, however, the word in French, Artichaut, or Artichault, we should imagine, that it meant the plant of a Hot nature, from Chaud or Chault, Some have considered the word as quasi Radicaldus, from Radix Calida. The Radix is an idle conjecture, yet the idea of the quality is probable. Menage produces a parallel Greek term, Artutika, (Αρτυτικα); and hence Harry Stephens has observed, "Vulgo dicuntur Artichaux, quasi Αρτυτικοι καυλοι," that is, Caules conditanci, says Menage. This seems sufficiently pro-Yet again, as Menage observes, the Greeks have called this plant Cactas, (Kartos, Cactus, Spinosa quædam planta, Carduus,) and the Romans Carduus. Hence the Herbalists have written it Articactum. Perhaps in the Chaut, Choke, Tuk, &c. of these words, we have the Cactas, (Kantos,) or Carduus; but then we may ask with Menage, whence the Art is derived. This Etymologist once thought, that Articactum was quasi Horticactum.

the Garden Thistle, which is likewise no improbable conjecture.— These difficulties are increased by considering the Arabic word for this plant, which Menage represents by Harschof and Charschop. The first part of this word, Hars, would seem to belong to Art; yet in the Chof, we see nothing of the Choke. In the present mode of writing the term in Spanish, we have Alcachofa. In Arabic, — Hershef means "Scales of Fish.— "An Artichoke. A Thistle." The succeeding word to this is Hershefet, "Rough, Hard Ground." The two following words are Hershun, "A Kind of Thistle, or Bramble," and Hers, "Splitting, Tearing." The preceding term to Hershef is Hersh, Scratching.—Heresh, Rough Skinned; and an adjacent word is HERZ, Rough Ground. We here perceive, that these terms belong to the idea of Rough, and that they might be referred to HARSH, HIRSutus, HERISSER, (Fr.) &c. I have supposed, that all such words are derived from the HERSE or Harrow, Scratching or Tearing up the Ground; and hence these terms signify in Arabic, Scratching—Tearing. On the whole, I cannot but think, that Art, in Artichoke, &c., belongs to Harsh, &c., though it is not perhaps to be considered as directly connected with the Arabic word. The Choke, &c. probably belongs likewise to Cactos, (Kantos.)

An adjacent term to the word Erica, before produced, is Ericius, "An Urchin, or Hedge Hog; — Also a warlike engine "made of iron, full of sharp pointed nails, or spikes." We shall now understand, that these words belong to Erica, under the idea of the Hirsute object. In this word, too, we are brought to the sense of the Harsh or Rough Scratcher, or Pricker. The Etymologists appear to see no connection between these words; but they derive the animal Ericius, Eritius, Eres, Erinaccus, which are the various names for it, from Æs, "quod velut sub "Æreo septo latet." The Urchin, we see, is only another form

form of Exicius, and the n is an organical addition to the C. The Etymologists acknowledge this affinity, and they produce the parallel terms in other Languages; as the Saxon Ircing, Erscen, the Belgic Horts, Hurts, the French Herisson, the Spanish Erizo, the Italian Riccio. The French verb Herisser means "To stand an end;" and the corresponding words in Italian are Arriciare, Rizzar; and we may see, in the Italian words here produced, the two forms 'RC, with the breathing before, and RZ, without the breathing before the R. The Etymologists likewise record the Belgic Nork, for Een-ORK, the Latin ORCA, and the Greek ORKunus, (Opxuvos, Piscis quidam cetaceus, thynnus,) which belong to each other, and to the words produced above. The Orchunos has the same meaning as the Sea Urchin, Riccio Marino, as the Italians call it. We shall now understand, that the Echinos, (Exmos, Echinus, marinus, vel terrestris,) is the U_{rCHIN} , when the sound of r is lost. In Scotch, Hurcheon is An Urchin or Hedge=Hog.

In Italian we have ORCA, "An ORK, a Whirlpool, (a Sea "fish,)" says my Lexicographer, to which he gives us a parallel term, the French Orque. An adjacent term is ORCIO, "An oil pot, "or pitcher;" and the next word is Orciolajo, A Potter, Potier de terre. ORCA is an ancient Latin term for a Vessel, and is justly referred to URCEUS and ARCEO, To enclose. ORCO in Italian means likewise "A Hobgoblin." URCHINS in our ancient Writers are considered as Hobgoblins, or Terrific beings. We all remember the threats of Prospero to Caliban;

- " For this, be sure, to-night, thou shalt have cramps,
- " Side stitches that shall pen thy breath up; URCHINS
 - " Shall, for that vast of night that they may Work,
- " All Exercise on thee."

on which Mr. Steevens observes, "Urchins, i.e. Hedge-Hogs." Urchins are enumerated by R. Scott among other terrifick beings. They are perhaps here put for Fairies. Milton, in his "Masque,

"Masque, speaks of 'Urchin blasts;' and we still call any little "dwarfish child, an Urchin. The word occurs again in the "next act." Mr. Malone adds, "In the M. W. of Windsor we "have 'Urchins, Ouphes, and Fairies;' and the passage, to "which Mr. Steevens alludes, proves, I think, that Urchins here "signifies beings of the Fairy kind:

" His spirits hear me;

"And yet I needs must curse; but they'll nor pinch,

" Fright me with URCHIN shews, pitch me i' the mire."

Let us mark in the former passage of Shakspeare the terms, belonging to our Element, w=ORK and ex=ERC=ise, which are used, we see, in their stronger sense of a Disturbing or Annoying operaand thus we perceive how w=Ork, ex=Erc=ise, and Unchins, are derived ultimately from the same source, and belong to the same train of ideas. The sense of ex=Exc=ise is peculiar, as it directly coincides with the metaphorical signification of ex=Enceo in Latin, "To Vex and trouble." We still, however, use the word to express operations of Toil and Labour, as 'Severe-Painful Exercise'-" To Exercise great Severity over "a person," &c. &c.—The Hedge=Hog, in German Hecke Saw, or Hecke Swein, may mean the Hog under the Hedge, as the Etymologists suppose; or the Hedge Hecke might possibly mean the Rough—Hirsute animal, the Orca, &c. I shall produce in a future page a great race of words, as HACK, Acuo, &c. &c. when the r is lost, bearing the same meaning; and in the German and Belgic terms for the Urchin, produced by Martinius, as Igel, Egel, Echel, the IG, EG, and Ech, have a similar sense. He justly refers these words to the Latin Aculeus; and he reminds us of terms belonging to Akanthos, (Axavbos,) which in the Vocabulary of Hederic is explained by "Acanthus, frutex Angl. Brank-Ursine, or Bear's "breech; - Echinus, Erinaceus;" where the Ak and Ech have the same meaning as in the above words, and the Kan belongs to

the Element KN, bearing a similar sense, as in Kentron, (Kerreoc, Stimulus,—Aculeus,) &c. &c. The Histrix, The porcupine, may be derived from Υ_{ς} and θ_{ς} , though it probably belongs to the race of words before us.

Let us mark the explanatory word Unsine, belonging to URSUS, the Bear, which, we now see, is the HIRSUtus, or Rough animal. In Greek, we know, the term is ARKTOS, (Aprtos,) belonging likewise to our Element, which supplies the name for this animal in the Dialects of the Celtic and some modern Languages. Among the terms recorded by Lhuyd, under Ursus, are the Welsh Arth, the Irish Ursan, and the Cornish Ors; and in the modern Languages we have Ours, Ourson, (Fr.) the Italian Orso, &c. In the latter Language, Orso means likewise a Paring Shovel, which may be either directly derived from the Tearing quality belonging to the Paws of this animal, or may relate to the general sense of the Element of Scratching—Tearing up, &c. To these words belongs the name of the Wild Man Orson, in the well-known Story of Valentine and Orson. The terms in Welsh adjacent to ARTH, in the Dictionaries of that Language, relate to the metaphorical application of Harrowing up a Surface, or to the idea of Annoying—Tormenting, &c. The verb Arteitheio signifies, according to Mr. Richards, "To Rack or torture, to "torment."—Arswydo, "To fear, to dread, to apprehend, to stand "in awe, to be afraid.—Arsang, Oppression." The explanatory word Rack belongs to Rake, Rout, Rut, &c.

We know, that Arktos, (Αρκτος, Ursus, Ursa,—Pars orbis septentrionalis,) means the North, which I have supposed to signify this or that peculiar Earth or region; and that n^Orth is Orth, either with a strong nasal breathing, if I may so express it, assuming the consonant form n, before the Arth, or the N may be the remains of an articular prefix, as An, &c. We have seen, that the Belgic Nork, the Sea animal, is for Een=Ork.

Some

Some perhaps might imagine, that the ARKTOS, (Aprtos,) may mean the Hirsute—Rough—Horrid region, and that n-ORTH may have the same meaning, with the n before the ${}^{\wedge}RTh$, by the process which I have described. Those who are fond of supposing, that certain words, or parts of words, were formed by the similarity of the sound with the sense, may imagine, that the nasal sound n was added to express more strongly the idea of that, which is Rough Whatever may be the precise idea, from which ARKTOS, (Apatos,) is derived, signifying the North; the constellation at the North Pole was probably called the Bear, from a confusion in the sound ARKTOS, (Apuros,) denoting at once this animal, and the n=ORTH. Perhaps Orcades and ORKney may mean the parts of the n=ORTH: Hence, under another form, perhaps, we have HERSE, the HERSE Language, &c. Baxter derives Orcades from "Or or Gor, (quod Scotobrigantibus et Saxonibus est For, " et Græcis etiam Π_{ℓ^0}) atque Cand sive Cad, quod et Caput est et " Promontorium." (Glossar. Antiq. Britan.) Dr. Jamieson supposes, that the term Erse, the Celtic Dialect spoken by the Highlanders, "originated from their Gothic neighbours, from the "idea of their being an Irish colony; for the Highlanders them-"selves invariably call their Language Gaelic." The Herse, however, may possibly be quasi Helse, where we have the g-AELS. when the guttural sound of G is lost in the gentler aspiration of H.

I once imagined, that the ARCADES, or ARCADIA, had the same meaning as the Orcades. If the Cad is significant, we might imagine, that Cad represented the Coti, that great people, whose history is traced by General Vallancey with such success; and Ar might represent the Aire, the term with which they are often combined, Aire-Coti, denoting, as this learned enquirer imagines, "the Ancient Coti." It is curious, that, among other derivations produced by Dr. Barry for the ORKneys, is the following:

following: It is the opinion of Camden, as he tells us, that it comes "from the old British word Ar or Or, that signifies Over against, or opposite to, and Cat, that implies the cape, or point of the Catti, or people of Caithness." Here we see the Ar=Catti, or Aire=Coti, as I have supposed. The Catti, Scots, Scytha, &c. &c. are the Celts, as I have before suggested, (p. 519.) Another derivation of the Orkneys is from Orca, the Whales, which are supposed in ancient times to have abounded in the North Coasts of Scotland. (Barry's Orkneys, p. 72-3.)

The adjacent word to Orso, in the Italian Dictionaries, is Ortica, the Nettle, which, we know, is in French Ortie, and in Latin Urtica, and which, as we shall now agree, means the Hirsute—Pricking plant. The Etymologists derive Urtica from Uro, "cujus folia acriter Urunt, id est, pungunt." Let us mark the explanatory term Uro, which belongs to the form 'R, for the same reason as the words now under discussion belong to the same spot. We perceive, however, that the Elementary form 'S, &c. appears in Ussi and Ustum. Robert Ainsworth has explained Uro in some of its senses, "To Gall or Pinch—To" grieve, tease, or Vex;" and Uror he has explained by "To "Fret."

I shall shew in a future Volume, that the explanatory word Grieve belongs to Grafo, ($\Gamma_{\varrho\alpha\varphi\omega}$,) and Grave, To Scratch up a Surface; and Fret I have likewise shewn to be applied in the same manner, and to be derived from the same spot. Areo, To be Dry, Scorched up, has a similar meaning; and in Ardeo we see the form 'RD. Ardeo is explained in Robert Ainsworth by "To Burn;—To" Scorch, To be tormented, or troubled." The term Scorched is only another form of Scratched—what has a Fretted—Corrugated surface. We see in the sense of Tormented the same metaphor, Harrowed—Scratched or Fretted. I have produced Ardeo in another place, among a set of terms, which relate to a similar action

action on the same spot, and denote, To be Stirred up-Agitated, &c. All these ideas are so blended with each other, that we must be contented with describing the general notion and the action, to which the term originally belonged, without being scrupulously minute in selecting those explanatory terms, which may be conceived best adapted to express with precision the peculiar turn of meaning, with which the word was at first invested. The forms Uro and Areo will bring us to Horreo, where the original idea is unequivocal. In the phrase Horret Mare, Iratum Mare, we see the genuine idea of a Surface Stirred up or Agitated; and it may be considered as a similar metaphor to 'Aratur Mare,' though with another turn of meaning annexed to it. We perceive here, likewise, the metaphorical sense of the Latin Ira, Iratum, derived from the same idea of Agitation—ab Anando. In Horridus, Horrid,—Horresco, and in Iratus, Irascor, the d, &c. may be considered as arising from the construction of the Language, as I have before observed. In the following passage we see Horreo used in its primitive sense:

" Et Campum Horrentem fractis invertere glebis." (Georg. III. y. 161.)

This passage will shew us how Hirsutus, &c. is connected with the Herse, the Harrow. In the Greek Orrodeo, the d may be an organical addition, or it may arise from the construction of the Language. I have produced these words on a former occasion, and they are again exhibited in this place, that the Reader may understand, how every point of view, in which the subject is considered, tends to illustrate and establish my Hypothesis.

CHAP. III.

SECT. II.

^C, ^D, ^G, &c.

Terms expressing actions performed on the Ground, the Earth, Estia, (Εστια,) &c., when it is Stirred up, Agitated, Broken up, Routed up, Cut up, Scratched up, Vellicated, &c. &c., by the various accidents and operations attached to it, as Occo, Hough, &c. &c.—Terms signifying To Stir up, Agitate, Excite, Cut up, Scratch up, Scrape, Vellicate, or Tease, as a Surface, materially; or by metaphorical application; which terms sometimes express actions performed on the surface of the Ground, or which are involved, either directly or more remotely, with words and ideas, relating to such actions, as Ago, Agito, Acuo, (Lat.) HACK, (Eng.) &c. Hence Terms expressing Bodily or Mental Feelings, as of Pain-Terror—Disgust, &c. &c., which are connected with the metaphor of Stirring up—Exciting—Vellicating, &c. &c., as Ach, Achos, (Axos, Dolor,) &c. &c. Terms relating to the idea of Scratching up,—Scraping up—Vellicating a surface, and signifying To Nip up—Catch up—Snatch up—Gripe—Seize—Constringe, as To Hook up or in, &c., Agcho, (Αγχω, Constringo,) and under the form 'GG, 'GK, &c. or 'NK, HANK, &c. pressing Fire and Water, as connected with the idea of Agitation—Commotion, as Æstus, Aqua, (Lat.) &c.—Terms denoting Noise—the Harsh, Grating, Rough Noise, as involved with the notion of Scratching or Grating upon a surface, as HOARSE, &c. under the form 'RS, and Hiss, &c. under the form 'S, &c.

Words

Words expressing operations on the Estia, (Εστια,) Ελττη, Ατκ, Ατς, &c. by Stirring up—Routing up—Cutting up—Tearing up—Scratching up, &c. its surface:—Terms, which are derived from, or are connected with, those words.

Occa-Occo. (Lat.) The Harrow, To Harrow.

OG-OGEID, &c. &c. (Celtic,) The Harrow.

Ege, Egian. (German,) The Harrow, To Harrow.

Ackern. (Germ.) To Plough.

Acker, Acre, Ager, Agros. (Germ. Eng. Gr. Lat.) The Ground.

Egean. (Sax.) Occare.

Eggian—Egg on. (Sax. Eng.)
Excitare.

EAGer, &c. (Eng.) In a state of Excitement.

HOUGH—HOE, &c. (Eng. &c.)
To Stir up the Ground.

Haue-Hauen. (Germ.) A Hoe, Mattock.

Hew. (Eng.) To Cut up.

Hue. (Eng.) The form, appearance, as made by Cutting, &c.

Hough, Hoe, Hock, Huckle-Bone. (Eng.) What relates to the lower part of the person, the Leg or Foot, which Houghs up the Ground.

Hos. (Sax.) Calcaneum, Caliga. Ocrea. (Lat.)

Hose—Hosen, Hosa, &c. (Eng. Sax. &c.) The Covering for the lower part of the person.

Hog—Us, &c. (English, Gr.) What *Houghs*, or Routs up the Ground.

HACK—HASH, &c. &c. (Eng.)
To Cut.

Ax—HATCHET, &c. &c. (Eng.) Acuo, (Lat.) Quasi Occo, To Stir

up, Sharpen up, &c.

Edge. (Eng.) The Pointed—Sharp Extremity.

I SHALL consider in this Section the Terms, under the Element ⁴C, ¹D, ¹G, which express actions, performed on the Ground, the Earth, Estia, (Estia,) &c. &c. when it is Stirred up, Agitated, Broken up, Routed up, Scratched up, Vellicated, &c. &c., by the various accidents and operations attached to it, as Occo, (Lat.) Hough, Hack, &c. &c. &c. I shall likewise consider those Terms, under the same Elementary form, which signify in general to Stir up, Agitate, Excite, Cut up, Scratch up, Vellicate, or Tease, a surface materially, or, in a metaphorical sense, as Ago, Agito, &c. We shall find, that these Terms sometimes themselves express, in one of their senses, actions performed on the surface of the EArth; or that they are involved, either directly or more remotely, with words expressing such actions, or with a train of ideas attached to such actions. Hence have been derived Terms, which express Bodily or Mental Feelings, as of Pain— Terror - Disgust - Wonder, &c. &c.; and objects which Disturb-Annoy—Grieve, &c. &c., from the metaphor of that which HAR-Rows up, HACKS up—Vellicates—Pricks—Teases—Nips, &c. &c., as Ache, Achos, (Axos, Dolor.) Hence we have a race of words, which, under the idea of Scratching up—Scraping up—Vellicating. or Grubbing up a surface, signify To Nip up or in—To Catch up— Snatch up—To Gripe—Seize—Constringe, as to Hook up or in— Agcho, (Αγχω, Constringo.) We see in Agcho, (Αγχω,) or Ancho, how we pass from the form of 'G, 'Ch, 'GG, 'GCh, to that of 'NG, 'NK; and hence we shall find a race of words, conveying a similar train of ideas, under the form 'NK, to which belong HANK, HANG, &c. &c. Under the Elementary form ^C, ^D, &c. we have words denoting Fire and Water, derived from the idea of Agitation, Commotion, &c. I shall likewise consider, in this Section, Terms denoting Noise,—the HARSH—Grating—Rough Noise, as connected with the notion of Scratching or Grating upon a sur-

face,

face, such as Hoarse, &c. under the form 'RS, and Hiss, &c. under the form 'S*.

The

* Though I suppose, that all these Terms are connected, either remotely or directly, with words relating to the EARTH, ESTIA, (Eoria,) and its operations; yet the Reader, if he pleases, may consider this matter as a point of Theory, which in a great variety of cases is distinct from those Etymological Facts, respecting the relation of words to each other, which are now for the first time unfolded in the present Volume. I have endeavoured so to state my Hypothesis, that it may be directed only to the Facts, which I am about to exhibit, as cases placed within the reach of Enquiry; and that it may accommodate itself, as nearly as possible, to any idea, which the Reader may form on the Theory of Languages. It may well be conceived, from the species of Evidence, which this subject is capable of affording, that direct and absolute proofs of the Influence of the Earth, &c. cannot often be obtained; though the Reader, I trust, will be surprised and gratified in discovering, during the progress of our discussions, that the question is capable of supplying collateral and presumptive evidence of so striking and singular a nature. We shall all understand and agree, that the Terms, expressing in one of their senses Operations on the EARTH, must be few in number; and, moreover, that the application of words to this object will oftentimes escape the diligence of the Enquirer. We know, likewise, that the acknowledged Terms, which are peculiarly and familiarly appropriate to such Operations, must be still fewer in number; and hence we shall see, that such direct and absolute proofs of the Hypothesis, which some may require, cannot always be exhibited.— I have endeavoured, however, to perform all, which the nature of the subject will admit; and my own conviction is, that the various Accidents and Operations annexed to the EARTH are the great causes which have been most efficient in imparting that peculiar force and meaning to words, which they now possess in the mechanism of Language.

That these Accidents and Operations will have some influence, no one can doubt; and the degree of influence I must leave every Reader to adjust, according to his own views on the subject, from the evidence which is adduced before him. I must observe, however, that the degree of influence in a variety of cases is partly a point of opinion which every one may accommodate to his own Theory of Languages, and which is rather to be conceived than detailed and described. I have endeavoured therefore to guard myself with considerable diligence, in the statement of my Hypothesis, against any embarrassment, which might arise from confounding the truth of such Facts, which we are enabled fairly to ascertain, respecting the actual relation of words to each other, with the truth of my Hypothesis, as we advance to that point, when Theory may or must in some measure necessarily commence. I have stated, in the opening of my Work, that our Element constitutes a race of words, "which "relate, either directly or more remotely, to the Earth, and the Operations, Acci-

The term which first presents itself to our attention, under the form ^C, ^D, ^G, &c., is the Latin Occo, or Occa, &c., which

"dents, and Properties belonging to it;" and thus I do not embarrass myself with the charge of adjusting at every moment the precise degree of affinity, which words bear to this object, or the precise degree of influence, which this object may be supposed to possess on every occasion. I must again repeat, that the series of Truths, which I detail, respecting the relation of words to each other, may be considered, under one point of view, in a variety of cases, as independent even of the degree of influence, which we may choose to affix to the EARTH and its Operations; that is, the Truths which I have detailed, respecting the actual relation of words to each other, would in a variety of cases remain to a certain point the same, and would still be received and acknowledged, if the influence of the EARTH did not always appear in my discussions, as a prominent and important part of the argument.

The nature of the Facts, which I shall unfold in the present Section, and which I have detailed in other parts of my Work, may be thus briefly stated; and these Facts cannot, I imagine, be denied, whatever opinions we may form on the Theory of Languages. 1. That a great race of words is to be found, which are related to each other, in various degrees of affinity, under the same train of ideas; namely, that of Stirring up-Scratching up-Excitement-Agitation-Commotion, &c., which train of ideas we do really annex to the action of Stirring up or Scratching up the Ground, EARTH, &c., whatever might have been the first and original source, from which these ideas were derived, and whatever might have been the potent—Operative cause, by which they were propagated and preserved. 2. That among those words. thus related to each other, are indissolubly involved and entangled those terms, which actually express Operations on the Ground or EARTH. Under this state of the question, as it relates to Facts, we surely cannot be very far removed from the truth, in point of *Hypothesis*, when from this series of kindred words, we select those terms, as the most important and operative, and as best adapted to illustrate the common train of ideas, pervading the whole race, which are acknowledged by all to express an object most interesting to man, and to denote those Accidents and Operations attached to that object, which are the most important—familiar, and impressive, in the occupations of Human life. If we should perchance adopt any Theory on Languages, which may lead us to conceive a source antecedent to that of the EARTH and its Operations, from which the train of ideas conveyed by this kindred race of words was originally derived; still we cannot but consider the EARTH, with its Accidents and Operations, as being the most important object, on which that train of ideas is most familiarly and impressively exhibited, and by the influence of which, as we should imagine, it would be most effectively propagated and preserved. Even therefore on this point of view, we should justly select the EARTH, and its Accidents-Operations, &c., as supplying us with a series of terms, most forcibly

which directly expresses an operation onthe Ground. The English Hough denotes a similar operation on the same spot, and is only another form of Occo; and the terms for Cutting, as HACK, HASH, HATCHET, Ax, &c. &c., belong to the same words. My German Lexicographer explains HACKE by "A HATCHET, Mattock, Ax, "Pick=Ax;" and HACKen by "To HACK or Chop, im Felde, "To How up, Dig, Delve, Brake the Ground; den Weinberg, "To Grub, or How up." In these German words we are likewise directly brought to the action of Stirring up or Cutting up the Ground; and in our English term Pick=Ax, we see the instrument of Cutting applied to the Ground. The parallel terms for HACK, in various Languages, as produced by the Etymologists, are Haccan, (Sax.) Conscindere; Hacher, (Fr.) Acciare, (Ital.) Hacke, (Dan.) Hacken, Hachten, (Germ.) Hacke, Hachelen, (Germ.) To Hackle, Minutim concidere; Haccio, (Welsh,) &c., which they derive from the Latin Ascia, the Greek Axine, (Azim,) as Skinner, or from the Saxon Acase, or the Teutonic Acus, Securis, as Junius. In English, the various forms for the Cutting instrument, belonging to these terms, are HATCHET, Ax, ADDICE, ADZE, &c.; and under some of these words the Etymologists produce, as parallel, the Gothic Aquizi, the Saxon Æsc, Ex, Acas, &c. &c., the French Hache, Hachette, Aiscette, the Italian Ascia, &c., the Spanish Hacha, the Danish Oxe, the Belgic Ackse, Haetse, &c., the Latin Ascia, the Greek Axine,

forcibly expressing a peculiar train of ideas, which is to be found through a wide compass of Human Speech. But when we take other views of the question, and examine words, belonging to different trains of ideas, the prospect still continues to open before us; and we perceive, that the same Hypothesis is equally potent in the illustration of other portions of Language. I shall assuredly prove this point at least, if I am not violently deceived, that the relation, which words do actually bear to each other, is precisely of such a nature, as it would have been, or as it might have been, if the Accidents and Operations, belonging to the Ground, Earth, &c., had exerted that very species of influence, which my Hypothesis supposes.

Axine, (Azın,) Ake, (Axn, Cuspis.) We perceive through what various Languages these terms have extended themselves, as likewise the various forms which they have assumed, by taking the different Cognate Consonants, C, D, K, S, T, X, &c., with their combinations. We may well imagine, moreover, what effect the existence of words, representing so important an action, would have on those Languages, in which they are found; and I might fix upon HACK and its parallels, as the terms, to which the race of words, under the forms ^C, ^D, ^G, &c., might be justly referred, through a wide compass of Human Speech; that is, the train of ideas, which runs through the words under the form ^C, ^D, ^G, &c., is strongly visible in the sense expressed by HACK and its parallels; and to such terms we might perpetually appeal with sufficient propriety, in order to illustrate the various turns of meaning, which this race of words has assumed.

Every one understands the various metaphorical senses, annexed to the words, which express the action of Cutting; and we shall at once understand, how inseparably these words are connected with the process of Stirring up—Breaking or Cutting up the Ground. The word Cut, and its parallels Seco, Scidi, &c., Skizo, (\(\Sigma_{\chi'}\chi_{\omega}\), Findo, Scindo,) &c., are to be found through the whole compass of Language; and we shall at once understand how they are connected with the action of the Soc, (Fr.) the Plough-Share, on the Ground,—the "Terra SAUcia Vomeribus." The SACK, about which we have heard so much, as a term pervading all Languages, means nothing but the Hollow, or Cavity, derived from the Hollow, or Furrow, so Cut—the 'Terra Excavata vel 'SEcata-Saucia, Arando,' &c. &c. Hence we see, that a word. under the same form, 'To SACK,' is nothing but the verb, with the strong metaphorical sense of Seco, of which SACK, the Hollow of the Bag, is the substantive. 'To SACK' is the same metaphorical

idea, under one Element, as To Harrow, Harry, Hergian, (Sax.) "Vastare, Prædari," are under another. The various senses of the Spanish Sacar, which is nothing but Secare, will shew the different purposes to which this idea may be referred. My Lexicographer explains Sacar in its first sense by "To Remove, to "put out of place;" and in other senses by "To clear, to " free, &c.—To find out, to discover.—To pull out, to draw out, " to extort.—To compel, to bring forth what was hidden.—To "excite passion or anger," &c. &c. However various these senses may appear, the original idea is that of 'To Stir or Turn 'up or out, as the Soil of the Ground,—To Cut up or out, &c.— 'To Draw out-Pull out,' &c. &c. The true idea of the word appears in another Spanish term, which is only a different form of it, and which I find in the same column of my Spanish Lexicon, "SACHar, To turn the Ground with a Hoe or Dibble," as my Author explains it; and "SACHO, Hoe, an iron instrument for Turn-"ing up the Ground." In the same column of my Spanish Dictionary, I find Saco, which means at once "Sack, a bag for "carrying or transporting any thing," and "Pillage, Plunder," as in the English Sack. In the Spanish phrase "Saco del mar, "Bay, port, harbour," we see simply the idea of the Hollow. In Scotch, "To Seuch," as a verb, means "To Cut, to divide;" and, as a substantive, Seuch is "A Furrow, a small ditch."-I shall shew in a future Volume, that Tailler, To Cut, Carve, &c., with its kindred terms Tailor, &c. &c., belongs for the same reason to Tellus.—We may well believe, that the name for the Hollow in general, as applied on various occasions, would be derived from or connected with the Hollow in the Ground; and thus it is, under the Element CP, that Cave, Cap, Cup, Ship, &c. belong to the "Terra exCAvata," or the CAMP-us ex-CAV-atus, &c. &c. To Cavo belongs Skapto, (Укити, Fodio,) Sap, To DigTo Dig out, &c.; and hence we have Chop, Scoop, Sup, Sip, To Draw out, &c.

Terms for the Instrument and Operation, expressed by Occa, Occo, are to be found under the form 'C, 'G, &c. in different Languages. In Welsh, Og and Ogeid is Occa; and in the Armoric we have OGET and OGEDI. In the Cornish it is Harau, corresponding with the form of Harrow. In German, Egian is To Harrow, and EGE is the Instrument. One of the terms, signifying 'To Plough,' in this Language, is Ackern, which belongs to Acker, "A Field, Soil, Ground for tillage," &c.; so that Ackern literally means 'To Soil or Ground,' if I may so express it, that is, 'To Break up the Soil or Ground.' Acker, we know, belongs to ACRE, AGER, AGROS, (Ayeoc.) In Saxon, Egean is Occare, and Egetha, "Harpica, Rastrum, Occa." In the same column of Lye's Dictionary we have "Eggian, Excitare," which, we see, belongs to Egean, Occare; and thus we perceive how Egg, in the phrase 'To Egg on,' belongs to the metaphor of the Harrow, or Occa.—The English word Hough retains, in the mode of writing it, the record of the Radical ^G, or ^C, though in the sound it is not heard. In HoE, a mode, by which this word is sometimes represented, the record of the Radical is lost both in writing and in the sound, and so it is in the parallel terms produced by the Etymologists, as the French Houe, Hoyau, the German Hawe, Pastinum, from Hawen, Percutere, Secare; the Belgic Houwe, Hauwen. Skinner observes, that it would not be absurd ("nec tamen absurdum esset,") to derive these words directly from the Latin Occare—" ausous deflectere à Lat. Occare."

In German, Haue means "A Hoe, Mattock, Pick-Ax," and Hauen, "To Hew, Cut;" from whence we shall understand the origin of our English word Hew, in the phrase To Hack and Hew. The Etymologists, under Hew, produce the parallel terms, as the Saxon Heawian, Aheawian.

Aheawian, Heawen, &c., the Belgic Houwen, the German Hawen, the Danish Hugger, &c. The Hew, or Hue, the Form, appearance, or Colour of any thing, belongs to Hew, To Cut, as the Etymologists understand. "Hiew," says Junius, "Species, Effi-"gies, Figura. A. S. Heow,-Hiw est Forma vel imago, præcipue " talis, quæ fit cædendo sculpendove." Skinner produces the verb in Saxon, Hiwan, Formare, or, as Lye has it, "Hiwian, Simulare, " speciem illusoriam induere, fingere.-Formare." The two preceding terms in Junius are "Hie, Festinare, Properare," and " Hie, Fistuca; i. e. Ansatum et capitibus ferratum instrumentum, " quo pali sublicaque alte in solum depanguntur." He refers us, under Hie, properare, to the Saxon Higan, and Hicgan; the former of which Lye explains by "Tendere, Festinare," and the latter by "Niti, conari, moliri," &c.; which, we see, belong to the idea of Excitement, attached to the action of Houghing up the Ground. The Hig, the Fistuca, is the Exciting — Stirring — Driving Instrument, to which we have the verb Hier annexed. HUE, in 'Hue and Cry,' must be referred to this race of words, signifying 'The Cry, to Stir up—Excite and Rouse the people.' The Etymologists refer us to Spelman, under the Latin Hutesium, and Menage, under the French Hucher; and Skinner reminds us of the English Hoor, where we have the true form. This brings us to the terms denoting Noise, under our Element, which will be explained on another occasion.

The Hoe, Hough, Hock, Hockle, is the lower part of the person, adjacent to that which Hoes up—Houghs or Tears up the Ground. The Etymologists refer us, under Hoe, Poples, Suffrago, to the Saxon Hog, Hoh, the Belgic Haessen, &c.; and Junius observes, "Hinc forte desumpta sunt Hoxing et Huckle-"bone." Lye explains the Saxon Hoh by "Calx;—Poples, Suf-"frago;—Ang. Hough." An adjacent word is the Saxon Hoha, Aratrum; to which Lye adds, "Inde forsan nostra, An Hough,

"Occa Minor." We have likewise in Saxon, Ho, Calx, Calcaneum. We see, that the original meaning of these words, Hon, Hough, &c., is the Calx, the part which actually Houghs up the Ground—' Pars quæ Occat Terram,' just as Calx, the Heel, belongs to Calx, the Stone, against which it strikes. Hough afterwards signified other parts of the Leg, the "Suffrago," which Robert Ainsworth explains by "The Joint of the hinder leg of a "beast, called the Hough, sometimes the Pastern," and Poples, which he explains by "The Ham of one's leg behind the knee." Nathan Bailey explains Hock by "The Small of a Gammon of "Bacon;" and To Hoccle, "To Hamstring or cut the joints "towards the Hough." The succeeding term in this Lexicographer is "Hockley in the Hole," which he derives from Hoc, Dirt, and Leag, Pasture; where in Hoc, Dirt, we are brought to the Spot, supposed in my Hypothesis. We might imagine, that the Greek Οκιαzo, (Οκλαζω, In Genua procumbo, Genibus inflexis subsido,) belonged to Hockle, and it must be owned, that the coincidence is very strong; yet we cannot well decide on this point, till the Element KL shall be diligently unfolded. Junius has an article, "Hoxing of Dogs," which he explains by "Expeditatio, vel Genuscissio," and which he derives from Hoh and Hough. Nathan Bailey has an article, "To Hoze Dogs, "To cut off their claws, or the balls of the Feet," where the word relates to the lowest part of the Leg. In the Huckle-bone, the Hip-bone, we have the highest part of the Leg, &c.

I have supposed in another place, (p. 170,) that the terms for the Hip, or Loins, as Iskis, Iskion, Ixus, Oxus, Osphus, Oskea, (Iσχιο, Ισχιο, Ιξυς, Οζυς, Οσφυς, Οσχεα,) are derived from the idea of the lower part, as connected with the Ground; though I have imagined, that the sense of the Base or Foundation supplied the intermediate step, as in the Persian AST, "The Buttocks," Hips, Backside, Fundament." It would be idle perhaps to attempt

, tory

attempt any distinction between these words, and the terms here produced, Hock, &c., if they are alike referred to the same spot—under a similar idea of the lower part of the person. I shall suggest, on a future occasion, another idea, from which these words may be derived. The Greek Ignua and Ignus, (1910a, 1910s, Posterior genu pars,) seems to be connected with Gonu, (Foru, Genu,) as the Lexicographers imagine; yet it appears to belong to our Element 'G, with the organical addition of the n. The Gonu and Genu might be quasi 'Gnu, where the vowel breathing was lost before 'G, and inserted between the G and the organical n. The adjacent terms IGDE and IGDizo, (1781, Mortarium, Pila; — Genus saltationis, 1γδίζω, Agito Pistillum; — Torqueo, flecto,) belong to the race of words now under discussion, signifying 'To Tear up-Break to pieces-Agitate,' &c. &c. In the interpretation of Igpisma, "Ιγδισμα, Genus saltationis in quâ "Lumbi agitantur, ut Pistillum," it might seem, as if the idea of motion, belonging to the Lumbi, was annexed to the signification of these words. This idea will be considered in a future page.

The Saxon Hoh, the Calx, Calcaneum, sometimes appears in that Language, under its genuine form, as "Hos, Calcaneum." This word likewise signifies, "Rhamnus, vimen, butrus;" and moreover, "Caliga, Ocrea;—unde nostra Hose, Hosen," as Lye justly observes. We perceive how Hos relates at once to the Heel, Calcaneum, and the parts of the Leg, "Caliga, Ocrea." Hose and Hosen mean the Covering for the Legs and Thighs. The Etymologists justly refer us to the Saxon Hosa, Caligæ, the Belgic and the Danish Hose, Housse, the Welsh Hosan, the French Houseaux, and the Italian Huose; though Skinner has improperly added the French Chausse, the Spanish Calcas, &c. We perceive how Caliga belongs to Calx, for the same reason that Hose belongs to Hock. The present Italian form for Huose is Vosa. Let us note the explana-

tory term-the Latin Ocrea, where we observe another form of the Hose. The Etymologists derive Ocrea from Ocris, Eminentia; yet we cannot but perceive, how the Oc in this word connects itself with Occo.—In Barbarous Latin, Hosa is Caliga; and Menage informs us, that in modern Greek, Ousion, (Ouotov,) is used in the same signification. In French, Bas, the Stockings, means, we know, the Base, or Lower part; and our English word Stockings has a similar meaning, and belongs to the Stock, the Stump, the Base or Inferior position. I shall shew, that Calx, the Stone and the Heel, belongs to the Element CL, denoting the Ground, the Solum, Soil, Clay, Clop, &c. &c.; and we shall now understand, that Calceus, Caliga, belong to the same spot. The term Caligo, under a similar form, denoting Darkness, means nothing but that which is Clodded or Clogged up, just as the term Dark belongs to Dirt, Dust, &c. In Colo, we have the Cultivation of the Solum. In Scotch, Hoggers are "Course Stockings without feet," as Dr. Jamieson explains the word. In Scotch too, Hoeshins bears a similar meaning; and this word Dr. Jamieson has justly referred to the Saxon Scin-Hose, Ocreæ, or Shin=Hose.

I shall take this occasion of recording the terms belonging to our Element, which in Menage are adjacent to Houseau, &c. The word Houspiller signifies "To pull, to tug one.—To worry, "to pull, to tear, to bite, as some animals do." Here we see, that this term has precisely the metaphorical sense belonging to Occare, To Tear up; and the Hous should perhaps be considered as belonging to this race of words. Piller is attached to Pull, Vello, Pillage, &c. &c. The French Etymologists refer it to Gaspiller, To squander away, which seems probable; and yet the Gas in this word must be considered as belonging to Gater. The Houspiller appears however to have a turn of meaning somewhat different from the other, and more accordant with the

race of words before us. Menage derives these words from Vulsipilare, "c'est-à-dire, pilos vellere." In old French, Housse-paillier means a Servant of the lowest order, as in Rabelais, "Nerva Houssepaillier—"C'est un valet de cuisine," as the Etymologists tell us, who observe, that "Botez de foin" is an expression applied to beggars, &c. who use Hay wrapped round their legs for Boots. The Houssepaillier then, as they suppose, "est un homme si miserable, que n'ayant pas même du foin pour s'en faire des bottes au besoin, il est obligé de se "Housser, ou botter de Paille." Surely the Houssepaillier belongs to Houspiller, and probably under the idea of the person who Squanders away, or Pillages his Master's property.

Housser signifies in French 'To Sweep the Dust off a surface;' where we are at once brought to the original idea, attached to these words, of Stirring up, or Scratching over a Surface. Hence Houssine means "A Switch," and Houssoir "A Whisk." succeeding word to Houssoir is Houx, the prickly plant—the Holly, which may either mean that, of which Brushes are made, as the French Etymologists suppose, or it may denote the Hough—the Pricker—Scratcher. The next word to this is HOYAU, which my Lexicographer calls "The Pick-Axe;" and we shall not wonder to see terms, denoting the Prickly plant—and the Pick-Axe, adjacent to each other. The French Housse denotes a Covering for a Horse, which we call Housings; and likewise Coverings of other kinds. The French Critics must decide, from the peculiar turn of meaning annexed to the word, respecting the precise idea from which it is derived. From the Covering for the Legs, the name for a Covering in general might be taken; yet there is another idea, which accords with a different application of the word. We see, that Housser signifies "To sweep the dust off "a Surface;" and we all acknowledge, that the idea of a Covering or some ornament, which we express by the name of Dress,

is connected with the Dressing up a Surface. I shall shew, that Dress belongs to Dirt, &c.; and we know, that it is applied to Dressing Land. It is curious too, that we talk of Dressing a Horse, in the sense of 'Rubbing upon his surface,' 'Currying him.' Le Duchat observes, that the "Cheval Housse tantôt signifie un "cheval couvert d'un Housse:-et tantôt un cheval, qui a une " plaie, qu'on vient de Nettoyer." Here we see again, that the idea of Cleaning a Surface is fully apparent, which is likewise most aptly expressed by the same term Dress, as in the phrase 'To Dress a wound.' Le Duchat derives the word, in the latter sense, from Houssoir, a Brush, which is so called, as he tells us, either from Houx, the Holly, of which it is made, or from the German Auss, dehors; "d' ou aussi," as he adds, "nous "avons fait Houss, qu'on dit à un chien qu'on chasse." In Languedoc and Gascony they use Horse for Housse; and from hence Menage derives it from Ursa, because Bear-skins were used as Coverings. Among other things, Housse signifies the Covering used by Women in Winter; and I ought to add, that terms for Coverings are often taken from the Rough-Coarse outward garment, used as a defence against cold; and that terms for the Rough—Coarse substance, are derived from the Bristling— Shaggy appearance, as connected with the Scratched-Fretted surface. Thus we see, how Housse might denote the Rough-Bristly Covering, as connected with Housson, the Brush, and Houx, the Holly. I shall shew, that Brush—Bristle, &c. belong to each other for the same reason.

The succeeding word to Hour in Menage is Hoyau, the Hough or Mattock. Menage derives Hoyau and Houe from Upupa; though other French Etymologists have seen, that they belong to the English Hoe, Hew, &c. &c. Adjacent to Hoyau in some French Dictionaries we have Houage or Houache, a Ship's Furrow; where we are directly brought to the idea of Houghing

Houghing up a Surface. We see, that Furrow is a metaphor taken from an operation belonging to the Ground, and to Plough the Sea is one of the most familiar metaphors in every Lan-The next term to Hoyau is Hoyer, which signifies guage. "Quereller, tanser, et quelquesois appeller;" where we have the metaphorical sense, annexed to these words, of Stirring up—Irritating - Provoking, &c., with that of Noise, likewise. - Hoyer is the metaphor of Houer. Le Duchat derives Hoyer or Huyer The adjacent terms Huc, explained by Voix,— Hucher, "Crier à dessein de faire entendre quelque chose-"HUER, Crier confusement," must be referred to the same race of words, denoting Noise. The French Etymologists derive these terms from HEUS, or the old French word Hus, a cry; and they remind us of the English word Huzza. The Latin Heus, and the English Huzza, must be added to the same race. Huau and Huette, the Owl, belong to these words denoting Noise; and we shall now be reminded of our phrase 'Hue and Cry,' before produced.

Among the parallel terms for Hack, we have in Skinner the German Hackelen, "Nobis To Hacke, minutim Concidere, "Hackelen, item in utraque dialecto linguâ Titubare." This will remind us of our term Haggle, which means 'To Hacke or 'Hack—To make a bargain in a Hackeng, teasing, vexing, annoying manner.' We talk likewise of Nagging in a similar sense, "What a Nagging fellow he is," which belongs to the same metaphor of Notching, or making Notches or Hacks. We see, in the use of Haggle, the idea of Vexing or Teasing, as connected with a Vellicating—Twitching motion; such as we should expect to belong to Hack, as derived from the operation of the Occa. In the phrase 'Hack and Hammer,' we have a similar metaphorical meaning, though the idea of Vexing or Teasing is not so prominent as in the use of Haggle. That authentic and popular Artist.

Artist, Nathan Bailey, explains HAGGLE by "To stand hard "in buying;" and the next word to this is HAGGLE, "To Cut "unhandsomely." We shall now understand, that the HIGGLER is the HAGGLER, and that the HUCKster is the HACKER, by the same metaphor. The Ster is the termination of contempt, as in 'Pun=Ster,' &c., which I have explained in another place. Etymologists derive Huckster from Hocker, (Germ.) Propola, &c., and HIGGLER from the German Hacke, Propola, and Heuchler, Adulator, &c. The preceding word to Höcker, A Huckster, in my German Lexicon, is Hocker, A Bunch on the Back, which belongs to the idea of the Raised surface by HACKING it up. In my German Dictionary, the adjacent word to Hocker is Hoch, corresponding with High. I shall shew, that Hoch, &c. means nothing but to Stir up—Raise up—Hough or Hack up; and thus we see, how Hoch, High, Hocker, the Huckster, and the Bunch on the Back, remote as they may appear, belong to each other. The preceding article to Huckster, in Skinner, is Huck-Shouldered, Gibbus, which he justly refers to this German word. The German Heuchler, the Hypocrite, Deceiver, and afterwards the Flatterer, belongs to the same metaphor of the HAGGLER, under the idea of Fraud and Deception. In German, Knicker, or Knickerisch, means "Niggardly, Haggling," &c., as my Lexicographer explains it. Knicker and Niggard belong to the same metaphor of Notching-Nicking, &c.; and in English, Nick means 'To Deceive—To Nick a person—To Cheat a person,' &c.

The succeeding term to HAGGLE, in N. Bailey's Dictionary, is HAGGLES, "It Hails. N.C.;" from whence we shall see, that the Cutting HAIL Storm, as we express it, is that which HAGGLES or HACKS. The Radical Consonant G is lost, we see, in Hail, but it is preserved in the parallel terms, Hagol, Hagle, &c. (Sax.) Haeghhel, (Belg.) Hagel, (Germ. and Dan.) produced by the Etymologists. Meric Casaubon derives Hail from Chalaza, (XalaZa,)

(Χαλαζα,) which I should imagine to be the fact, if the form HL only had appeared. If Hægle, &c. belongs to Chalaza, (Χαλαζα,) the G is an organical addition to the L. The HECKLE, HACKEL, or HATCHEL, &c. (Hechel, Germ.) is the instrument for dressing Flax, the Flax Comb; where we are brought to the original idea of Vellicating or Teasing a surface. Let us mark, how the term Tease, To Torment, belongs to the same action of Teasing or Scratching upon a surface. Dr. Jamieson explains the Scotch HECKLE by "To dress Flax;" and in the second sense, "Metaph. "To Tease with questions, to examine severely." We here see, that Heckle coincides with the idea of Haggle. Let us mark, how by a just impression the term Tease was adopted in the explanation, though the writer was himself unconscious of the coincidence of metaphor in the two terms, when referred to their primitive idea. Nathan Bailey explains HACK by "To Jade, "also to Hew," where we have its metaphorical meaning preceding its material sense. The term Heckle, as applied to the operation performed on Flax, seems to refer to two different pro-As a verb, Heckle signifies "To Break Flax, To HACK " or Break to pieces;" and as a substantive, it appears to denote the Comb, with which it is Teased or Dressed. HACK, HECK, or HATCH, signifies a small door, which belongs to HACK, To Cut, and is derived from the idea of the Catching motion, annexed to this race of words, just as Carpo signifies to Catch hold of, and means likewise to Tease or Vellicate a surface. This idea however will be more fully explained in a future page.

Nathan Bailey explains HACKLE by "The Slough or cast-off "skin of a snake;" where HACKLE relates to the Hirsute, Rough Surface or Covering, HACKLED or Teased over, as it were. This same Philologist explains HACE by "Harsh, Hoarse;" where we have the Rough Noise, annexed to the action of Notching or HACKing

HACKING up a Surface. In Scotch; HEKKIL, HECKLE, means at once "A Hackling Comb," and Cock's Comb, or the Feathers of his Neck, derived from the same idea of their HECKLED—Teased State or Appearance. Dr. Jamieson has produced the following passage from Gawin Douglas:

- " Phœbus rede foule his curale creist can stere,
- " Oft strekand furth his HEKKIL, crawand clere," &c.

Dr. Jamieson observes, that Ruddiman "has mistaken the mean"ing of the word, as here used," when he explains it by a Cock's Comb. "It signifies the feathers on the neck of a cock,
"and thus conveys quite a different idea from the Curale Creist, or
"Comb, mentioned in the preceding line. A feather from the
"neck of a cock still receives this designation, as well as a fishing
"hook dressed with one of these. V. Heckle," which signifies to fasten by means of a Hook. It is not necessary to decide, whether it relates to the Feathers on the Neck or the Comb, as the same idea prevails. Let us mark, that the Comb of a Cock belongs, by a similar metaphór, to Comb, the instrument, which Teases or Hackles a Surface. In the Poems attributed to Rowley, Heckled is applied, as we shall now understand, with singular force and propriety to Savages wrapped up in the Rough—Staring, Heckled covering of Beast skins.

- "Whanne Scythyannes, salvage as the wolves their chacde,
- " Peyncted in Horrowe formes bie nature dyghte,
- "HECKLED yn Beast skyns, slepte uponne the waste,
- "And with the morneyne rouzed the wolfe to fyghte."

(Englysh Metamorphosis, *. 1, &c.)

Hence we find the following article in Lye's Saxon Dictionary, "HACELA, HACELE, Clamys," which means, we see, the Rough—HECKLED garment. The preceding term to HACELA, in Lye's Dictionary, is HACCAN, TO HACK, HASH, "Concidere, secando "comminuere." In Saxon we have the simple form likewise,

as HECCE, Pallium. In Rowley, the verb to this simple form is used. Hope is addressed by her votary, as oftentimes appearing,

" HECKET ynne a myste, and wyth thyne eyne yblente."

Here Hecket seems to be used in the spirit of its original idea. The person of Hope appears concealed and deformed to the eyes of her votary by the foul black mist, with which she is enveloped, as the person of one, who is wrapt up in the Coarse, Rough covering of the Heck. In Skinner we have Huke, with its parallel terms Huque, (Fr.) Huycke, signifying "Palla, toga, pallium Belgicis fæminis usitatum," originally denoting, as I imagine, the Rough, outside Cloak or Covering.

The words, which are in the same page with HACK in Skinner's Lexicon, are Haggess, Hagger, Haggard, Hag, Haddock, HACKNEY, and HACK, Sepes; which I shall shew, in the course of my discussion, all to belong to the idea conveyed by HACK, To Cut, remote as they may seem from each other in their various senses. Haggess is explained in Skinner, both by "Tomaculum "seu Botulus ex carne Porcinâ incisa," and "Faliscus venter, "seu ventriculus fartus;" and he derives it from Hog, "vel "potius," as he adds, "à verbo Teut. Hacken, Conscindere, Disse-"care." The HAGGESS is the part HACKED or cut into small pieces, before it is dressed. Mr. Grose, in his Provincial Glossary, explains HAG, HAGGUS, by "The Belly," and HAGGIS, or HAGGASS. "The entrails of a sheep, minced, with oatmeal, and boiled in "the stomach or Paunch of the animal. Northumb. and Scotl. "To cool one's HAGGASS, to beat one soundly." The preceding term in Grose is HAGGenbag, which he explains by "Mutton or "Beef baked or boiled in pie-crust. Cornw.;" where the idea of the HACKED Meat is, I imagine, still preserved. The HASLET, in French Hastilles or Hatilles, appears to have the same sense as the HAGGESS. The French Etymologists derive it from Haste, Veru.

We see, that the HASTE, HASTA, (Lat.) still means the HACKER or Cutter. The preceding term to this French word, in the Dictionary of Menage, is Hasterel, or Hastereau, which sometimes signifies Collum; and it should seem, as some imagine, that Hasterel belongs to the German Halz, the neck. Yet Duchat observes, that in an old French Romance, the term signifies "les parties de la "poitrine et de l'estomac jusque vers la ceinture;" and he adds, "Et ce sont ces mêmes parties du porc qu'à Metz, où Rabelais avoit "été, on entend encore aujourd'hui sous le nom de Menue HASTE, "ou Hastille: aussi est-ce uniquement du foye de cet animal que "sont faits les Hasterets ou Hastereaux, qu'on y mange rôtis sur "le gril à la Hâte." It should seem from hence, that HASTE is the simpler form of all these words, and that HASTELLE is the diminutive.

The preceding term to Haslet, in Skinner, is Hasle-Nut, which appears in various Languages, as in the Saxon Hasel, Hasl, the German Hasel, the Danish Hassel, the Belgic Haseler, &c. &c. On the origin of these words it is difficult to decide. Martinius derives them from Hase, the Hare, "quod nucamenta sint ceu "villi pedum leporinorum," and Skinner from the Latin Casula. Wachter thinks, that both these writers are wrong, and that Hasel is derived from Hasel, "proprie Galerus, et metaphorice "calyx nucis, quia galero similis." This conjecture is not improbable. The Hasel, Galerus, belongs, as Wachter justly observes, to the German Hut, which corresponds with the English Hat, and must be referred to terms, denoting an Enclosure.

The succeeding word to HACK, in Skinner's Dictionary, is HACKney, to which he produces the parallel terms in other Languages, as the French Hacquenée, the Spanish Hacanea, Haca, the Italian Acchinea, Acchenea, Chinea, the Welsh Hacnai, "quod "illis," says the Lexicographer, "Equum Gradarium, nobis "Equum conductitium significat." He adds, "Fort. omnia à "Teut.

"Teut. Hengst, Equus, vel saltem cætera omnia ab It. Chinea, et "hoc à Schiena, Dorsum, q. d. Cavallo di Schiena, A Backed-Horse, "a Saddle Horse, a Pad Nag." In English we use both HACK and HACKNEY; and we must observe, that the n is only an organical addition to the C or K. We see, that in the Italian Chinea, the Radical form is entirely lost. Menage has justly seen, that the French terms HAQUENée, HAQUET, HAQUE, and EGUE, names for Horses, belong to Equus. He has not however been thought so fortunate in deriving the Spanish Alfana from this Latin After having told us, that in the Dialect of Arragon they say Faca for Haca; he adds, that from Faca they have formed Facana, and then Facanea, a term still used in Castile. Facana they have formed Fana, and hence, by the addition of the Arabic article, Alfana. If the fact be true, that in Castile they still use Facanea, this derivation cannot be considered as impro-Our Etymologists have not always been least successful, when they have referred terms to each other, which appear altogether dissimilar. Nothing can be more unlike than Bishop and Eveque. Still, however, both the Al and the Fana are probably of Arabic origin, though I have not been able to ascertain the source from whence they are derived. Monsieur Menage concludes the article about Haquenée by producing the celebrated Epigram made on his own derivation of Alfana. "Il me reste," says he, "à faire part ici à mes Lecteurs de cette belle épigramme "que M. le Chevalier de Cailly a faite sur mon étymologie " d' Alfana.

"ALFANA vient d'Equus sans doute,

We shall now understand, that the HACK—HACKney—Equus, is the animal, 'Qui solum movendo Occat, who HACKS up—Tears 'up the Ground in Moving—by Trotting—Galloping,' &c. The

[&]quot; Mais il faut avouer aussi,

[&]quot; Qu'en venant de là jusqu'icy,

[&]quot;Il a bien changé sur la route."

Etymologists derive Equus from Æquo-" quod, quando quadrigis " jungebantur, Æquabantur, &c.—Exw, Cedo, quod animal sit " docile—Oχεω, Veho—Ωκυς, Velox," &c. Our familiar term Horse conveys a similar idea under the form 'RS, corresponding. with Herse, (Fr.) The Hearse, which carries the Dead, has a similar meaning, and denotes the carriage, which Tears up the Ground, by dragging over it.—We cannot in these cases separate the Noise from the action itself; and we might have brought it under the terms, denoting Noise, by Grating on the Ground. I shall shew, that Cart belongs to Crush, Crash, Scratch, Grate, Grit, &c. &c., which are derived from actions on the CRT, the CREAT, (as it appears in the Celtic Dialects,) the Ground. Horse. occurs in the Saxon and Danish Hors, the Belgic Hors, or Ors, the Runic Hross, which the Etymologists have produced, who have likewise given us the German Rosz, the French Roussin, the Italian Ronzino, the Spanish Rozin, which, if they do not directly belong to Horse, and the Element 'RS, with the breathing before the R, must be referred to the Element RS, with the breathing after it. The form RS will be considered in a future page. Skinner derives Hearse, which he writes Hears, and explains by "Pannus Libitinarius, capsæ Funereæ operimen-. "tum," from the German Hulse, Siliqua; "est enim Cadaveris " quasi exterior Siliqua:" and Junius explains HEARSE by "Ce-" notaphium, tumulus honorarius;" and derives it from the Saxon Are, Honor. He observes too, that it means what we call a Pall, "Pannus ille, quem defuncti loculo honoris ergo insternunt." Lye however has justly explained it by "Feretrum ab Equis The adjacent words to HEARSE are Hearth and " tractum." Heath, which assuredly belong to the EARTH. Thus we see, that the HEARSE is connected with the Horse, for the same reason as Haquenée, Haquet, the Dray, belong to the Hackney, or HACK.

Junius has a glympse of the idea, which I have proposed for the origin of these words, when he produces the Etymology of Gesner, who says, that the HACKney is so called, because he makes a noise with his feet, alternately moving up and down, such as we hear when Herbs or Flesh are HACKED or Chopped into small parts upon a dresser by two Knives. He reminds us, moreover, that the Belgic word for the Horse, which the Latins call Asturco, is Klepper, which comes from Kleppen, Sonare, resonare; and that Kalpis, (Kalnig,) in Greek, is the Immog Badiorne, (Equus Gradarius,) according to Hesychius. To these words belongs our English term Gallop .- I shall shew, that a race of words denoting Noise are attached to our Element 'RS, 'S', ^K, &c., under the idea of the Noise made by Tearing up or Disturbing the Ground, in passing over it. Perhaps the idea of the Noise was the original notion annexed to the Element. The effect of the Horse's Hoof in motion, in its Noise and action, seems to have made a deep impression on the mind in every country.

" Quadrupedante putrem sonitu quatit ungulâ campum."

Though we have no evidence to decide on the precise notion which was annexed to these words, Hackney, &c.; yet we can certainly decide on the train of ideas, and on the terms to which they belong. We cannot doubt, that they belong to Hack, &c., as referring to an action on the Ground, by the operation either of swift or slow motion. Similar ideas are presented to the mind, of Noise and Impression on the Ground—the Occatio terræ, whether the motion performed be swift or slow. The name of the Hackney might have been that of the Drawing or Dragging Animal, and the idea of Drawing or Dragging is alike connected with this action on the Ground.—In short, every thing coincides to shew, that these names are connected with the train of ideas, which I have unfolded, whatever might be the precise notion which

which they originally conveyed. We all acknowledge, that HACKney connects itself in form with the verb HACK; and in Welsh the same union is found. The preceding terms to the Welsh "HACNAI, A Hackney Horse," in Mr. Richards' Dictionary. are HACCIO, "To slice, To HACK or cut, to slit or slive;" and HAC, "A Cut, Notch." The succeeding word to the French HAQUENEE is HAQUET, A Dray, which, according to my Hypothesis, still conveys the same idea, and means that which HACKS up the Ground by Dragging upon it.—The Latin Æquo, bearing a similar sound to Equus, conveys a similar meaning. The term Æquo, "To Equal, to lay flat, and level," Excisanque ÆQUAVIT Solo, means nothing but 'To HACK or Rout up the Ground, for the 'purpose of Levelling it, quasi Occo, Frangendi causâ.' We see how the word is brought to the Spot in the phrase which I have produced; and we know, moreover, that the term is again brought to the Spot, when Aguor actually signifies the Surface of the Earth. Thus we see, how the word for Justice, as Equity. what is Equal, may belong to the idea of Breaking up the Ground.

The term Ox, with its parallels, has been referred by Skinner to Occo, "quia, sc. hoc animal tum Pedibus tum Aratro, quod "trahit, Terram Frangit et Proscindit." That it belongs to the idea and the words, attached to Occo, is, I think, certain; but it is not so easy to decide on the precise notion conveyed by it. If it means the animal, "quod Terram Occat Pedibus," it belongs to the same idea as Equus. It may however mean the animal employed in Ploughing, and in this sense it will agree with the combination Ox=Gang, sometimes called Oskin, from "Ox et Gang, Itio; scl. quantum ab uno Bove Arari potest," as the Etymologists have told us. The Ox might mean the animal, "quod Occat," in a metaphorical sense, or the Harrower—the Router—the Fierce—Attacking—Butting Animal. It should

seem, from the Irish Agh, which means at once, "An Ox, Bull, or "Cow,"—"Fear, Astonishment, Awe,"—"A Conflict, battle," as Mr. Shaw explains it, though he has placed the words in these different meanings in three distinct articles, as if the metaphorical sense annexed to Occo represented the original idea. The Etymologists have collected the parallel terms to Ox, as the Saxon Oxa, the Danish, Islandic, and Frisian Oxe, the Belgic Osse, Ox, the German Ochs, Ochse, the Runic Auxs, and the Gothic Auhs, or Auhsns; to which we should add the Celtic terms, which appear in Lhuyd, under Bos, as Υ_X , Eidion, Udzheon, Odion, Ezhian, Eark, Agh, Aithre. Some Etymologists refer these words to Bos, and the b in b-Os might certainly be only a labial sound annexed to the vowel breathing; but on this point it is not easy for us to decide till the Element BS shall be fully examined.

I have before produced Egg, in the phrase 'To Egg on,' and it has been referred by the Etymologists to the Saxon Eggian, and the Runic "Ad Eggia," the Danish "Til Egger," Exstimulo; the French Agacer, Lacessere; the Latin Acutus, the Greek Ake, (Axy, Acies,) and the English Edge. The Saxon Eggian, "To " Ecc, Incitare," occurs in the same column of Lye's Dictionary with Egean, Occare. The French Agacer, "To set the teeth on " Edge.—To Induce, Entice, to Allure," must belong to the race of words before us; and here the Element is doubled, Ag=Ac, in order to render the term more forcible. We shall now understand, that the word EAGER denotes a person in a state of Excitement, and belongs to Egg, &c. The Etymologists refer us to the Saxon Eagor, Ferox, Acer; the French Aigre, the Welsh Egr, the Italian Agro, the Spanish Agrio, the Belgic Egger; and they again remind us of Ake, (Aug,) and the Latin Acer. Lye justly produces likewise the Saxon Eggian, the Islandic Eggia, Incitare; the Saxon Ecge, and Islandic Egg, Acies; with which, as he says, Acies and Ake, (Axn,) correspond. Skinner, moreover, produces the

the Danish and Runic word Eger, Oceanus; and he adds, "Sic "etiam nobis appellatur violentus ille Estus Trentæ fluvii." Let us note the explanatory term Estus, which must be referred to the race of words now before us. It is a very expressive term to denote a violent state of Agitation, and is equally applied to the commotion by Fire or Heat, and Water. Let us likewise note the term Heat, which belongs to the same train of ideas. The words relating to Fire and Water, which are attached to our Element, will be examined in a future page.

Terms, denoting what is Sharp;
—What Cuts, or HACKS, &c.
Id, quod Occat.

Oxus, Ake, Ak-Oke, Akon,

Acuo, Acutus, Acer. (Lat.)

&c. &c. (Gr.)

AIGU, AIG=UISer, &c. &c. (Fr.)

Acido, AGO, AG=Uzzare. (Ital.)

&c. &c.

EDGE, ECG, &c. &c. (Eng. Sax.)

HECK, ECKE. (Old Eng. Germ.)

The Sharp projecting Point,

or Edge.

AKTE. (Gr.) The Sharp Edge of Land—The Shore; and the Ear of Corn with the Sharp Edge or Point.

Aнs, Есніг, Атнег, &c. (Goth. Sax. Greek, &c.) The Sharp-pointed Ear of Corn.

Akros. (Greek,) The Edge or Extremity.

Ах, Натснет, &с. Æх, &с. Насне, &с. &с. (Eng. Sax. Fr. &c. &c.)

HACKE. (German,) A Hatchet, Mattock, Pick-Ax, &c. &c. &c.

WE now understand, that we must refer to such terms as Egean, Occare, HACK, &c., a race of words, which denote what is Sharp—Sharpened up, &c., and which are derived from the notion of Excitation or Irritation—of Stirring up—Scratching up—Tearing

up—Hacking up, if I may so express it. Hence we have Acuo, Acutus, Acer, Acies, Acumen, Acus, &c. &c. (Lat.) Oxus, Ake, AKOKE, Akis, AICHMe, AKOUS, OF AKON, AKONE, AKONGO, (Oğuş, Acer; Aun, Arwan, Acies Ferri; Aug, Cuspis ferri; Aixun, Cuspis; Aκων, vel Ακους, Jaculum, ab Ακη, Ακονη, Cos; Ακοναω, Acuo, Exacuo;— Impello, Incito,) EDGE, (Eng.) &c. &c. &c. with the various terms, under the Element ^C, &c., relating to the idea of what is Sharp— Piercing—Cutting, &c., which are to be found through the whole compass of Language. The Latin Acuo is interpreted by "To "Whet-To point-To provoke;" and ACER, by "Sharp, sour, " poignant, tart, EAGER, Acrimonious, virulent, - Courageous, "brisk, strenuous, smart, pert, metalsome, sturdy." I have given these interpretations, that we might be fully impressed with the various turns of sense to which these words are applied. We shall unequivocally perceive, that Acuo, "To Sharpen up-"Stir up-Whet-Provoke," is only the metaphorical application I shall not attempt to produce the acknowledged derivatives of Acuo, Acer, as Acidus, Acetum, &c. &c., with the parallel terms in modern Languages, as Acute, Acid, (Eng.) &c. &c., Aigu, Aigre, Aiguiser, Aiguille, &c. (Fr.) Acido, Acre, Ago, Aguzzare, &c. &c. &c. I cannot however forbear producing some terms directly belonging to this race of words, about which some difficulties may exist. In the Latin Acerbus, the Ac is acknowledged to be attached to Acuo; and even the portion Acer in this word might belong to the form Acer, the adjective, with the b as an organical addition to the R. Yet the Erbus might belong to Herba, as the word appears peculiarly to relate to the 'Unripe' productions of Nature. In German, however, Herb méans "Harsh, "Rough, Sharp;" and to this Erbus might be referred. The Acer, the Maple-tree, is so called, say the Etymologists, "quod Acre "et durum ejus sit lignum." Martinius derives the German Ahorn, the Maple-Tree, from Acernus. The Acerra, the Censer,

is supposed by some to be so called, "quod Acerna sit, id est, ex "Acere facta." Perhaps it receives its name from containing the Incense, or the Sharp—Pungent Smell.

The Akoniton, (Axovitor, Aconitum, Herba venenata,) is imagined to have been so denominated, "quod in sv raus axavaus, seu cautibus nascitur; yet perhaps it is derived from Akonao, (Azovaw, Acuo, Exacuo; Impello, Incito, under the idea of its being a Sharp-Violent Poison. Acinum or Acinus, the Stone of any fruit, is derived by some from Acuo, because, as I imagine, the Stones in comparison of the fruit are Sharp or Hard to Bite, &c. Acinaces, Annuage, the Persian weapon, is derived from Ake, (Aug); yet Vossius observes, "In peregrinis Græcum quærere etymon "insanire est." I find no Persian word to which I can readily refer this term. The Acipenser, the Fish, has been derived "ab "Accipiendo," vel "quia se in Aqua Pandat—vel quia est Acie, "vel Acumine Panso, hoc est, quia lato est rostro et patente." Vossius thinks, that Acipenser is quasi Acipesner, ab Acumine " Pesnæ, hoc est Pennæ. Nam antiqui, Festo teste, Pesnæ et "Cœsnæ pro Pennâ et Cœnâ." The word under this idea may perhaps be derived from Acus and Pinso, To peck, from its Sharp Beak or Nose. The Aich in Aichme, or Aich-chme, (Aixun, Cuspis,) we must surely refer to Ake, (Axy); and if that should be the case, the Ak in Akme, or Ak-kme, (Axun, Cuspis, Acies,) must be referred to the same source. The Chme or Kme is Chame, Kame, and belongs to the Element CM, denoting the Top or The Ai and the A, however, may have only been the representatives of some articular Prefix. The Latin Acumen might be a compound of the Ac and Cumen, or the Men may be only the addition from the analogy of the Language. The origin of the Greek Oxus, (Ozus,) will be acknowledged when we recollect the term Oxina, which actually signifies the Occa, or Harrow, (Ožva, Crates dentata ferreis stilis.)

The Edge, we see, properly denotes the Sharp Extremity, and afterwards the Extremity or Boundary in general. mologists have recorded the parallel terms to Edge, as the Saxon Ecg, Ecged, the Islandic Egg, the Danish Eg, the old Belgic Egge; and they have justly produced likewise Ake, (Ax η ,) Acies,& c. Junius records moreover the terms in Suidas and Hesychius, Ηκη, η Οξυτης του σιδηρου. Ηκες, Οξυ. Ηκεα, Οξεα. English we have HECK, which occurs in the Poems attributed to Rowley, and is interpreted by Dean Milles, the Height. precise meaning of the word is that of the EDGE, the Sharp-Projecting Point of Land.

- "Stronge ynn faithfullnesse, he trodde
- " Overr the waterrs lyke a Godde,
- "Till he gaynde the distaunt HECKE,
- "Ynn whose bankes hys staffe dyd steck."
- "Thenn the foulke a brydge dydd make
- "Overr the streme untoe the HECKE."

(Song of Seyncte Warburghe.)

Hence is the origin of the German Ecke, which signifies, as my Lexicographer explains it, "A corner, angle, nook, Ecke oder " Spitse, des Landes, a Point, Cape, Promontory, Fore-land;" where, in the explanatory words Spitse and Point, we have a similar metaphor of the Sharp Extremity. The same Lexicographer explains Spitse by "The Point or Tip, (the Sharp End of a "thing.)" The succeeding term, in Wachter's Glossarium Germanicum, to Ecke, which he explains by "Acies, Cuspis, &c., and refers to the English Edge, &c., is Ecke, "Angulus, cuspis " ex concursu duarum linearum, Græcis Ayxav, per Epenthesim, " Latin. Angulus, Belgic Hoek," &c. I shall shew, that Angulus is quasi Aggulus, and that it belongs to this race of words. Wachter, under Ecke, makes a scanty collection of the terms, which he imagines to belong to the idea of the Sharp-pointed

object, &c. Among these he enumerates the Latin Occa, the German Egge, bearing the same meaning, &c. &c. &c. succeeding word to Ecke, in my German Dictionary, is Eckel, "Disgust, distaste, dislike;" which belongs to the very same idea of the Sharp object, in its metaphorical sense of Teasing—Annoying, &c., just as Acerbus means in one sense Displeasing, as R. Ainsworth explains it. In the succeeding column of my German Lexicon we have Ege, the Harrow, the term produced by Wachter, which points out to us the train of ideas annexed to these words. Wachter sees no connection between Echeln, Aversari, and Ecke, though they are adjacent to each other in his Glossary; but he derives Echeln from the Greek Adyen. He justly however refers us to the Saxon Eglan, Dolere; to which belongs our term Ail. Wachter produces, among the terms attached to Ecke, Cuspis, the words Ahsa, (Goth.) Æchir, Egle, and Eglan, Spica. From hence we shall understand, why AKTE, in Greek, (Auty, Littus, Farina, fruges,) relates at once to the ECKE, the Sharp Projecting Shore or Land, and to Corn; or originally, as I conceive, to the Sharp Ahsa, or Æch-ir, the Ear of Corn. Under this idea we shall see how Akte and Ake, (Azty, Aug, Acies,) agree with each other. Homer applies AKTE, (Autg.) HECK, to the High Advanced part of the Shore—the Head-Land, or Projecting Point of Land, on which the waves beat with noise and violence; and the Scholiast has justly conceived the word, as denoting 'the Craggy Spot on the Sea Coast, on which the ' waves break.'

Αργειοι δε μεγ'ιαχον, ως οτε κυμα ΑΚΤΗ εφ' υψηλη, οτε κινησει νοτος ελθων Προβλητι σκοπελω. (Β. 394, &c.)

[&]quot;Argivi vero altum clamabant, sicut quando fluctus ad Littus "altum cum eum admoverit Notus ingruens Procurrenti scopulo."

"AKTH.

" ΑΚΤΗ, ο παραθαλασσιος και πετρωδης τοπος. Απο του περι αυτον Αγεσθαι, " ο εστι, ρησσεσθαι, και περικλασθαι τα κυματα." We might suppose, that the Aig in Aigialos, (Aryrahos, Littus,) belonged to AKTE, (Αντη); yet I imagine, that Aigialos, (Αιγιαλος,) is a compound, and only another form of Agchialos, (Αγχιαλος, Mari vicinus, ex Ayzi, et Als, Mare.) I have produced these words Heck, Ecke, and Akte, &c. (Auth,) on a former occasion, (p. 114,) as denoting the Enclosure; though I have there suggested likewise, that HECK may belong to Edge. In this opinion I finally repose.—I state on the present occasion, that the HECK, &c. means the Sharp Extremity of Land, which in fact is the Bounding Shore, and such was afterwards the general sense of Heck, &c. desirous of proceeding, as far as I am able, in my investigation on the original idea annexed to words; and I have now, as I imagine, advanced to that point, and have decided on the primitive notion. I produced, on a former occasion, other words, as denoting the Enclosure or Bound; and I have nothing now to add to the observations with which they were illustrated. Some of those words will however be again brought under consideration in a future page of my Work.

The term Akte, (Arth, Farina, Fruges,) as relating to Corn, denoted originally, as I imagine, the Prickly Ear of corn. We have seen, that a German Lexicographer produces Spitze, in his interpretation, as a parallel term to Ecke, or the Akte, (Arth,) the Sharp Point of Land; and it is curious, that Spitze actually relates to the Sharp—Pointed Ear of Corn—"Spitze einer Kornahre, "the Beard of a Corn Ear," as the same Lexicographer explains it. Thus, then, Akte, (Arth,) will bear two senses similar to Spitse, and for the same reason. Let us mark the explanatory terms, the English Ear, and the German Ahre, which convey the same metaphorical meaning, whether they are considered as belonging

belonging to the Elementary form 'R, or to 'Cr. If Ear, &c., the substantive, belongs to the form of the Element AR, we must directly refer it, as we should readily imagine, to EAR, (the verb.) To Plough, Ano, &c.; and if it belongs to the form ^Cr, it would be naturally referred to such terms as HACK, &c. &c. In some Languages, Ear appears under the form ^C, &c. ^Cr, &c., and in others under that of 'R. Among the parallel terms, the Etymologists produce Ahs, (Goth.) Aecer, Ahr, Eare, &c. (Sax.) Aaker, (Su. G.) Akran, (Moes. G.) Ahr, (Germ.) Aer, Ader, (Belg.) Ather, (Abye,) Arista, &c.; and to these we must add the Scotch Echer, Icker, 'Acher-Spyre,' &c. It should seem, as if in these words the various forms 'R, 'S, 'RS, &c. were united: The form 'R in some of them seems to be directly taken from the form 'Cr, and the letter H seems to be a record of the Ch, as in Ahr. Whatever may be the mode of considering these words, in our arrangement of the proper forms to which they should be referred; the idea, which they convey, is unequivocally that of the Sharp—Pointed object. When we consider the form ^Cr, we cannot but note the same form in Acer; and we shall now understand, that the Greek Akros, (Augos, Summus,) an adjacent word to Akte, (Azzy,) is another term of the same kind, and that it belongs to the idea of the Sharp Edge, or Ake, (Aug,) the Top or Extremity. In Scotch, Acher-Spyre means "To Sprout or Ger-"minate," which Dr. Jamieson has justly referred to Echer, or Aechir, the Ear of Corn, and Spire, the Sharp Point. This is all very just, except that Acher, in the compound Acher-Spyre, conveys the general idea of the AKR-os, (Akpos,) the Sharp Extremity.

To the Greek Ather, (Αθηρ, Pars Spicæ acuta,) belong the ETRA in Phar=ETRA, (Φαρετρα, Pharetra, Theca Sagittarum,) the Bearer or Holder (from Φερω, Fero,) of the Sharp-Pointed object;

and

and Eethra, or Eeter, in Our=Eethra, Our=Eeter, (Ουρηθρα, Urinæ meatus, Oventus, Meatus urinarius, fistula urinaria, ab Perhaps Etheira, (Eleipa, coma, cæsaries, jubar equorum,) has the same meaning of the Pricking—Bristly substance. I am examining the word Ather, $(A\theta_{\eta\rho},)$ I cast my eyes on Athera, or Athara, (Abyea, Abaea, Pultis genus,) which perhaps originally referred to the Bearded Corn...Athrene, (Alenn, Genus apis,) which means, I imagine, the *Pricking—Stinging* Animal, of which word Anthrene, (Autom, Crabro,) appears only to be another form. I shall shew, in a future page, that Anth belongs to the form ATH, by the organical addition of the n. I find likewise ATHReo, (Aθρεω, Video, cerno, &c.) which may mean to Scratch or Search into any thing; a metaphor, as I have perpetually had occasion to observe, most familiar—Athroos, (Abgoog, Confertus, in unum collectus, coacervatus,) which may convey the idea of 'Scratching or Scraping together, quasi Corradere; and ATHURO, (Abugu, Ludo, Lusito,) which, I imagine, originally meant 'To Scratch together or 'about—To Stir up or about—here and there, in an idle playful 'manner.' Let not the Reader imagine, that my idea on the original sense of these words is remote from their present meaning, and that it was suggested only by the spirit of supporting a favourite Hypothesis. Whether these words should be considered as belonging to the form 'T, &c., or TR, &c., or as compounds of these forms; still the idea, which I have exhibited, supplied, as I conceive, the original sense of the words; and I can prove, that the terms Athuro, and Athurma, (Αθυρω, Αθυρμα,) unequivocally convey the meaning, which I have here unfolded. are applied in the very passage, quoted by the ordinary Lexicographers for their illustration, to the precise action supposed in namely, to the idle amusement of a boy my Hypothesis; Scratching about the Dirt, here and there, with his hands and feet.

Ερειπε δε τειχος Αχαιων

Ρεια μαλ', ως στε τις ψαμαθον παϊς αγχι θαλασσης,

Οστ' επει συν ποιηση ΑΘΥΡΜΑΤΑ νηπιεησιν

Αψ αυτις συνεχευε ποσιν και χερσιν ΑΘΥΡΩΝ. (Il. O. v. 861.)

We cannot but perceive, that in the application of Athurmata, $(A\theta\nu\rho\mu\alpha\tau\alpha)$, we have the idea of Scratching or Scraping together, as in Athroos, $(A\theta\rhooos)$; and in that of Athuron, $(A\theta\nu\rho\omega\nu)$, we have the idea of Scratching about, or of Scattering.

To the Greek AKROS, (Axeos,) belongs immediately, as I imagine, its adjacent term Akroaomai, (Akroaopau, Audio,) which signifies only "To Stand a Tip toe," as we express it, as in a posture of anxious listening to the discourse of another. It is particularly applied, we know, to the act of Listening on solemn and important occasions, as to the Audience Chamber of Judges trying causes; to Pupils listening to their Teachers, &c. (Axeout neior, Auditorium; locus in quo judices ad cognoscendam caussam conveniunt, Azeoutys, Auditor, Discipulus.) In the same column of my Greek Vocabulary, where Akroaomai, (Akeoaomai,) appears, we have Akro-Bamon, (Ακροβαμων, Qui erectus in summos pedum digitos incedit;) where we see the very action which is supposed in my Hypothesis. We cannot but note the term EAR, Auris, bearing the same form, as the EAR of Corn; from whence we might suppose, that they belonged to each other, and that the EAR, Auris, was attached to the idea of the Sharp Pricking object, by the same metaphor which we apply, when we talk of Pricking up the Ears—Arrige Aures. The term Ear, and its parallels Auris, Ous, (Ous,) &c., pass under the same variety of forms, AR, ^RS, ^S, &c., as the Ear of Corn; and they seem moreover to connect themselves with HEAR, HARK, Audio, &c. &c. collected these terms on a former occasion, (p. 109); and I shall produce them in another part of my Work, that the Reader may examine them under various points of view. On the whole he will will discover, that the terms for Hearing, as Audio, &c., are not directly connected with words, denoting Attention, as referred to the Enclosure, or Guarded Spot, according to my former conjecture.— Nothing is so difficult as to adjust the primitive notion, existing in words, when they convey ideas which are alike attached to different senses of the Element.—In such examples I endeavour to perform all which the case will admit, by exhibiting the words before my Reader, under the various points of view in which they may be conceived.

I have already produced (p. 657,) the parallel terms to Ax, HATCHET, ADDICE, ADZE, as the Gothic Aquizi, the Saxon Æsc, Ex, Acas, the French Hache, Hachette, &c. &c. I shall not attempt to produce the different forms in various Languages, under which the name of the Ax, as attached to our Element, is exhibited; but I shall only observe, that they are alike to be referred to the race of words, which I have here unfolded. I cannot however forbear producing certain terms conveying this train of ideas, which are not so generally known. In Welsh, Hogi means "To Whet or Sharpen, to make a Sharp " Edge or point," which the Lexicographers in this Language have referred to Onyw. Awar likewise means "The Edge or "Sharpness of a weapon or tool;" and it denotes, moreover, "Vigour, liveliness, vehemency." These senses precisely coincide with the meaning of Akmė, (Axun, Acies, Vigor.) In Welsh, likewise, Egalen and Agalen signify A Whetstone; and these terms the Lexicographers refer to the Cornish and Armoric Agolan, Igolen, and the Greek Akone, (Axorn.) The preceding word to Egalen, in my Welsh Dictionary, is EG, An Acre; where we are brought to the spot, from which it is derived.

On the opposite side of the page, in Mr. Richards' Dictionary, we have Egr, "Sour, sharp, tart, biting, Eager, poignant, Egori, "To open;" and this he has justly referred to the Greek Oigo, (Oiyu,)

(Oiya,) which, as we now see, relates to the Hacking up— Breaking up, or Opening of the Ground; - EHAGR, or HAGR, Ugly, Deformed; EHEGR, Swift, &c.; EGRygi, Hoarseness; EGRyn, Fear, trembling; and EGR, an ACRE; where we are brought to the original spot. Adjacent to the term HAGR, we have HACCIO, "To slice, To HACK or Cut," &c., where we see the true idea. In the adjacent column we find Haeddel, Arm. Haezl, A plough Handle; to which Mr. Richards has referred the Greek Echetle, (Εχετλη, Stiva.) This Greek word Echetle, or ECHTLE, surely belongs to these Celtic terms, which seem to bear the same form as Egalen, Hackle, &c. In examining the few terms in Lhuyd's Armoric Vocabulary, which belong to our Element, and are adjacent to HAEZL, "The Plow Handle," I find HAGR, and likewise HEGACC, To EGG, or Provoke, from which the French 'Agacer' is directly taken; HEGea, To shake, toss; Hezr, Hydr, Bold; Hesq, A Slice of Bread; Hesquen, A Saw; Hoquet, A Harrow; Houch, A Hog. Surely the HAEZ, in HAEzl, belongs to these terms, Hoquet, &c., and denotes the Plough Handle, from the general idea of the property of the Plough in Cutting. I find, likewise, HEUS, the Boot, which belongs to Hose, &c., HARZ, A Hindrance; HARZAL, To bark like a dog; where we have the HARSH or HARD obstacle, and the HARSH Noise; HOARS, HOARSin, Laughter, To Laugh; where we have still the Loud HARSH Noise; and Hogan, A Hawthornberry. The Houch, adjacent to Hoquet, the Harrow, will shew us, that the name for this animal, Hog, and its parallel terms, Us, (T₆,) s=Us, &c. &c., are derived from the idea of Routing up the Ground—ab Occando Terram. We shall imagine, too, as I conceive, that the Hogan, the Hawthorn-berry, is attached to the Hoquet, the Harrow, under the idea of the Prickly thorn; and this might lead us to conjecture, that Haw, quasi Hawgh, and its parallels HEDGE, &c., might mean the Prickly object, applied as the Fence.

Fence. If this should be the fact, we shall then see, that HEDGE and Edge belong to the same idea. Skinner produces HACK as a Lincolnshire term for a HEDGE, where we have the very form of HACK, To Cut. I have supposed, however, in another place, that the Fence is the original notion; yet in this probably I am mistaken, though the idea of the Fence now only exists in the word. Under the form of ^CL, we have in Welsh Archolli, To Wound; Urcholl, A Wound; and Erchylly, "To look" "fierce and gastly; ERCHYLL, Horrible, dreadful, terrible.-"Q. wh. from Erch, and Hyll," says Mr. Richards. Erch means "Horrible, dreadful, terrible;" and it denotes likewise "The Proper name of a place. The Oncades," saith E. Lh. Orcades may perhaps be derived from this word. In the same column we have Erchwys, Hunting Dogs, Hounds; Erchi, or ARCH, To ask, To request; Encwlf, Hercules. I have had perpetual occasion to observe, that the sense of Asking for, or Searching after any thing, is derived from the idea of Stirring up or Routing up the Dirt or Ground, as in Scrutor from Scruta. In the sense of the 'Hunting Dogs,' we perceive the same idea. We might imagine, that the name of HERCULES belongs to ERCHYLL. The term exists in the Teutonic Dialects, as HERKUL, "Unus ex posteris Titanum," says Wachter, who derives it from 'Her, Exercitus, and Kulle, Caput, Dux, seu Caput Exercitûs,' which is a very probable conjecture. There is another conjecture of Wachter, that Hercules means Clava Terribilis, from Keule, Kyle, Kule, (Scythice,) in Greek Kelon, (Κηλον,) Clava, and "HER, Terri-" bilis, vel Erch, ejusdem significationis, quorum illud Germani-"cum, hoc Brittanicum." In this derivation of HER and ERCH, we see how the Teutonic and the Welsh terms agree; and in this origin I acquiesce. Wachter might have seen the form of 'RG in the Teutonic Dialects, as in the preceding column of his Glossary we have 'HERGen, Vastare.'

In Spanish, Hocico means "The Snout, the nose of an ani-"mal;" Hocicare, "To break up the Ground with the Snout;" and Hocino signifies "A Bill, sort of Hatchet with a hooked point." The Hoc=Ic is nothing but the Elementary form ^C doubled, in order to express more strongly the idea. In Hocino we have the form of Axine and Oxine, (Ozwa, Occa.) We here see, how the ideas of 'Stirring up the Ground,' and of HACKing, or the HATCHET, are connected with each other. The Hog, as we have seen, with its parallel terms Us, (Υ_{ς}) and s-Us, belongs to the same idea, and means the animal which Routs up or Houghs up the Ground. A word under the same form Hog, "Ovis Bimus, vel Secundi "anni," which is sometimes called Hogger, conveys the same fundamental idea, with another turn of meaning. The Sheep is called Hog, from the idea of Carping up or over a Surface, or from its Carping—Twitching—Vellicating mode of biting. A Sheep is said to Nibble, from its Nipping-Twitching or Catching mode of biting; and in the Dialect of the North, a Sheep is called a Nepper, or Nipper, and is said to Nep or Nip. In Agnus we have the same idea; and in ARS, (Aes, Aevos,) we see the form ARS, as I before observed. The Goose is an animal which resembles most the Sheep in its close mode of biting; and hence. in Italian, we have the Oca, which directly connects itself with the succeeding word in our Italian Dictionaries, "Occare, To "Harrow, to Grub," as my Lexicographer explains it. The Latin Glossaries give us the terms Auca; and in Spanish and French we have Oca, and Oye, or Oie, where the Υ represents the lost Elementary Consonant. In the term "Ped=Augue, pied "d'Oie, Pes Aucæ," we have the true form.

Again, in Spanish, Hoz signifies a "Sickle, a reaping Hook, "with which corn is cut down;" and it means likewise a "Defile, "ravin; a narrow pass," where we have the idea of the Hollow; and the verb Hozar means, "To Grub, to turn up the Ground

" as Hogs do with their snouts," as my Lexicographer, Mr. Neuman, explains it. In the same column of his Dictionary we have HOYA, "Hole, cavity, pit," "HUECO, Hollow, empty," &c.; and likewise Hucar, "Hooker, A kind of Dutch-built vessel," and HUCHA, "A large chest," &c., which, we see, signifies the This will remind us of our English word HUTCH, and Hollow. its parallels Hwacca, Huche, (Sax. Fr.) &c., which I have before derived from the idea of the Enclosure, or Hut, for the purpose of Securing and Preserving any thing. That it means the Enclosure for Preserving any thing is certain, and that it is directly connected with words bearing that meaning is extremely probable; yet it is not easy to adjust the precise idea, from which the sense of the Enclosure was derived. The Spanish term Hucha seems immediately attached to words which express the Hollow, made by HACKing up the Ground; and from this source the sense of an Enclosure is commonly derived: yet the Enclosure of the HEDGE and its parallels seems to belong to the idea of the Sharp— Thorny-HACKing substance, of which the Fence of the HEDGE consists. Still however the idea of the Hollow, as from the HACKED up Surface, will sometimes be so involved with that of the Enclosure, from whatever source it may be derived, that we shall be unable to separate the one from the other. Milton has applied Hutch, as a verb, as relating to metals, deposited in the bowels or Hollow of the Earth.

"In her own loins
"She Hutch'd th' all-worshipt ore and precious gems." (Comus.)

Warton explains the word by *Hoarded*, though he would rather read *Hatched*. An adjacent word to the Saxon *Hwæcca*, in Lye's Dictionary, is the Gothic Huzd, Thesaurus; and in the same opening of this Work, we have Hus, An *House*. Among the Celtic terms for *Sus*, in Lhuyd, I find the Welsh "Hux," the Cornish "Hoh, Hox," and the Armoric Gues, Guesen. Let us mark

mark the Armoric and Latin Gues and Sus, which belong to the English Sow, quasi Sog. The Etymologists properly refer Sow to the Saxon Sugu, the Belgic Soegh, Souwe, &c., the German Saw, and the Latin Sus. It is agreed, that Us, (Ts,) and s=Us coincide; and thus we see, how these forms pass into each other. Hence we might conjecture, that such words as h=Ack, &c. and s=Eco, &c. belong ultimately to each other.—I must still observe, that however this may be, when the forms are once constituted, they may be considered as distinct forms, invested with peculiar veins of meaning appropriate to each.

The term Hog, the Sheep, will remind the learned Reader of a passage in Bochart, who observes, that a Ram in Arabic is expressed by "حيل Hamal, aut كبش Saphi, "aut si sit procerior Giuchgiuch, et Hug-Hug." (Hieroz. lib. ii. c. 43.) The Chebs and Saphi belong, I imagine, to our term Sheep,—the Hamal to the German Hammel, A Weather; and the Hug=Hug probably to the Hog. In Persian, ازار Izar is a Sheep; and the word preceding this in Mr. Richardson's Dictionary, under the same form, signifies "Chiding, re-" buking, reproaching, scolding, Teazing, affronting, reprimanding, "importunity." The succeeding term is the verb ازاردن Azarden, "To Hurt, offend, injure, vex, revile, disturb, impor-"tune;" and in the same opening of Mr. Richardson's Dictionary, we have this verb under the form ازردن Azurden, " To "injure, Harrass, disturb, vex, trouble, offend, rebuke, reprove, "reproach, disgust, afflict." Here, as we see, is the precise metaphorical idea, which is annexed to the race of words now under discussion; and the explanatory term HARRASS, we know. is directly taken from the HARROW, or HERSE. Whether the Persian ازار Azar belongs to our Element AZ, or to ZR, I cannot Caper, the Goat, belongs probably to Carpo; and the Greek Aiks, Aigos, (Aig, Aigos,) might be referred to the terms

now

now under discussion, from its mode of Eating. Yet perhaps Aiks, (Aιξ,) belongs to its adjacent term Aisso, (Αισσω, Ruo, cum impetu feror, Ingruo, Irruo; -Festino,) and has been so called from the idea of Agitation, or from its Nimble, Hurried motions. A term under the same form as AIKS, AIGOS, (AIE, airos,) the Goat, the succeeding word AIKS, AIKOS, (A/E, 12005, motus violentus, impetus fluctus,) seems to decide, that this peculiar idea is annexed to the animal, and that it is not derived from its mode of Eating. When two ideas might equally afford the origin of the word, it is oftentimes difficult to be decided in our choice. Though CAPER is probably derived from Carpo, from its Carping mode of Feeding, if I may so express it; we know, that Caper, To leap about, Capricious, &c., are taken from the motions of the Caper. Latin Hædus might belong to Edo, and be derived from the mode in which it EATS. The Etymologists refer it to Fædus; and Varro tells us, that the Sabines used Fedus for Hædus, as they did Fircus for Hircus. This may indeed be the origin of Hædus, and the Sabine form Fedus adds some authority to the conjecture. If Hircus be quasi Fircus, and belongs to the Element FRC, it must be referred to such terms as Ferk, Ferret, and is derived from its quality of Butting—Pushing, or Driving at objects, with its Head, &c. Hircus however might belong to our Element 'RC, under the idea of the Hirsute, or Rough animal.

I must again recur to the Hog, the young Sheep, as it will open to us another source of enquiry. This word is used likewise with the same idea in the Scotch Language, as Dr. Jamieson has properly noted; and the terms belonging to our Element, which are adjacent to it in Dr. Jamieson's Dictionary, are the following: Hog, Hoggers, Hogmany, Hogry Mogry, Hog Score, Hog Shouther, Hoy, quasi Hoj. Hog, in Scotch, says Dr. J. "in the diversion of curling," is, "the name given to the stone, which does not go over the distance Score. S. It seems," adds this Writer.

Writer, "to be denominated from its laziness, and hence the "distance line is called the Hog=Score." We plainly perceive, in the combination Hog-Score, that Hog has a similar meaning to Score, and means the HACKED out, Scratched out Score or Line. Score belongs to Scar—The Cut, under the same relation. Hog, in Scotch, signifies "To Shog;" and Hogshouther means "A game " in which those who amuse themselves justle each other by the "Shoulders." Dr. Jamieson has justly commemorated, under these words, the Islandic HAGGA, "To move, shake, to Jog;" to which he might have added the Scotch and English term HITCH, which Dr. Jamieson explains by "A motion by a jerk," and to which he has justly referred the French Hocher, and the Saxon Hicgan, Niti. In HITCH we see the idea of a Vellicating. Twitching - Catching motion; and accordingly we find, that HITCH means likewise in Scotch, "A loop, a knot," where we have that, which HITCHES in, or Catches. In other words too we see the same idea of Agitation—as connected with a Twitching— Desultory motion. In French, "Hocher la tête" means, "To Wag "the Head in sign of contempt." HOCHET is "A Child's Rattle," and Hoche=Queue, "The bird, called A Wag-tail." Hogers means, in Scotch, "Coarse stockings without feet," which belongs to Hose, the covering for the lower part of the person, the Hock, the part which HACKS up the Ground. We have likewise Hoeshins, bearing the same meaning, which Dr. Jamieson properly refers to the Saxon Scin=Hose, Ocreæ, or Shin=Hose. The Hogmany I shall consider on another occasion, where I shall shew, that Hog means HIGH, which signifies the Stirred up or Raised up part.

Dr. Jamieson has properly referred Hogry Mogry, Slovenly, to the English Hugger-Mugger, and the Scotch Hudge-Mudge, or Huggrie, in a clandestine—concealed manner. We might record in this place the expressions Hopge-Podge, Hocus-Pocus, Huderon-Duderon, (Scotch,) Slovenly, &c.; Hash-Methram, (Scotch,)

(Scotch,) 'In a state of disorder, topsy turvy;' HIGGLEDY-Pigledy, HUDDLE, HUDELN, (German,) "To bungle, Huddle, "shuffle, hurry, spoil a work, do it helter skelter;" Husle, &c. &c.; all which words, different as they may appear in sense, convey the same fundamental idea, as relating to matters—Embroiled in a state of Disturbance—Confusion—Disorder, &c., and which would aptly be derived from the idea of Dirt or Mud-Stirred or Mixed together—as in a Confused Heap or Mass, &c. &c. It is impossible so to adjust a general explanation, as to express the peculiar meaning, attached to various words, which convey different portions of the same train of ideas. The Reader, however, will sufficiently understand the fundamental idea in its various applications, and will be duly directed to the common origin from which they are taken. The Muggrie, Mugger, Mudge, unequivocally belong to Mun; and we know, that Podge means a Mixture of a Mud-like Consistency. The Podge and Poc, in Pocus, belong to such terms as Pudding—Paste—Pudge, (a Muddy Ditch,) Puddle, &c., and ultimately, as I shall shew, to the Pedon, (Ileson.) In such phrases as 'The business is all Mud-Muddy-Muddled,' we have a similar metaphorical application. Hodge, the clown, is the Hodge=Podge figure, if I may so express it. I can find no terms, in which I can so aptly convey the idea of this word to the mind of my Reader. In the word Bump=kin we have the Bump= or Lump Kind of personage. In vulgar Language we use Stodge in a sense similar to Hodge=Podge, "The Porridge is all of a " Stodge;" and we talk of a Stodge figure. Squab is used in the sense of Soft Stuff of a Podge or Pudge consistency, if I may so say; and we talk likewise of a Squab figure. In Squabble, we have the sense of Embroilment-Commixture-Disorder-Confusion, &c. N. Bailey explains Squab by "A Soft stuffed cushion, " or stool; also a thick fat man or woman;" and he interprets Squabbled,

Squabbled, in one sense, as used by Printers, "when several lines " are Mixed one with another." In Squibble Squabble, we see an attempt to express strongly the idea conveyed, similar to that which we see in Hodge-Podge; though in one case, words under the same Element are repeated, and in the other, words under different Elements are joined.—To Hodge, the Clown, belong the names Hodges, Hodson, Hudson, Hodgekins, Hodgkinson, Hutchinson, Huskisson, &c. &c. In Hodgekin we have a similar compound to Bumpkin. Skinner considers Hodges as belonging to Roger. The preceding word to Hodgekins, in one of his Vocabularies, is Hockley in the Hole, which he derives from the Saxon Hoc, Lutum seu cœnum profundum. In Hoc, we at once see the Hodge; and this, I trust, will decide on the truth of my conjecture, respecting the origin of Hodge-Potch.

In Hocus Pocus we have an attempt to heighten the meaning by adding a Latin termination to words conveying the same sense, as Hodge-Podge, in order to give the idea of a Hodge-Podge-Confused state of matters, trickery jargon, &c.-as perfectly unintelligible, as if it were all turned into Latin, an unknown tongue. Skinner derives Hocus Pocus from Hocher. Quatere, and Pocher, "Digito, extrudere, et quasi Effodere;" where we are brought to terms connected with the idea, which I have given of Agitation—Stirring up _Digging up. however gives us a very extraordinary reason for this derivation. "Totum enim istiusmodi artificum mysterium in eo consistit, ut " pilas vel sphærulas in vasculis seu pyxidibus quassent, et digitis " quam celerrime motis res immissas surripiant." It is unnecessary, I conceive, to add, what some imagine, that Hocus Pocus is not derived from Hoc est corpus, as alluding to the doctrine of Transubstantiation. I cannot forbear producing an odd coincidence in a Persian term, as it appears with the interpretation of Castell, who explains explains — Hkh bar thus; "Belg. Een Hokes Bokes Speelder, "Qui ollis, s. capsulis ludere novit ad sui admirationem: Præ"stigiator, qui manuum agili dexteritate facit, ut res aliæ appa"reant circumstantium oculis, quam revera sunt." The term

— Нкн is explained by Castell to be the "Olla Apothecaria, in
"quâ syrupi et conservæ custodiuntur;" and by Richardson, simply
"A Box." In the same column of this latter Writer's Dictionary,
where Hkh or Hekke is found, we have the Arabic Hekou,

— "Scratching,
"rubbing. — Scraping, erasing. — Boring, Digging, piercing;"
where we have the true sense of the Element. The Persian
Hekke is probably the Hutch or Hollow of the Chest, Box, &c.

The Scotch Hoy is quasi Hoj, or Hog, just as Hoe belongs to HOUGH; and it is explained by Dr. Jamieson, "To urge on, To "incite;" where we see the sense of Stirring up. The next word is Hoyes, "a term used in public proclamations, calling attention. "It is thrice repeated, S. Oyes, E. Fr. Oyez, Hear ye.—It is also "used by Skene," adds Dr. Jamieson, "although perhaps "improperly, as equivalent to Hue, in the phrase Hue and Cry." If Hoyes belongs to Hue, it must be referred to Hoy, &c., and the terms denoting Excitement—Stirring up, &c. I find likewise, as adjacent terms, "The HoE Fish, HoE Mother," denoting the "Piked Dog-Fish and the Shark;" where Hoe is used in the sense of the ravenous, or annoying animal, which Hoes-Houghs up-HACKS-Wounds, or which Hooks in. The term Pike belongs, we know, to the idea annexed to Piquer—to Prick— Stick, &c.; and the Shark is derived by the Etymologists from a Saxon word, which signifies to Cut, and from the term Search. It belongs to Search—Scratch, &c. In Skinner we have HAKOt, (Eng.) Hacod, (Sax.) Hecket, (Belg.) Hecht, (Germ.) denoting the Lucius, or Pike; and the preceding term to this is HAKE, (Eng.) Haecken, (Belg.) Rem captare. These words belong to

each other, and the Fish means the ravenous animal, which Hooks up, or Catches. I shew in another place, that the idea of Seizing—Catching, or Hooking up or in, is derived from the action of Hacking up, or Hooking up a Surface, with a Vellicating-Plucking — Catching — Scratching motion, if I may so express The Haddock belongs to a similar idea. It is sometimes called in French Merluche, which signifies, as the Etymologists suppose, Maris Lucius, the Sea Pike. Again, in Scotch we have the Hose=Fish, Cuttle-Fish, where the true form appears; and Cuttle probably belongs to Cut, for the same reason. The next term is the Hose=Net, which Dr. Jamieson supposes to be "A small net, affixed to a pole, resembling a Stocking used in "rivulets." This may be the meaning of the term; yet we should remember, that the idea of Catching, or Seizing, is generally connected with the idea of HACKing up, or HOOKing up; and thus we see, how the Cuttle-Fish and the Net may be connected with each other. The next word in Dr. Jamieson's Dictionary is Host, Hoist, "To cough;" and in the second sense we have "To Belch up, to bring forth," &c.; where we see the idea of Stirring up. We talk, moreover, of a HACKing Cough; and I shall shew, that Cough-Catch, and Cut, belong to each other for the same reason. The next word is Hosta, "Used as "an interjection of surprize, and perhaps of some degree of "hesitation. Ang. Husto, Husta, Aberd. expl. See here, See to "it." This is a word of Excitement to attention, which will be considered in a future page.

The terms adjacent to Hotch=Potch, in Dr. Jamieson's Scotch Dictionary, are Hotch, "To move the body by sudden jerks, which is another form of Hitch; and he has justly recorded here the German Hutsen, the Belgic Hotsen; Hotter, "To crowd together, "conveying the idea of individual motion;" and likewise "To "Houd. To Wriggle, to move from side to side, whether "walking

"walking or sitting." Under this latter word Dr. Jamieson refers us to Hoddin, "A term expressive of the Joggling motion " of one who rides a horse that moves stiffly, and who receives in " his own body the impetus of every movement." In the same page with this latter word we have Hockerty=Cockerty, "To ride on one's " shoulders with a leg on each.—This in Ang. is called Cockerty= "Hoy," where Hockerty relates to the wriggling—unsteady motion of the person so sitting; and Hoy is quasi Hoj or Hock. bearing the same meaning. The next word is Hockit, "apparently " for Hotchett, moved clumsily by jerks;" and the next, Hocus, "A stupid fellow, a fool, a simpleton," which contains a similar idea to Hocus, in Hocus Pocus, though it is applied in somewhat a different manner. We have moreover Hoddle, "To Waddle;"-HODDIE, "A Carrion-Crow;" HODDEN Grey, "A term used with "respect to cloth worn by the peasantry which has the natural "colour of the wool." The form Hoddle will remind us of HUDDLE, where we likewise see the idea of Desultory, unsteady motion. Dr. Jamieson observes, on the term Hodden, "Perhaps "from E. Hoiden rustic, clownish, from German Heide." term Hodden, as denoting the vulgar, clownish colour, belongs to the idea of the Hoddin, denoting the Vulgar—Clownish Motion. HOIDEN, in English, means the vulgar person, only as it is connected with Unseemly—Disorderly Motion; and hence it is applied to the vulgar, romping Girl. In the German Heide—the Heath. We are brought at once to the Ground—the EATH. To the form of Hoiden belongs the ancient word for a Dance, which Nathan Bailey represents by HAYDEGINES, "A Country dance or round," as he explains it. It occurs in the Poems attributed to Rowley. and is applied to the dance of Rustics. In the third Eclogue a clown says,

[&]quot; I daunce the best HEIEDEYGNES,

[&]quot; And foile the wysest feignes."

We here see, that Heiedeygne is used as a disyllable, as it ought to be, corresponding with the word Hoiden. Chatterton explains the term as "A Country dance still practised in the North;" and Dean Milles properly adds in the Glossary, "A Romping "country dance."

Among these terms, denoting Desultory motion, we must place our phrase Hoity Toity, to which we must add the Scotch "To "Hoit, Hoyt. To move in an ambling but crazy manner," says "Dr. Jamieson, "to move with expedition, but stiffly and clum-" sily. S. The term is often used to denote the attempt made "by a corpulent person to move quickly. Horr, A Hobbling "motion. One, to whom this motion is attributed, is said to be "at the Hoit." We here see that Hoit is applied, by way of ridicule, to the awkward attempt of an animal, naturally slow, to bustle forward. This is probably the sense of Hop, in "Hop= " Mandod, A Shell snail," as Mr. Grose explains it. We shall have little doubt respecting the truth of this conjecture, when we learn the preceding word in Mr. Grose's Glossary. "Hoppy, "Well, pleasant, in good spirits. I'm pretty Hoppy." The snail is called likewise A Dod=Man; and the Man=Dod seems to be an inversion of this word. A Dud=Man is a Man made of Duds, or Rags, a Scare-crow; and it then means "A Hobgoblin, " a Spright," as N. Bailey explains it; and afterwards, perhaps, the ugly, disagreeable animal. I once thought, that Dud=Man meant the animal or creature, crawling in the Dust; yet as the combination exists, applied to a different object, it has probably the same specific meaning in both cases. Dud means Rags, from the loose broken Dust. The succeeding words in Grose to Hodmandod, which belong to our Element, are "Hoo-A Sheep " of a year old. North. Sometimes called Hoggrel," which we have just explained;—"Hog. To Hog, To carry on the back. "North.;" where Hog may perhaps relate to the unsteady motion

in such a position, as in the Scotch Hockerly,—"Hoggere "Hog-Colt; colts of a year old. Hampsh.;" where the term is transferred from a young sheep to another young animal; HOIT, "An awkward Boy." The preceding article to Hoddy is Hocker=Headed, "Fretful, passionate. Kent." Here we see the two opposite senses of Pleased and Displeased, from the same radical idea of Excitement. Mr. Grose has very happily explained HOOKER by Fretful; where in the term Fretful we have the very same metaphor of Irritability, as derived from the action of Fretting or Scratching a Surface. In Chaucer we have the terms Hoker and Hokerly, which Junius explains by Morosus, Contumax, &c., and which he has properly enough referred to one of the terms belonging to this race of words, the French Hocher. . In Saxon, Hocer and Hocor mean "Irrisio, contumelia;" and we shall now understand the origin of our colloquial word HOAX-To HOAX a person, Irridendo Perstringere; where, in Perstringere, To Graze or Scratch upon a Surface, we have a similar metaphor. In Saxon, Husce means "Contumelia, contemptus, opprobrium, "convitium," as Lye explains it; and under another form we have Hucse, Huck, which he explains by "Ironia, contumelia, "Mid Hucse, Cum Ironia, derisorie, contemptim." The succeeding word to this Saxon term, in Lye's Dictionary, is Hunenian, "Excutere;" where we have another of these terms, which denote Agitation, &c. In the phrase "To Hoax on the dogs," we have the same idea of Exciting-Stirring up-Egging on. The original sense of Hocer will be manifest from the preceding and adjacent words in Lye's Saxon Dictionary, Hoc, Hoce, Hook, Uncus; and Ho, calx. I shew in another place, that the Hook is derived from the action of Hooking or Houghing up the Ground, and that the Ho is the part which Hoes-Houghs up the Ground. In the succeeding column we have HOEHTan, Persequi; another turn of meaning, derived from a similar metaphor. In German. Hotten

Hotten means "A Cartman's crying to make his horses turn to the right hand;" where we have likewise the idea of Excitement. In the phrase "Es will nicht recht Hotten," which my Lexicographer explains by "It will not go or advance rightly," we see at once the idea of Excited or Quickened motion. In German and French, Hotte is a Basket, "qu' on attache," says Menage, "sur "les epaules." It may belong to the idea of motion, as explained in Hog, Hockerty; or it may denote the Hutch, the Hollow, which I have before illustrated.

The preceding word to Holt, in Dr. Jamieson's Dictionary, is Hoist, To cough; which again confirms my opinion, that these words for Noise, belonging to our Element, are derived from the idea of Agitation-Stirring up, &c. Again, among the terms denoting a Vellicating-Twitching motion, we must add the Scotch "Howder. To move by succussation, S. To Hotch, synon." The next word to this, in Dr. Jamieson's Dictionary, is "To "Howder. To Hide, conceal;" which means to Agitate or Stir together, so as to bury up and conceal. This will shew us, that my explanation of Hugger is just. The preceding terms are Howdy, "A Midwife;" and To Howdy, "To act the part " of a Midwife, to deliver a woman in labour;" where we see, that Howdy relates to an operation, in which a person in the pains of labour Howders. Dr. Jamieson does not seem to be aware of the relation of these terms. In the same column of this Writer's Dictionary, where Hown is, we see a term to which it ultimately belongs. We here find How, "A Hoe, an instrument " for Tearing up the surface of the Ground;" and the succeeding word is How, Hou, "a term used to denote the sound made by "the owl." Here we again see another proof, that the idea of Noise is taken from the action of Tearing up or Scratching up the Ground. These words have the same relation to each other, that the Screech=Owl has to Scratch. We have seen, that Hoddie is the Carrion-Crow; and here Dr. Jamieson refers us to Huddy, where he seems to think, that the Huddy Craw is the "Hooded "Crow." The next word is Hudds, which is defined to be "a species of Clay, which the smiths use for fixing their bellows in their furnaces," &c., where we are directly brought to the idea of Dirt.

In the same opening of Dr. Jamieson's Dictionary I see the following terms, belonging to our Element; Hud, Hudderin, Huddroun, Huddum, or Huddone, Hudge=Mudge, Huggrie-Muggrie, before explained, Hud-Pyke, Huick, Huke, Hukebane, Huckie-Buckie, Huck, To Huke. - Dr. Jamieson has observed: that Hup is "a term used by masons, for denoting the trough "employed for carrying their mortar," which corresponds with our English word Hod, a term of the same meaning, which is likewise applied to the utensil containing coals, as the 'Coal ' Hod.' Perhaps Hop and Hup signify that, which carries Hud. or Dirt, or Matter of a Dirt kind. Hudderin, Huddroun, mean Slovenly; where we have the same idea as in Hudge-Mudge. &c. &c., before explained. The term Hudds, actually signifying Dirt, will serve to confirm my idea, that these words Hupge, &c. &c. are taken from actions relating to Dirt. Huddum is "A kind of Whale," used by Gawin Douglas:—Pistrix. Virg. "also pistris; said to be a whale of great length, which Cuts the "water as he goes;" and we shall now understand, that the Sword-Fish—the Cutting animal, belongs directly to the train of ideas which I am now unfolding. Hence the Hud=Pyke is "A Miser," by the same metaphor. Pyke is the Pricking— Sticking—ravenous animal. Huick means "A small rick of "corn;" and the next article is "To Huck. To take care of. "to consider, to regard." Remote in sense as these terms appear to be, still however they directly belong to each other.

They both relate to the idea of Stirring up or about—Turning up—Raising up. The Huick is the Raised up Heap; and 'To Huik, To consider,' belongs to the same metaphor, as in the phrase 'To Agitate a matter' — Agitare consilia — To Revolve— Volvere, "To Tumble up, or Toss,—To consider, or weigh;" and again, in English, we say, 'To Turn a thing over in one's Volumen, the Volume, is the swelling Roll, which belongs to Volvo, To Consider, just as Huick, the Rick, belongs to Huick, 'To Consider.' I shall shew, that Rick belongs to the Ridge of Earth, Routed or Stirred up by ploughing, &c. Dr. Jamieson has justly referred Huick to the Saxon Hogan, or Hogian, which Lye explains by "Sollicitus esse, curam gerere, studere, meditari;" where, in Sollicitus, which originally referred to Stirring up the Solum, or Ground, we have the true idea. The succeeding words to the Saxon Hogung, Cura, in Lye's Dictionary, are "Hoh, Calx; "Angl. Hough."-" Hoh, Altus-Hoha, Aratrum.-Inde forsan "nostra An Hough-Occa minor," says Lye, where we see the true origin of the word Hogan; and we learn from Hoh, which belongs to High-Stirred up by the Hough, how Huick has been formed. The Huke-bane is the Huckle-bone, which I explained in another place; and Huckie-Buckie means 'To Squat 'down, or to sit on the part adjacent to the Huke-bane.' The word Huck means perhaps, says Dr. Jamieson, "To grudge, to hesitate, "as in a bargain, q. to play the Huckster." If this be the meaning of the word, it belongs directly to the ideas which I am unfolding. I shew, that HUCKSTER and HIGGLER belong to HACK and HAGGLE. We often talk of a person having a 'HACK-'ing-Haggling way with him-in transacting business.' Huke and HAIK occur together in the same line, as relating to operations in a ship; and Dr. Jamieson refers the one to Hucken, Incurvari; and the other to Haecken, Unco prehendere. If the words bear this meaning, they belong to Hook, which I shew in another place to be taken from the idea of HACKING up—Vellicating, or Catching up a Surface, if I may thus express it.

Among the terms denoting Agitation-Confusion, as of things thronged together in a disorderly Heap, we have HIGGLEDY-Piggledy—Huddle, and Hustle. In Higgledy we come to the form HAGGLE, quasi HAGGLEDY, as it might have been, all in a Smash, or all Mashed together, as we say in colloquial Language. N. Bailey explains HUSTLE by "To shake together;" and we talk of people being Hustled together, as thronged together in a state of Confusion. In the same column of this Lexicographer's Vocabulary, where Hustle is found, we have Husseling-People, which he explains by "Communicants at a "Sacrament;" from whence it should seem, that Husseling-People meant 'People all HUSTLED or thronged together in a great 'crowd, pressing to receive the Sacrament.'-Whatever be the origin of Husseling-People, it should seem as if the word Un-Houseld, in Shakspeare, ought to be referred to it. I have produced Housel, and its parallel terms Husel (Saxon,) "Eucha-"ristia, Panis sacer, seu Eucharisticus," in another place; and derived it with the Etymologists from the Host, the consecrated wafer representing the body of Christ, who was the HOSTIA, or Victim. This may be right, as in Gothic we find Hunsl, "Victima, Sacrificium;" yet I cannot but add, that among other compounds of the Saxon Husel, we have one like that recorded by Nathan Bailey, relating to the action of Going to or Assembling at the Sacrament, as Husel-Gang, which Lye explains by "Eucharistiæ aditio, sive participatio."

We have seen, that Hocher means in French 'To Shake or 'Wag.' This term is adjacent to other words, in the Dictionary of Menage, which demand our attention. Hoche means a Notch, which has been justly referred to the English HACK, and the

French HACHER. Another term in the same column is HOCHE=Bos. a species of Flemish Soldiers, mentioned in Froissart, which is supposed to be a compound of Hocher, To Shake, and Bos or Bois, Wood, or metaphorically a Spear made of Wood. If this be the origin of the term, it will be a combination similar in meaning to Shakspeare or Shake=Spear, and Wag=Staff. preceding column we have Hoc, as used in the phrase "Cela "m'est Hoc," 'I am sure of that.' One part of France used Oc or Hoc instead of Oui; and hence the Dialect, in which this term was used, is called "La Langue d'Oc." I have conjectured, that Oui is quasi Ouj; and in Oc or Hoc, That, we have the true form, as in the Latin Hoc. The game at cards, called Hoc, belongs to this term of Assurance. - In the same column with Hocher we have Hode, "Lassé, fatigué, recru;" and Hogner, "Murmurer tout bas." The former word has been referred to Opos, (Osos, Via,) and it belongs certainly more particularly to Fatigue in Travelling, "proprement laissé de "Marcher." The term Hopé, however, is probably attached to the race of words before us, and to the metaphor of Tiring or Harassing the frame. The very word Tired, corresponding with the sense of Hope, must be referred to the Element TR, denoting the Soil, and to Tero, Teiro, (Teipw, Vexo,) Tear, Tire (old English for Tear,) and lastly to Terra.

On the term Hogner, Menage observes, "Murmurer tout bas. C'est une onomatopée, formé des hons qu'on entend sortir de l'estomac de celui qui Hogne." I shall produce in another page a race of words, which denote Noise, and which I shall-shew to be derived from the idea of Agitation, as in Hocher, &c. The n in this word is an organical addition to the G. The succeeding term is Hoque, or Hoquette, which denotes, as Menage says, "l'entrée d'un Port." In this sense it might

be

be referred to the Heck, Edge, &c., the projecting Land, or Shore. In another sense, it is applied, says Huet, to places distant from the Sea, and denotes "Colline, lieu elevée." This brings us rather to the English High, the German Hoch, &c., with another turn of meaning. The next word is Hoguineurs, a nickname for the people of Arras, which Le Duchat derives from Hoguiner, signifying 'Facher.' The sense of Hoguiner, as represented by Facher, is precisely that, belonging to the idea expressed by HAR-RASS, which is derived from the metaphor of the Herse, or Harrow, under the form 'RT, 'RS. Hoquiner is quasi Occare.—Perhaps the Huguenots may be only another form of Hoguineurs, and denote the Disturbing—HARRASSING—Stirring up or Seditious people. The various derivations of this word may shew us, that no conjecture can be considered as remote. It has been derived from a Spectre called "Le Roi Hugon,"—from Jean Hus, "qui " fut condamné au concile de Constance,"—from the German Eydgenossen, Fæderati,—from Huc nos, the beginning of a Speech made by one of this Sect, — from the Swiss Heu Guenaus, "les "mutins et les seditieux," or from the Flemish Heghenen, pronounced Huguenen, "qui signifie Purifier," as the Calvinists are sometimes called Puritains, Puritans, &c.

The preceding term in my Saxon Dictionary to Egean, Occare, is Ege, the Eye; and we cannot but note, how the Oc, in the Latin Oculus, connects itself with Occa. Remote as these ideas may appear, we shall not doubt that they belong to each other. The idea of Seeing, as we should all agree, would be naturally derived from that of Search; and the notion of Searching into any thing, as we all know, is connected with the metaphor of Routing up or into any thing, as Dirt, &c. It is acknowledged, that Scrutor and Scrutiny belong to Scruta, quasi Scruta Eruere; and Rimor means, "è Rimis eruere." Thus we see, how Ege, the Eye, the Seer or Searcher, may belong to Egean, Occare, To Scratch

Scratch or Rout up the Ground. In the metaphorical applications of the Poets, and even in ordinary Language, the qualities of the EYE are perpetually connected, as every one knows, with such material operations; and thus the Eyes are said To Pierce-Bore—quasi Occare, &c. &c. The parallel terms to Eye appear in a great variety of Languages, as Eag, (Sax.) Ooghe, (Belg.) Aug, (Germ.) Augo, (Goth.) Occhio, (Ital.) Ojo, (Span.) Oko, (Sclav.) &c. &c., produced by the Etymologists, who remind us likewise of the Greek Auge, (Avyn,) Eido, (Eido, Video,) and the Latin Oculus, &c. Whether the Cul in the Latin Oculus be significant, I cannot determine; but the Oculus seems to coincide in form with Occillo, or Occilo, 'Occa Comminuo.' Etymologists derive Oculus from Occulto, "quia eos ciliorum "tegmina Occultant," &c. &c.; and they remind us of OKKOS, (Onκος,) Ossos, (Οσσος,) Optomai, (Οπτομαι,) &c. &c. In the French Œil, the Radical consonant C, in Oculus, is lost, and the L only remains, unless we consider the Œil as belonging to the Ul in Oculus. In the English Eye, the Y preserves the record of the lost Consonant G, &c. The succeeding word to Eye, in Junius. is Eigh, Eja, "adverbium hortandi. Græcis Eia," the term of Excitement, which, as we see, is derived from the same idea of Stirring up, Routing up, &c.

The Greek Ossos, Ossomai, (Ossos, Oculus, Ossomai, Auguror, Vaticinor, in animo fingo, cogito, prævideo, prospicio,) must be added to this race of words. We perceive, that Ossa, (Ossa, Vox, fama, rumor, omen, oraculum,) relates to Noise, which I conceive to be derived from the Noise made by the actions from which Ossos, (Ossos,) is derived. Screech and Shriek belong to Scrutor and Scratch, for the same reason. The term Ossomai, (Ossomai,) seems to have retained its original idea of Piercing—Penetrating; and hence we see it applied to the Piercing Eye of Rage, and likewise to that Penetrating view, which dives into

the knowledge of distant or future events. We all remember, that this word is adopted, when the enraged Agamemnon, with his Eyes flashing fire, looks furiously upon Calchas.

ΟΣΣΕ δε οι πυρι λαμπετοωντο είκτην, Καλχαντα πρωτιστα ΚΑΚ' ΟΣΣΟΜΕΝΟΣ, προσεειπε.

The term is perpetually applied to the power of Foreseeing future events, Oσσοντο γας αλγια θυμω, &c. &c. These enquiries into the origin of Human Speech will enable us to understand that Curiosa fælicitas of expression, which is exhibited by the Poet, when he adopts certain terms with such exquisite force and effect, from the strong and faithful impressions of a feeling and a vigorous mind. We see, that the Greek ONDOMAI, from the idea of the Penetrating look, has been referred to objects of an Angry—Fierce appearance, and likewise to the notion of Foreseeing or Prognosticating the future. Now by a singular felicity of application, Homer has combined these two ideas in his use of this term, and has applied it to that appearance of the Sea, when it assumes an Angry and a Menacing look—Prophetic of a future storm.

Ως δ' οτε πορφυρη πελαγος μεγα κυματι κωφω,
ΟΣΣΟΜΕΝΟΝ λιγεων ανεμων λακψηρα κελευθα,
Αυτως, ουδ' αρα τι προκυλινδεται ουδετερωσε,
Πριν τινα κεκριμενου καταβημεναι εκ Διος ουρον. (Il. Z. V. 16, &c.)

Whether the Greek Optomai, $(O\pi\tau \circ \mu\alpha i)$, Video,) be quasi Otomai, where the p is an organical addition to the T, it is not easy to decide. If the word Optilos, $(O\pi\tau i\lambda \circ \varsigma, Oculus, apud Dores,)$

[&]quot;Ut verum quum nigrescit pelagus magnum unde tacita

[&]quot; Præsentiens stridulorum ventorum celeres motus nullo

[&]quot;Effectu, neque videlicet provolvitur in hanc vel illam partem,

[&]quot;Antequam aliquis certus descenderit à Jove ventus."

be quasi Otilos, it would coincide with the form of the Latin The Greek Oph=Thalmos, (Οφθαλμος, Oculus,) is a compound of Opt, denoting Sight, and Thalmos for Thalamos, (Θαλαμος, Cubiculum, nidus, — cava capitis, in quibus oculi sunt,) the Bed or Hollow Socket for the Eye. Though the Lexicographers explain Thalamos, (Θαλαμος,) by the "Cava capitis; "in quibus Oculi sunt;" yet they do not seem to understand, that the Thalmos, in Oph-Thalmos, belongs to it. The term Eido, (E.Su, Video,) and the Latin v=IDeo, are derived probably from the same idea of Searching or Routing into. In Viso, and Visito, To Visit, we seem to have this idea more strongly expressed. In such phrases as 'To Visit with afflictions,' we approach to the violent sense annexed to this race of words. In the adjacent term v=Is, as in the parallel Greek term Is, (Ic, Robur,) we have perhaps the idea of Force, as arising from Excitement and Agitation, and not as belonging to the notion of Stability, as I have before conjectured. Let us mark the explanatory term Auguro, before adopted in the explanation of Ossomai, (Ossomai, Auguror,) which exhibits more strongly the idea of Prying—Penetrating—Searching or Routing into things, as the hidden secrets of futurity, and which must be referred, as I imagine, to such terms as Ago, Occo, &c., "To Increase-Advance," If Augeo should be derived from the idea of Stirring up or Raising up, we shall then understand, how the Aug, in Augeo and Auguro, conveys the same fundamental meaning. I have given however a different origin of Augeo and Auctor in other parts of my work. I must not omit to observe, that the derivation, which the Etymologists give of Auguro from Avis, is very probable, and that the form Aw for Av coincides with that of Au in Auceps, which certainly belongs to Avis. We cannot help observing the accidental coincidence in sound between the Latin Augur and the English Auger, the Borer, Penetrater; The term Augen certainly belongs to the race of words now before before us, and presents to us the very idea, of which the Latin Augur, as I conceive, contains the metaphorical application. The Etymologists understand, that Auger belongs to the Saxon Ecg, Edge, which I have shewn to be attached to Egean, Occare.

Terms derived from the idea of Scratching, Fretting, or HACKing upon a surface, so as to Corrode it.—Tear it, &c. &c.

ETCH—HATCH, ETZEN, &c. (Eng. Germ. &c.)

EAT, Essen, &c. Edo, Est, Esthio, &c. &c. (Eng. Germ. &c. Lat. Gr. &c. &c. &c.)

ESTHES. (Gr.) A Garment, what is Worn.

ITCH—IUCKen, YOUK and YUKE. (Eng. Germ. Scotch.) What Scratches or Vellicates the skin.

OUCHE. (old Eng.) The Swelling Sore, which Vellicates or Corrodes the Flesh; afterwards the Precious Stone, rising or swelling up.

Achor — Ichor. (Greek,) The Running Sore.

Ache—Achos. (Eng. Gr.) The Vellicating pain.

We shall now perceive, that Etch, To make Scratches—Lines or Furrows upon Copper, and Eat, as in the expression "To "Eat into a Surface" are nothing but to Hack—Occare, To Tear up,—Cut up, or Fret upon a Surface, &c. To Eat, as applied to Food, means to Tear the Food to pieces. I shall shew in another Volume, that Fret, under the Element FRT, is derived from the idea of Scratching or Tearing up the Ground; and Fret in old English, and Fressen in German, signify To Eat, Devour, &c. My German Lexicographer explains Fressen by "To Eat greedily, hungrily, ravenously, To Ravin, Devour," and Fressen by "Eating, Etching, Corrosive, consuming." I shall likewise

712 A R.R. A -C, D, G, J, K, Q, S, T, X, Z.

likewise shew, that *Tire*, which signifies in old English To Devour as a Bird does his prey, belongs to *Tear—Tire*, (in the sense of Fatigue,) *Teiro*, (Tuçu, Vexo, affligo,) *Tero*, (Lat.) and finally to *Terra*. In *Venus and Adonis*, we have,

"Even as an empty Eagle, sharp by fast.

" Tires with her beak on feather, flesh and bone."

(Malone's Edit. p. 16.)

The Greek Ado, (Abu, Satio, Expleo,) is nothing but To EAT—ravenously, to Satiety, as we have it in Fressen, and Tire. In Ase, Assomai, or Asaomai, (Aon, Fastidium, Nausea;— Molestia animi; — Sordes; Dolor, Ασσομαι pro Ασαομαι, Nauseo, Fastidio;—Irascor,) we see this idea more strongly; and in the sense, which these words bear, of Pain and Anger, we see the metaphorical sense as in Fret. We all know, that the metaphorical idea of EAT is connected with Pain — Annoyance, as in " EATING Cares," and in such words as Tuioxogos, Membra Depascens, Membra Fatigans, Γυιοφαγος, Membra Exedens, Γυιοβορος, The Lexicographers derive Γυιοχορος from Membra Depascens. Γυιον and Κειρω; but we may wonder, that with such examples before them, they did not refer the Koros in this word to Koreo, (Kopew, Satio.) It is true, that Koreo, (Kopew, Satio,) To be Satiated, belongs to Keiro, (Ksiew, Tondeo,) To Sheer; and so it does to Koreo, (Kopew, Verro, Purgo,) To Brush; all which words, as we now see, refer to the action of Fretting upon a surface, and are attached to each other, just as Tire and Tear-Fressen and Fret, are attached to each other. In the phrase Γυιοκορους μελεδωνας, the word is applied with singular beauty by Hesiod, though Ruhnkenius (Epist. Crit. p. 80.) does not consider it to be genuine: He supposes, that no Grammarians would be ridiculous enough to imagine, that it was derived from Tuiov and Keigeiv; though he tells us, that Keipen is explained in Hesychius by Εσθιείν. We here see, that Keiro (Ksipw,) means at once To Sheer, and to Eat, which unequiunequivocally decides on the true origin of Koreo, (Kopen.) Let us mark the sense, which Ase, (Asn,) bears of Sordes, where we directly come to the Asis, (Asis, Limus, Sordes,) the Dirt of the Ground, the Spot, from which I imagine these terms to be derived.

I suppose, that the words for Noise, belonging to our Element, are derived from the action of Vellicating-Fretting or Scratching upon a Surface: Hence we have ADO, or AEIDO, (Adu, Audu, Cano,) To make a Noise, belonging to ADO, (Adu,) To EAT, ETCH, or I shall shew, that Scrietch belongs to Scratch, for the same reason. While I am examining ADO, (ASW,) in my Greek Vocabulary, I cast my eyes on Anes, (Adas, Orcus, Tartarus, Inferi; - Sepulcrum,) where we are again brought to the Ground. The word Aden, (Adn, Adfatim, Abunde, Largiter,) is probably derived from ADO, (Adw, Satio); and perhaps the ADen, (Adm, Glandula, Tonsilla,) the Tonsils, should be referred to the strong action of these parts in ravenous Eating. The Tonsils, Tonsillæ, are derived from Tondeo, Tonsum, for a similar reason. In the compound ADE=Fageo, (Αδηφωγεω, Ad Satietatem usque comedo; Vorax sum,) we see ADen, ADO, (Aδω,) applied to the My Lexicographer derives ADE in this comoriginal idea. pound from Aden, (Adop, Adfatim,) which he considers as a root. The other sense of Ado or Adeo, (Ado, Place, Adeo, Placeo, gratificor,) To Please, is taken probably from the Pleasure or Satisfaction received from plenteous Eating, or from being Satisfied with Food. We know, that the explanatory words Satisfaction and Satisfied belong to each other. The word ADeo, (Aδεω, Tædio adficio,) is another form of ADO, (Aδω,) To be Saturated, and is not quasi Aedeo, (Andew,) from the privative A and Edus, (Hous, Suavis.) The word Edus, (Hous,) itself might be derived from the idea of Pleasant Exting, or Food; but on this point it is most difficult to decide. I have suggested another

another origin (p. 125,) in a former page, which is very probable. Nothing is more perplexing to the Etymologist than the investigation of terms like these. I cannot however help producing a combination, where the word is brought to the original Spot, from which I conceive it to be originally derived, Hδυγαιος, Bonam Terram seu bonum Solum habens, ex Hδυς et Γαια. I might here add, that possibly Asm-enos, (Ασμανος, Gaudens, Alacris, Ultroneus, Libens,) belongs to the Eesmai, (Ησμαι, perf. ind. pass. v. Αδυ.—v. Ηδομαι.) In Asma, (Ασμα, Cantus, ab Αδω,) the Noise, we have the same form. The Greek Aedo, Aedon, (Αηδω, Aηδων, Luscinia,) the Nightingale, means the Aeldon, (Αειδων,) the Singer.

The Etymologists produce the parallel terms to Eat in other Languages, as Etan, (Sax.) Itan, (Goth.) Eeten, (Belg.) Essen, (Germ.) Etzen, (Germ.) Corrodere; the Danish Ede, the Islandic Et, the Greek and Latin Edo, (Εδω.) The Greeks have likewise Estho, Esthio, &c. (Εσθω, Εσθιω, Edo. Ab Εθω,) and in Latin we have Est and Esse. In German, Esse signifies "A Melting-"house for Metal," from the idea annexed to Essen, of Eating to pieces a solid Mass. Essic likewise denotes Vinegar, from its Sharp—Corroding quality. Hence we have in old English the term Eisel, Vinegar, which, as some commentors think, Shakspeare means in Hamlet. "Woul't drink up Eisel? eat a "crocodile." Whatever may be the meaning of the word in this passage, Shakspeare uses Eisel for Vinegar, as Dr. Farmer has observed, in one of his Sonnets.

"Like a willing patient, I will drink "Potions of EYSELL 'gainst my strong infection."

In German, Etzen is to Etch; and Aetzen means "To Bait"—
"To make brass cuts with Aqua fortis, To Etch, grave with it,"
as my Lexicographer explains it, who likewise interprets Aetzpulver by "Corrosive or Fretting Water, Aetz-Wasser, Aqua
"fortis,

"fortis, ETCHing Water." Among the parallel terms to the German Ecke, the Edge of any thing, Wachter produces Essig, Acetum; and likewise Igel, Egel, Securis; Hechel, Instrumentum dentatum; where we have the form of Eisel, as we have seen in a variety of other words, Hackle, Haggle, &c. &c. moreover records, among these words, Egge, Occa, -It is curious to remark, how words, with the same meaning, have been formed from terms attached to the same race, though the words themselves do not directly belong to each other, as Acetum, Essig, Eisel, Vin-Egar, or Vin=Aigre; where the Ac, Es. Eis, Eg, represent the same race, with the same idea, though immediately belonging to the several Dialects, in which the words are found.--Under the same form, as the Greek Estho. (Εσθω, Edo,) we have Esthes, (Εσθης, Vestimentum,) the Garment. which have probably the same relation to each other, that Wear, To Waste away, has to Wear, when it denotes Wearing Apparel, or what we Wear, or is Worn. In the passive Worn, we see the original idea. (See p. 625.) The Latin v=Estio is acknowledged to belong to Estho, (Esta.) We cannot but note, how in v=Esta, the Goddess of the Earth, and in its corresponding term Estia, (Estia,) we are brought to the Spot, supposed in my Hypothesis.

The Latin Esca belongs to Edo, and so perhaps does Vescor, as the Etymologists suppose. The Es, in Esculentus, Esculent, we should naturally refer to Esca, as the Etymologists have done. The Cul might belong to the terms denoting Food—Eating, &c., under the Element CL, as the Greek Colon, (Kodor, Cibus,) the Hebrew Act, and the Arabic Act, To Eat. We perceive here, that these Eastern terms have the form ACL, and from hence Esculentus, Esculus, &c. might be derived, without any reference to Esca; yet, as we have seen, the form ASl is familiar to our Element. Edo, To utter, is supposed to

be derived from E and Do, and so perhaps it is; yet it may possibly belong to EDO, To EAT, or Fret a surface, under the idea of 'To Scratch up—Fret up—Rout up,' with a similar sense to Eruo; and thus the phrases, "In lucem "EDERE,' and "E tenebris Eruere," would be parallel to each R. Ainsworth explains both Epo and Eruo by "To "bring forth." In Welsh, Ysu, anciently written Esu, means "To EAT, to devour, consume;" and IsoL, "Devouring, Con-"suming." The phrase produced by Mr. Richards, under this latter word, is "Tan IsoL, The Devouring fire," where we see the strongest sense annexed to this race of words. In IsoL, we appear to have the Escul in Esculus. In Irish, ITHam and Iosam mean to EAT. The adjacent words to ITHam are ITH= Chomla, a File, where we see the idea of Fretting or Scratching upon a surface; and Ithiom-radh, "A murmuring, grumbling, "backbiting;" where we have at once the Noise, attached to the action of Scratching upon a surface, and the metaphorical application of that idea. I find likewise ITH. Corn, and ITHir, Corn-field, soil. We have moreover Is, Under, where we are brought to the Low situation of the Ground. The Greek Isos, (1005, Æquus,) seems directly to belong to this Celtic word; and if these terms should be derived from the violent action of Routing up, so as 'To Lay Low, Level,' &c., every thing will coincide.

Wachter has collected, under the German words Essen, Vesci, and As, Cibus, the various parallel terms relating to Food. The succeeding word to As, Cibus, in the Glossary of this Etymologist, is As, "Cadaver, morticinium," which he explains by "Proprie "Cibus, sed fraudulentus, et inescandis feris per insidias objectus. "Inde *Ezen*, Allicere." We see in this sense of a Carcase, to be *Torn to pieces* by Wild Beasts, the original idea, from which the action of Eating, expressed by these words, was derived. The term *Fressen*, which I have referred to *Fret*, is particularly applied

applied to the Ravenous devouring of Wild Beasts. Wachter explains it by "Vorare, devorare. Dicitur de Animalibus, In the preceding column "lurconibus, et famelicis tantum." of Wachter to that, in which As, Cibus, occurs, is "As, Monas, "As, Deus, verus, et summus;" and As, "Homo divinus, opinione "Deus." These words belong to the idea of Being—the Illustrious Being, &c., which I have discussed in a former part of my Work, (p. 334, &c.) I have expressed my doubts, on some occasions, respecting the original idea, annexed to these words; and I am now inclined to believe, that the idea of the Powerful Being-THE Being, was originally derived from Power, as it relates to actions of Incitement and Violence; and if that should be the fact, we shall understand, how As, relating to Food, and As, the Powerful Being, contain the same fundamental idea of the Tearer to pieces—the Destroyer—Consumer, or something of that kind.

Wachter has justly produced under these words the parallel terms for Gods, or Powerful Personages, as Esus, or Hesus, Æsar, Asæ, the companions of Odin, Aisoi, Aisoi, bear uno Tugentur. (Hesych.) The God Esus is the Celtic Mars, where we have the sense of the Destroyer; and it is a reduplication of the Element 'S, as Es-Us, in order to express the idea more strongly, as we have seen in the Armoric Heg=Acc, "To Egg or Provoke," and the terms directly taken from it, the French Aig-Uiser, the Italian Ag-Azzare, To be in a passion, &c. In Armoric, Heg=Azus is Quarrelsome. In the next column of my Armoric Vocabulary, we have Hoguet, the Harrow. I have before produced (p. 196,) the Hebrew nw Oz=Uz, "Very or exceedingly strong," and the Syriac Az=Az-os, (Αζιζος,) the Arabic Az=Eez, عزيز "Excellent, " precious," and the Greek Agerochos, (Αγερωχος, Superbus, We have a similar reduplication to these words in Ak-Oke, (Axwxy, Mucro, Cuspis.)

I have

I have justly referred on a former occasion various words, denoting Strength, to each other, (p. 191, &c.); and I have supposed, that the original idea is that of the Base or Foundation. It is true, that in most of them the sense of Strength, as connected. with Firmness and Stability, as of things Raised on a Base or Foundation, appears to exist as the prevailing notion, and that the idea of Excitement or Commotion is not visible; and I have therefore justly considered such words in a separate portion of my Work. Yet I cannot but observe, after the maturest deliberation, that many of these terms appear to have been originally derived from actions of Excitement or Violence; and I suggest this opinion, that the adepts in the various Languages examined, some of which are placed out of my reach, may direct their enquiries to this point. Mr. Parkhurst has referred Hesus to the Hebrew OS, OSS, wy, www "To Consume, Destroy.—To " be Consumed, Consume, or Waste away." This derivation exhibits precisely the same union of ideas, which is supposed to exist between As, Food, what is Consumed, and As, the Powerful Being, the Consumer, according to my Hypothesis. The Hebrew term seems directly to connect itself in idea with the words, which I am now examining. It denotes the Moth, the animal, which Frets or Consumes Garments; and it means likewise Blight, as denoting, says Mr. Parkhurst, the "Corrosive Air." In the Arabic : Azz, "Rare, excellent, &c.—Corrobating," (see p. 195.) the idea of Excellence, as connected with Strength, appears to prevail; and in another Arabic term, || Aza, which is probably only another form of it, we have the sense of "1. Whatever tends "to Support life. A Prop, Support;" where we have the idea of Strength, as connected with Stability. Yet in another Arabic word belonging to it, which is to be found in the same column of Mr. Richardson's Dictionary, we have the sense of Strength connected with the notion of Excitement, which I conceive to be

the original idea of the word. Mr. Richardson explains il Azz, in one sense, by "Force, value, power, Strength;" but the preceding senses of the word, according to his arrangement, are " 1. Moving, Removing, Shaking, Agitating. 2. Burning, inflaming, "kindling, lighting a fire. 3. Fire, flame. 4. Exciting, Prompting, " Stimulating, Instigating, Impelling, rendering covetous." I think we may perceive, that the original idea of the Hebrew p OZ, denoting "Strength or Vigour," is that of Excitement, when we consider the turn of meaning annexed to the word. Though it denotes "A Strong Hold or Place;" yet it signifies likewise "To Hasten, Move, or Remove with Haste and Vigour-A Goat, "so called on account of its Agility and Vigour;" to which Mr. Parkhurst has justly referred Aix, (A/2); and I shew in another place, how Aix, (A/\xi,) connects itself with Aisso, (Aurra, Ruo.) On the whole I must observe, that through the whole compass of Language, the idea of Excitement—Commotion-Agitation, seems principally to have afforded the original turn of meaning, with which words were impregnated.

In examining the word [j] Aza, in Mr. Richardson's Dictionary, I cast my eyes on a Persian term in the same opening, [Color, To sew together, to prick or pierce with a "needle.—Ezden, To drive the Edge or point of a knife into any thing." We shall from hence conclude, that the Greek Akeomai, (Ακεομαι, Sano, medeor, medicor; — Εκρίο, Sarcio, Resarcio, &c. ΑΚΕΙΣΘΑΙ ελκος, δήμαν, τα ΔΙΕΡΡΩΤΟΤΑ, ΤΠΟΔΗΜΑΤΑ, &c.) belongs to Ακε, (Ακεστρα, Acies ferri,) for the same reason; and we know, that Ακestra, (Ακεστρα, Acus,) means a Needle. I have suggested this idea on a former occasion, (p. 240,) in which I now acquiesce. The Greek Ugies, (Τγιης, Sanus,) may perhaps belong to this, as I before suggested. If the Irish Icam and Welsh Iachau belong to Aκeomai, (Ακεομαμ,) they must be referred to the same idea. On the Welsh terms Assio, Iassu, "To Solder, or sodder, to join, "fasten,"

" fasten," &c., I have no evidence finally to decide; yet I have supposed, and I think with probability, that they belong to Iachau. I must add, however, that the preceding term to Jassu, the word IAS, means "Heat, Boiling Water. It is also used of violent cold;" where we seem to see the idea of something Sharp or Acute— Painful, &c., as applied to the two extremities of Heat and Cold. I have referred the Irish Iclus, "Healing by Herbs," the Biscany OSAGUILLE, A Physician, the Æscul and Ascl, in Escul-Apius and Ascl-Epius, the Greek UKEL-os, (Tredos, Sanus,) to each other, (p. 249,) which is surely the fact. In the explanation of Iclus, "Healing by Herbs," the interpretator manifestly supposes. that it is a compound of the simple form Ic, A Cure, and Lus, "An Herb or plant, Leek," as Mr. Shaw explains it. The name for a Herb, or what is Green, appears under the form GL, GLS, In Welsh, the terms for Green are Glas, Llas; in Irish, Glasam, &c. Among the terms for Herba, in Celtic, are the Welsh Glaswelltin, Llys; and in the other Dialects we have commonly the form LS, as Lysuan, (Corn.) Luzauan, Lousou, (Armor.) Lus, (Ir.) &c. I must leave the Celtic Scholars to decide, whether these words Iclus, Osaguille, and the parts Æscul, Æscl, &c., are not compounds of Ic, &c. To Cure, and GL, GLS, LS, denoting Herbs. I must remind them, moreover, that the Labial sound is sometimes an organical addition to the L in these names for Herbs; from whence we have the Irish Luiv or Luibh; and I must leave them to consider whether the p in Esculapius has not been derived from this source. I cannot but think, that the name Ascalaphus is a composition of a similar kind with Æsculapius, whatever it may be. One personage under this name is a mystic character who watches over Proserpine, and is the son of Acheron and Gorgyra, or Orphne. I suspect, that this has some allusion to the Celtic Mythology, connected with the Cauldron of Cerid-Wen. to which Mr. Davies has lately directed the attention of the Public,

Public, (Mythology of the Druids.) who would do well to examine this point. If Mr. Davies will burn his Bryant, the most dangerous and deluding of all guides in the mazes of Mythology, he may perform good service to the cause of letters, by affording plain and literal translations of the Welsh Bards, with critical observations on difficult words, confirmed by examples.—It is painful to see those valuable materials, which the Welsh Bards and the Druid Ceremonies present to us, enveloped under the disgusting jargon of Bryant Mythology.

HATCH, in Shakspeare, is used for ETCH, or HACK, To Cut or Engrave. Ulysses, praising the speeches of Agamemnon and Nestor, says that they "were such,"

- "As Agamemnon and the hand of Greece
- "Should hold up high in brass; and such again,
- " As venerable Nestor, HATCH'D in silver,
- "Should with a bond of air (strong as the axle-tree
- "On which heaven rides) knit all the Greekish ears
- "To his experienc'd tongue." (Troilus and Cressida, A. I. S. 3.)

Dr. Johnson observes, that to "Hatch is a term of art for a par"ticular method of Engraving. Hacher, To Cut." Mr. Malone
has likewise observed, that "Hatch'd in Silver" means "whose
"white hair and beard make him look like a figure engraved on
silver." We perceive, that the whole image is an allusion to
an Engraving; and the Bond of air refers, either by an intentional
or involuntary allusion, to the material representation of the
Breath—as uttered by a person in the act of speaking. The Poet
had probably seen a representation of Nestor in this attitude.
Under the same form as Hatch, we have 'Hatch, Incubare,'
applied to Fowls; and if Skinner's idea should be just, that
Hatch, Incubare, belongs to Hacken, or Hack, "Conscindere
"minutim, quoniam sc. aves, cum excludunt ova, rostris suis
"Conscindunt, et perrumpunt putamina," both words belong to

the same notion. Perhaps the Egg, &c. may mean that, on which this process of Hatching or Hacking is performed.

The term ITCH, as we shall now understand, belongs to this race of words, and means the Scratching upon a surface. Itch, as applied by us at present, expresses a Scratching kind of sensation, if I may so express it. The Latin Scabies, "A Scab, a scall, "a gall, or Fret; the mange, murrain, &c.—Met. A tickling, or " Ітсніng, Desire," as R. Ainsworth explains it, belongs, we know, to Scabo, "To Scratch, to claw." The Latin Scabo is acknowledged to be derived from the action of Scratching up the Ground, and is justly referred to Skapto, (Σκαπτω, Fodio.) Let us mark the term *Fret*, which, as I have observed, is particularly applied to the action of Scratching or Vellicating a surface. Let us likewise observe, how the idea of Desiring any thing-Longing for any thing, is connected with the action of Scratching upon a surface, as in ITCH and Scabo, "A Tickling, or ITCHING Desire," "Scabies et contagia lucri." In the word Tickling, we have the same metaphor; and I shall shew, in a future Work, that Tickle belongs to Tease—Teasel. Skinner refers Itch, ("credo olim "Ick," as he observes,) to Suck; and Meric Casaubon derives it from the Greek Kriζειν, or Kittav. Skinner adds, however, "Allu-"dit idque longe propriùs Ixwe, Serum, sanies." In German, Iucken, or j-Ucken, means to Itch or Fret; and Yuck, as Skinner tells us, is a Lincolnshire word with the same meaning.

We shall now understand the origin of the term Owch, occurring in Shakspeare; which conveyed, as I imagine, in its original sense, a similar idea to ITCH, and meant the Gall—or Fretted Sore, Rising on the Skin. "Your Brooches, pearls, and "Owches," is the line of an old Song, which describes the ornaments worn by women; and it is repeated by Falstaff, (Second Part of Henry IV. A. II. S. 4.) with an allusion to the foul eruptions on the skin, proceeding from a loathsome disease.

Mr. Pope has seen only, that Owches mean "Bosses of gold set "with diamonds;" but Dr. Johnson justly observes, "I believe, "that Falstaff gives these splendid names, as we give that of "carbuncle, to something very different from gems and orna-"ments;" and Mr. Steevens has confirmed the idea of Dr. Johnson by quoting the following passage from an old play, The Widow's Tears—"As many Aches in his bones as there are Owches "in his skin." Here, we see, Owch unequivocally means the eruption on the skin; and this I conceive to have been the original sense of the word. The idea of precious stones, and that of eruptions on the skin, have been perpetually connected. In the instance of Carbuncle, we fully see this fact; and in a passage quoted by Mr. Malone, we have the same familiar combination, "Let him pass for a churle and wear his mistress's favours, viz. "Rubies and Precious stones on his nose," &c. &c. If we are desirous of unfolding the secrets of Language, we must be content to search for information, wherever information can be obtained; nor must we disdain to call to our assistance the ribaldry of the Comic writer, who portraits with fidelity the Language—the follies and the vices of mankind.

Let us mark the explanatory term Ache, which belongs to this race of words, and is derived by a metaphorical application from the same action of Fretting or Vellicating a surface. We cannot but observe, from the line in the old Play above quoted, that the sound of ch, in Ache, was sometimes like that of ch in Owch, and of tch in Itch; which would operate, I fear, on the minds of some readers in deciding their opinion, that these words belonged to each other. The sound of Aitch has now passed into that of Aik; and idle as it may be to introduce the notice of so trivial and familiar a change, yet a transition of this kind has become, in the arrangement of the Etymologist, an insurmountable barrier, by which races of words are secluded from all communion with

with each other. The Greek Achos, (Axos, Dolor,) belongs to the same metaphor of Scratching upon a surface; and should only be considered as another form of ACHE. We cannot but note on this occasion, how the Ach and Ich, in Achor and Ichor, (Αχωρ, Manans capitis ulcus, sordes capitis, Ιχωρ, Sanies, tabum, pus,) relate to the Foul Sore. If the Chor in these words be significant, it must belong to Scar, Sore, &c. Dr. Jamieson produces Youk, Yuke, &c. as the Scotch terms, corresponding with ITCH; and in the preceding article to Yuke, he exhibits the term Yuik, which is used, as in the following sentence, "Certane " blak pimples-brak out over all his haill body, with sa greit "Yuik, and sic pane throw out all his lymmis," &c. Dr. Jamieson is much embarrassed about the meaning of this term. He finds. that in the Lond. Edit. Ache is the word used, and that the Latin translation is "Dalore, et omnium partium vexatione." He imagines that "Itchiness cannot well be meant, as there is no corre-" spondent term in the Lat.;" and he adds, moreover, "One would " almost think, that Yuik were an error of the Press for Yaik, as the "v. is used in this form, signifying to Ache." Our Lexicographer will now, I trust, understand, that these terms YUKE, YUIK, YAIK, &c. are only different forms of each other, or, if he pleases so to conceive the matter, different senses of the same word, conveying the same fundamental idea. I have been led to produce these terms relating to Sores, adjacent to words which signify to EAT; and I have shewn, that they contain the same Radical meaning. It must be owned, that on the first view no ideas can be more remote from each other; yet we shall at once see the intimate union between these notions when we remember the familiar metaphor of a Sore-Gangrene, &c., Eating into the Flesh. R. Ainsworth explains Exedo in the first sense by "To EAT, as " an Ulcer or Sore doth."

OZD. (Heb.) To Cut.

m-OZD. (Heb.) An Adze.

HEZZ. (Ar.) Cutting.

Huzz=Az. (Ar.) Piercing.

HK. (Ar.) Scratching, Scraping,

Boring.

HYKKET. (Ar.) Itching, Rubbing.

AKK. (Ar.) Splitting A Furrow.

Akhub. (Ar.) A Furrow, Cutting.

In Hebrew, עצד OZD signifies, in its original idea, "To Cut, Cut "off," as Mr. Parkhurst supposes. It is used with the formative M for "A Cutting Instrument, An Axe, Hatchet;" and "hence," adds Mr. P. "An Adze, a kind of Axe, a Hatchet, and perhaps " Edge." I might here observe, however, that perhaps the y the Gnain, beginning this Hebrew word, may have the force of G, and then the term will belong to Cut, Gash, &c. &c. I must leave the Hebrew Scholars to determine whether I'v IGCh, "To Afflict, "Grieve," "IGO, or IGG, "To Labour, To be weary or " fatigued with Labour," belong to this metaphor. The adjacent word to this is יגר IGR, "To Shrink or draw back for fear, be "afraid." We have seen the Welsh Egr, Sour, Sharp, &c., and EGR=yn, "Fear, Trembling;" and I must here likewise leave the Hebrew Scholar to determine the original idea of the word, as I have not sufficient materials before me to decide on this Again, in Hebrew, אשר ASD means, as Mr. Parkhurst thinks, "the Sharp Biting humour;" which might lead us to enquire, whether it does not belong to this race of words. Again, in Hebrew, ידע IDG means "To perceive or feel by the body or "outward senses." The idea of Feeling is naturally derived from the metaphor annexed to Stirring up—Exciting—Vellicating;

and such might be the original notion annexed to this word. In one conjugation it means, says Mr. Parkhurst, "To cause to " feel, make feel, as we say for putting to pain, Jud. viii. 16: "where many of Dr. Kennicott's Codices read fully in Hiph. " חודע, and where LXX has Hanger, Threshed, or, according to "the Alex. MS. Katekavev, Tore, and the Vulg. Contrivit and Com-"minuit," &c. &c. Here we are brought to the train of ideas which I am now unfolding. Mr. Parkhurst refers to this Hebrew word the Greek Eido, (Eida,) and its parallels Video, Wit, &c. &c. It is certain, that the idea of mental Sensation-Perception, &c. is often connected with that of Excitement. I shall shew, in a future Volume, that Sensation - Sensible, belong to this idea. I cannot decide whether the Hebrew term and these words are directly connected with each other; but I have already suggested, that Eido, (Eido,) and Video, belong to words, signifying to Stir up or Rout into any thing; and we cannot but see how WIT relates to what is Sharp—Pricking, &c., and how it connects itself with WHET, which unequivocally signifies to Sharpen up. We cannot but perceive, likewise, how WIT associates itself with such terms of Excitement, as WISP, WHISK, &c. &c., where in the latter of these words we actually see the idea of Stirring up, Brushing up or over, a Surface.

In Arabic there are terms for Sense, Perception, belonging to our Element, which are unquestionably connected with the metaphor of Excitement—Vellication, &c., as referring to the action of Stirring up a Surface. In this Language, Hess means 1. Sense, Sentiment, Feeling, imagination. 2. Killing. 3. The sudden cry of pain upon touching unexpectedly any thing burning hot," as Mr. Richardson explains it. As adopted by the Persians, with an auxiliary verb, this word means, "To perceive, to comprehend, &c.—To comb the dust (from a horse, &c.) to curry and dress cattle.—To destroy, to kill.—

" To

"To tear up by the root. Hyss. Love, sympathy, compassion.— "A low murmuring sound." In the sense of Currying Cattle, and Tearing up by the Roots, we unequivocally see the original idea of Stirring up a surface. In the sense of Killing we have the most violent action belonging to this metaphor. Let us mark the idea of Sound annexed to this action, which I unfold on another occasion. In the preceding column of Mr. Richardson's Dictionary we have : Hezz, Cutting, making an incision, notching. - Scraping, &c., and خزاز HEZ=Az, Diligence-Huzz=Az, " 1. Piercing. 2. Scraping. 3. Anger. 4. Anxiety." Element 'Z, 'S, &c. is doubled in order to render the word more forcible, as in the Armoric HEG=Acc, to which probably it directly belongs. In Persian, هوش Hush means "Understanding, judg-"ment, intellect, &c.—Destruction, perdition, Death," &c.; and in the same column we have the Arabic هوس Hawes, "Desire, "lust, concupiscence, an inordinate appetite;" and in Persian, when it is adopted as an adjective, it means "Libidinous, Bruising, "beating, breaking." Mr. Richardson, under this Arabic word, refers us to by Hawa, "Air, Atmosphere," &c., which perhaps should be considered as quasi HAWAS, where the idea of Agitation is still apparent. The Arabic Scholar will now understand, that the expressive term for violent passion or Love, בشف Үзнк, "Love of the most passionate kind," is derived from the idea of Excitement. An adjacent term to this is the Arabic مشقر، Ashkyn. "The Rut (of deer or other animals.)—Travelling fast, going a "good pace, (a horse.)" I shall shew, that the explanatory term Rut belongs to the same metaphor of Routing up; and the sense of Travelling fast, annexed to the Arabic word, belongs to its other meaning of Rut, denoting a Road. In Scotch, To Eassin, Eisin, means "To desire the male. In this sense a Cow is said to " be Eassenin. S.—Metaph. used to express strong Desire of any "kind," says Dr. Jamieson, who refers the word, among other derivations,

derivations, to the Saxon Esne, A Male. Whether it belongs to the race of words before us I cannot decide.

In Arabic, L HEKK signifies "Scratching, rubbing. "Scraping, erazing. Boring, digging, piercing;" and in the same column of Mr. Richardson's Dictionary we have Lykket, "Itching, rubbing;" where let us note the explanatory term Iтсн, which I have shewn to belong to this race of words. In the same column I find Hukkam, "Princes, Lords, "Nobles, governors, judges, magistrates;" where perhaps the name for the Great, Powerful Man, must be referred to the strong sense of the same metaphor in the Sharp—violent action of Scratching up—Tearing up—Erazing, &c., as denoting the Sharp, Strict, Severe Exactors of their will, &c. In the succeeding column we have the parallel terms to it, where we find, that HEKEM means "Absolute power, Dominion,"—HUKUMEt, "Despotism," &c. We find likewise, that HYKEM means "Knowledge, Science," and HUKEMA, "Wise Men, Philosophers, Doctors, Physicians;" where we have a similar idea of the Sharp Scrutinizers — Searchers. These words might be explained in Latin, in its original sense, by Radere, Eradere, Stringere; and in its metaphorical sense by Strictim Exigere,—ut in Regendo, Decernendo, Scrutando, I have chosen the word Stringo, because, as we know, it relates to Scratching over a Surface. In the same column we have HEKEMET, "A Bridle, a halter, an iron ring, or other check "rein for a horse;" where we see unequivocally the metaphor of Sharp Constriction.

In the preceding page I find the Arabic —— Hek, denoting "Just, right, true;" where we have probably the same idea of Strict; and this will shew the Arabic Scholar why the same word means "An Enemy." This term Hukk denotes likewise "A Hollow "in the middle of the neck, or of a bone," where we see the original sense of the Hole made by Scratching up a surface.

The

The term adjacent to these words, Hykaket, which denotes "History, heroic romance, fable, tradition, a relation, narrative," means probably a 'Strict Search into, or Tracing of preceding events.' In Arabic, عقب Akk means "Splitting.—A Furrow or "Crack in the Ground." The Arabic نخل Акнг, "А Receipt, "taking, Seizing, interception, apprehending," belongs to the same idea of Strictio—Constrictio; and a term in the preceding page of Mr. Richardson's Dictionary, the Persian (Akten, "To Hang, Suspend.—To draw (a sword.)—To Lead to a place," belongs still to the same metaphor of Stringo, Stringere gladium, &c.; and this sense of Lead brings us, we see, more nearly to that of Ago, (Ayw, Duco,) derived from the same action. my idea respecting the word Akhz is just, will be manifest from the preceding term اخدو Ukhud, or Акниd, "An oblong "Fissure in the Ground, a Furrow.—(A blow) Cutting the skin." In the same page we have اختضار Ikhtizar, or Акнтіzar, "Mowing, "Reaping, Cutting down any thing green;" where we unequivocally see, that the idea of Taking—Seizing is derived from the action Stringendi Superficiem, ut Terram, &c. The Latin Capio belongs to Carpo, for the same reason. The Hebrew by HK means, from a similar cause, "To Confine, straiten, contract, "compress."

In Arabic, JÜI Asar means "Histories, traditions, relations, "news, memorable events," &c. &c.; to which, as it should seem, belongs the Greek Istoreo, Istoria, (Ιστορέω, Inquiro, sciscitor, Exploro, Viso, lustro, memoriæ trado, &c.; Ιστορία, Cognoscendi studium, Lustratio locorum, Historia, &c.); where we manifestly see, that the idea annexed to these Greek words is that of Routing into—or Searching into any thing. That the Arabic word is derived from this metaphor of Scratches and Scars upon a Surface, I can prove by producing the first sense of the word as recorded by Mr. Richardson, who actually adopts the

730

term Scar in his explanation, "Signs, marks, Traces, Scars, ves"tiges, ruins, monuments." In the succeeding column we have
another form of the word,—Eser, where it is explained by
"A mark, sign, character, impression, Trace, remain, vestige,
"ruin.—Knowledge, perception of any thing," &c. &c. This
origin of History and Story will explain to us, why Story is
connected in old English with the Delineations or Sketches of
Painting.

" And STORIED Windows richly dight."

Mr. Warton observes on this passage, that Storied means "Painted with Stories, that is Histories." After having ascertained the true idea annexed to Istoreo, (Io Topew,) the only difficulty which remains is to discover, whether it should be considered as belonging to the Element 'S, or to ST-R, or to both. Under the Element SR, the same idea exists as in the term, which I have found it expedient so often to adopt, Stir, and the explanatory word Scar, &c. &c. The Welsh Lexicographers understand, that YSTORI, denoting History in that Language, directly belongs to the Greek Istoria, (Istopia); but they do not seem to be aware, that the words under a similar form belong to the same idea, as "Ystyr, Consideration, sense, meaning; also History;" Istyrio, "To consider, to mind," &c.; YSTRyw, "Industry, wit, "craftiness, subtilty, skill; a stratagem." We find likewise, as adjacent terms to these, Ystrin, "a Battle, a fight;" Tstrewi, "To Sneeze;" where we have the idea of Commotion, as we see it in the English Stir. There are various other Welsh words under the form 'ST-R, which convey the same train of ideas. I shall shew, in a future Volume, that the words under the form ST-R, as Stir, &c., belong to Terra, &c.

Terms signifying To Stir up or about—To Urge forward, violently or gently—To Drive—Lead, &c., either directly expressing the action of Stirring up, and Breaking up the Ground, or connected with words applied to that purpose.

Agoo, Ago, Agito. (Gr. Lat.) To Drive—Lead, Stir up. To

Act—AGITATE, connected with Stirring up the Ground in the important business or Action of Agriculture.

Egeomai. (Gr.) To Lead.

Ago, Agnumi. (Gr.) To Break up, asunder, &c. &c.

Oigo. (Gr.) To Break up or open; To Open.

Ogmos. (Gr.) A Furrow.

Aiceam, Aigeam. (Ir.) To Lead, Go on.

Agreuo, Egeiro, Ageiro, (Gr.)
To Stir up, about, or together,
To Chase, Drive, &c. &c. &c.
as attached to the

Agros, Ager, Acre, or Ground.

Aguia. (Gr.) The part much Stirred up, or Trodden by

the feet, the common Path, Place, &c., the Street, Village, &c.

EASam, ACHTam. (Ir.) To Make, do an Act.

Achdam. (Ir.) To Chase.
Achaid. (Ir.) A Field.
OSH. (Heb.) To do, Act.
HGH. (Heb.) To Carry forth
or away.

Askeo. (Gr.) Colo, Exerceo, To Cultivate, Exercise, Practise any thing.

Axioo, Euchomai, Aiteo, Ask, Ax, Axian, Ascaim. (Gr. Eng. Sax. Ir.) To Stir up to any purpose — To Solicit — To Beseech, Pray.

Out—Aus, &c. Ek, Ex. (Eng. Germ. Gr. Lat.)

Aus=Ackern. (German,) To plough Out or Up.

Utian. (Sax.) To Out, Expellere, Ejicere.

Ex=Agito. (Lat.) To Drive Out or About.

Oter. (Fr.) To take away.

Отнео. (Gr.) То drive away.

THE Latin and Greek Ago, (Ayw,) with their parallel terms in Modern Languages, Act, Agir, (Eng. Fr.) &c. &c., certainly belong, in one of their applications, to Actions performed on the Surface of the Ground, by means of the Plough—HARROW— Occa, Ege, &c. &c. We should all imagine, à priori, that the word expressing Action or Labour would be derived from the Spot, on which the primitive and most important Operations are performed. The first sense of Ago, as given by R. Ainsworth, is "To Drive gently or forcibly;" which accurately expresses the meaning of the word, To Stir up or about, &c. The Greek Ago, (Ayw,) is justly explained by Duco, To Lead or Draw; and this idea of Driving—Leading or Drawing, is perpetually connected with that of Driving or Pushing on the Plough, &c. in Drawing a Furrow, &c. &c. I shall shew, that Duco means simply 'To Ditch, or Dike, To Make or Draw a Ditch, Dike, Furrow, 'Trench,' &c. Hence we have Ducere Fossam, Ducere Sulcos, (in pulvere,) &c. &c. The Greek Elko, (Elko, Traho,) To Draw, belongs, we know, to Olkos, (Olkos, Tractus; -Sulcus, proprie et tropice.) the Furrow. The term Ago, (Ayu,) is used, as I imagine, in its original sense, when it is applied to the Furrow, Agein Ogmon, (Ayen Oymor.)

Ουθ' εον ΟΓΜΟΝ ΑΓΕΙΝ ορθον δυνα, ως το πριν ΑΓΕΣ.

(Theocrit. Idyll. X. v. 2.)

" Neque Sulcum rectum Ducere potes, sicut antea Ducebas."

The OG, in Ogmos, (Ογμος,) should probably be referred to the same idea as that conveyed by Ago. The Scholiast explains Ogmos, (Ογμος, Sulcus aratro factus;—Linea à messoribus facta, quum scilicet manipulos vel demessa secundum lineam disponunt;—Plantæ ordine dispositæ;—Series, Ordo;—Via,) in the following manner; Ογμον την αυλακα παρα το Διοιχθηναι την γην' οι δε ταξιν, οι δε τον Ορχον, οι δε τον χορτον' κυριως δε η επ'ευθυ του αρουτρου τομη.

Let us mark the explanatory word Oigo, (Oiyw, Aperio, patefacio,) with its application to Breaking up or open the Ground; where the word is brought to its original Spot. Let us mark likewise the explanatory term Orchos, (Oęxos, Plantarum Ordo, Vitium Ordo,) or Orchatos, (Plantarum Ordo, seu Series,) which, under the form ARC, seems to belong directly to the idea of the Furrow. Another Scholiast tells us on this passage, that Ordinion, (Oędonov,) was the ordinary or modern Greek word for a Furrow; Audara de, τον Ογμον φησι το κοινως λεγομένον ΟΡΔΙΝΙΟΝ. The explanatory Latin word Ordo I have referred to the same Spot, though under an idea somewhat different.

This origin, which I have attributed to Ago, (Ayu, Duco,) To Lead, will explain to us, why Ago, or Agnumi, (Ayw, Frango, Rumpo, pro quo usitatius dicitur Ayrum,) signifies to Break. We shall now see, that Ago, $(A_{\gamma\omega})$ in both senses of Leading and Breaking, belong to each other, and that they are connected with the idea of Breaking up the Ground. The words, to which the Greek Ago, (Ayw,) is adjacent in our Vocabularies, bring us to the same spot, as Agros, (Ayeos, Ager,) the Field, Acre, &c. &c., and Aguia, (Ayuia, Vicus, Via, sc. urbis; Regio, Platea; -Vicinia; Angiportum, the Path, or the Street. Agora, (Ayoga, Forum,) is another adjacent term; and that it belongs to some idea expressed by Ago-Agros, or Aguia, (Ayw, Aypos, Ayua,) we shall now, I think, agree; though it is not perhaps so easy to decide on the precise notion.—Agora might mean simply the Agnos, or peculiar Ground, or Place, destined for a certain purpose, as we apply Place in Market=Place; or it may mean 'The • Place much Stirred up or Trodden by the multitude, the Public 'Path—the Via—Vicus, Platea, or the Spot, on which people are 'collected.' We know, that Vicus has the double sense of the Street and the Village; that is, the Frequented—Trodden Path, or Spot; and Forum in Latin means at once the Market=Place,

and the Market=Town. We perceive, how Forum connects itself with Forus, the Furrow. To these words Forum and Forus, the Furrow, belong the English Fair, the French Foir, and the English Fare, To Go, with the German Fahren, To Fare, or Go, and Fuhren, To Lead, &c.

The Etymologists derive Agora, (Ayona,) from Ageiro, (Ayuna, Congrego, Colligo; — Mendicando corrogo, circulatorum more peto; Wagor, victûs, aut alius rei causâ.) The Greek Egeiro, (Εγειρω, Excito,) and AGEIRO, (Αγειρω,) are only different forms of each other; and they are derived from the idea of Stirring up the AGROS, (Αγρος,) or Ground. The word AGEIRO, (Αγειρω,) in the sense of Colligo, precisely agrees with the metaphorical expression of Raking together, or Stirring together, as Turba, the Crowd, belongs to Turbo, To Dis Turb; and in the sense of Vagor, we have the idea of Raking about. The terms Agureo, Aguris, and Agurtes, (Ayupew, Congrego, Colligo in unum; Ayupe, Cœtus, Ayueths, Qui congregat ac cogit in multitudo congregata; unum; - Circulator et Præstigiator circumforaneus,) belong to EGEIRO, (Eysiew.) This minute difference in form between Agureo, (Αγυρεω,) and Egeiro, (Εγειρω,) has made both these words to be considered as Roots, in our ordinary Greek Vocabularies. The term Agra, (Ayea, Captura, Venatio; — Piscatio; — Res, quam capimus.aut venamur, præda,) is likewise considered as a Root; and Agreuo, (Aypeuw, Venor, venatu capio, feras, pisces, aves,) is supposed to be derived from it. It is singular, that these terms were not understood to be related to the adjacent word, under the same form, Agros, (Ayeos.) The terms Agra and Agreuo, (Ayea, Aγρευω,) may simply mean what belongs to the Agros, (Aγρος); or AGReuo, (Ayeeuu,) may signify 'To Stir up-Chase-Drive,' &c., from the idea of Stirring up the Ground, or Agres, (Ayess.) have seen, that the first sense of Ago is "To Drive gently or "forcibly;" and one of the passages produced by R. Ainsworth, under

under this sense, is "Cum Prædam ex Agris Agerent;" which brings us to the idea conveyed by Agra, (Ayça, Præda,) Prey, Booty, &c.

AGITO, from AGO, is, we know, likewise applied as a term for *Hunting*.

"Nec curat Orion leones
"Aut timidos AGITARE lyncas."

Robert Ainsworth explains Agito in one sense by "To Chase, "Course, or Hunt." I have shewn on a former occasion, that Harrier, the Hunting-Dog, belongs to Harry, "Vexare, Lacesand Hergian, "Vastare, Prædari;" which mean to Harrow. I have observed, what we all acknowledge, that the idea of Commotion is perpetually connected with that of Stirring up the Ground, as Pulverem Excitare, Solicitare, "To Stir, or Dig, up; " properly the Ground. To Disquiet, to busy, to trouble, to "disturb," &c.; and hence we have Ago, signifying "To Move, " or Shake.—To Disturb, or Disquiet;" and hence likewise it has arisen, that Agito is one of the strongest and most appropriate terms to denote Commotion or Agitation. The genuine sense of Agitation, &c. appears in the following passage: "Sed ne lassitudo quidem Soli minuit Agricolæ fructum: neque " enim prudentis est adduci tanquam in hominibus nimia corporis " exercitatione, aut oneris alicujus pondere, sic Cultibus et Agita-"TIONIBUS AGRORUM fatigationem succedere." (Columell, lib. ii. c. 1.) I cannot quit the form AGR, without suggesting, that words under this form, Agreuo, (Αγρευω,) &c., may possibly be compounds of Agoo, (Ayw,) Ago, and ERA, (Eqa); and thus Ager and Agros, (Ayeos,) might have originally related to the Ploughed up Land; and hence we have the union of Ag= ARi, Ag=itatio. The Greek Agoo, (Ayw, Aufero, Rapio, Abigo,) has a similar idea of Violence and Commotion; and hence, we know, is the familiar phrase AΓΕΙΝ και φερειν—τους πολεμιους, &c., which R. Ainsworth

worth justly explains by AGITARE and Diripere. In this sense it precisely coincides with Harry, Hergian, &c. Vastare, Prædari.

That the idea of Action, annexed to the Latin Ago, Actus. &c., was derived from the important Action, the Cultivation of Land, will be manifest, I imagine, from the word Verv-Actum, which means, says R. Ainsworth, "Vere Actum; i. e. Verno "tempore Aratum; Land, that hath been fallow, and is turned "in the spring to be sown the next year." The term Actor, which meant in latter times 'A Pleader of Causes,' and 'A Player,' or Actor, as we express it, originally denoted the Cultivator of a R. Ainsworth gives us, as the second sense of this word, "A bailiff, or comptroller," and refers us to Columella, lib. i. c. 77. "Ita fit, ut et Actor, et familia peccent, et Ager sæpius in-" fametur." The phrase Agene Terram Aratro occurs in the Vocabulary of the Rei Agrariæ Scriptores; and we are referred to page 296 of the Work, where we have "Circum-Actus Aratri. Quin-" que aut sex pedum latitudo, quâ scilicet Aratrum eat." (Nicolai Rigaltii Glossæ Agrimensoriæ. Hence we have the term Actus, for a measure of Land, or "Mensura longitudinis pedum CXX "absque latitudine." It is not necessary to adjust with precision the quantity of the measure, which is here intended: It is sufficient to bring us to the spot, from which it is taken, or with which it is connected. (See too Columella, lib. ii. c. 1. 5.) In Sub=Igo, which our ordinary Vocabularies explain by "To Break, " Ear, or Till.—To Dig, or Cast up, Ante Jovem nulli Subige-"BANT Arva coloni.—Scrobem Subigere," we see the genuine sense of Ago. Among other senses which Subigo has, is that of "To Whet-Subigunt in cote secures," which will again shew us, how Igo or Ago-Occo and Acuo, may be only different forms of each other. The various senses existing in Ago and its derivatives, Sub-Igo, Actor, &c. &c., which are acknowledged

to be applied to Operations on the Ground, whether that application be the original sense or not, will shew us what various ideas, apparently discordant from each other, are connected with this Spot, and consequently, what various ideas, such as these are, might have been originally derived from it. Let us examine the various senses of Ago and Sub-Igo, as they are detailed in our ordinary Lexicons, and we shall be astonished and edified by observing the various applications of the same fundamental idea, all connected at least with the action of Stirring up the Ground, if not derived from it. Among the different senses of these words, recorded by R. Ainsworth, we have (Ago,) "Properly, To drive "gently or forcibly.—To do or execute any business.—To talk " of.—To mind, observe.—To sue, implead, or indite.—To Plead.— "To move or shake.—To live.—To personate.—To Exercise.— "To Count or reckon. — To bargain, contract for, &c. &c.— " (Sub=Igo.) To Bring under, to Subdue, to conquer.—To Shove " or thrust.—To Break, Ear, or Till.—Nequam voc.—To Dig, or "cast up.—To Rub, or stroke —To Whet." Mr. Parkhurst has justly compared with the Greek Ago, (Αγω,) the Hebrew הגה HGH, which signifies "To bring or carry forth, or away;" and in other senses, as this Author explains it, "To bring forth, or utter "words, or a voice.—A Discourse, Tale.—To roar, or rather "growl, as a lion over his prey.—To bring forth, or propose any " thing in the mind for meditation and contemplation.—יני IGIG, "Intense Meditation, earnest contemplation." The same idea of Agitation affords the senses which we see in this Hebrew term. The Latin Ago means, as we have seen, "To Talk of.—To mind, "to observe;" and we all know such phrases as "Agitare rem " aliquam sermonibus, To talk or discourse of-Agitare consilia, "To Consult."—The succeeding word to this Hebrew term is הניבה HGINH, which once occurs in Ezekiel, and which some explain by "Directly, Straight forward." If this thould be the 5 A meaning

meaning of the word, the HG may belong to the sense of 'Driving' or 'Leading onward, Forward,' &c.

There are various terms, adjacent to Ago, (Ayu, Duco, Ayw, Frango, Rumpo,) which are derived from the same idea of 'Stirring up,' Agitating, &c. In the same column of the Vocabulary of Hederic, where this word occurs, I find Agon, (Aywr, Certamen, solennes ludi, certamina ludorum,) which is placed as a Root, but which, as we see, belongs to the idea of Commotion-Agitation, &c., annexed to Ago, (Ayw,) &c. One of the senses given in my Greek Vocabulary of this word is "Exercitatio ad "certamen;" where in ex-Encere, belonging to the form of our Element 'RC, we have a similar union of the ideas of Contention and of Stirring up the Ground, "Exercet frequens Tellurem." In Greek, Askeo, (Askew, Colo, Exerceo, percolo, meditor,) has the same idea, and is derived from the same spot, under the form of our Element 'S, 'K, &c. We perceive, that the sense of Meditor coincides with the use of the Hebrew word above produced; and we see likewise, that the explanatory term, used by Hederic, Colo, brings us at once to the same idea of Cultivating the Land.—The English Ask, in old English, as in our vulgar Language, Axe, with its parallel terms Ascian, Axian, &c. &c. (Sax.) Eyschen, (Belg.) &c., has been referred to Askeo, (Aruew, Exerceo,) and Axioo, (Ažiou, Peto, Postulo.) These words are all ultimately derived from the same idea. We shall not wonder to find, that such words as Ask and Axioo, (Akiow,) which signify To Solicit, should be derived from the notion of Stirring up the Ground. when we remember, what I have frequently observed, that the explanatory word Solicit has the same metaphorical meaning. I have suggested in another place, that Axios, (Azios,) might perhaps belong to our Element AS, &c. denoting This or That-Distinguished Being, by way of eminence; but I have now given, as I imagine, the true idea. We must add to these words, signifying

fying To Ask, &c., the Greek Aiteo, (Aitew, Peto, Postulo,) the Galic Asscam, "To request, crave, search for;"-Assc, "A Re-"quest, petition;" and Aisc, "Damage, trespass; a reproach, "chastisement;" where we have another sense belonging to this race of words, "AITCHIM, To pray, beg; Ascaim, To "Ask, beg; Aicim, To Pray, beseech, intreat;" and in Welsh, ARCH, ERCHI, Petition; where we have the form 'RC. In the same column of my Welsh Dictionary with Erchi, we have ERCHWYS, "Hunting-Dog, Hounds;" where, in these two words, we see the same fundamental idea of Searching out. In the same column with Aicim, in Mr. Shaw's Dictionary, I see Aiceam, To Lead; and in the next column, Aigeam, To go on; where we have the sense of Ago. I find likewise, in the first of these columns, Aichear, Sharp, Keen; where we see the sense of Acuo and Aicear, Angry, Cruel, Severe; Aicid, Disease, Sickness, &c. &c. &c. The 'm, in these verbs Aiceam and Aicim, is the mark of the Infinitive Mood; and from such forms have been sometimes derived the Present Tenses of verbs in Greek; while in other instances the 'M denotes Am. In Euchom=ai, Egeom-ai. (Ευχομαι, Precor, Opto, &c., Ηγεομαι, Duco, Dux sum, &c.) we see unequivocally the Euch and Ec belonging to the race of words now before us, whatever might have been the original force of the 'M.

In the same column of my Greek Dictionary with Egeomai, (Ηγεομαι,) I perceive Egelazo, (Ηγηλαζω, Duco, Ago, Pello, &c.); which some derive from Agein and Elan, (Αγεω et Ελαν, Pellere.) That the first part, Eg, belongs to the Eg in Egeomai, (Ηγεομαι,) and to the Ag in Ago, (Αγω,) we shall not doubt; and the second part, El, may be significant, and belong to the Element ^L, conveying the same idea. The form and sense of Egel in Egelazq, (Ηγηλαζω,) will remind us of Agele, (Αγελη, Armentum, grex,) which probably meant originally the Drove of Oxen, Sheep, &c.,

4.66

and belongs to the form 'GL, To Drive, just as Acmen belongs more directly to Ago. A word in the preceding column of my Greek Vocabulary, under the same form, Aggello, (Ayyello, Nuncio, &c. &c.) and Aggelos, (Αγγελος, Nuncius, - Nuncius Dei, Angelus,) conveyed, I imagine, a similar notion, and meant To Stir up—Excite—Urge—or Drive any one to action by command, exhortation, &c.—To Enjoin—Order. Hence we know, whatever might have been the primitive sense of these words, the term Angel, the Messenger, has been derived. The words under the form 'GL, in the opening now before me of my Greek Vocabulary, as Aggule, or Agkule, (Αγγυλη, Lorum in modum catenæ intortum, Αγκυλη, Amentum.) \ Agel-astes, (Αγελαστης, Anguilla, with the Latin Anguilla, or Agguilla, Agkeleuo, (Ayredeum, Servo,) Agklos, or Agkulos, (Αγκλος, Αγκυλος, Tortuosus,) all convey the same idea of Forcing-Compressing-Constringing together. Thus we see, how Ago and Agcho, (Ayw, Ago, Rapio, Ayyw, Neco, Strangulo, Suffoco, fauces, Constringo,) are only different forms of each other, conveying similar ideas of a forcible action upon an object or surface. The very term Constringo is acknowledged to be derived from Stringo and Strix, which relate to the idea of Stirring up or over-Agitating-Brushing over or Vellicating a Surface. We see here likewise, what I have before noted, how the forms 'G, 'GG, or 'NG, pass into each other; as Agcho, (Ayxu,) Ango, &c. &c. The word Sub=Igo signifies itself, as we know, "To Force, Constrain;" and here again we see, how Ago, (Ayω,) and Agcho, (Aγχω,) belong to each other. The terms under the form 'GCh, 'GG, or 'NCh, 'NG, &c. will be considered on a future occasion.

We have seen, that the Celtic Aisc at once means "A Re" quest, petition;" and "Damage, trespass; a reproach, chas" tisement." The Greek Αιτεο, (Αιτεω, Peto,) and Αιτίαοπαί,
(Αιτιαομαι, Criminor, Accuso,) have the same relation to each
other.

The Greek ATE, (ATH, Injuria,) is only another form of these words. The Latin Peto means at once "To Entreat "humbly, to desire," &c., and "To set upon, to assail,—To "make a claim in law," &c. In the same column of Mr. Shaw's Dictionary with Ascaim, "To Ask, beg," we have Asgaim, "To winnow, cleanse;" where we at once see the idea of Agitation, annexed to this race of words. In the same column we have Asam, "To Do, Make," where we see one of the senses annexed to Ago; and this will remind us of other Celtic terms, with the same meaning, as Easam, "To make, to do;" ACHT, "A Statute, decree, deed;" ACHTam, "To pass an Act of " parliament, to ordain, order, command;" which, we see, coincides with the form Act, Actum, (Lat.) Eachdam, "To do, Act;" and EACHD, or ACHD, "A Condition." In the same column of Mr. Shaw's Dictionary, where this latter word occurs, we have ACHT, "A Nail, claw;" where we see the original idea of the Scratcher-Vellicater, &c.; Achiar, Acar, Sharp, tart, sour, belonging to Acuo, and Ach, "A Skirmish;" Achdam, "To Chase;" and Achaid, "A Field;" where we are brought to the original spot. Under the form Each we have the term denoting a Horse, which we might conceive from hence to signify the Doer,—the Labourer; yet I have attributed to Equus, HACK, HACKney, on another occasion, the more original sense, annexed to this race of words, of the animal who HACKS up the Ground by its motion upon it. In Hebrew, ישה OSH means "To Do, perform, Act;" which should probably be referred to this race of words. same column with the Celtic Asam, in Mr. Shaw's Dictionary, is Asard, Debate; and adjacent to Easam we have Easard, "Quarrel, "A foul House;" and Eas, Easar, Easard, "A cataract, " fall of water, cascade;" where we see the idea of Disturbance-Disquiet-Agitation-Commotion. This will shew us, what I endeavour to prove in a future page, that the name of Water,

Water, as Aqua, &c., is derived from the idea of Agitation. In the succeeding column we have Ease, "Water; Old;" and Easgair, "A storm, blustering wind, surprise." Ease, Easea means the Moon; but whether it be derived from the idea of the "Watery Moon," I cannot decide. Eascará denotes "An adver-" sary, enemy;" and I must leave the Arabic Scholars to decide, whether the Arabic Asker, An army, from which the term Lascars is derived, belongs to this idea.

The words Asard and Easard will remind us of the English HAzard, which means a Sharp state of Peril—Danger—Disquiet, Stirring up—Exciting or HACKing up our feelings. not necessary or possible to select that precise notion, with which HAzard directly connects itself, from a train of ideas, which belong to the same imagery. We all know, that the idea of Danger or Peril, or a Hazardous state of things, is connected with the metaphor of what is HACKing or Cutting-Sharp-Piercing-Pointed-the Acute Edge, &c., as Epi Xurou Akmes, (Επι ξυρου ακμης, In acie novaculæ,) 'To be in the most imminent 'Danger-in the most perilous or Hazardous situation;" where Akme, (Aκμη,) and Acies belong to the words before us. The succeeding word to Hazard, in Skinner, is 'Hazy Weather.' Here again it is difficult to decide what peculiar notion should be selected from a train of congenial ideas. Perhaps HAZY conveys the same notion as Turbid, thick, which belongs, we know, to the sense of matter Stirred up together in a Disturbed state. I shew in another place, that Turbidus—Turbo belongs to Turf; and in R. Ainsworth the first sense of Turbidus is "Muddy, thick," "Foggy." To Hase or Hawze means likewise "Nimio clamore "obtundere;" where we again see the sense of Turbare. Skinner refers HAZY to Hassen, Odisse, and Hase or Hawze to Has, (Sax.) Heiser, &c. (Germ.) Raucus; where we have the same idea. The Ard, in HAS=Ard, is probably the familiar term denoting

denoting 'Kind, Sort,' as in Bast=Ard. The parallel terms to HAZARD occur in various Languages, as in Azar, (Span.) Zara, Azarro, (Ital.) Azaria, (Αζαρια, modern Greek,) &c.; and some imagine, that it is derived from As or Az, the Ace, as relating to the game of Hazard. The sense of certain terms, beginning with Az in Spanish, will shew us the metaphorical idea from which Azar is derived, which my Lexicographer explains in its two first senses by "Unforeseen disaster, an unexpected acci-"dent.—Unfortunate card or throw at dice," such as Azada, "A Spade, Azadon, Pick-axe, Azadonar, To dig or break up "the Ground with a Spade or Pick-axe;" and Azarbe, "a Trench "or drain which carries off the overplus of irrigation—waters." Under the form Hazada, for Azada, we have still the same idea. of the Spade; and while I am examining this word I cast my eyes on the adjacent term Hazana, "Exploit, Achievement, He-"roic deed." A comparison of these terms with each other will shew us whence the idea of Action is derived. knowledged, that Hazana belongs to Hacer, "To Make," &c., which we should certainly refer to the race of words now under discussion; and yet Hacer is allowed to belong to Facio, which brings us to the form FC; and this form will supply ample materials for a separate discussion. But whatever we may think 'of Hacer, the Spanish Etymologists will grant, that their familiar term Echar, "To cast, to throw, to dart," belongs to Ago, &c. Its original idea, amidst all its various senses, is that of 'Stirring 'up—Casting up—or Throwing up, as the Earth;' and oftentimes the idea of Agitation or Commotion is annexed to it. In such phrases as "ECHAR Tierra à alguna cosa, To bury an affair "in oblivion;" literally 'To throw Earth upon any thing,' we are brought to its original idea. In the Spanish Auto, we have another form of Act, Actum, &c.

In Scotch, HASARTour means "A gamester, one who plays

"at games of Hazard," as Dr. Jamieson explains it; and the two preceding articles are HASARD, "An old dotard;" and HASARD, HASERT, "Gray, Hairy;" of which latter word Dr. Jamieson sees "no probable origin." All these words belong to each other, and denote the circumstance or object which Excites the feelings, or *Disturbs* and *Annoys* the mind with emotions of apprehension-Disgust, &c.-the Fretting circumstance, and the Fretting or Fretful Personage. We might almost use the word Crabbed in both cases, and apply it at once to the HAZARDOUS or Crabbed state of circumstances, as we sometimes express it, and the Crabbed or Hasart old man. That the Has in these terms relates to the metaphor, from which I suppose this race of words to be derived, will be manifest from a term in the next column of Dr. Jamieson's Dictionary, HASH, To Slash. In the second sense it is used for "To abuse, maltreat; as to HASH " clothes, to abuse them by carelessness; to HASH grain, to "injure it by careless reaping," as Dr. J. explains it. He explains HASH by "A Sloven, one who abuses his clothes;" and quotes the following lines as an example of its use.

" I canna thole the clash

" Of this impertinent auld HASH."

It is acknowledged, that Hash, as applied to the Man, belongs to the metaphorical application of Hash, To slash; and Auld Hash means the same as Hasard, the old Dotard; and thus we perceive how we have brought the Has in Hasard to the terms Hash or Hack, according to my Hypothesis.

In the same column of Dr. Jamieson's Dictionary we have Hash=Methram, "In a state of disorder, topsy turvy; "Hasky, "Rank, &c., Coarse, &c., Dirty, &c." Has=lock, "A term de-" scriptive of the finest wool of the fleece, being the lock that "grows on the Hals or throat;"—Hassock, "A Beesom. It is "applied to any thing bushy; a Hassock of hair, a great quantity

it on the head." In these words the Has bears the same meaning, as being only another form of Hash; and we here see, how terms, from signifying what is Hashing or Hacking to the touch or to the mind, afterwards denote what is Disgusting.—Annoying.—Harsh.—Hirsute.—Rough, and then what is Breshy in general. I have shewn, that Harsh, Hirsutus, belong to the form 'RS, to the Herse, the Harrow, for the same reason: Hence we have the above terms in Scotch denoting the Breshy lock of Wool, and the Bushy Hair—the Rough Bushy Beeson, &c. In English, Hassock is used for the Rough Mat, on which we kneel. The word Mat, under the Element MT, is derived from a similar idea, the Matted object.

In the same opening of Dr. Jamieson's Dictionary we have " HASTard, Irascible; HASTer'd, Confounded.—Fluttered,—Flur-" ried; Hasterd—Early, Soon Ripe; Hat, Was Called; Hatch, " HOTCH, To Move by jerks; HATCHEL, To shake in carrying; "HAIT, Hot;" where, in all these terms, however different in sense they may be, we have still the same fundamental idea of Excitement and Acitation. The HASTard, Irascible, is what we HASTY; and HASTer'd, Soon Ripe, is the HASTY, or quick ing production. I shall shew, that HASTE and HOT belong to e same idea of Excitement; and with respect to HAT, 'Was 'Called,' belonging to Hight, &c., which appears most remote the idea, I shall shew, that this sense of Calling is derived the notion of Exciting or Stirring up a person to action— Call upon a person—to do so and so.' Dr. Jamieson justly refers us, under HAT, to the German Heissen, which means to " Bid, tell, command;" and in Scotch, Hecht has a similar meaning, "To Call.—To Command." In old English, Hastard used to express the most violent state of Hostile Excitement or Fury, which belongs to the HASTY Personage. Skelton pours his execrations against the Murderers of the Earl of Northum-

berland, by describing them as "Vilane HASTARRODIS in their " furious tene." (Percy's Reliques of Ancient Poetry, Vol. I. p. 97.) The Glossarist explains HASTARDDIS thus; "Perhaps Hasty, rash "fellows, or upstarts. qu.;" where he is right in the explanatory term HASTY, though that term is not applied with us in so strong a manner.—Dr. Jamieson, in the same opening of his Lexicon, in which the above words are found, gives us likewise " HATE, HAIT, HAID. Any thing, the smallest thing that can " be conceived. Ne'er a Hate, Nothing at all: Neither Ocht nor " Hate, Neither one thing nor another." We might imagine, from seeing the term HATE, denoting the smallest particle, in this place, that it belonged to HASH, and meant the minute cuttings of any thing; yet on this point I cannot decide. mieson refers Whit, Nought, to the same source; and it should seem, as if Ought and Ocht belonged to the same idea. Yet here considerable difficulty occurs.

We have seen the Greek Ogmos, (Ογμος, Sulcus aratro factus;— Linea a messoribus facta, quum scilicet manipulos vel demessa secundum lineam disponunt; —Plantæ ordine dispositæ; —Series, Ordo, Via,) the Furrow, &c., and the phrase Ogmon Agein, (Oyuw) Ayew.) On the precise origin of this term it is difficult to decide. The OG may belong to Ago, (Ayw, Duco, Frango,) Oigo, (Oiyw, Asperio,) &c., and the GM might belong to the Element GM, to Chamai, (Xauai, Humi,) &c. The m may however be only an organical addition to the G; or the form of Ogmos, $(O_{\gamma\mu\sigma})$ might be referred to Agma, Agmos, (Ayua, Fragmentum, Ayuos, Fractio,) derived from Ago, (Ayw, Frango,) by the construction of the Language. In this case, Ogmos would mean the Breaking up of the Furrow. The succeeding words to Agma, (Ayua,) in my Greek Vocabulary, are Agmeiones, (Aqueiones, Bubones, seu tumores in inguinibus,) Agme, (Αγμη, Focus, Hes. Calculus,) Agmeros, (Ayungos, Quietus.) The Agme may mean loose Broken Stones; and the Agmeiones, the Tumours, or Breakings out, as we express it. The Agmeros, whatever it may be, I am unable to explain.— The Greek Ogmos, $(Oy\mu os,)$ may afford these conjectures; but they are such as will not admit the decision of our opinion on its origin. In the Latin Agmen we have the form $^{\circ}GM$, with the addition of the n, which I conceive to be organical *.

My conjecture, that Ognos, (Oguos,) is particularly connected with Celtic terms, will receive perhaps considerable force, when we learn, that the succeeding word to this in the ordinary Greek Vocabularies is confessedly of Celtic origin. This word is Ognios, (Oguios, Epith. Herculis ap. Gallos,) a name for Hercules, among the Gaul. This term contains some difficulties. We all remember, that the name comes to us from Lucian, who saw in Gaul, as he informs us, a representation of Hercules, called Ognios, painted as a decrepid old man; and wondering at the sight, he was informed by a learned Druid, "that Hercules did not in Gaul, as in Greece, betoken Strength of Body, but Force of Eloquence," as General Vallancey has expressed it. (Grammar of the

^{*} As the following observations relate to Celtic Literature, I shall present them to the attention of the Reader, who is interested in the enquiry, under the form of a Note: that the general argument may not be interrupted by the minuteness of a particular discussion. On the origin of the Celtic OGHAM, the mysterious writing of the Druids, it is not easy to decide. We might refer it perhaps to the Greek Ogmos, (Oymos,) that is, to a word under the form 'GM, bearing the same Elementary meaning of Regular Furrows, or Lines. The OGHAM seems to denote the writing formed by Lines, both as referring to the principal parallel Lines, or Furrows, which served as guides, and to the Lines or Strokes, made on those principal Lines, by which Strokes the letters were represented. Hence perhaps the letters received the names of Trees, as this mode of writing by certain Lines in a regular order might well remind the writers of a Series or order of Trees planted in Lines, Trenches, or Furrows. Hence Ogmos, (Oymos, Sulcus aratro factus, Plantæ ordine dispositæ,) at once signifies Furrows-Lines, and Plants disposed in order. To make this resemblance still more complete, we may observe, that the Druids sometimes actually adopted Sprigs or Twigs of Trees, in their mysterious writing. (See Mr. Davies' Celtic Researches, p. 269, &c. &c.) The OGHAM consisted, "according to "O'Flaherty, in certain Lines and marks," says General Vallancey, "and their situations se and positions, as they stand in relation to one principal Line, over or under which "they are placed, or through which they are drawn." (Grammar of the Irish Language, p. 4.) The Greek Grafo, (Γεαφω,) and the Latin Scribo, mean to Grave up or Scrape the Ground; and Exaro, we know, is at once To Plough and to Write. I have shewn too, that Write means to Wroote up the EARTH. In Hesychius, UGGEMOS, (Υγγιμος, Συλλαβη, On Σαλαμιπο,) is given as the Salaminian word for a Syllable, which may belong perhaps to the Druid OGHAM.

Irish Language, p. 3.) He then informs us, that "Keisler, in Antiquit. Celt. derives the " name Ogmius from the Irish word Ogam, Eloquence." He adds, moreover, "that the "Tartarian Hercules was also called Ogus. (Hist. des Tartares. Leyd. 1726. p. 34.) "Hence the honourable title of Ogus-Chan of the Tartars." Bochart derives Ogmius from a Phoenician term signifying a Stranger, DN Agemi, or, as he otherwise expresses it, "Barbaros et peregrinos Arabes ita nominant. Nempe vel ex Phœnice "Hercules, vel ex Africa aut Gadibus ad Gallos se contulerat, post multos labores mari et "terra exantlatos." (Chanaan, lib. i. c. 42.) He imagines, as it seems, that Hercules was painted as an old man, from being thus exhausted by his Labours. "Atque id ipsum," as he adds, " Herculis pictura referebat." The Arabic word, to which Bochart alludes, is, I imagine, AGEM, which Mr. Richardson explains by "A Persian.—A Bar-"barian, an 'ideot, fool, rustick, rough, unpolished man." In Celtic too, Oigimh is a Sojourner or Foreigner, as General Vallancey observes. The name of Hercules, whatever it might be, would probably be taken from the idea of the Illustrious Personage; which was no doubt applied to the prowess exhibited by this Hero, in his Labours; and when he is described under another point of view, the representation probably arose from some confusion in similar names, which were terms of Honour and respect, referring to different qualities, as to Valour-Age-Wisdom-Eloquence. This, I imagine, has taken place in the present instance; and 'GM, which might denote originally the Prince—Leader— Man of Valour, &c., was converted into the Personage Illustrious for Wisdom or Eloquence,the Sage, &c.

It would be difficult, however, to arrange with precision the terms which contain this equivocal sense, as attached to the form 'GM; and it would be still more difficult to decide on the true Element to which these words are attached. I am surprised, that Bochart, in seeking an Arabic origin for the name of Hercules in Ugmios or Ogm, OGAM, did not, instead of Ajem, adopt the most familiar word in the Arabic Language, under a similar form, Azeem, عظير denoting whatever is Great, Illustrious, or Distinguished. Mr. Richardson explains this word by "Great, Large.-High in quality or "dignity, much esteemed." This is a term which perpetually occurs. In Greek, a Leader appears under the form 'GM, as EGEOMai, (Hyropai, Duco, Dux sum, przco; - Opinor, puto, reor,) Egemoneuo, (Hymporuu, Sum Dux, Rego,) Egemon, (Hympor, Dux.) The Eg in these words represents the Radical form, and belongs to AGO, (Ayw,) as I have before observed, whatever may be the origin of the M. Thus Eczomai, (Hyrenau, Duco,) To Lead, might be connected with Ogmos, (Ογμος, Sulcus,) just as Dun is derived from Duco, which is applied, we know, to the Furrow-Trench, &c. - Ducere Sulcum, Fossam, &c. I shall shew in a future Volume, that Duco is the verb belonging to Ditch, Dike, Teikos, (Τυχος,) &c. &c.

• In the column of my Greek Vocabulary, preceding that where Ogmias, (Ογμως,) is found, we have another Phoenician or Celtic term, Ogka, (Ογκα, Onca, Cognomen Minervæ. Vox Phoenicia,) the celebrated name for Minerva. General Vallancey derives this name from Ogham, the Elements of letters. (Gram. of the Irish Language, p. 3.) After observing, that "Ogham is always applied to the Elements of letters," he proceeds in the following manner: "Thus Minerva in Egypt was called Ogga, as the Goddess of Wisdom. "Euphorion,

⁶⁷ Euphorion, in Stephen of Byzantium, is positive on this head. Ογκα, η Αθηνα κατα ⁶⁸ Φοινικας, and Hesychius says in so many words, Ογγα, Αθηνα 10 Θηβαις. All writers of ⁶⁸ antiquity do attest, that the most ancient name of Minerva was that of Ogga, says the ⁶⁸ learned Abbe Banier, in his Mythology of the Ancients; and, adds the same Author, ⁶⁸ Selden, Bochart, and Fourmont seem much at a loss about the derivation of this word ⁶⁸ Ogga. Minerva, Pallas, and Athene, among the Greeks, were but one and the same ⁶⁸ divinity: as Pallas, she presided over War; the Irish Oighe implies a Champion: ⁶⁸ she is also said to preside over spinning and weaving; hence the Irish word Oighe also ⁶⁸ means a loom. This is a convincing proof, that the Greeks borrowed the attributes of ⁶⁸ this Deity from the Celts; a practice confirmed by Cornutus the Stoic."

The question is to determine what idea OGGA originally conveyed, whether that of Wisdom—Valour—Spinning, or any other quality which she was supposed to possess. The name was certainly derived from some one idea; though, from a confusion in the meaning of similar words, the Goddess, who originally was intended to preside over one certain or particular quality or Art, as Learning—Weaving, &c., might be afterwards supposed to preside over another, as War; and the equivoque might exist in these Celtic terms. The Goddess OGGA might be afterwards invested with the office of the OIGHE, or Champion, who was originally intended to preside over the OIGHE or Loom. When the Goddess was once invested with these different offices, her various names would be generally derived from one or the other of these offices, according to the taste of her votaries. Bochart supposes that she is so called, as being the Goddess of War, from the Syriac TIN Aggah, as he represents it, "Bellum movere;" and he thinks, that the Gates at Thebes, Ogkaiai, (Oynanai, Tuhai Gnβon,) are called so from the Goddess. (Chanaan, lib. i. c. 16.) The names of the Gates I consider in another place.

The term Ogga may certainly connect itself with terms which relate to Knowledge-Weaving, and War, in the Celtic Dialects; and they are all derived from the idea of Excitement-Commotion or Agitation. That terms denoting War should be derived from this source, we shall readily understand; and we shall not wonder, that the idea of Knowledge-Intelligence-or Mind, should be derived from the Excitement of Energy and Activity, such as we annex to Courage, Spirit, &c. The very term Spirit relates at once, we know, to Excitement of Thought and of Courage; and we shall find, that various terms, which express Mind, often present the same union of ideas: We know, that Mind-Mens, belongs to Menos, (Menos, Animi ardor, Impetus, quo ad aliquid agendum, aut sustinendum ferimur; -- Animus, præsertim Vis Animi, quæ Latinis Mens.) The same union of ideas occurs in Φροπμα, Cogitatio, Animus; — Animi Impetus, Θυμος, Animus, seu Impetus Animi, and Animus, "The Mind, Courage, Spirit," says R. Ainsworth. Lhuyd represents the Irish terms for Sapientia by "Agna, - Agnaidheas, -"Eigsi." Mr. Shaw, in his Galic and Irish Dictionary, explains Eagnaidh by "Prudence, "wisdom,"-UIGE by "Knowledge, skill, ingenuity, understanding;" and the preceding term is UIGE, "A Web, carded wool for spinning." We here see, that the terms for Skill and Weaving are connected. In Mr. Shaw, OIGE is a Web; and the adjacent terms are "OIGE, Young; OIGH, A Virgin, Maid; OIG, A Chamof pion;" where we have the idea of Excitement, as belonging to Youth and Courage. Again,

Again, in Mr. Shaw we have Agna, Eagna, Wisdom, prudence; and in the preceding column I find AgH, in four separate articles, denoting "Good fortune;"-"An ox, bull, or cow;"-"Fear, astonishment, awe;"-AGH, "A conflict, AGHaim, "To be afraid or astonished;" AGHach, "Warlike, brave;" " battle;" and Agaram, "To plead, pursue, dispute, plea." We shall have little doubt, I think, that the Ac in all these words has the same radical meaning. In the sense of Pursuing, we see at once the idea of Agere, To Drive, &c. &c.; and this will shew us the fundamental notion annexed to these terms; namely, that of Eucliement-Acitation, &c. &c. I have before suggested, that the Ox and its parallels may denote the Driver-Pusher-Butter. Again, in the same Lexicographer we have "Eigsi, Art, "science, learning;"-" EIGHI, Science;" and in the same column we have "EIGE, "A Web." We see, that the n in Agna is an organical addition to the G; and according to the Greek form, OFFA, O782, the word might be written ORGA or ORCA; where the n is an organical addition, preceding the G or C. Though I must leave the Celtic Scholars to decide on the precise intermediate idea by which these Celtic terms are united with each other; yet I persuade myself, that I have given the general and pervading notion. We see, that UIGE signifies Carded Wool, as well as a Web; and thus the terms denoting Weaving might be derived from the same idea of Excitement, in the action of Scratching or Teasing a surface. In Irish, among the various forms of the words belonging to each other, which denote Knowledge, Mind, &c., we have AIGHNE, AGNA, EAGNAI, AICNE, AIGINE, AITHNE, &c. We cannot avoid noting the term AITHNE, and being reminded of another name, belonging to OGGA, the term ATHENA. (Alma, Minerva.)

That I have given a just conception of these Celtic terms, AGNA, EAGNAI, as relating to the idea of Excitement—Energy—Force or Activity of Mind, will be unequivocally evident from the parallel Welsh word EGNI, which Mr. Richards explains by " Force or Endeavour to do a thing, vehement endeavour, an effort, strength, vigour." In the same opening of Mr. Richards' Dictionary, where this word occurs, we have various terms under the same letters, Eq, which relate to Excitement, &c., as ElGion. "The Ocean;" EHEGyr, "Swift, speedy, quickly, forthwith"—EGR, "Sour, sharp, "tart, biting, EAGER, Poinant;" which belongs to Acer, Aigre, (Lat. and Fr.) EGORi, To Open, belonging to OIGO, (O1744,) which means to Stir up, or Break up the Land. That my Hypothesis is right respecting the sense of these words, and the spot, from which they are derived, will be manifest from another adjacent term, EGR, "An ACRE," which decides on the question. We see in Eigion, and its parallels Ocean, &c., the organical addition of the n to the G, as in E10ni; though in this case a vowel breathing is inserted between the G and n. In the Irish word corresponding with EIGNI, we have likewise the vowel breathing between the G and the n; and it is applied to the more Violent action of Excitement. This word is EIGBAN, EIGIN, which Mr. Shaw explains by "Force, violence, compulsion, necessity, a rape, need." The succeeding word in Mr. Shaw is EIGE, Web; and in the same column we have EIGHI, Science, and Eigsi, Art, science, learning. In the same column I find likewise Eigha, A File; where we see unequivocally the idea of Stirring up or Scratching upon a surface, with which action I conceive all these terms of Excitement to be inseparably connected. The words

words preceding and following this term are Eigcordam, To jar; and Eigham, A cry, shout, call; where we have the idea of the Grating cry made by Grating upon a Surface, from which notion, according to my Hypothesis, the terms denoting Noise have been derived. The word preceding AGNA, in Mr. Shaw's Dictionary, is AGhet, Old wine; where we have the sense of Egr, Sour, sharp, &c. or Acid; and thus we see, that Achet and Acnei belong to each other, just as Acidum and Acumen might do. In the same column of Mr. Shaw, we have AITHNE, Knowledge, and AITH, Quick, Sharp; where we have the same union of ideas, and likewise AITHE, Keen; ATHE, Revenge. The Reader cannot but note, how the Celtic ATHE agrees in sense and form with the Greek ATE, (A711, Noxa, &c., Ate, Dea hominibus nocens.) If the Celtic Scholar will examine the Irish and Galic terms under the form AITH; as represented by Mr. Shaw, he will find the idea of Excitement, as the original and fundamental notion in all the various senses to which it is applied. The terms for Youth, as derived from the idea of Excitement, will be considered in a future page, in which I shall recur to my observations on a former occasion, (p. 191.) In speaking of the Goddess Ogga, (0772,) we ought to bring into our account that OIG, the Champion, is connected with OIGH, 'the Young Female—the Virgin, Maid;' and we have in OGGA, (0770,) the Martial Maid.—Our Romances, we know, exhibit likewise their Martial Maids, as Bradamente, &c.; and this union of Characters is perhaps to be attributed, as in the case of Minerva, rather to the operation of Language than of Life.

Terms under the form ^C, ^D, ^G, &c., expressing objects, which Stir up, Excite—Vellicate the Feelings; such as objects of Terror — Annoyance—Disgust—Wonder, &c.—or Terms expressing Bodily Pain or Mental Solicitude; as connected with words which signify to HACK up—Cut up, &c. &c., quasi Occando Vellicare, &c. &c.

HACK, HOUGH, &c. (Eng.) To Cut up.

HAG-HAGGARD. (Eng.) The Scaring-Hack object.

EGEAN, EGETHE. (Saxon,) Oc-care, Occa.

Ege--Egesa--Egesian, Egeslic, &c. (Sax.) Timor, Horror,—
Terrere, Horribilis.

Eges=Grima. (Saxon,) Larva, Venefica.

HECATE. The Hag, or Witch. Hoga, Oga, Ugga. (Sax. Run.) Terror.

Ugly, Ugsome. (Eng.) Æglian, Ail. (Eng.) Dolere.

Agast, Agao, Agazomai. (Eng. Gr.) Terrified, To be alarmed or amazed at any thing.

Agos. (Greek,) The Shocking Wickedness.

Agios. (Gr.) The astonishing Sanctity.

Augustus. (Lat.)

August. (Eng.)

Атло, Azo, &c. (Greek,) То Injure, Hurt, &c.

HIT, OTHEO. (Eng. Gr.)

OISTros—OISTOS, IOS, EGCHOS, USSOS. (Greek,) The Gad-fly, Dart, &c. What Vellicates, Pierces, &c.

ACHE—ACH-os. (Eng. Greek,)
Pain, &c.

OIZUS, OITOS, ACHTHOS, OIKTOS, OITOS, AGGris, &c. (Greek,) Pain, Grief, &c.

1 SHALL in this article consider a race of words, under the form ^C, ^D, ^G, &c., which relate to objects Exciting our feelings, such as objects of Terror-Annoyance-Disgust-Wonder, &c., and which express Bodily Pain or Mental Solicitude, in various degrees and in various manners; all which words are attached, as I imagine, to the metaphor of HACKing up the feelings, if I may so express it, or of Stirring up—Tearing up—Cutting up—Vellicating—Agitating or Disturbing the feelings, as originally derived from, or as intimately connected with terms, which relate to the action of Stirring up or HACKing up the Ground by Harrowing, Ploughing, &c. &c. The term HARROW, we know, in such phrases as 'To HARROW up the Soul,' is a strong example of this metaphorical application; and we likewise understand, that the metaphor is equally appropriate to objects of Wonder and of Fear,—" It HARROWS me with Fear and Wonder."—The terms adjacent to HACK, in our Alphabetical Vocabularies, are HAG-HAGard, and HAGGar; and it is impossible, I think, for us to doubt, that all these words belong to each other. N. Bailey explains HAG by "A Witch;"-"To HAG, To Torment, to "Harrass with Terror;"-"HAGard, That has a fierce or wild "look;"—"HAGard HAWK, a wild Hawk, which preyed for "herself before she was taken;" and "HAGGar, Lean, thin." Adjacent to these terms we have HAGGLE, which I have shewn to belong to HACKLE-To HACK, and HAGGess, which the Etymologists understand to be derived from HACKen, To Cut or HACK. Let us note the explanatory term HARASS, which I have proved to be taken from the HARROW, HERSE, &c.; where we have precisely the same metaphor, which I attribute to this race of words.

Though all these terms, denoting objects of *Terror*, may be derived from the metaphor of *Scratching—Tearing* to pieces—HACKing—HARROWING in an active sense; yet I seem to perceive

in these words the passive as well as the active mode of applying this metaphor. The HAG, the hideous Witch, and the HAGard face, mean the horrid object, which HACKS—HARROWS or Harasses a person with terror; but it seems to convey at the same time the passive sense, as denoting the object, whose face is HACKED - Scratched - Corrugated or Deformed, with frightful Furrows-Wrinkles. In short, if the word Harrow had been adopted, as the 'Harrow-Face,' or 'Harrow-full Face,' we should have combined at once, under these phrases, the idea of the Harrowing or Affrighting countenance in general; and the Harrowed Countenance in particular, from its being Harrowed or Corrugated with hideous furrows. Hence we find annexed to the idea of the frightful HAG that of the old woman, whose countenance is frightfully Corrugated or deformed with Furrows or the Wrinkles of old age:

"I saw a Wrinkled HAG with age grown double." and again,

"But on us both did HAGGISH Age steal on."

This, we know, is the received idea, connected with the Witch or Hag.—We use the word Scare, in English, for to Affright; which, we know, belongs to the Scar, the Cut, or Scratch. Now Hag and these terms, which I shall here produce, denoting objects of Terror, bear, as I imagine, the same relation to Hack, To Cut, as Scare does to Scar, the Cut or Scratch. The English Haggar is acknowledged to belong to the German Hager—Hagerkeit, which my Lexicographer explains by Scragginess. I shall shew, that the word Scraggy belongs to Scratch. Under Hag, Skinner and Junius produce the parallel terms Hegtys, Hægesse, (Sax.) Heckse, (Belg.) Hexe, (Germ.) Hechizera, (Span.) which have been referred to Hecate, to Saga, to Ayr, Scelesta, and to Hagger. Lye produces, under Hagg, the Welsh Hagr, Deformis, turpis; and he informs us, that the Belgic Heckse is written as if it came

from Hecken, "Mordere, venenatorum animalium et noxiarum "bestiarum instar mordicus appetere ac mutilare;" where we see another form of HACK. The Saxon Hægesse has been derived by Somner, as Skinner observes, from another Saxon word, Egeslic, Terribilis.

If is curious, that Skinner explains HAG by Strix, in which Latin word we have the frightful object, drawn from the very metaphor supposed in my Hypothesis, that of the Furrow, or, in other words, of the surface HACKED or Cut into Lines or Furrows, whatever be the precise idea to which it belongs. Strix signifies, as Robert Ainsworth explains it, "A channel, furrow, hollow "gutter, or strake, in rabating of pillars;—A Screech owl, an " unlucky kind of Bird, (à Στριγξ.)—A Hag, Fairy, goblin." We perceive here, that the Latin STRIX, STRIGis, must be referred to our word Strake, Streak, and to Strike, Stroke, &c. The Latin Strix belongs, as all acknowledge, to Strigo, for Stringo, "To "grasp or hold fast;—To press upon;—To thin the boughs of "trees, to lop or cut;-To touch lightly, brush or graze upon." Let us here observe, how different Elements, denoting the same objects, afford the same metaphor: I shall shew, that Hug, and a race of words, which are attached to our Element, signifying "To grasp, or Hold fast," belong to HACK-Occo, &c., and are derived from the idea of Vellicating—Tearing up or Scratching up— Plucking, Pulling, Snatching or Catching up the Ground, if I may so express it, in Channels, Furrows, &c., as Carpo, belonging to Capio, under the Element CP, signifies at once 'To Vellicate 'a surface,' and 'To Pluck-Pull-To Seize,' &c. We perceive, that Stringo in the same manner signifies "To grasp or Hold "fast, or Hug;" and that it belongs to the "Furrow—Channel," &c., or, in other words, to the surface Vellicated or HACKED into Furrows. We see, moreover, that Stringo signifies 'To lop or 'cut;' that is, 'To HACK.' Let us again observe, that Stringo

means likewise "To touch lightly, brush or graze upon;" that is, to Scratch lightly over a surface; and that Carpo has the same sense, 'Carpere viam,' &c. Strix, in the sense of the Screech Owl and the Goblin, is probably derived from the idea of Grasping or Seizing.—Let us mark, that Screech is derived from the noise made by Scratching.

The Greek and Latin EKATE, (Exaty,) HECATE, should be referred probably to the Saxon Hegtys, and Hægesse. Lye explains the latter word by "Larva, lamina, furia, HECATE, Parcæ, " Eumenides, Pythonissa." If this derivation should be true, we see, that HECATE is brought back to her true situation, when she is placed by the great Bard in the Dialects of the Teutonic, among those "Secret, black, and midnight HAGS," who preside over the destinies of mankind. It is marvellous to observe, how words retain their original idea. We perceive, according to the derivation which I have given of the term HECATE, how, in the original and material sense of Houghing or HACKing up the Ground, she is the Goddess of Earth; and how, in the metaphorical sense, she becomes a deformed HAG—with the idea of every thing Hideous annexed to her character, the Inhabitant of the lower regions, and presiding over the dark and horrid mysteries of Magical Incantations *.

HAGard,

Αυτικα εξ Αιδαω, δια φλογος ηγιεθησαν Δεικαι, θαμβητειςαι, απηνεις, απεοσοςατοι.

^{*} In the Greek and Roman Mythology, she assumes the name of HECATE, as the Power of Hell:—She is Goddess of *Magic and Inchantments*—and she is represented under a frightful form with three heads. The arch Mystic has described her in the following manner:

Τεισσοκιφαλος, ιδιιν ολοον τιεας, ουτι δαντον,
Ταεταεοπαις ΕΚΑΤΗ. (Orph. Argonaut. ν. 974, &c.)

Heyne and others read Telogonaemos, for the sake of the Metre. In the Magic of Orpheus we have the burning Caldron or Pit; and Horrid forms, the attendants of Hecate, rise out of Acheron through the flames.

HAGard, a species of Hawk, is justly referred to the French Hagard, which Skinner explains by "Ferus, Contumax, Agres-"tis;" and he adds, "Alludit Gr. Ayeus." But he rather supposes, that it is quasi "Vagard, a Vagando," which is the idea of Menage; or that it is derived from Hæg, the Hedge, "quia sc. " non domi sed foris sc. in sepibus agitat." Huet derives it from the idea of an Inclosure—from Hag, Hague, "pour signifier un " homme de la Hague, ou un homme que la fortresse dans laquelle "il se trouve rend fier et hardi." My Lexicographer explains the French Hagard by "Wild, untamed, fierce.-Rugged, wildly "disordered." Hag in this word means the same as Hag does in its simple state. Ard denotes Nature, as in 'Drunk-Ard,' &c. From the idea of Fierce, Terrible, HAGARD, as applied to the Hawk, means Wild or Savage in general.—In Shakspeare, as we remember, HAGGARD, the wild Hawk, is referred to a loose, Wild, wanton Woman.

" If I do prove her HAGGARD,

"A HAGGARD

The Magic of Orpheus may be considered as Druidical; and in the Pit which he digs for the burning of his Magical Ingredients, (ΒΟΘΡΟΝ τειστοιχοι οξυξα-Καιιτο δ' αυτικα ΒΟΘΡΟΣ,) we have the Mystic Caldron of the Celtic Ked or Cerid-Wen, and the Pit of Acheron with the flaming Caldron of the Teutonic Bard. If the relation of the name HECATE to the Teutonic terms, which I have above produced, had not been so direct, I should have conceived, that the CAT, in Hecate, was the KED of the Celts. I must observe, however, that in general the terms, which in Grecian and Latin Mythology relate to Ceres, Proserpine, &c., must be referred to a Celtic origin. In the CERID we have the CERES of the Latins; and PROSer=PINA, PERSe=PHONe, is the Celtic PRID-WEN, "The Lady of Beauty-The Lady of the World," as Mr. Davies explains it. Whether this be the exact interpretation must be considered on another occasion; yet such is the relation of these personages to each other. The Wen is acknowledged to belong to the Celtic terms for a 'Woman,' Byn, Bean, &c. &c., from which the Latin Venus is derived, &c. &c. In Druidical Mythology, the term Bun, the Maid or Female, is applied alone to Proser=Pine; and hence the Greeks, by translation, have adopted their title of Kore, (Kogz, Puella, Proserpina,) as others have seen. (Davies on the Druids, p. 445.)

[&]quot;Though that her jesses were my dear heart-strings,

[&]quot; I'd whistle her off, and let her down the wind,

[&]quot;To prey at fortune." . (Othello, Act III. S. 3.)

"A HAGGARD Hawk," says Dr. Johnson, "is a wild hawk, a hawk unreclaimed, or irreclaimable;" and Mr. Steevens adds, It is difficult to be reclaimed, but not irreclaimable." This Commentator likewise notes its general sense of Wild, as applied to a wanton woman. HAGGAR, we have seen, has been interpreted "Lean, Thin;" which means the HAG, the HACKED appearance. Strigosus, "Lean, lank, Scraggy, thin," &c., has precisely, we see, the same meaning from the same metaphor. Let us mark the explanatory word Scraggy, which belongs to Scratch, from the same idea. The Etymologists have given us a notable reason for this sense of Strigosus, "A Strigando.—quippe bos, qui in "arando strigat, id est, præ macie interquiescit."

We shall now understand the origin of the Greek Ischnos, (Ioxros, Macer,) which should have been explained by Strigosus, how it connects itself with Ichnos, (Ixros, Vestigium, i.e. ima pars pedis,-Vestigium, i. e. Signum, quod pes solo, vel alii rei molli imprimit,) the Mark, Trace, or Scratch upon the Ground; where we are directly brought to the Spot, supposed in my Hypothesis. I might here produce the Greek AKTIN, (AKTIN, Radius solis,) which perhaps belongs to the form of these words, and means nothing but the Trace-Line-Mark-Scratch, &c. The explanatory term Radius has the same metaphorical meaning, belonging to Rado, "To Scrape, or Scratch up," &c. In Achna, (Axra, Gluma, Acus, Sordes, Tenuissima et minima pars rei,) we have a similar form to ICHNOS, (Ixros,) &c.; where we are at once brought to the little Gritty Dirt of the Ground, or to Dirt, as in a Scratched State. I shew, that Achos, (Axos, Moeror,) belongs to the metaphorical idea annexed to this race of words; and thus these terms, Acunos and Acuos, bear the same relation to each other, as Grit bears to Grate. Again, we have another. form, Achuron, (Axugor, Palea, acus, festuca,) for this Gritty stuff or Dirt, as in a Scratched state; and let us mark the explanatory word word Acus, attached to Acus, which we shall all allow may belong to Occo.

I have before produced a term in the same column of my Greek Vocabulary, Achor, (Axue, Manans capitis ulcus, sordes, capitis,) which relates to the Foul Ulcer, as belonging to the idea of the Scarred Surface. Hence we have the appropriate term Scar for a Wound; and we know likewise, as I have observed, that Elkos, (Ελκος,) from which Ulcus is derived, belongs to Aulax, (Auλαξ,) hi=Ulcus, s=Ulcus, the Furrow. The Greek Ichor, (Ιχωρ, Sanies,) is only another form of Acnor, (Axwe.) I have shewn, that Iтсн—Owcн, belong to a similar idea of the Scratched—Fretted We now see how the adjacent words Ichor, (1xup, Sanies,) and Ichnos, (12005,) are attached to each other, as they both signify the 'Locus quasi Sulcatus,'—the former denoting the Ulcus, or 'Caro vulnere Sulcata;' and the other 'Terra pede ' Sulcata.' The common Dictionaries supply us with this ordinary Under Sulco, R. Ainsworth produces the phrase metaphor. Pedibus Sulcare pruinas; and the next example relates to the Furrowed Skin, though with another species of effect, "Cutem "rugis Sulcare." I cannot forbear noting a sense of Sulcus, when it signifies "A Stream of light," according to the explanation of R. Ainsworth. This confirms my idea respecting the origin of the Greek AKTin, (Autu,) or at least it shows, that my derivation is founded on true principles. If, instead of a "Stream " of Light," our Lexicographer had used a Streak or Ray of Light, he would have preserved the right metaphor. In the same column of my Greek Vocabulary, where Isknos, (Ioxros,) is, I find Ischus, (Ioxus, Robur,) which would lead us to consider, whether the sense of Strength be not derived from the idea of Excitement, rather than from that of Stability, as I have conjectured in a former page. I have expressed the same doubts with respect to Is, (Is, Fibra,) and v=1s. In the same column we have Isko, $(I\sigma\chi\omega$, Habeo,)

Habeo,) &c., which would likewise lead us to consider, whether this term be not derived from the idea of Scratching up—Catching or Snatching up, just as Capio belongs to Carpo. The term Isko, $(I\sigma\chi\omega_1)$ however, is another form of Echo, $(E\chi\omega_1)$ which would moreover suggest to us, that this term was derived from the same notion.

That HAG, as an object of Terror, belongs to the metaphor of HACK—Harrow, &c., the Harrowly object, if I may so express it, will be evident by considering the word Egeslic, Terribilis, produced by Skinner, which is literally Harrowly. The Lic is the Saxon particle, from which our word Like and Ly are taken, in the formation of Adjectives; and Eges belongs to the Occa, or Harrow. If I can prove this, it will be impossible, I imagine, to doubt the train of reasoning above unfolded. In the same column of Lye's Saxon Dictionary, where Egean, Occare, occurs, and likewise Egethe, Harpica, rastrum, Occa, we have Ege, Timor,— Formido, Horror; Egesa, Horror, Terror; Egesian, Terrere; which become EGSA, EGSian, EGESlic, the word in Skinner, or Egeslica, Horribilis, Terribilis; Ege-full, or Egesfull, Timore plenus, terrore plenus, terribilis, metuendus; and what is still more decisive, another word belonging to these, which actually signifies a HAG, EGES-grima, Larva, venefica. We perceive EGE-full or EGEsfull, which is precisely the compound, which I have supposed by way of illustration, HARROW-full. mark the explanatory word Terror, which belongs to Tero and Terra, for a similar reason. In the same column we have Egla. Arista,—Carduus, festuca; the first part of which—the Eg, belongs probably to Egean, Occare, under the idea of the Scratching or Pricking object. Let us mark the Latin Arista, which belongs either to the Elementary form 'R, or 'RS, for the same reason. I have already produced (p. 682-9,) the various forms for the Arista. as Ear, Ahr, Ahsa, Ader, Achir, &c. &c. In the column of Lye's Dictionary, Dictionary, succeeding that from which I have produced the above terms, we have Eher, Ear of Corn, Spica. In the same column where Eher appears, we have EGTHA, Hircipes et Tribula, where we see the form 'G. The succeeding article is EGTHE, EGTHERE, where Lye refers us to Fgethe, Egethere; the former of which he explains, as we have seen, by "Harpica, rastrum, Occa;" and the latter by Occator. In Hebrew, TON ATD, signifies "A Bramble, "or thorn with large and strong prickles," as Mr. Parkhurst explains it.

In the same column of Lye's Dictionary, where the Saxon Ægtha is, we have "Eg-Stream, Diluvium, Torrens, aquarum inundatio;" which means the Stream that HARROWS—Tears up or Sweeps away all before it. We have likewise Egor, Æquor, which denotes likewise the Sweeping violent body of Water. I shall shew, that Agua is attached to this race of words under the idea of violent Agitation—Commotion, &c.—The verb belonging to ÆGLa, Arista, appears likewise in this column, Eclian, Eclan, which Lye explains by "Ail. Dolore me. Me EGLETH swithe, Tædet me "valde, ægre me habet .-- Him EGLDE, vel EGLEDE, Nocuit ei.-"Gif men innan wyrmas Eglian, Si hominibus intus vermes "molesti sint." We here perceive, that in Lye's conception, Ail is quasi AGIL, and belongs to the race of words before us. Junius produces, under Ail, this Saxon word; and he reminds us of the Gothic word Aglo, "Afflictiones, Aglu ist, Difficile est. "Agluba, Difficulter." He reminds us moreover of the Greek Agluesthai, Αγλυεσθαι, which in Hesychius is explained by Blastreofae. The adjacent words to these Gothic terms, in Lye's Dictionary, are the Gothic "AgLaitei, Impudicitia, protervia;" and the Saxon "Aglac, Miseria, Dolor," &c. In the same column with these latter words we find the Gothic Agis, Timor; and Hence it is, that we have the Irish EAGLam, Agian. Timere. "To fear, frighten, deter;" and the Greek ASKALLO, (Ασχαλλω,

Doleo, Mœreo, tristor; indignor, ægre fero.) Under the same form we have the Welsh Agalen, the Whetstone; where we see what belongs to the material action, from which the metaphorical use of these words is derived. My Lexicographer explains Agalen by "Maen Hogi," which literally means the Whet-stone; where, in Hogi, "To Whet or Sharpen," &c., belonging to Acuo, &c. &c., we see the simpler state Hack. As the term Ail, Dolor, belongs to the form Æglian, so Hail is acknowledged to belong to the same form, to Hagol, Hagel, &c. &c. I have shewn, that Hagel, Hail, is attached to Haggle, Hack, &c., as denoting 'The Cutting storm,' as we express it. To Hail must be referred our Surnames Hale, Hales, &c. &c., just as the names Snow, Winter, Frost, &c. are derived from Elementary accidents.

Again, in Saxon, Hoga signifies Terror, metus, cura, that which Houghs up—Agitates—Excites or Disturbs the mind. Hence Hoga means, as Lye explains it, "Prudens, Sollicitus;" and Hogian, which I have before produced, means "Sollicitus esse, curam gerere, "studere, meditari-Sapere-Sentire-Spernere.-Gemere;" where in these various senses we see the original idea of Houghing up, Exciting, Disturbing, either as applied to a person's own mind, or to that of others. The word Sollicito is well chosen to express the sense of this Saxon term, as it is precisely the same metaphor, from which I have supposed Hogan to be derived. It is acknowledged, that the first sense of Solicito is "To stir or dig up; " properly the Ground," as Robert Ainsworth explains it, "Salum "Citare." Hence, in the second sense, we have "To disquiet, " to busy, to trouble, to disturb, to make Solicitous;" and Solicitus means, in one sense, "Careful, thoughtful," &c. We perceive, that if Hogian had been explained only by "Curam gerere, Studere, "Meditari," without the term Sollicitus; and if no other clue had been presented to us for the discovery of the original idea; how vain and illusive all our conjectures would have proved. I cannot help adding,

ndding, as I have before observed, that in Lye's Saxon Dictionary the terms directly adjacent to Hogian are the Saxon Hoh, "Calx,—"Hough," and the Gothic Hoha, "Aratrum, Inde forsan," says Lye, "nostra an Hough, Occa minor." The term in old English, Hoker, as I have before suggested, must be referred to this metaphor, either in an active or passive sense, Solicitans or Solicitus. Junius observes on the word, "Chaucero est Morosus, "contumax, protervus, Peevish, Froward. Item Hokerly, Morose, "contumaciter, proterve, Peevishly, Frowardly.

" She was as full of Hoker and besmare."

Between the Saxon terms above produced, Eige, Terror, and EITHE, Traha, we have the Gothic EISARNU, Ferrum, and the Saxon "Eisega Stefn, Ferrea Vox." Whether we consider the form of IROn to be that of Ison, or whether we consider the terms under the forms AR and S, as denoting this metal, to be separate radicals; still these terms are to be referred to a race of words which relate to the train of ideas here unfolded, whatever may be the precise notion by which they are connected. Iron might mean the Hard-Harsh-operating metal, Harrowing up the Feeling. We know, that in the metaphorical use of words, denoting the Metal of Iron, this idea prevails; and from such an idea might the words themselves have been originally derived. In the example before us, we see Eisega Stefn, Ferrea Vox; and in our own Language, we have 'The Iron-hand of Power'-'To rule with a rod of Iron,' &c. &c. This is a favourite metaphor with the Hebrews: "Thou shalt bruise them with a rod of "Iron.-Whose feet they hurt in the stocks: the Iron entered "into his soul," &c. &c. &c. Robert Ainsworth explains Ferreus, "Of Iron; -- Met. Hard, stout. Unkind, cruel." Ferrum is supposed to belong to Ferus; and thus Ison might be referred to the train of ideas annexed to Eithe, Egethe. The parallel terms to IRON, as produced by the Etymologists, are to be found in various Languages,

Languages, as Iren, Isen, Erene, (Sax.) Iern, (Dan.) Eisen, (Germ.) liser, (Belg.) Eisarns, (Goth.) Iarn, (Run.) Haiarn, (Welsh,) the Spanish Hierro, and the Latin Ferrum, &c. &c. We cannot but note, how the h-Ierro seems to connect Iron and f=Errum; and Wachter has produced, as a kindred term to these words, the Latin Æs, Æris. If all these terms belong to each other, we shall be inclined to think, that they denote the Metal, or that which is Routed up, or HARRowed up from the Earth, 'Quod 'è terra Enuitur, vel Occatur, si ita dicam;' and the parallel Celtic terms seem to favour this idea. In Mr. Shaw's Irish Dictionary, the preceding term to IARRUNN, Iron, is IARRAM, "To "ask, seek after;" and I ought to add, that in Wachter's Glossary the preceding term to Eisen, Ferrum, is Eischen, or HEISCHER, Petere. I have had perpetual occasion to observe, that terms for Asking, Seeking, &c. are derived from the idea of Routing up or into Dirt, as Solicito, Scrutor. The very term Ask. belongs to Eischen. The preceding word to Eischen, in Wachter, is Eisen, Turpis, Foedus; which he justly refers to Aisches. (Aurxos) where we have the Dirt itself. If such should be the idea of the Ir in Iron, we shall see how this brings us to Ore, Metal. and the Aur and Ar, of Aurum and Argentum, in Celtic Or, Airgad, &c. The consideration of the Element 'R will more fully unfold this matter.

The preceding term in my German Vocabulary to Eisen, &c. is Eis, glacies, or Ice. The terms Eis, Ice, &c. seem to denote the Substance which Hacks or Cuts by its Piercing—Cutting property of Cold,—what Harrows up or Thrills with Cold—"Through Thrilling regions of thick ribbed Ice." The Etymologists have produced the parallel terms to Ice in other Languages, as the Saxon Is, Isa, the Belgic Eyse, Eys, the Danish Iis, the German Eis, the Runic Iisk, &c. &c. I cannot conjecture another source, from which Ice, &c. can be derived, except the name of Water, which

which appears attached to our Radical, under the forms Aqua, Isk, &c., as I shall show in a future page. Yet I seem to perceive, that when Ice is recorded by our Northern writers, the idea of Horror is commonly annexed to it. Skinner derives Ice from Edw, Audes, "quia sc. est perspicua;" and Wachter conjectures, that it may belong to Igos, Æqualis,

The English terms UGLY, and the Scotch Ugsumnes, Horror, are justly referred by the Etymologists to the race of words denoting Terror, before exhibited, who produce under these terms the Saxon Ege and Oga, Terror, Horror; Egeslic, Terribilis; the Gothic Ogan, Timere; the Runic Ugga, Uggur, Uglest; the Islandic Yglubrun, &c. &c. Ugly is quasi Egeslic, or Ogelic, as Skinner has it. The Ug, in Ugsome, belongs to Oga, &c.; and Some has the same force, as in 'Whole-Some,' &c. &c. Ugsome, Ugsomeness, and Ugsomelie, occur in the Poems attributed to Rowley.

"Deathe, lynked to dismaie, dothe Ucsomme flie, (Eclogue II. v. 55.)

The English and French Hipsous and Hipsup, belong to the same idea. The French Etymologists refer Hideun to Hispidus, wherewe have the same notion. Some have imagined, that Gastly is quasi Ghostly, which appears somewhat probable, till we recollect the term Agast, from whence we might conjecture, that the Ag is the Radical part, and not the Gast. Though Skinner derives Agast from A and Gast, spiritus; yet he cannot avoid producing the French Agacer, as in Agacer les dents, and the Greek Agao and Agazomai, Ayaw, Aye Course, cum stupore miror. Skinner likewise refers us to another term, Gastred, which he explains by "Perterrefactus," and derives likewise from Gast. Whatever we may think of Agast, Gastred, &c., whether they belong to the Element 'G or GS, we shall instantly agree, that the Greek Agao and Agazomai, (Ayea. Demiror, stupeo; -invideo; - Odi, Aya Jopas, Admiror, suspicio; -- Veneror; -- Indignor, succenseo,) express Excitement

or Irritation of mind. We shall now understand, why Agao, (Ayau,) resembles in form the Greek Ago, (Ayu, Duco,—Accipio, aufero, rapio, abigo, Ayu, Frango,) To Drive—Break, &c.; terms denoting actions of Violence and Disturbance, which I have before shewn to be attached to the metaphor expressed by Occare, Harrow, &c. &c. The Greek Agos, (Ayos, Veneratio, admiratio;—res sacra, quam veneramur;—puritas;—lustratio, purificatio;—piaculum, scelus;—Cubitus,) is considered as a Root by the ordinary Lexicographers; but it should be referred, as we now see, to Agao, (Ayau,) as denoting that which Excites or Stirs up the mind to Admiration, Reverence.

The Greek Agos, (Ayos,) might be translated into English by Awe; and the English word Awe is considered by the Etymologists to be quasi Aug. It is referred by Junius to the Saxon Ege or Oga, Metus, before produced, and the Gothic Agis; and by Skinner, to the Teutonic Acht, Observatio, Respectus, and Achten, Æstimare. All this is probably right. I have suggested in another place, that Achten is connected with the notion of Stirring up the Ground, Agitating, &c.; and that Acht, Outlawry, Banishment, &c., belongs to this idea. The succeeding term to Awe, or Aug, in Junius, is Auger, the Borer, &c.; where we unequivocally see the notion annexed to this race of words. Thus then, if Awe be quasi Aug, it may be considered as the metaphorical application of the sense annexed to Auger. Ages, (Ayrs, Scelestus, frequentius Erayns,) is justly referred to Agos, (Ayos, Scelus); and to this idea belong Agios, (Ayios, Sanctus, Sacer;— Purus, Venerandus,) Agisteuo, (Ayio TEUW, Sanctifico; —Veneror.) Perhaps with Agios, (Ayios,) we must connect the Hindoo Yogees, of whose severe acts of devotion we have heard so much. Greek Agos, (Ayos, Cubitus,) means likewise the Elbow, which brings us more nearly to the original sense annexed to this race of words. I shall shew in another place, that the idea of Breaking

up—Tearing up—or Vellicating a surface, is connected with that of Catching up-Snatching up in general; and that from hence have been derived objects bearing a form calculated for that purpose, such as Crooked—Bent objects, as Hook, &c., which means, as I suppose, that which HACKS - Vellicates - Snatches, or Catches up. Hence, I imagine, has Agas, (Ayas,) the Elbow, been derived; and under this idea it belongs, I conceive, to Agcho, (Аухи, Constringo, Mœrore afficio,) Agkai, (Ауки, Ulnæ,) Ackistron, (Agriction, Hamus,) &c. We here see, how the term Constringo, which is acknowledged to be derived from the action of Scratching upon a surface, expresses the sense of Tying or Constriction, and how this again connects itself with the metaphorical sense of Mental Solicitude-Grief-Anxiety, &c. We here see too, how the form 'G, 'GG, connects itself with or passes into that of 'NG, as Hank, Anxiety, &c., which change will be more fully considered in a future page. The union of this race of words, under the forms 'G, 'NG, with each other, as in Agos, (Veneratio, Cubitus,) and Agcho, or Ancho, (Ayye,) will shew us, how Augustus, August, and Angustus, or, as it might have been, Acqustus, belong to the same idea. Augustum means that, 'quod metu-veneratione, animum Perstringit;' and Angustum, or Aggustum, 'quod materialiter Stringit.' We know too, that Angustum and Angustia are applied likewise in a metaphorical sense, for that, "quod animum moerore Stringit vel " Angit."

I might here collect, under one view, various other terms belonging to the form ^C, ^D, ^G, &c. &c., expressing actions—affections—properties—accidents, &c., which Hack—Cut—Wound—Vellicate—Vex—Plague—Annoy, &c., the Feelings, &c. I have produced some of these words on a former occasion; yet I think it expedient to exhibit them again in this place, that the Reader may at once view a series of terms impregnated with the same train

train of ideas; though I do not attempt to adjust in my arrangement the degree of relation, which they may bear to each other. Among words of this class, we might enumerate the following: Aggris, Agon, (Ayyeic, Dolor, Ayun, Certamen, solennes ludi, certamina ludorum; Concertatio quævis; Periculum, Discrimen, AGRISE, (old Eng. Terrere,) AGOHO, (Ayxu, Neco, Strangulo;-Mœrore afficio,) Agony, (Eng.) Ach, (Eng.) Achos, (Azos, Mœror, Dolor, Tristitia,) Ague, (Eng.) Achen, (Azw, Pauper, Mendicus,) Æger, (Lat.) Achthos, (Αχθος, Pondus, Onus; Miseria, Calamitas,) OIKTOS, (OIXTOS, Misericordia, commiseratio; ejulatus; OIXTOS, apud oratores Excitationes Misericordia,) Ottos, (Ottos, Ærumna, calamitas,) ATE, (ATI, Damnum, Noxa, Ærumna, Ate, Dea hominibus nocens,) Αταο, (Αταω, Lædo,) Ατυχο, (Ατυζω, Terreo, Metu percello; Perturbo,) the preceding word to which, in my Greek Vocabulary, is ATTO, (ATTW, Prosilio, Subsilio,) a parallel term to A1850. AITTO, (A1000, 770, Ruo,) where we have the idea of desultory motion; -AITIA, AITiaomai, (Airia, Accusatio, Airiaopai, Accuso,) Aikia, Aikizo, (Aizia, Plaga, Aizila, verberibus indigne adficio.) AAZO, AASKO, (Augu, Lædo, violo, Austu, Lædo, noceo, &c.) Alskuno, (Aloxura, Pudorem incutio, vitium offero,) Alschos, (Aloxos, Turpitudo,) the foul outrage; ECHTHOS, (Exflos,) Opium, Osum, (Lat.) HATE, (Eng.) with its parallels Hatan, (Sax.) Hassen. (Germ.) Hair, (Fr.) &c., Odusso, (Odosou, Irascor,) Odune, Oodin, (Ofun, Dolor, Ola, Dolor parturientis;—vehementissimus dolor; Vinculum, funis,) Οοτήεο, Ουτλο, (Ωθεω, Trudo, pello, &c., motu violento, Outan, Vulnero,) with their parallels Hit, &c., which brings us to HURT, under the form 'RT. The terms denoting Annoyance, which pass into the sense of Constriction-Confinement, &c. and which appear chiefly under the form 'NK, as Accho, (Arre,) or Ancho, To Hank, &c., I shall more particularly consider in the next Article. The Etymologists refer Ague to the same train of ideas, by deriving it from the French Alcu. If there be any one Disorder

Disorder above another, which may be said to Egean, (Sax.) Occare, To Harrow up the frame; it is certainly the Ague. I do not however pretend to adjust, whether Ague is directly derived from this metaphor; but to shew, that it is connected with the same train of ideas. In the words Odune, and Oodin, (Oδυνη, Ωδιν,) the Dun and Din are significant, and so possibly may be On, Oon; and if that should be the case, the terms would be quasi Od=Dune, Ood=Din; yet this point is somewhat doubtful. The Od, in Odous, Odontos, (Odous, Odontos,) is not significant; but the O is an articular prefix, or something of that sort. Dous and Dont belong to Tooth,—Dens, and a great variety of words under these forms, through a wide extent of Human Speech. In examining some of these terms, I cast my eyes on Ozo, Osdo, Od=Oda, (Οζω, Dor. οσδω, p. ωδωδα, Oleo, Odorem spiro,) which belong to Opor, Opour, &c. &c. These words convey the same idea of Annoying, and mean the Disagreeable-Strong Effluvia—the Pungent Effluvia, as we express it. I shall shew, that Flragro means in its first sense "To smell Disagreeable," or "To smell Sour or Strong-Fragrat Odor acerbus;" and that it belongs to Fragosus, Rough, for the same reason. In the Epithet Acerbus, Sharp, we have the original idea annexed Thus we see, how the OD, in ODium, ODiosus, &c., what is Opious, and Opor, the Opious smell, convey the same meaning.

While I am examining Odi, in the Etymologicon of Vossius, I cast my eyes upon a word in the adjacent column, "Ocimum, "Oximon," which some think, as he says, to be so called, "ab "Odoris Acrimonia. Nempe and to Ozen, quod est Olere." In the preceding column we have Occo, where we are brought to the genuine idea; and the adjacent words are Ocrea, and Ocyor, a parallel term to Okus, $(\Omega \times u_5)$, where we have the part which

Harrows up the Ground, and the Harrowing or Hurrying Motion, 'quod Occat terram,'—'Motus Occatorius,' if I may so express it. In the same column with Odusso, (Οδυσσω,) in my Greek Vocabulary, I see Oduromai, (Οδυρομω, Lamentor,) which may seem to belong to these words; though it is probable, I think, that Odur, in Odur-omai, (Οδυρομω,) is connected with Udor, (Υδωρ.) Adjacent to Echthos, (Εχθος, Odium,) in our Greek Vocabularies, we have Echis, (Εχις, Anguis,) and Echinos, (Εχωος, Echinus,) where we have the material sense of these words—Pricking—Stinging—or the Rough, Prickly feel or appearance. If the sense of Echo, (Εχω, Habeo, Cohibeo, Prehendo atque prehensum teneo,) should be derived from the same idea as Agcho, (Αγχω, Constringo,) as I suggest on other occasions; we shall then understand, how Echthos, Echis, and Echinos, and Echo, (Εχθος, Εχις, Εχινος, Εχω, Prehendo, Prehensum Teneo,) belong directly to each other.

In the same column of my Greek Vocabulary where Oiros, (Oitos, Ærumna,) is found, we have Oistros, (Oistros, Æstrus, Tabanus, Asilus; - Furor, Insania; - Irritatio Vehemens,) where we are unequivocally brought to the idea of Stirring up-Exciting, Vellicating, &c. &c. Let us mark the As in Asilus, belonging to a similar idea. In the same column is Orstos, (Outtos, Sagitta, Jaculum,) where we have a similar notion of the Vellicating-Pricking instrument, &c.; and to this we must refer the Latin HASTA, and the Greek Egchos, (Εγχος, Hasta, Ensis,) Ussos, (Υσσος, Verutum, missile, pilum, telum,) Ios, (Ios, Missile, Sagitta, jaculum.) That I have given the true idea annexed to Ios, (Ios,) will be manifest from the other senses of the word, as it not only signifies A Dart, Arrow, &c., but likewise Poison and Rust; where we have still the idea of the Vellicating object, "quod Occat,"-that which Tears-Pricks-Frets-Corrodes. I shew in another place, that the idea of Vellicating-Teazing or Twitching a Surface directly

directly connects itself with the idea of Snatching or Catching, as Carpo belongs to Capio, and has a similar sense to it. Hence we have the term in the preceding column of my Vocabulary, to that, in which Ios, (Ios,) appears,—Iksos, (Igos, Viscus, Arundo aucupatoria; — Varix; — Tenax, Parcus,) Birdlime. Viscus belongs to Iksos, (1505,) with the addition of the Labial breathing v, or what the Grammarians would call the Æolic Digamma. Let us mark the sense of Varix, where we see the idea of the Streak—or Scratch-like Mark. In the same column of Hederic's Vocabulary, I find Iks, (15, Vermiculus vites Arrodens,) where we are unequivocally brought to the idea of Fretting—Scratching— Corroding, &c. &c. Thus we see, that the Element continues true to its office, and still conveys the same fundamental idea, under all the various forms into which it passes, and amidst all the various purposes to which it is applied, without error and without confusion.

Terms belonging to the Elementary forms ^C, ^D, &c. ^NC, ^ND, &c. &c., which signify To Constringe—Gripe, Seize—Pinch—Nip—Grieve, Annoy—Catch—Confine—Hold, &c., derived originally from the idea of Grubbing up—Scratching up, HACKING up or HOOKING up a Surface, as if with a Catching—Twitching—Vellicating motion or action.

Hook up, quasi 'To Hack or 'Hough up.'

HAAKE, HAKE. (Ger.) A Hook.

HACKen. (Germ.) To Hack, To Hough up, or break up the

Ground—To Grub up.

HITCH on, Hug, Hasp, Heck Hatch. (Eng.)

Haschen. (Germ.) To Catch.

Agcho, Agkai, Agkon, Agkoine,
Agkale, Agkule, Aggule,
&c. &c., or Ancho, Ankai,
Ankon, Ankoine, Ankale,
Ankule, Angule, &c. &c.
(Gr.)

Uncus, Unguis, Angustus, Anxius, &c. &c. (Lat.)

HANK, HAND, HANG, HINGE, HENT, To Seize, (English,) &c. &c. &c.

Anxiety, Anguish, Anger, Hunger, (Eng.) What Hanks up or in—Constringes—or Wrings the Mind or Body.

I have shewn, in a former page, that Ago, (Ayω, Duco, Ayω, Frango, Rumpo, pro quo usitatius dicitur Ayνυμι,) in its two senses, To Draw and To Break, refers to the same Operation of Breaking up the Ground in Drawing the Furrow, &c., as in the phrase Agein Ogmon, (Ayειν Ογμον,) where we cannot distinguish between the two ideas. I have likewise suggested, that the term Agcho, (Aγχω, Neco, Strangulo, Fauces Constringo;—Constringo, Coarcto quovis modo, Mœrore adficio, Aγχομωι, Angor,) To Strangle, Bind.

Bind, Constringe, Compress, Gripe, Grieve, &c., must be referred to its adjacent word Ago, (Ayw,) and that this sense of Constringing— Griping, is attached to the idea of Vellicating—Scratching, or HACKING up a Surface, as the Ground, with a Twitching—Snatch ing—Catching, Hooking up motion, if I may so express it. I have anticipated one of these words belonging to our Element ^C, &c., To Hook up—in, &c., where we see the true idea. The term Gripe, as I shall shew in a future Volume, belongs to Grip, Grave, Grope, Grub, To Scratch up the Ground; and in Grieve, Grief, we have the metaphorical application of this action. The Latin Capio, which commonly relates to the power of Holding, or to Capacity, as we express it by an appropriate term, means, in one of its senses, "To take by force, to Seize;" and this word is connected, we know, with Carpo, 'To Take; -To Rob, Pillage "or Take away," which means likewise, "To Gather, Pull or "Pluck fruit, herbs, &c., To Teaze, or Card wool, flax, &c., "To Carp;" where we are brought at once to the idea of Vellicating a Surface. The word Carptim is explained in R. Ainsworth under the expression "By Snatches." The Celtic term, to which these words belong, is CABam, which Mr. Shaw explains by "To Indent, Break Land, to Catch." If these words do not belong to each other, we still see, in Carpo and Cabam, the precise union of ideas, which I have supposed in my Hypothesis. In the explanatory word Pull, we see little more than a term of force. applied to the action of Drawing; but in Pluck, we manifestly perceive the idea of a Twitching-Vellicating motion. I shall shew, that Pull and Pluck, Vello, Vellicate, belong to each other, and to Peelos, (IInhos, Lutum,) Field, &c. &c., the Ground, for a similar reason. Let us mark, how Teaze, To Vex, belongs to Tease, To Vellicate a surface, and to Twitch, &c. &c. The very term adopted in the Vocabulary of Hederic, as explanatory of Agcho, (Αγχω,)—the term Constringo, or Stringo, is itself connected

nected with the train of ideas, which I have now unfolded, as I have before observed. R. Ainsworth explains Stringo by "To "Grasp or Hold fast;" and in another sense, "To touch lightly, "brush or Graze upon,—Canis extento Stringit vestigia rostro;" where we have the idea of Vellicating or Carping a surface, in its gentler sense. The adjacent word to Stringo is Striga, "A Ridge "Land, or single Furrow drawn at length in ploughing," which the Lexicographers justly refer to Strigo, from Stringo. we see, that Agcho, (Aγχω, Con=Stringo,) bears the same relation to Ago, (Ayu,) when it is applied to the Furrow, in the phrase Agein Ogmon, (Ayen Oynor,) as Stringo does to Strigo, or Striga. I have before suggested, that the original idea of Echo, (Exa,) appears probably in its sense of 'Prehendo, atque Prehensum * Teneo, Adhæreo, Conjunctus sum, To Hook in, together,' &c. In Isko, (Ισχω, Retineo,) which is acknowledged to be only another form of Echo, (Exw.) we seem to feel this idea more strongly.

We see, how in Agcho, (Αγχω,) or Anko, we pass from the form ^C, ^G, &c. ^GG, ^GCh, &c. &c., into that of ^NK. After the most mature reflection on the nature of the Element ^NK, ^N, &c., I conceive it to be originally derived from the form of our Element ^C, ^G, &c., under the idea which I have unfolded. Still, however, when the form 'N, 'NK, was once established, it may be considered as a distinct Element, and as generating a race of words by its own powers. I have already illustrated the union of the 'N with the 'G, &c. (page 370); but the examples, in which both forms Agcho, (Aγχω,) Ango, appear, and the mode adopted by the Greeks of expressing the force of N by G, &c., (Γ ante γ , κ , χ sonat ρ ,) unequivocally exhibit this fact.—I shall collect in this article certain terms relating to Holding, and Confining, which are derived from the train of ideas above unfolded, and which may be considered as signifying 'To HOOK - Snatch - Catch up - in, &c., To Constringe - Gripe-' Seize

' Seize-Pinch-Nip, &c.-Hold-Take in, Confine,' &c. &c., both under the forms ^C, ^G, &c., and ^NC, ^NG, ^N, &c. The great race of words, conveying this train of ideas, we shall find chiefly to appear under the form 'N, 'NG, &c. These words signify oftentimes no more than to Hold, Enfold, or Confine, Take In; where I anticipate one of the terms belonging to this race; though we shall have perpetual occasion of noting that peculiar sense of Constriction—Griping, &c., as connected with the idea of Grief— Pain—Annoyance, which we see in the term AGCHO, (AYXW,) ANKO. The sense of this term will present to us a good example of the peculiar turn of meaning annexed to many of these words. In the preceding article, I illustrated the words under the form ^C, ^G, &c., which relate to the idea of Grief-Pain, and Annoyance, as. connected with the metaphor of Griping—Grubbing up—Scratching or Vellicating a surface, as the Ground. We see, in the following examples, how the two forms 'G, 'GG, or 'NG, are mingled with each other, in terms denoting Grief-Pain-Annoyance-Violent Emotion or Excitement of mind, some of which I before produced: - Agko, (Αγχω,) or Anko; Ankone, (Αγχονη, Suffocatio;) Ango, (Lat.) Anguish; Huggrian, (Goth.) to Hunger; Anger, (Eng.) Agon, Agonia, (Ayων, Certamen, Molestia, Ayωνω, Certamen, Solicitudo,) Agony; Aggris, or Angris, (Ayyus, Dolor;) Anxius, Anxiety, (Lat. Eng.) In the term Agon, (Aywr,) Agony, the n is an organical addition after the 'G; but in Aggone, or Ankone, (Ayxorn) the n may be said to be an organical addition both before and after the Radical Consonant.

The following collection of words will give us a good idea of the sense of the Element 'G, 'NG, when it signifies 'To Hook 'In—Hold—Enfold—Confine—Catch—Seize,' &c.'&c.—Hook, Hasp, Heck, Hatch, (the Catch door,)—Hitch, (To Hitch on,)—Hug—Hake, and Belgic Haecken, explained in Skinner by 'Rem 'Captare,' and referred by him to Hanker and Hanger;—Hakot,

the Pike;—Haddock; Haschen, (Germ.) To catch; Hatch, (Eng.) as Eggs, which either refers to the action of Confining or Covering them, by the process of Incubation, or of HACKing them, in order to bring out the young, as Junius supposes; Acos, (Aγος, Cubitus;)—Ag=Osτos, (Αγοστος, interior pars manus, vola;)— AGKai, AGKon, AGKoine, AGK=Istron, AGKale, AGKule, AGGule, AGKulos, AGKleuo, or Ankai, Ankon, Ankoine, Ankistron, Ankale, Ankule, Angule, Ankulos, Anklos, Anklauo, (Aynas, Ulnæ, Ayrow, Cubitus, quælibet curvatura, Ayrown, Ulna, Ayriotoov, Hamus, Uncus quilibet, Ayrahy, Ulna, Ayrahy, Jaculi genus, Curvatura cubiti, Αγγυλη, Lorum, Αγκυλος, Curvus, ad Uncus, Αγκλος pro Αγκυλος. Ayrateum, Servo;) Aggos, or Angos, (Ayyos, Vas quolibet,) Agkos, or Ankos, (Aynos, Vallis,) Agkalpis, or Ankalpis, (Aynaλπις, Præcipitium,) Ogke, or Onke, (Oyng, Angulus, seu Uncus,) Ogkos, or Onkos, (Ογκος, Tumor; — Uncus,) Agkura, or Ankura, (Αγκυρα,) Anchora, (Lat.) Anchor, (Eng.) Egchelas, or Enchelus, (Εγχέλυς,) Anguilla; An-Agke, or An-Anke, (Avayan, Necessitas,) Onux, (Owg,) Uncus, Unguis, Angustus, Angulus, Anguis, Anguilla, (Lat.) Hank, Hanker, HANG, HINGE, HAND, HENT, (To seize;) AND, (the Conjunction Copulative, or of HANKing;) HOUND, HUNT, HANDLE, (Eng.) ANSA, Ensis, Egchos, or Enchos, (Eyxos, Hasta,) Entea, (Ertea,) what a person Holds, or what Holds him In, Enfolds him, In, On, (Lat. Eng. &c.) what is Hanked or Enclosed In, or what is Hanked On or Attached to any thing; HAUNT, To be Hanked to a place, Ungo, Ann-Oint, what is Put On or over any thing; EGKata, or Enkata, Enteron, (Εγκατα, Εντερα,) Entrails, Intestinus; Spl=Anchnon, (Σπλαγχνον, v-Iscos,) Spel-Unca, Antroon, um, (Artpor, Antrum,) Eggus, Agchi, or Engus, Anchi, (Eyyus, Ayxi, Prope,) which mean HANKed to, or adjacent to another, just as Echomenos may be said to mean Hooked to another; (EXOMENOS, ETITE, Suid. Adhærens, Conjunctus, Vicinus;) Agos, WNG, (Welsh, Near,) ^Nigh, (Eng.) ^Neigh-bour, ^Next, NGSh, שנו "To be close to, confined by or In—To straiten, oppress—
"Squeeze," &c. &c., says Mr. Parkhurst, 'NigGard, (Eng.) of a Griping Ard, or Nature; where the breathing before the N is lost, and inserted between the two Consonants, Isle, Is-land, Insula, "A Land Closed=In or Environed with the Sea," &c., as R. Ainsworth explains it; 'Innis, (Celt.) 'Nes-os, (Nyoos,) &c. &c. &c.

I shall not attempt to discuss on this occasion all the words, appearing under the form 'N, 'NG, &c., which, when once existing, may be considered, as I before observed, as a separate Element, and which I shall fully discuss in a future Volume. At present I shall proceed to make a few observations on the race of words, under this form ^C, ^G, &c., which will serve to confirm my idea, that the sense of Hooking up or in, Confining—Griping, &c., has been derived from the notion of HACKing up—Grubbing up—or Vellicating a Surface. In the term Hook we see this union of ideas very strongly. The Hooked or Curved instrument is that, which on many occasions is best calculated for Grubbing up—or Plucking up any thing from the Ground. We have seen, that the German HACKen, To HACK, means likewise "To How," or Hough "up, dig, delve, break the "Ground; -den Weinberg, To Grub, or How up;" and that HACKE means "A Hatchet, Mattock, Ax, Pick=Ax;" where we see how HACK and the Ax, &c. belong to the idea of Grubbing up the Ground. An adjacent word in my German Dictionary is HAAKE, or HAKE, "A Hook, crook, tack, Hasp, clasp;" which, we see, directly connects itself with HACKE, the Pick=Ax, &c. Let us note the explanatory word Mattock, which Minshew derives from the Belgic "Met Haeck, cum Unco," "Ridicule," says Skinner, who refers it to Meor, Muscus, "and Togen, part. verb "Teon, Trahere (i.e.) quod herbas erraticas trahit, distrahit, seu "divellit." The Matt=Ock is probably the Mud=Ax, the Ax which

turns up the Mud, Muck, or Dirt. In Scotch, a similar combination appears in Muck=Hack, "A Dung-fork, with two prongs, "shaped like a Hoe," &c., or Hough, says Dr. Jamieson, who derives it from the Islandic Hiacka, Cædo, &c. In the same opening of Dr. Jamieson's Dictionary we have Hag, To Cut, Hew, Hack, A Chip, Crack, &c.* Another form of Hack is Heck; the

^{*} As there are various other terms in the same opening of Dr. Jamieson's Dictionary, which ought to be explained, but which do not directly belong to the subject of this Article, I shall insert them in a Note. HACE means, in Scotch, Hoorse : and HACE ort, a Cougher; where we see how the idea of Noise is connected with that of HACKing up or Scratching up a Surface, as I suppose in my Hypothesis; "HACSHE, ACHE, pain;" where we have the metaphorical application of this action. In the same opening we have "HACK, a Rack for cattle to feed at;" and "HAGabeg, Coarse table linen,-"Refuse of any kind." The HACK might mean that which HOOKS in or contains the Hay; and Dr. Jamieson has derived it from the Saxon Hegge, corresponding with our word HEDGE. The HACK however is, I believe, derived from the form, or from the Railing of which it is composed, like regular HACKS or Scratches on a surface, with intervals, as if made by an instrument Scratching or Raking up the Ground. I shall shew, that Rack belongs to Rake for the same reason. That the idea of this species of Railing is connected with Scratching on the Ground, will be manifest from the word Grate in English, which contains this double sense, A Grate, and To Grate; and from its parallel term Crates, "A Bundle of rods wattled together.—A Drag, or Harrow, to break clods.— "A Grate of brass or wood." I shall shew, that Rail, in German Riegel, belongs to Racler, (Fr.) Rake, and Rack, for the same reason; and thus we see, that Rail the verb, and Rail the substantive, belong to each other, as 'To Grate,' and Grate may do. The preceding word to Rail, (Tignum,) in Skinner, is Raguled, "vox Foccialium, idem quod "Ragged, (i. e.) Crenis seu inciruris Exasperatum;" where we have the precise idea. It is curious to observe, how we are led by the force of impression to a just explanation of the primitive idea, though we are totally ignorant of the origin of the word. Dr. Jamieson produces, under HACK, the parallel Belgic word HEK, which he properly explains by Rails. We perceive, that Dr. Jamieson refers HACK to HEDGE; and the conjecture is certainly probable. I have supposed on a former occasion, (p. 96,) that HEDGE, with its parallel terms, is derived from the certain spot of Earth—the Enclosure, separated and secluded from the rest. That it is derived from the Earth, under some idea, will be evident, I trust, from the discussions of this Volume; yet, whether it be derived from thence under this precise idea, is not altogether certain, as I have before suggested. As the HEDGE or Fence is often composed of Thorns, the term HEDGE might be derived from the idea of the Rough Thorn, which HACKS-Pierces, Pricks, &c., or it might

the succeeding term to which, in Dr. Jamieson's Dictionary, is "To Heckle, Hekle. To fasten by means of a Hook, or "fibula;"

might be taken from the idea of that which Confines—Hooks in, &c. &c. The Reader must form his own judgment on the evidence before him. Dr. Jamieson derives HAGa-Bag from the German "HACKE, the last, always used as denoting something "of inferior quality; or Huycke, a Cloak. For it seems originally the same with "E. Huckaback." The Huck—HAG seems to be the Rough—Rugged Cloth—HACKed, as it were, or Scratched in Rucks—Ridges, &c.; and Bag seems to belong to such words as Big, Bag, Boss, Book, &c., under a similar idea of the Coarse Cloth, Swelling out—Rising up in protuberances, in opposition to what is plain—level—smooth, &c.; unless we should think, that Bag means Back or Surface, as in the Scotch HECKLE-back, the Stickle-vack, which certainly means the HAGGLed—or HAGGLing, Rough, Prickly Back. The next word is HAG-berry, which means the HEDGE Berry.

In the same opening we have "HAGG," and "HAGbut of Croche, or Crochert, a kind " of fire-arms anciently used." This instrument is sometimes written Harquebus, Arquebuse, Archibugio, (Fr. Ital.) &c. &c.; and it has been derived from Arco Bugio, "Arcus "cavatus;" but Skinner and Dr. Jamieson have justly referred these words to the Flemish Haeck=Buyse, from HAECK, A HOOK, and Buyse, a Tube, as by means of a HOOK or Croche, the Tube or Gun, was fastened to a kind of tripod. In the same opening we have HAGGarbalds, a contemptuous designation, "Vyld Haschbalds, "HAGGarbalds, and Hummels." The HASHbalds and HAGGar-Balds mean the Bold impudent men, who go HACKing about here and there in a riotous manner; and this idea is confirmed by the sense of HAIK, in the same opening, which is explained by "To go "about idly from place to place." The Rake has a similar meaning, from the idea of Raking about. I find, moreover, HAGGERdecash, "in a disorderly state, topsy turvy;" where we at once see the idea of HACKing up or about; and Cash belongs to Cut. We have likewise HAGGERsnash, Offals,—HAGGies, the Dish, and HAGman, one employed to fell wood, which Dr. Jamieson derives from HAG, HACK, &c.; and we mark in Snash the same term as Snatch, &c.; HAGGer, to Hail, where we have the simple form of Haggle, to Hail, which, as I have shewn, means to HAGGLE, or Cut; -HAGGart, "An old useless horse," which is the same as the English Haggard; -HAGE, the Hedge; HAGGart, a Stack-yard, from HAGE, the Hedge, and y=Ard, as Dr. Jamieson supposes; -HAICHES, belonging to Hauchis, or Hauch, which our Author explains by "A term used to denote the forcible reiterated respiration of one, who exerts all his " strength in giving a stroke." Dr. Jamieson has referred this to HAUCH, Halitus, and Hyging, (G. and B.) panting; where we see the true idea of Stirring up-Drawing up-with Agitation, &c.: and we cannot but note too, how it associates itself with HACK—the blow. It is marvellous to observe, how terms with the same radical meaning attach themselves to each other, though they are employed in somewhat a different manner.

"fibula;" and the next word is Heckle, "To Dress Flax;" where we see the idea of Scratching over, or Teazing a surface, connected with that of Hooking—Catching—Confining, &c. Though Dr. Jamieson does not refer these words to each other, he cannot avoid seeing, that the latter word connects itself with Haeck, (Teut.) Hake, (Swed. G.) Cuspis incurvus, a Hooked point. The next word is HECKLE, "A fly for Angling, dressed "merely with a Cock's feather, S. from its resemblance of a "comb for dressing flax?" This word may mean the fly which is intended to Heckle or Hook the fish, or it may be so called from

its

manner. The next term in Dr. Jamieson's Dictionary is "HAUCHS, of a Sock, the "three points into which the upper part of a ploughshare is divided, and by which it " clasps in the wood." This is justly referred to Hook, &c.; and we here see, how the HOOK again connects itself with the instrument for turning up the Ground, to which it originally belonged. The next article in Dr. Jamieson is Haugh, &c., Halche, which belongs to the Element ^L.

The term HAUCH will remind us of our word HAWK, To Spit up; where we have at once the action of Stirring up, and the Noise attending the action of Stirring up. In Scotch, HAWGH means "To Force up phlegm with a Noise. S. To HAWK," as Dr. Jamieson most properly explains it. In HICK-up we have the very idea of something Raised Up. The succeeding word to this in Nathan Bailey's Dictionary is HICK-Well, or HICK-Way, "A Bird called a Wood-Pecker;" where we have actually the idea of that which Pecks or HACKS. An adjacent word to this is HAWSE, the Throat, which means the part in which this HAWKing takes place; and the next word is HAzel-Raw, Lichen Pulmonarius, Lungwort, which denotes the plant useful to the HAWSE, or Throat, in breathing-expectoration, &c. But the preceding term to Hawse brings us to the Spot, from which, as I conceive, all these terms are derived, or with which they are inseparably connected. This term is HAWK, the Dung-fork, where Dr. Jamieson properly refers us to the Muck=HACK. We see, in the explanatory term Fork, the idea of what is Crooked, annexed to that of the Instrument, used for Grubbing up the Ground, &c. R. Ainsworth translates Forkedness into Latin by "Curvatura "more Furcæ." I shall shew in another Volume, that the word Curvus belongs to Gripe, Grub, sCrape, &c., just as Crook-Crooked-Croche, &c., does to Scratch, &c., and as I suppose HOOK does to HACK. It is curious to mark, how the idea of an instrument, such as we annex to a Fork, &c., connects itself with the Ground. In Latin they say, "Of two Furrows-Of three Furrows," in order to express Two-Forked-Three-Forked, as Bi=Sulcus, Tri=Sulcus, &c. I shall shew, that Furca and Porca, the Ridge or Furrow, are connected with each other for a similar reason.

its Rough appearance. We have likewise Heckle-back, "The "Stickle-back;" where the name, says Dr. Jamieson, "is evi-"dently borrowed from its resemblance to a HACKLE or flax "comb." The Heckle-back is assuredly the animal with the Heckled or Heckling,—the Haggled or Haggling,—Rough and Prickly Back.

We perceive, I think, in the terms HATCH, HECK, denoting a Door, the idea of something 'Catching-or Hooking to or in;' and thus we have, under the same form, the following words, which I conceive to belong to each other; as "To HATCH or Heckle Flax, HATCH, the "Door, HATCHES of a Ship, To HATCH eggs, and HATCHet, Securis." In old French, Huis signifies "A Door," and Huissen, a Door-Keeper, from whence our term Usher is derived—the Usher of the Black Rod. The term properly signifies, as the Lexicographers agree, the Door-Keeper of a Court, &c. whose business it is to execute certain offices belonging to it, as to keep silence—preserve order, &c.; and hence it is applied to the USHER of a school. The Etymologists have referred Huis, Uscio, (Fr. Ital.) to Uscire, Exire, To Issue forth, which belong to Ex. This connexion seems plain and direct. The Latin Ostium belongs to Os; so that these terms for a Door seem to be more immediately attached to different ideas. I have produced, in a former Work, a passage in Hesychius, which has much embarrassed his Commentators, Ογκας Αθηνας τας Ωγυγιας πυλας λεγει. This passage abounds with difficulties; yet I have observed, that I should be well pleased to find a text, in which OGKAI or Onkai signified Gates. OGKai might be the HECK. The form ONKai would bring us to the Arabic عنك Ink, A Gate.

HITCH relates at once to a Catching—Twitching—Vellicating motion, if I may so express it,—'To HITCH about;' and it likewise signifies To Hook or Catch, 'To HITCH in,' &c. Skinner has two articles; one for HITCH, the nautical word, "Fune vel "Unco

"Unco quidvis arripere et Figere," &c., which he refers to Ficher; and another for "HITCH, ut ubi dicimus HITCH Buttock, "et HITCH Neighbour," which he derives from Hocher, (Fr.) and Hicgan, (Sax.) Moliri; terms parallel to each other. The succeeding word is HITCHEL, which belongs to the HECKLing of Flax, where we are brought to the genuine idea. Let us mark the word Hitch, as applied to the Buttocks. I have produced, on a former occasion, (p. 170,) a race of words denoting parts adjacent to the Buttocks, the Loins, &c., as Ixus, Iskis, Oxus, Osphus, Oskea, (Ιξυς, Ισχις, Οξυς, Lumbus, Οσχεα, Scrotum,) which I have supposed to be derived from the idea of the Base, as attached to the Earth. The Iksus, &c. however, may be taken from the same spot, the Base or Surface, in a state of Agitation, and may mean that part of the person which HITCHES about. be observed, moreover, that some of these words are connected in form with terms conveying the train of ideas, which I am now unfolding. Adjacent to Ixus, (1\xi_0\xi_0,) we have Ixos, (1\xi_0\xi_0, Viscum; Arundo aucupatoria;—Tenax,) the v-Iscum, that which HITCHES or Catches;—Ix=Alos, (Ιξαλος, Crebro saltans,) in which we see the idea of desultory motion, and which the Lexicographers have derived from Ixus and Allomai, (Ex Ιξυς et Αλλομαι,) as if signifying the HITCHING or Agile Loins; and Ix, (IE, Vermiculus vites arrodens,) the Nibbling Animal, which means, as I imagine, the animal which HACKS up, or to pieces, if I may so say, or Frets a surface in a HITCHing—Catching manner. In Nep, Nip, and Nibble, we unequivocally see the idea of a Catching mode of Eating. The Iskis, (Ισχυς,) bears a similar form to Iskus, (Ισχυς,) which, as I have suggested in other places, may be derived from the idea of Vigour and Activity in Motion. I have shewn, that Isknos, (Ioxyos, Macer, gracilis,) belongs to the metaphor of a Scratched—Furrowed Surface, just as Strigosus belongs to Stringo and Striga. We see too, that Oxus, (Ozus, Lumbus,) the Loins,

has the same form as Oxus, (Oξυς, Acutus, Acris, vehemens, celer, subitus,) which at once denotes Desultory motion, and belongs likewise to the sense of HACKing or Cutting. On the whole we shall imagine, I think, that these terms for the Loins, &c. belong to this train of ideas.

The English word HANCH, as another form of these words. assuredly belongs to the idea of Catching or HANKing, whatever may be the precise turn of meaning annexed to it. We know, that Catch and HANK have a similar sense; and we know likewise the familiar phrase, in which persons are said to have a 'Catch in 'their gait.' Now this is precisely the sense of the German HINCKen, "To limp, halt, go lame." Thus then, HANCH may be derived from the idea of motion, as I have supposed the other words to be; or it may be derived from the notion of the Swelling out-Protuberant part. The sense of Protuberance is perpetually connected with the idea of Convexity or Concavity, able to HANK On or In: This may be the sense of HANCH, quasi Hunch, which belongs to Hank. In the Greek Ogkos or Onkos, (Oxxos, Tumor, Moles, Massa, &c. Uncus,) we have the double sense of HANK and HUNCH. The Etymologists produce the parallel terms to Hanch, as Hancke, (Belg.) Hanche, (Fr.) Anca, (Ital. and Span.) Adjacent words to Anca, in my Italian and Spanish Dictionaries, are Ancheggiare, "To wag one's legs," where we have the sense of motion; and Ancho, Broad, Wide, &c. &c., where we have the idea of that which HANKS IN, or comprehends a great space.

I have shewn in a former page, that the ideas of Wonder—Surprize—Fear, &c. have been derived from the notion of Stirring up—Agitating—Exciting—Vellicating, &c. the mind with these passions or Emotions, "It Harrows me with Fear and Wonder," &c. Hence we shall not wonder to find Agos, Awe, (Ayos, Veneratio, Admiratio;—Res sacra, quam veneramur;—Puritas;—Lustratio.

Lustratio, purificatio; — Piaculum, scelus; — Cubitus,) denoting Admiration and Veneration under a similar form, as Ago, (Ayw, Duço, ... Rapio, &c.) and Acho, (Ayxo, Strangulo.) We perceive, that when Acos, (Ayos,) signifies Cubitus, it connects itself with the material sense of Hooking in, annexed to Ago-Ep' Ackuron Agein, (En' Ayreveur Ayre, In Ancoris Stare,) and with Agcho, (Ayxo.) In Ag=Ostos and Ag=Osteo, (Ayeotos, Interior pars manuum, Vola. Hom. Il. XI. 425.—Extrema pars manus; — Cubitus, Ulna; Palma, Ayootew, Immundus sum, sordibus inquinatus sum; unde apud Hom. Il.: ζ. v. 506. Αγοστησας, ut aliqui veterum legebant, pro Anormous,) we have the material and the metaphorical sense of Agos, (Ayos, Cubitus;—Piaculum, Scelus.) The Ag-Ost we should probably consider as the Element 'G, 'S, &c., doubled in order to convey the idea more strongly, or a vowel breathing may have been inserted between the symbols, which represent the Radical consonant. The term AG=ISTeuo, (Ayioteuw, Sanctifico, Veneror, &c.) is only another form of Ag=Osteo, (Ayortew.) I have supposed, that Ac=Ostos, (Ayortos,) signifies the Arms—the Hollow of the Hands—the Grasper, Griper, or Hooker in, from the action of Grubbing up, HACKING up, or Hooking up the Ground, if I may so express it. I have had perpetual occasion to remark, how marvellously words continue to be connected with the original spot, from which they are taken, though they are employed with a different turn of meaning. curious, that Ag=OsTos, (AyorTos,) is adopted by Homer, when he describes the action of Griping the Ground with this part.

-Ο δ εν κονιησι πεσων ΕΛΕ ΓΑΙΑΝ ΑΓΟΣΤΩ. (Λ. V. 495.)

In Persian, اغوش Agush, AgeUsh, means "1. An Embrace. "2. The Bosom. 3. As much as the arms can embrace or con-"tain, an armful, truss, bundle of hay, corn, grass, wood, &c. "4. As much as a reaper takes in his hand. 5. A Pitch-Fork "full." The verb to this noun is اغیشت Agisten, AgeIst-er, which

which Mr. Richardson explains by "To embrace, to be embraced, "contained, comprehended;" and the other senses are, "To Cut, "mince, macerate, Hash, macerate.—To Hang or be Hanged." The succeeding word to this is (عيشيد Agishiden, Ag=Ish-iden, "1. To fear, dread. 2. To Embrace. 3. To Cut." We have here the various ideas of HACK or HASH, HOOK, HANG, and Anxiety, and Agos, (Ayos, Veneratio,) Awe, quasi Aug, under the same Radical word, precisely as they are supposed in my Hypothesis to be connected with each other. The term Ag=UsH appears again in Persian under the form 'NK, as انكشت, which Mr. Richardson represents and explains by "Enk=Isht. Coal. "ENG=USHT. A Finger." No ideas appear more remote from each other, than those of the Finger and a Coal; yet we see, how they are reconciled under my Hypothesis, which supposes, that the original idea is To HACK or HOOK up, in, &c., Stir up— Excite. The Coal is the Inflammable substance—the substance readily Excited into flame. The Greek Anthr=Ax, (Ανθραξ, Carbo,) belongs to the Persian Enk=Ish; and to this idea we must perhaps refer the Scotch Ingle, Fire. The succeeding word to the Greek Anth-r-ax is Anth-r-ene, (Ανθρηνη, Crabro, Vespa,) the Wasp, which still means the Exciter-Stirrer up, the Pricker-Stinger—Annoyer, quæ Angit. Let us mark, how Carbo assimilates itself with Crabro; and I shall shew in a future Volume, that they belong to each other for the same reason, and that they are ultimately to be referred to such words as Carpo, Carp, Crop, Grub, Gripe, &c. Anthos, (Av805,) is that, which a person HANDS or HANKS off, Carps, Crops; as Karpos, (Καρπος, Fructus, Carpus,) belonging to Carp, Crop, means at once the Hand and the Fruit.

That the senses of the Finger and the Coal, in the Persian Enk=Ish, are to be referred to each other under the idea of Stirring

Stirring up or Exciting, according to my Hypothesis, will be unequivocal from the sense of a word, belonging to Enkisht, in the succeeding column of Mr. Richardson's Dictionary. This word is ויציביי, Eng=Ikten, which our Lexicographer explains by "To Excite, Rouse, Raise or Stir up;" and in the same column we have انكين Eng=Iz, "1. Exciting.—2. A Coal." In the same column we have likewise Enkelus, An Eel, and Engule, A Button, which mean the HANKers In; -Engusbiden, To embrace; Engiden, To Seize, take; and Engur, a Grape; which bears the same relation to the other terms signifying to HANK, &c., that Grape does to Gripe. The Enkelus, we see, belongs to the Greek and Latin Egchelus, or Enchelus, and Anguilla, Anguis, as Enkisht does to Onux, Onuch-os, (Ovuž, Ovuxos,) Unguis. We perceive, in the sense of the Nails-Fingers, &c., how we are brought to the idea of Scratching up a surface. Under the form of FNG, PNG, &c. we have the sense annexed to Hank, as Fingers, Fang, &c.; but whether they belong to each other must be the subject of a future consideration. The term Engikten is the appropriate word, joined with Autash, Fire, in order to express Inflammation, as ויה ויאב, Autash Engiz, "Kindling Fire-"Fuel, Coal,"&c. I shall shew, that the terms for Fire, under our Element AC, &c., as Ign-is, are derived from the same idea; and in this very word Icn-is, we see the organical addition of the n to the G after the G, as in $E_{nG}=Iz$ before it. We see in Aut=Ash the more familiar form. I must leave the Persian scholars to decide, whether Aut=Ash—Eng=Iz, Ag=Ush, should be considered as the Element 'S doubled, in order to express the idea more strongly; or whether they should be regarded only as quasi Autsh, Engz, or Eggz, Agsh, &c. The same doubt exists with respect to Agostos, (Ayootos,) &c., as I have before observed.—The Latin Angustus bears the same form as the Persian Persian Engush, Enkisht, &c.; and I have suggested in a former page, that Augustus and Angustus, or Aggustus, coincide with each other.

Terms expressing Diligence,
Care, Attention, Regard, &c.,
either directly taken from
the idea of being Stirred up,
Roused or Excited to Diligence—Attention, &c., or belonging to terms originally
expressing actions of Excitement: all which terms are
ultimately connected with
words referring to the action
of Stirring up the Ground.

Egean, Eggean. (Sax.) Occare, Incitare.

To Egg on—Hoax on, &c.

Hoe, quasi Hough.

HIE, quasi HIG, forward. (Eng.)

Higan, Higgan, (Sax.) Tendere, festinare, Niti, conari.

HIGE, HIGGE. (Saxon,) Mens, cogitatio, cura, studium.

Hogian. (Sax.) Sollicitus esse, studere, &c.

Huik. (Scotch,) To take care of, consider, regard, &c.

ACHT. (Germ.) Care, &c. Out-lawry.

HEED—HUTen. (Eng. Germ.)
To take care of—guard, regard, respect.

OTHE, AIDOS. (Germ.) Heed.

Husch. (Germ.) Adv. Hortandi, Age, Agedum.

HUTCHEN, HUTCHE. (German,) Incitare, Alapa.

Audio, Akouo. (Lat. Gr.) To Hear, i. e. to be Excited to Attention.

Audeo. (Lat.) To be Excited to bold action.

Ous, Otos, Ouas, &c. Audes, Auses, Auris, &c. &c. &c. (Gr. Lat.) The Ear.

Hear—Ear, &c. (Eng.)
Ear. (Eng.) To Plough or Stir
up the Ground.

I SHALL in this article consider certain words which relate to Mental Diligence-Study-Attention, &c., and which I conceive to be connected with a Race of words expressing Actions of Excitement, whatever may be the precise process by which they are attached to those words. We have seen, in the course of these discussions, various terms which signify "To Stir up or "Excite to any action or purpose," as Egg, Hoax, &c. 'To Egg 'on,' 'To Hoax on—the Dogs,' &c.; and the latter word has been applied to the idea of ridiculing or bantering a person, as 'To 'HOAK any one.' We have seen likewise the term HIE, quasi Hig, 'To Hie forward,' in Saxon Higan, Higian, Tendere, festinare; Hicgan, Niti, conari. I have observed moreover, that the Saxon Eggean, To Egg on, occurs in the same page with Egean, Occare; and no one can doubt the relation of these words to each other. In Hie, the Radical consonant has disappeared, as it has in Hoe; and even in the sound of Hough it is lost, though it is preserved in the mode of writing it. To these words HIGan, &c. belong the Saxon terms "HIGE, HYGE, Mens, animus, "cogitatio, mentis applicatio, studium, cura; - HIGE, Diligens, "studiosus, sedulus;" where we have the idea of Excitement or Diligent exertion in action, Thoughts, Mind, &c.

This union of ideas between Mind or Thought, and Excitement, perpetually occurs, as I have before shewn. It appears in the Greek $\Theta \nu \mu o \varsigma$, Animus, seu Impetus Animi, Vehementia, and $\Phi \rho o \nu \eta \mu \alpha$, Cogitatio, Animus, sensus animi;—Elatio animi, fastus, Animi Impetus; in the English Spirit, which is at once applied to Mind and to Courage; in the Latin Animus, which means "The Mind—"Courage, Spirit;" and in Mens, "Mind—Courage," which belongs to Manos, "Animi Ardor, Impetus, quo ad aliquid agendum aut sustinendum ferimur." In the same column of Lye's Saxon Dictionary, where Hige occurs, we have Hiht, Spes; Hihtan, Sperare;

Sperare; and we find, as adjacent terms, Hihtan, Augere; Hінт-ful, Gaudii plenus; Нінти, Height, Altitudo, Exaltatio; and Hin, Altus; where we have still the same idea of being Excited or Raised up. We shall now understand, that High belongs to these terms, as I shall more fully illustrate in a future page. ceding term to Hige, Mens, is HIGE, Familia, communitas; which is attached, as I imagine, to terms denoting a Dwelling, as House, HAG, (Germ.) Domus, Mansio, &c. &c. The word preceding Hyge, Mens, is Hyge, Fauces; which may be derived either from the Agitation of the Jaws, in masticating food, or from the action itself of HACKing or Masticating, &c. In Scotch, Hulk signifies, as Dr. Jamieson explains it, "To take care of, to consider, to regard;" and our Author refers it to Hugghen, Observare, considerare; Huga, Hoga, (Su. G.) In animo habere, meditari; Hugen, (Alem.) id; Hogan, (A. S.) Curare; Hog, Hug, (Su. G.) The Mind, &c. &c. Lye explains the Saxon Hogan and Hogian by "Sollicitus esse, curam" "gerere, studere, meditari;" where in Sollicitus, from Solum and Cito, we have the true metaphor. Again, in Latin, Venso means, we know, "To Stir or turn about," as the Ground, 'Versare Terram," and "To Weigh, to Consider." The adjacent words to Hogian are Hon, (Sax.) which is quasi Hogn, "Calx.—Poples, Suffrago, "Ang. Hough," says Lye; "Hoh, (Sax.) Altus, quasi Hogh, or " High; and Hoha, (Goth.) quasi Hogha, Aratrum.—Inde forsan: "nostra, an Hough, Occa minor;" where we unequivocally see; as I have before observed, the origin of these terms.

The German Achten, "To care, esteem, respect, regard, "observe, mind a thing," is connected with terms denoting actions of Excitement, as I before observed, (p. 125,) whatever may be the process by which they are united. The term Acht, in one sense, relates to the idea of Stirring up—Routing—Driving, &c. in the strongest sense of such actions, when it signifies "Outlawry, proscription," &c. My Lexicographer explains Achtsam.

ACHTsam, among other things, by Solicitous, which may exhibit the true metaphor. Among the interpretations of the substantive ACHT, we have Heed; and we should at once imagine, that the English Heed is only another form of the German term. Etymologists have referred HEED to the Saxon Hedan, Cavere; Hige, Diligens; the German Hut, Custodia, &c.; where we see, that they have placed a term of Excitement with one; which belongs to the Enclosed—Secured Spot. I have supposed on a former occasion, (p. 108,) that HEBD, HEDGE, and HUT, belong to each other; and I still retain, the same opinion; yet it is not easy to adjust the precise idea, by which they are attached to each other. HEED is certainly directly connected with Hut, Custodia, and perhaps as denoting the HEDGED-in Spot, by way of Security. Yet it is likewise, as we see, directly connected with Acht, which bolongs to an action of Excitement, whatever may be the process by which it is connected with that action. secondary sense of Hut, &c. the idea of an Enclosure of Security-Defence, &c. only appears; yet still I imagine, that the original idea related to an action of Excitement, whatever it might be. Wachter explains Hur in different articles by "Pileus," (to which sense HAT and HOOD belong;) "Custos, Custodia;" and HUTen, by "Tegere, openire,"—"Celare, Abscondere," to which HIDE, the verb and substantive, more directly belongs, "Cavere, Provi-"dere," (to which Wachter refers HEED,) "Munire, Sepire,"-"Custodire," "Observare, cum cura attendere." The succeeding word is HUTTE, Tugurium, to which we must refer terms denoting Dwelling, as Hut, House, Ædes, Oikos, (Oikos,) &c. &c., which I have produced in a preceding page, (258.).

I have suggested on a former occasion, (p. 623,) that terms of Security and Defence are often derived from the idea of some action of Excitement or Violence, as that of Driving away, Keeping off, &c. &c.; and hence it is, that Defendo is explained in the

first

first sense by Robert Ainsworth, "To Strike, or Keep off, out, or "away." This may possibly be the original sense of Huten; and whatever it might be, the term is certainly surrounded by races of words which denote actions of Excitement, as we have unequivocally seen in the course of our discussion. In the same opening of Wachter's Glossary with Hut, I see Husten, Tussis, and Tussire; and I show in another place, that terms like these are derived from the sense of Stirring up—with the idea of Noise annexed to that action; as in HAWK up, HICK-up, &c. &c. preceding term to this is "Husch, adverb. hortandi, significans "Age, Agedum, cito, Agedum;" which Wachter refers to Huschen, Incitare; and Husche, Alapa; where we directly possess the term of Excitement, precisely as it is supposed in my Hypothesis. I find next to HUTTE, in Wachter, Huz, "Modus " vocandi suem apud Suevos, sicut Sic abigendi apud Armoricos. "Utraque vox Suem notat, illa apud Armenios, hæc apud Celtas." Whether we consider Huz as a term of Excitement, or as denoting the animal, the same fundamental idea exists. I have shewn. that the name of the animal is derived from the action of Stirring up, or Routing up the Ground; and thus in both cases the term conveys the idea supposed in my Hypothesis. We see, moreover, in the explanatory term Age, Agedum, a word of the same race; and in Ocyus we have likewise another of these terms. seen in a former page, that Agere relates to the action of Stirring up the Ground; and we cannot doubt, that Ocyus belongs to Occo. We are to consider therefore, whether HEED, &c. is derived from the secondary sense, as relating to the Secured Spot, just as Regard belongs to Guard, or whether it does not relate to what I conceive to be the primary sense, such as we see it in various kindred words.

We cannot but perceive, that our terms Hush, Hist, with their parallels produced by the Etymologists, belong to the idea

conveyed by Husch. Hence we understand, how terms relating to Silence-Quiet-Repose, &c. may be derived from the idea of Excitement. No combination is more familiar to us; as we perpetually observe, that a person's Attention is Roused or Excited to any business; and from Attention to Silence, Quiet, &c. the passage is direct and inevitable. Hence probably we have the idea of Quiet and Silence annexed to the Greek AKE, AKEON, (Ax1, Quies, Axew, Tacitus.) We shall consider this opinion however more than probable, when we remember, that AKE is actually a term which relates to the strongest sense of Stirring up-Exciting, &c., and that it belongs to Acuo, &c. (Axn, Acies ferri, cuspis ferri.) Before I quit the German term Husch, I must observe, that in the same column of Wachter we have HURTen, Trudere, Impellere; HURT, Impetus; HURSCHen, Incitare, Accelerare; which belong to the form 'RT, as in Hurt, Hort-or, just as Hit, &c. ΟτηΕο, (Ωθω, Trudo,) belong to the form ^T, &c. Here we see, how the 'RT, &c. and 'T, &c. pass into each other. It is curious, that Martinius should understand the relation of Husten, Tussis, to a term of violence, Ostizo, (Ωστιζω, Trudo,) just as Tussis belongs to Tusu and Tundo. I shall shew in a future Volume, that Tussis is attached to a great race of words, conveying the same idea of Stirring about or Vellicating a surface, as Tease, Touch, Twitch, Tusk, &c. &c.-My idea is, that Huren, in its original sense, was precisely that of Defendere, "To Strike, "to keep off, out, or away;" and that it belongs to such terms as Hit, Otheo, Ostizo, &c. (Ωθεω, Ωστίζω.) Wachter cannot help perceiving, that Huten conveys a sense of Violence or Destruction. He observes, that it was anciently used "pravo sensu," as in the following passage: "Der sundige HUOTET des rehten," that is, as he says, "Peccator observat justum. Puta, non servandi " sed Destruendi causa." I have conjectured, that g-UARD, WARD, HERD, &c. belong to HARRY, HARROW, HERGian, Vastare. Vastare, &c.; and thus we see how every thing tends to the same point.

To HEED, &c. we must refer Οτηοπαί, (Οθομαι, Curo); and we cannot but perceive, how the OTH and OOTH, in Obopas, Curo, and Ωθεω, Trudo, appear to be connected with each other. But the very term Othomai relates in one sense to the idea of Excitement, (Oθομαι, Moveor.) The Greek Aidos, (Aιδως, Pudor, verecundia, reverentia, veneratio, observantia,) belongs probably to HEED. In the same column of my Greek Vocabulary, where AIDOS, (Ados,) is found, we have the terms of Excitement, AIDulos, (AIDulos, Audax,) Aizeos, (Aiζηος, Juvenis, qui robore juvenili viget,) and AITHaloeis, (Αιθαλοεις, Ardens, ab Αιθω, Uro.) It is marvellous to observe, how words, which may be said to have passed into their secondary sense, still refer in some of their applications to the The terms Aidos, and Aideomai, (Aidos, Aideomas,) original idea. are applied by Homer, on occasions when men are to be Roused and Excited to the most strenuous exertions of Activity and Duty.

 Ω φιλοι, ανέρες εστέ, και ${
m AI}\Delta\Omega$ θέσθ' ένι θυμω,

Αλληλους τ' ΑΙΔΕΙΣΘΕ κατα κρατερας υσμινας.

 $AI\Delta OMENΩN$ δ' ανδρων πλεονές σοοι ης πεφανται·

Φευγοντων δ' ουτ' αρ κλεος ορνυται, ουτε τις αλκη. (Il.O. v. 561, &c.)
"O amici, viri estote, et Pudorem habete in animo, et aliis alium
"Verecundantes observate, per acres pugnas. Verecundantium
"enim virorum plures salvi, quam occisi sunt: Fugientium vero
"neque gloria exurgit, nec ullum auxilium." We perceive how
inadequate such terms as Pudor and Verecundia are to express
the sense of the words now under discussion; and the reason of
this is, that they refer only to the secondary sense of the words
when they ought to have a fundamental meaning, referring to the
primary. The term Aidos, Aidus, might be interpreted by 'Diligens
'vel Sedula Cura, observantia, &c. impensa in aliquam rem vel
'personam, et hinc Cura, observantia, reverentia, pudor, verecun-

'dia,' &c. In the sense of 'Diligens cura, vel observantia, quam 'alius erga alium habet,' we pass into the sense of Emulation— Emulatio, that strong term of Excitement, which might almost be adopted in the explanation of this passage. I have purposely selected the term Cura, as it unequivocally exhibits to us the union of ideas which I am endeavouring to illustrate. worth explains Cura by "Care - Regard - Application - Dili-"gence;" and Curo by "To take care of-to look to a business-"To Regard, to Attend to—to pay Respect and Homage to," &c. We must not wonder, that I should ultimately refer these terms for Respect—Regard—Reverence, &c. to words expressing actions performed on the Ground, when we know, that one of the strongest terms in Latin for Religious Worship or Veneration, Colo, "To "worship, to Revere," actually itself signifies "To till the "Ground."—It is marvellous to observe, how the same action, under different views of it, leads us to the same train of ideas.

Among the words denoting Attention, belonging to our Element ^C, ^D, &c. &c. we must refer the terms for Hearing, as Audio, Ακουο, (Ακουω,) with their parallels produced in a former page (109,) Ous, Otos, Ouas, Ouatos, (Ous, Ωτος, Ουας), Ουατος, ATA, $(A\tau\alpha)$, the Doric or Tarentine word for OTA, $(\Omega\tau\alpha)$, AUDES, Auses, &c. old Latin words, Aodin, Azin, (Chald. Heb.) Audia, a modern Greek word, &c. &c. That Audio is by some process connected with terms, relating to actions of Excitement, will be manifest from a word, almost under the same form, Audeo. Thus we shall be of opinion probably, that AUDE and AUDI, remote as they appear in sense from each other, express only minute differences in the turn of meaning; and that they have in fact the same fundamental signification, such as we see in ' Hoc Age,' and 'All' Age,' (All' Aye,) 'Be Excited to action or 'Attention.' In such phrases as "Erige te," we almost see the two significations of these words; and R. Ainsworth explains Erectus.

in one sense by "Stout, courageous, undaunted;" where we have the sense of Audeo, and in another by "Intent, Earnest," where we have the idea annexed to Audio, "To mind, attend," &c. The Arabic O' Uzn, the Ear, signifies in one of its meanings, as represented by Izen, "Well done, go on, come on;" where we see the sense of Age, (Aye,) Under another form, we have O' Azan, Ears, which means, as represented by some minute variation Ezan, "Signification, announcing, invitation, the "signal for summoning to prayers by the Mullah or priest from "the minarets or towers of the mosques;" where we unequivocally see the idea of Exciting to any business or action.

In the English HEAR, EAR, with some of their parallel terms HYRan, OHR, &c. (Sax. Germ.) we see the form 'R; in others we have the form 'RS, as in HEARK, HEARKen, &c.; and in some have the form 'D, 'S, &c. HAUSGan, (Goth.) AUDio, Auses, &c. In Aures, we should be unable to decide, whether it belonged to the form 'R or 'RS, if such decision were necessary for any purposes of distinction. It is impossible to doubt, I think, that all these terms belong ultimately to each other: Hence, we see how these Elementary forms on some occasions pass into each other, without any difficulty or confusion; and how again they constitute races of words distinct and different from each other. It is impossible not to mark the coincidence in form between EAR, the organ, and EAR, To Plough; where we are directly brought to the very Spot and Action supposed in my hypothesis. Thus, then, h-EAR and EAR, denoting Attention, are nothing but EAR, 'To Plough or Stir up the Ground,' used in its metaphorical sense, just as Solicitus means "Earnest," according to R. Ainsworth's interpretation; or, as he might have said, 'At-'tentive,' from Solicito, "To Stir or dig up, properly the Ground," as he observes. I have supposed with the Etymologists, that the Aus, in Ausculto, belongs to Audio; and that the Culto is to

be referred to Kluo, (Κλυω,) and the Celtic terms Cluinam, Claistam. I have ventured to form a conjecture on the original idea annexed to these words, but this cannot duly be unfolded till the Element CL shall be fully examined. In Galic, Ogh is the Ear, and in the same column of Mr. Shaw's Dictionary, where this word is found, I perceive OG, Youth; and I suggest in another place, that the idea of Youth is derived from the Excited action, belonging to that period of life. In Galic, Eistam or Eispam means "To " Hear, listen, be silent, Attentive;" which I have referred, (p. 112,) to other terms in the same column of Mr. Shaw's Dictionary, as "Eisam, To Trace; Eiseadh, Seeking, hunting "after, researching." I have frequently observed, that terms conveying the sense of Searching—Seeking, are commonly derived from the idea of Routing up the Dirt, Scratching into Holes, &c. as Scrutor means 'Scruta Eruo;' and Rimor means 'Rimis Eruo.' In the same opening of Mr. Shaw's Dictionary, where the above terms occur, I find "EITE, An addition to the Plough-share, "when worn," and "EITRE, A Trench, Furrow;" where we are brought to the Spot supposed in my hypothesis.

It is marvellous to observe, how the same metaphor accompanies the same train of ideas, even when we pass to material objects; and there are some cases in which the metaphor and the material operation are blended with each other. In the phrases 'Arrectis Auribus, With Pricked up Ears,' as we say, we have at once the metaphor of a person Raised or Roused up to Attention, and the Raised up object, or the object supposed to be in that state. In Akroaomai, (Akroaomai, Audio, Audio discendi caussâ,) is expressed a degree of Attention so Raised, as that the person is Raised up or Stands on Tiptoe, as we express it. We cannot doubt, I think, that Akroaomai, (Akroaomai,) directly belongs to Akros, (Aroaomai, Summus, extremus,) under the idea of Standing on Tiptoe, as it appears in Akro-bamon, (Arofamus,)

Qui Erectus in summos pedum digitos incedit.) Hence Akroaomai, and a term belonging to it, are applied to Hearing—on occasions, where Earnest Attention is most necessary; as to Scholars Listening to their Masters, and to people attending to the decrees of Magistrates in courts of justice, (Angonoum, Audio, Discendi caussa, Axeoantheor, Auditorium; Locus in quo judices ad cognoscendam caussam conveniunt.) The ordinary Lexicographers consider Aκκοαοmai, (Ακροαομαι,) as a Root; yet Martinius, among other conjectures, derives it, "ab Aky, vel Akqua, Auditus sensus est " Acutus;" where in Ake, (Aug, Acies,) and Acutus, he has brought us to the terms and the metaphor, to which I have referred these words, denoting Hearing. Thus we see, how the the Ak in Akouo, and Ake, (Akouw, Aky,) has the same fundamental The Ak, in Akros, (Axee,) is nothing but the Ake, (Axe,) the Acies, or Edge; and thus we see, how a term for Attention, .as Akroaomai, (Ακροαομαι,) though not directly belonging to the very series of words, conveying that idea, as Akouo, (Axouw,) &c. is yet, by a similar impression of the mind, attached to the same race of words, under the same fundamental idea. Such are the subtle, though sure and well-directed processes, by which Human ch has been generated, uniform in all its parts, and consistent I its operations.

The Reader has seen, that the words, denoting Possession—Secretity, Caution—Attention, &c. examined on former occasions, (P- S6, 255,) as Echo, (Exw.) Hedge, Heed, Hut, Huten, Hut, (Germ.) House, (Eng.) Oikos, (Omos,) &c. ultimately belong to each other. Though, in the secondary sense of these words, we see only the idea of the Appropriate Spot, Fenced and Enclosed, for the purpose of Security; yet I imagine, as I have before stated, that the original notion, from which they were derived, related to actions of Excitement—Violence; and I suppose moreover, that this fundamental notion is indissolubly entangled with the action of Stirring

up the Ground in Harrowing, &c. &c. As on former occasions I considered the terms of Possession, &c. only in their secondary sense, I think it expedient to reconsider them more particularly in this place, with relation to their primitive and more original notion. In examining these kindred terms of Possession, &c., it would be an idle attempt to arrange the various shades of meaning, annexed to each word, from the particular mode of applying the fundamental notion. The violent action of Stirring or Routing up the Ground brings us, under various modes of conceiving it, to Violent actions in general, or to the idea of 'Routing by any ' process, of Driving about or away—of Carrying off or away, in the e action of Attacking or Seizing, in order to Possess the property of others, or in that of Repelling attacks, in order to Secure our 'own.' From this turn of meaning in the Fundamental notion. we at once obtain a Race of words, denoting Seizing—Holding— Possessing—Securing, &c. I have shewn (p. 773,) that the union of these ideas of Seizing—Having—Holding, &c., and of Stirring up a surface, is most strongly visible in the kindred terms Capio and Carpo, however we may conceive or explain the process of their union. R. Ainsworth explains Capio, by "To take.—To "take by force, to Seize.—To Hold or Contain.—To receive, "obtain, get, or have;" and Carpo, we know, not only relates to the action of Carping up or off a surface, as "To gather, pull, "or pluck fruits, herbs, &c.—To teaze or card wool;" but it means likewise, "To rob, pillage, or take away." Cabam, to which Carpo and Capio probably belong, means at once "To Break Land," and To Catch; and in an Arabic term, which perhaps is likewise directly attached to these words, we have the sense of Possession, connected with the idea of Excitement— Agitation, &c. Mr. Richardson gives us, as the appropriate Arabic term for Hold, the word تبض Kubz, which he explains by "Quickness, expedition, KEBIZ, Taking, Seizing, CAPTure, "seques-

sequestration.—Constipation.—Contraction (of the wings, &c.) " Agitation, compulsion, Possession." I have likewise illustrated at full length in the last article the union of these ideas of Carping a surface, and of Constringing-Seizing, Confining, &c. in a great race of words, as Agcho, (Αγχώ,) &c.; and I have applied the term Stringo, as singularly adapted to illustrate this union, since it is acknowledged, that Stringo belongs to Striga, the Streak, Scratch-Furrow, &c.-Under the form of our Element 'R, and ^RD, we have seen HARRY, (Eng.) HARRIE, (Sax.) "Depopulari, "hostiliter invadere, vastare;" HERGian, "To HARROW, vastare, "spoliare, prædas Agere;" where we are directly brought to The Saxon Here, Here, Exercitus, Turma, Prædatores, &c.; the German HERR, the Lord or Master; HERUS, (Lat.) &c.; HERD, the Keeper, and HERD, the Flock, all belong to each other; and originally denoted the HARROWERS or the RROWED, the Drivers or the Driven, &c. &c. We cannot but how h=ERD, the Keeper, connects itself with gu=ARD. w. A. RD, &c.; and thus we may conjecture, that the original idea anne xed to this race of words, denoting Security, was derived from the same source of Driving away. I must again, repeat, the secondary sense only of Security commonly appears in the see words, and some of them may have been derived from terms, bearing that secondary sense, without ever having participated of the primitive idea. It is impossible however to adjust those minute points, or to separate words from each other, as dist i riguished by these shades of difference.

We cannot but note how HEED, HUTEN, &c. (Germ.) connect them selves with Hern, and its parallels Hyrdan, Custodire, &c. &c. Thus, again, we see, how the forms 'R, 'RD, 'RT, 'D, 'T, &c. pass into each, without confusion, and how the general relation of all these forms is distinctly visible, without confounding our ideas on the peculiar relation, by which the words under each

form are more particularly connected. I have just shewn, that HEED, ACHT, (Germ.) and HUTEN, (Germ.) &c. are surrounded with words expressing actions of Excitement, and among the terms of Possession, which I produced with HEED, &c. on a former occasion (p. 124,) as EHT, ÆHT, Æstimatio, EHTE, Bona, possessiones; ÆHT, Possessio, Hæreditas; ÆHTE Man, Colonus; ÆHTE-Land, Terra possessionis, &c. &c., we have the strong term of Excitement, EHTan, Persequi. In these words we are directly brought to the Spot, supposed in my Hypothesis, whatever may be the precise idea by which they are connected. I have suggested, that if ÆHTE-Man had been explained by 'Vir terram 'Exercens,' we should have seen, why EHTan signified "Persequi;" or, as it might have been, 'Exercere, Exagitare,' &c. Here we again perceive, how the idea of Possession may be connected. with that of Excitement, as attached to the action of Stirring up the Ground, by another turn of meaning.

But these Saxon terms EHT, ÆHT, &c. bring us to a race of words, which are most important in various Languages. terms as ÆHTE, AHTE, (Habuit,) are acknowledged to belong to Agan, Possidere, of which the different forms are Ægan, Ægnian, (Sax.) Algan, (Goth.) Possidere, &c. &c. To the form Ægn-ian, where the n is an organical addition to the G, belongs the Saxon Ægn, Proprius, to which the English Own is attached, as the Etymologists understand. We cannot, I think, doubt, that the Greek Echo, (Exw.) belongs to Agan, &c.; and the Saxon Scholars must surely agree, that Agan, Ægan, Possidere, belong to Egean, Occare, whatever may be the precise idea by which they are connected. We cannot but see likewise, that Есно, (Ехи,) in the sense of "Prehendo, Prehensum teneo," connects itself with Agene, (Ayxu, Constringo, coarcto quovis modo,) which assuredly belongs to Ago, (Ayu,) 'To Draw, Drag, Drive off, away, &c. To Take, Ravish, Seize, Catch,' &c.

(Ayw,

(Ayw, Accipio, aufero, rapio, abigo, &c.) In the phrase Ep' Agkurais Agein, (Επ' Αγκυραις Αγειν, In Anchoris stare,) we see how Ago and Agcho, (Ayω, Aγχω,) coincide in one of their modes of application. We have seen too, how Ago, (Ayw,) and Ago, (Lat.) are actually applied to Stirring up the Ground, just as Egean, (Sax.) and Occo are. We must acknowledge moreover, that such terms as Hook, Hug, &c. belong to Agcho, (Αγχω,) and I have shewn how these words refer to HACK, under the idea of HACKing up a surface. Thus then, we now understand, that all these terms Egean, (Sax.) Occo, HACK, AGCHO, (Αγχω,) HOOK, Hug, (Eng.) Echo, (Εχω,) Ægan, &c. (Sax.) Hedge, Oikos, (Oπος,) &c. Acht, Heed, Hut, Huten, &c. Agoo, (Aγω,) Ago, (Lat.) Agitate, AcT, &c. &c. all belong to each other, and that they express only different modes of applying the same fundamental idea. In the Latin and Greek Ago, Agoo, (Ayw,) we have even the sense annexed to Achten, Huik, &c. In the phrases Hoc Age—All' Age, (All' Aye,) we see the idea of Excitement to Attention or 'Minding one's business,' according to our expression, as in the German Achtung, Attention. R. Ainsworth explains Ago in one sense by "To Mind, or Observe.-To take care "of;" and in the next sense we have "To Endeavour," which directly brings us to the meaning of the Saxon Hicgan, "Niti, Conari."

We shall not wonder, that these words all belong to each other, and that different turns of the same Radical meaning should be expressed by kindred words, assuming different forms; when we know, that many of these different turns of meaning appear under the very same form, or under the same word. R. Ainsworth has annexed twenty-one different senses to the word Ago; and in the Vocabulary of Hederic we have five and twenty senses annexed to Echo, $(E_{\chi\omega})$, in its three voices. Thus then, one single term, abundant in its senses, may supply us

with the different meanings which exist in different words, ultimately belonging to that term. We hence see, that one such term, or two such terms, well studied, in the details of a copious and diligent Lexicographer, might introduce us into the mysteries of an Element, and enable us to see the different turns of meaning, with which that Element is invested, as they appear in the different though kindred words of which it is composed. The Greek and Latin terms Agoo, $(A_{\gamma\omega},)$ Ago and Echo, $(E_{\chi\omega},)$ are words admirably adapted for that purpose; and I beseech the Reader to recall to his remembrance the various senses of these words, by the assistance of an ordinary Lexicon, tolerably copious, and he will find abundant materials of useful meditation.

A German term unequivocally connects the HEDGE with words denoting a Dwelling, &c.; but here a difficulty might present itself, which perhaps should be stated. Wachter explains HAG, placed in various articles, by "Verbale ab HAGen, Sepire, " est vox latissimi valoris, et vi originis significat, quantum potest, " Sepimentum, et Locum Septum, qualiscunque ille sit."-" Do-"mus, Mansio,"-" Ager, Primo Septus, postea omnis Ager." "Nemus," &c. "Vallum militare, Agger palis, et stipitibus " munitus." — "Pagus," &c. The consideration of this word would lead us to think, that the original idea annexed to AG, in Ager, and Agger, was that of the h-Ag, or Enclosure. We cannot doubt, that Oikos, (Oikos,) House, Hut, &c. connect themselves with the HAG. As a verb, HAGen means "Sepire, Septo cir-"cumdare, Anglosax. Hegian-Angl. To Hedge;" and Wachter adds, "Duci potest ab HEGE, HEGGE, HECKE, quod primo fuit " frutex senticosus, postea Sepes ex fruticibus senticosis, denique " omnis Sepes."

This idea creates a difficulty in our arrangement. I have before suggested, that Hedge might originally denote the Shrub, which Hacks or Cuts; and that from hence the idea of the Hedge, the

the Enclosure, might be derived. We cannot, I think, doubt, that all these terms, denoting an Enclosure, belong ultimately by some process to each other; and it might be, that the names for the Enclosure were derived from the Hedge,—the Shrub, which Hacks or Pricks, of which Enclosures were commonly made, and not from the general Elementary sense, as I have above explained it.— I have laid before the Reader all the evidence relating to this subject; and he will see, I think, in a variety of terms denoting an Enclosure, such evidence of the original fundamental idea, that he cannot conceive them to be derived through the medium of the Hedge, as the Shrub which Hacks. We know however, that ideas, similar in some respects to each other, may be generated by different processes from the same fundamental notion; and thus the terms for an Enclosure, though under one mode of conceiving the matter, all ultimately belonging to each other, may be derived from sources somewhat different. The HEDGE therefore, the Shrub, which HACKS or Pricks, might form certain terms, denoting an Enclosure; and the others might belong to the more general train of ideas; but these are minute points, which we are unable to ascertain; as it is impossible to define the limits, within which each of these processes is confined. We must be content to have discovered the relation of all these words to each other, and the fundamental idea by which they are connected, which, I trust, has been most fully and unequivocally performed.

I cannot leave these words of *Possession*, without again noting the terms Ægn, Agen, Proprius, belonging to Ægnian, Possidere, from which the English Own is derived. I have endeavoured in a former page (123,) to explain the process, by which these terms belong to each other, and the explanation is on the whole just; yet perhaps the following mode of conceiving the matter

may assist us in deciding our opinion. The Etymologists have placed Against and Again in two separate articles; and under the latter term they have produced, as parallel, the German Gegen, which is quasi G'=EGEN, belonging to AGEN. Another form of G'=Egen in German, is G'=Egend, which my Lexicographer explains by "A Region or Tract of Land, Situation;" and which surely means the AGEN, Proprius, 'the Property of 'a person;' 'A certain Spot of Land; — Appropriate or Peculiar to 'a person;' and afterwards, 'A certain Spot of Land or Situation 'in general.' Hence is derived AGAINST, which denotes the relations of one Situation to another, as 'It is Placed over 'AGAINST such a spot.' The Latins express AGAINST in this sense by a term, signifying Place, Situation, as 'E Regione. 'Of or From such a Region;' the very term, as we see, which is adopted by my German Lexicographer in his explanation of G^=EGEND.

From the sense of Against we directly pass to that of AGAIN; just as the Latin Contra, which R. Ainsworth explains in one sense, as a Preposition, by "Over Against" means, as an adverb, "Mutually, Reciprocally," as the same personage explains it, or as he might have said, 'Mutually, reciprocally, AGAIN.' We cannot but perceive, that the Tra, in Contra, belongs to the same idea of Situation, as in 'In=Tra,' 'Ex=Tra;' and I have observed on a former occasion, that it is derived from Terra. In old English, Owe signifies simply "To Possess;" and I have expressed my doubts in a former page (130,) whether it belongs to the Element 'B or 'G, to Habeo or Ægen, &c., though I now conceive, on maturely weighing the matter, that it must be referred to the latter. In Scotch, as we have seen, Awe and Aucht, &c. both signify To Owe, where in the latter Scotch word we have the true form. On the word OUGHT I have nothing

nothing to add to my former observations. I have supposed, that Egg, Ovum, might belong to these words denoting Possession; vet it must probably be referred to the same idea as HATCH, which I conceive to be derived, as some Etymologists do, from the action of the Hen in HACKing or Breaking the shell, in order to produce the chicken. I have justly supposed, that Hood, HEAD, in KnightHoop, MaidenHEAD, belong to these terms denoting. Property (p. 127,) what a Person Holds or Possesses, as peculiar to himself or herself; and that Hood, the Covering for the Head, is that which Holds or Contains. The term *Head* belongs to the Element c-P, as Heafod, Haubith, (Sax. Goth.) which brings us, we see, to the Latin c-Aput, &c. The term Hop, as the 'Coal= 'Hop,' is another term, signifying that which Holds—Contains. Among the words denoting Possession, Acquisition, &c.— What 'a person Holds,' &c. which I produced in a former page (126,) were the Galic terms Adh, Agh, Felicity, good Luck,-Ed, signifying "Gain, profit, advantage," as Mr. Shaw explains it; who in three other articles gives us the same term ED, as denoting "To make, receive, to handle; —Defence, Protection; —Cattle;" and again, as a verb, we find in another article, "Epim. To "To Catch, Apprehend." Here we have the sense annexed to Carpo, &c.; and the Celtic Scholars should consider the peculiar turn of meaning affixed to this verb, from whence they might be enabled to understand the original idea, from which these Galic terms for *Property* are derived.

Terms of Excitement.

EHTan—HETTan. (Saxon,) To Persecute.

HETZEN, HETZE. (Germ.) To Chase, A Bull Baiting.

HETE. (Sax.)

HATE—Odium. (Eng. Lat.)

HATian. (Sax.) To HEAT, and to HATE.

HASTE, &c. (Eng. &c.)

HATan. (Sax.) Vocare, Appellare, Jubere, i. e. To Urge or Enjoin any thing in a Pressing manner.

HEST. (Old English.) A Command.

HIGHT. (Old Eng.) Called.

WE have seen, that in Saxon, EHTan means Persequi; and in this Language, HETTan, another form of it, has the same meaning, where we have the strongest sense of Stirring up or about— Routing, &c. under the idea of Annoyance. In the same column of Lye's Dictionary, where the latter word occurs, we have HETE, Hate, Odium, which belongs, we see, unequivocally to HETTan. The English HATE and the Latin Opium, Osum, &c. are different forms of this word. The Saxon verb Hatian signifies at once "To HEAT, be Hot, and to HATE;" and we now see, that the sense of HEAT belongs to the idea of Excitement. Hate, Heat, will remind us of HASTE, and its parallel terms HATER, &c, which Skinner refers to the German HASE, the Hare, another of these terms. In the same column of Skinner, where HAST is, we have 'To HATCH flax,' where we are brought to the original idea of Stirring up or Scratching over a surface. In Gothic, HATJan is Odisse. The Etymologists have duly collected the parallel terms to HATE, as Hassen, (Germ.) Hair, (Fr.) Odium; Odium; Aταο, (Αταω,) &c. In Gothic too, we have HATIZON, Indignari, Odisse; and perhaps we should imagine, that the form of the Greek Aτυzο, (Ατυζω, Terreo,) directly belongs to this Gothic term. Heat and Hot occur in various Languages, as Hete, (Sax.) Hitte, (Belg.) Heiss, Hitze, (Germ.) &c. &c., which the Etymologists have duly noted.

In the same column of Lye's Dictionary, where Hatian and Hatjan are found, we have HATAN, HÆTAN, "Vocare, appellare— "Jubere. — Hete, Promissus;" which seem to convey senses very remote from the train of ideas, now under discussion; yet nothing is more natural than their relation to each other. HATan, To Call—Order—Promise—Assure, &c. means to Stir up or Excite, Urge, as when one person Calls upon, Orders or Enjoins another person to do any thing in an Urgent-Pressing manner. sense of Promise or Assurance is derived from the same notion of an Urgent—Ardent—strongly Excited—Earnest or Pressing mode of action or expression, in Promising—Assuring—Confirming any thing. In such expressions as 'I'll give you a good drub-'bing, I Promise you; '-- 'You shall answer for it, I Promise you;' we see this sense of Excitement. The Latin Promitto is explained by R. Ainsworth in one sense by "To threaten .- Promisi Ulto-"rem." The words HATan and its parallels, derived from this idea, afterwards signify To Call, &c. &c. in general, without any intensive meaning. The sense of Calling must of necessity be frequently connected with the idea of Excitement; and in many cases we cannot distinguish the one from the other. R. Ainsworth justly translates 'To Call up—To Call up Spirits—To Call one ' up in the morning' into Latin by terms of Excitement as 'Cieo-'Manes Ciere, -Suscito.' I shall shew, that the English Call and Kaleo, (Καλεω,) belong to Keleuo, (Κελευω, Jubeo, Impero, Hortor, Invito ad aliquid agendum;—Peto, Postulo; permitto, Censeo, Remiges Clamore Incito;) and if they do not, we perceive in Keleuo,

Keleuo, (Κελευω,) itself, the union of those ideas, which I suppose to exist in HATAN.

In the words connected with Keleuo, (Κελευω,) we see the notion of Excited action, and of Noise, as Kelaruzo, (Κελαφυζω, Cum strepitu fluo; — Murmuro, strepito,) Keloruein, (Κελωρυειν, Vociferare, clamare,) Keles, (Κελης, Celer, Equus desultorius,) Kello, (Κελλω, Appello, Appellor, Pervenio in portum, Moveo, Celeriter curro.) We cannot help noting the same relation between Appello, To Call, and Appello, To Drive to Land, as between Keleuo and Kello, (Κελευω, Κελευω.) The Etymologists acknowledge, that Appello, To call, belongs to Pello, which, they say, anciently signified to Speak, "Ex Ad et Pello, ant. pro Loquor, qu. ad me Pello; "i. e. voco." We now see, that Appellere and Appellare convey the same idea of Driving or Urging—to Land and Action.—In such phrases as "Nec avarus exactor ad diem et horam Appellat," we have the original sense of the word. The phrase might have been "Nec avarus Appellator ad diem et horam Exigit," or even Appellit; where we see, that Appellare, Appellere and Exigere, from Ago, have a similar meaning. I shall shew too, that Voco belongs to terms of Excitement, as Vexo, &c.; and we cannot but recollect this fact in the words Provoco and Provoke. The Latin Cito, "To Call, or summon to appear, to Cite, To Recite, to Rehearse," means, we know, "To Excite, to Stir up, to encourage," as R. Ainsworth explains it; and the term Cito, we likewise know, is peculiarly applied to Citing up, if I may so say, Ex-Citing or Stirring up the Ground, as in Soli-Cito, "To Stir, or dig up, "properly the Ground." Let us mark the different turns of meaning annexed to this metaphor of Stirring up, as the Ground, and particularly the words Recite and Rehearse, where HEARSE, in Re=HEARSE, belongs to the HERSE, (Fr.) the Harrow, which Stirs up the Earth for the same reason. I have already produced the term HEARK, HEARKen, as other words, denoting Excitement

Excitement to attention; and thus we see, how the HEARSE, in reallings and Harkilbelong to each other. I have likewise shewn, that, Hensellothell Carriage for conveying the Dead, is derived from the same sides of Stirring sup-Scratching up or upon + Grating upon the Ground, with a Grating-HARSH Noise; and thus we see, how every thing coincides in the same train of ideas, we Refore Alegre the words which I have above noted, I mousto observe, (that othe terms : Keleuo ; Kaleo, (Kindo, Kane,) Call, Acaibelong to such words as skalle, skalleno, (Skalleno, (Skalleno, Skalleno, Sarcuto circumcirca sarrio, &c.. Σκαλλευω, Fodio,) sCale, (Eng.) which signify to Stir-up the Solum, or Soil In Koni-Sailos. (Konowaco, Pulvis motusy) weithere the Ban lapplied to its original a the ugh, "ke other have all asserting 1.3 2.4 6.6

To the terms Hatan, Hatan, Vocare, &c. we must refer the words Hight, Called, and Hest, bar Mest, a Command. The term Hrong, we know is retained in modern Roctry; and we all remembertit in Shakspeare (weed) could be boling at the could

"This Child of Repcyl that Armado Hight"

We know, that Hess is likewise a term familiar to our ancient Poets, an "Refusing ther grand Hestes Historic (Tempest.) The succeeding -word "to the sar, sehi, Junius wie Herreno; which, in Chancer, means '6 Ludibrium, Inrisio; hawhere we have the same metaphor as in Hoaxy Huses; (Sax.)! In the phrase Highty-Tity! we have the same sound as limilitrain; and the same meahing of something in a Stirred upsia Reisest up - Agitated State, at which we express our Supprise. A Houry Roity lis, another form of this phrase. It is curious to remark, how words continue to preserve their original meaning, as well by their own force, as by the process of the Associating principles. The word Hrour, House used simply for Called, still connects littelf with the train of ideas to which it originally belonged, though by a mode of abblication very different. Thus in modern Poetry, as the passage · • : . i

of Shakspeare, Hight, Called, is applied on Highty-Tity occasions, if I may so express it, or to Highty-Tity Characters. This is extremely curious, and well worthy of our attention. We mark, how Hight, Called, coincides in form with High, Height, to which, as we now see, it belongs. Lye, in Junius, has Hight, HAITE, HAT, &c. which he explains by "Vocatus, Nominatus, "Promissus;" and which he refers to the Saxon Hatan, the German Heizen, or, as it is now written, Heissen, the Belgic Heeten, the Islandic Heita, and the Gothic Haitan. In Scotch, as I have before shewn, HECHT means "To call, name, to " Promise, to Engage.—To Offer, Proffer.—To Command;—HAT, "Called," &c.; and Dr. Jamieson duly understands the race of words to which they belong; though, like other Etymologists, he sees nothing of the original idea. In the same column of my German Dictionary, where Heissen, "To Bid, Call," &c. is, we have, under the same form, Heiss, Hot; and I see likewise Heischen, To Ask, which is parallel to Aireo, (Aireo,) and other words, produced in a former page, which contain, as I conceive, precisely the same metaphor as Solicit, from Solum and Cito, To Stir up the Ground, and Heisch; Hoarse; which, according to my hypothesis, is derived from the idea of Stirring up—Scrutching upon, or Grating upon a Surface. In German too, HETZen means 'To Chase,' and HETZE, 'A Bull or Bear-baiting;' and here we are brought to the form of the German HITZE, Heat. In the same column I find HELTER, "Serence Aclear, fair," belonging, as I imagine, to ÆTHER, AITHER, AITHEA, (AITHEA, (AITHEA, AITHEA, AITHEA, AITHEA, AITHEA, AITHEA, AITHEA, AITHEA, serenitas,) which are surely derived from the idea of Excitement or Agitation in the Air. The sense of the German Heiter likewise appears when it is applied to a person being, as we express it, in High spirits- Ich bin Heiter in a Highty=Tity 'state'-as we might say. We have seen, that in Saxon HIHT-ful means "Gaudii plenus."

Terms originally relating to the idea of Stirring up, Raising up, &c.

High, Hoch, Hoodh, &c. (Eng. Germ. Belg. &c.) what is Raised up, &c.

To Raise up.

Out, Ex, &c. (Eng. Lat. Gr.)

To Stir or Cast up, away, &c.

Aexo—Auxo, Augeo. (Greek, Lat.) To Raise up, Advance, Increase.

Auctor—Author. (Lat. Eng.)
The Raiser up—The Person
from whom any thing takes
its Rise; The Founder, &c.

Aukan — Eacan — Eke, &c. (Goth. Sax. English,) To increase, grow, &c.

We have seen, that the term High belongs to this race of words, signifying to Stir up—Raise up, &c. and that it connects itself with the Saxon Higan, Higian, To Hie, "Tendere, festinare, Contendere, niti." &c., and ultimately with Hoe, Hough, To Rout up, or Stir up the Ground. In Hough and High, though the Radical Consonant is not heard in the sound, it is preserved in the form. The Etymologists have produced the parallel terms to High, where we shall see, that the Radical Consonant is sometimes lost in the form likewise, as Heah, Hiest (Sax,), Hauhs, (Goth.) Ho, Hoo, Hough, (Belg.) Hau, (Run.) Hey, (Dan.) Hoch, (Germ.) &c. Skinner refers these words to the French Haut, formerly written Hault, which he derives from the Latin Altus; and Junius records the Welsh Ucho, Supra; Uchel, Altus. The form, which the French Haut originally had of Hault, seems to class it with the Latin

Latin Altus; and if it belongs to this, Latin term, it has no connexion with the words before us. If the French Hausser belongs to Haut, and if Haut is derived from Altus, these terms, which appear so similar to High, are excluded from all relation to it. Menage has not inserted Haut in his Dictionary, imagining as it should seem, that the word was of too obvious a derivation wto require any illustration. Wachter however refers Haut to these Teutonic terms; yet there are considerable difficulties, pur the The term HAUSSER appears however to belong to our Element'S. In Welsh, Uch is 'Upper, Higher, above 1, and UCHEL, HIGH, &c. The Uchel would seem to belong to the Greek Typios, as the Welsh Lexicographers imagine if the simpler state Uch did not exist, which should probably be referred to High, &c. An adjacent word in the Welsh Dictionary of Mr. Richards, is Uchenaid, "a sigh, a groan;" and in the next column we have Upo, "To howl as a Dog doth," where we might remark, that perhaps these terms belong to the race of words attached to our Element denoting Noise. Upp: Lord; which is perhaps a different form of Uch I find likewise another adjacent term, Ucher, the Evening, but whence that is derived, I am limable to explain. I shall not attempt to produce the various forms under which High appears in Gothic and Saxon, as the Gothie Hauh, HAUGHgan, Exaltare, Glorificare Hauhitha, Honor, gioria, Altitudo, to which probably belongs the Gothic term in the succeeding column of Lye's Dictionary, HAZeins, Laus, the Saxon Hea, Heah, HEAG, Altus, &c. &c.

Skinner produces, under Hron, the combination Heah-Tide; (Sax.) Hoch Zeit, (Germ.) Hoy Tid, (Dan.) Died Festus, "Nuptie, q. d. A Hron Time." Hean Tide coursesponds: with our combination High Tides, which agrees in sense with High Day's and Holidays. Lye explains Heah-Tid, by "Solenae Tempus." Pus. "Heag Tid. Germ. Hooh. Et inde forsan nostratiom: "Hock.

"Hock Tide; Festivan Solemitatem significans!!! Hock Tide is certainly the Hoon Zeit, or High Tide, the High Time, or Festival, as Skinner duly perceives: Zeit and Tide are only different forms of each other, as the Etymologists understand. Though Lye has justly seen the relation dictiveen these words Hock, &c. in his Saxon Dictionary, yet in his Edition of Junius, after enumerating the defivation given by Skinner of Hock Tide, or, as it sometimes appears, Hock Day, he adds, "Mihi magis "extinct deducere, ab Isl. Hogg: Cades, occisio, at Dag. A.S. "Dag, Dies, q. d. Cadis et Occisionis Dies." The Islandic Hogg belongs to Hack. Hock Tide perpetually occurs in our ancient Writers. In the Poems attributed to Rowley, we find allusions to the Hock Tide Games:

(Battle of Hastings, No. I. v. 25.)

"The Hocktyde Games," says Dean Milles, I are alluded to "more than once, as affording a variety of diversion. Here bulls "are baited. At v. 348. Mastiff Dogs are set to fight. In the " second poem, v. 576, Cornish wrestlers; and v. 412, the nappy "ale at these games is made the subject of the poet's praise." Dean Milles then repeats the ordinary story, from which the derivation of Lye is taken, that "this festival is known to have "been originally instituted in commemoration of Ethelred's " slaughter of the Danes all over England." It is certainly well known, that a Festival was instituted to commemorate the slaughter of the Danes, and that it was called Hook Tide, or a-Pestival, but for no other reason, than because all Festivals. were so called. It might however be called the Hook Tide, or 'The Festival,' by way of eminence. In German, Hock Zeit is particularly applied to the Marriage Testival, and is therefore explained in the German Lexicons by M.A. Wiedding, Bridal, "Marriage Feast." When the Hockeride or Restival of the Massacre

Massacre of the Danes was celebrated, plays were sometimes performed on that subject. Dr. Percy observes, that one instance occurs of an Historical Play, "which was perhaps as early as any "mystery on a religious subject;" and that "This was the old "Coventry Play of Hock-Tuesday, founded on the story of the "Massacre of the Danes, as it happened on St. Brice's Night, "Nov. 13, 1002." (Percy's Reliques, Vol. i. p. 141.)

In Scotch, Hogmanay, means the last day of the year; and among other derivations of this term, some have thought it "allied " to Scand. Hoeg-Tid, a term applied to Christmas and various other " Festivals of the Church." (Jamieson sub voce.) The Hogmanay, however, has certainly a curious resemblance to the French cry used at the same period of the year, during the Fête de Fous, which was "Au gui Menez, tiri liri, mainte du blanc et point du " bis." The Beggars, who made this cry, were called, as it is said, "Bachelettes, Guisards; and their chief Rollet Follet." The writer, quoted by Dr. Jamieson, under this term, has the following observation: "The resemblance of the above cry to " our HOGMENAY, Trololay, Give us your white bread, and none of " your grey; and the name of Guisards, given to our Bacchanals, "are remarkable circumstances; and our former connexions with "France render it not improbable, that these festivities were taken from thence; and this seems to be confirmed by our " name of Daft days, which is nearly a translation of Fêtes de " Fous." If the Critic has detailed the customs of his Country with precision, there can be no doubt respecting the coincidence of these cries; and but little, I think, that Hogmane is a corrup-... tion of Au oui Menez.

We shall now understand, that the 'Hey-Day of the Blood—of Life,' &cc. is the High Day, or Festival period, of the Frame and of Life, when we are in High vigour and Spirits; and inclined to mirth—glee and Festivity.

" At your age .

"The HEY-Day in the blood is tame, it's humble,

"And waits upon the judgment." (Hamlet, A. III. S. 4.)

Mr. Steevens produces the following passage from an old Play,

" Musi

"The HEY-Day of your luxury be fed

"Up to a surfeit?".

The Interjection Hey-Day is acknowledged by Skinner to be "q.d. High-Day, O Festum diem (i.e.) Lætum et Fælicem!" This interjection is sometimes used to express surprize at merriment somewhat ill-timed, and disorderly, as 'Hey-Day! What is all this Noise for?' That is, 'What is the meaning of all this 'Festival merriment, when there is no Festival?'—or, 'What 'Festival or Hey-Day are you celebrating?'—High is used, as it is in the above phrases, when we talk of 'People being at High 'romps;' where we see fully the idea of Excitement, Commotion.

The Greek Aetos, (Aetos, Aquila, Fastigium ædificiorum, quod et Astuna,) means the High soaring animal, and the Height. Perhaps the names of Mountains, belonging to our Element, as IDA, &c. are derived from this idea. It is certain that we must seek for the origin of many Phrygian terms in the Teutonic Dialects. (Wachteri Præfat. p. 29.) Wachter derives Pergamus from the German Bergham or Bergheim, 'Montana Mansio.'. In German, Berg not only means a Mountain, but it signifies: likewise, 'The Secured Spot.'—"Tuta receptacula;" and to this: sense belong our terms Burgh, Borough; which, as we know, are familiar additions to the names of Towns, EdinBungh, &c., These words belong to Bury, (Eng.) Bergen, (Gerad.) &c.; and they expressed originally the action of digging Hollows in the Ground, and casting up the mould in Heaps,-Tumuli, or Bergs, if I may so say. The Ham, or Heim in the compound Berg-Ham

Berg-Ham belongs to Home,—Ham, &c.: It is likewise a familiar addition to the names of Towns and Villages, as Notting-HAM, &c., and the spot, on which I am writing these discussions, Harding-HAM, &c. &c. Thus, then, the AM, in Perg-AM-us and Harding=hAm has precisely the same meaning. Hence we see, how distant ages and places become, as it were, connected with each other by the mediation of kindred Languages, which are found to have been thus spread over the face of the Earth. I have shown, that Home, Ham, &c. belong to names for the Ground, as Munus, &cc. (p. 1882); and I shall prove in a future Volume, that the Element PRG denotes, through a wide compass of Language, the same as it does in Burgh, Borough, &c.; Hence we have the Greek Purgos, (Ilveros); and in the Sclavonic Dialect we have such combinations as Peters-Burgh, &c. In English, the compound Bergham appears as a name, which has been illustrated by a Pedigree from the pen of the unfortunate Whatever errors — interpolations — inventions, &c. may exist in this extraordinary piece; I am unable to conceive by what process of the understanding it can be imagined, that the whole of it is an absolute Forgery.

In the same column of Hederic's Vocabulary, where Aetas, (Asac,) is found, we have Aza, (Asa, Fuligo,) which brings us probably to the original Spot, under the idea of the Dirt of the Earth, Erz, &cc. &c. In the same and preceding column, we have Aertao, Aertao, Aertao, Aertao, Aertao, Aertao, Tollo, Attollo, Elevo, Asach, Tollo,) where we are directly brought to the idea of Stirring up or Raising up the Earth, or Ground. I shall shew, that Tollo belongs to Till and Tellus, under the same idea. These words Aertatho, &c. (Asacha, Tollo,) are justly referred by the Lexicographers to Aertao (Asac, Tollo,) which belongs to the form Ar. These terms will shew us, how the forms Ar., Ar., Ar., are connected with each other. I see in the same column of my.

Greek Vocabulary with Aetos, (Aetos,) the terms Aesai, (Spirasse, ab Aeω, Spiro,) Aesi=maina, (Aeσιμαινα, ut θαλασσα, Mare, ventis agitatum, inquietum; ex Aω, et Μαινομαι, furo,) Aesi=phron, (Αεσιφρων, Ventosus, levis; ex Aω, Flo, et φρην.) The Aes in these terms contains, we see, the same idea, as the race of words now before us; and thus the Radical form of Ao, (Aω, Spiro,) should probably be conceived to exist in Aeso, (Aησω,) to which the sense of a Future time has been accidentally annexed.

The English Hoise or Hoist, To Elevate, has been derived by some from the French Hausser, and from the Saxon Heahsian, Elevare, and Heah, Altus. It surely belongs to the French term; and if that be the fact, we shall be of opinion, that Hausser is not attached to Haut, if Haut be derived from Altus. The nautical term HAWSES, from which the name HAUSER Trunnion is derived, has been referred by the Etymologists to Hausser. Junius, under Hoise up the Sail, produces the French Hisser, the Italian Issare, and the Belgic Hüsen; and he reminds us of the Danish Hoi, Altus.—The preceding term to Hoise, in Skinner, is HOIDEN; which I have referred likewise to the idea of Excitement, and which we may express by the colloquial phrase, the Holty Taity Girl.— We use High in a similar sense, when we talk of a Girl in High Romps. The term HAUGHTY, as it should seem, connects itself with High, as some observe; yet here we are reminded of Haut, Hautain, Hault, Haultain, and Altus. In these coincidences we know not what to decide. The old English word Houton is derived directly from Hautain, Lofty. It occurs in the Poems attributed to Rowley:

"Houron dyd make the Mountaine bie their might."

(English Metamorphosis, *.93.)

Chatterton explains Houton by Hollow; on which Dean Milles observes: "Chatterton misinterprets the word Houton: it does "not mean Hollow, nor could that circumstance be any alleviation

"to the fate of Elstrid and Sabrina; but HAUTEN is explained in "the Prompt. Parv. by Exalto, and is used in this sense by Peter "Langtoft; and HAUTAIN, in old French, signifies Proud or "Lofty. The size and height of the mountain are mentioned as "an exertion of might by the Gods, to add dignity to their fate; and with the same idea, the poet has chosen the highest hill in Wales for the monument of the giant. In this sense, we may also understand that line in Robert Canning's Epitaph:

" 'Houton are wordes for to tell his doe.'

"It required Lofty not Hollow, words to celebrate his praise." I believe Houton means here Idly Swelling.

I have suggested on a former occasion (p. 446,) that Out, with its parallel terms Ex, (Lat.) Exs, (Ex,) &c. may belong to the idea of Stirring up or Our the Ground; though I have produced in that place, and in a preceding page (210,) other modes of conceiving the matter.—I refer the word to the same spot, under all these ideas; and I doubt only, whether Ex should be referred to the Ground, under the idea of Stability, or under that of Excitement. This perhaps may be regarded as an idle minuteness, which is unworthy of any enquiry. I must however observe, what I have frequently remarked, that the idea of Excitement seems most prevalent in the formation of words, and such I finally imagine to be the origin of these terms. In Saxon, Utian means, as Lye explains it, "To Out, Expellere, Ejicere, Extinguere;" and our Lexicographer then produces a long list of words, comnounded of UT, corresponding with our preposition Out, and other terms. If the verb contains the original idea, the term belongs to an action of Excitement or Violence. In our phrase 'To Houst a person,' we seem to have the sense of 'To Out a person; and Houst brings us to the French Orer. Etymologists produce the parallel terms to Out in different Languages, as the Gothic Ut, Uta, the Saxon Ut, Utan, Ute, Foras, Utian.

Utian, Extinguere; the Belgie Utt, Uyt, Wt, the German Aus, Aussen, the Danish Ud, the Islandic and Runic Ut, &c. I shall not attempt to produce the different forms in Saxon and Gothic, under which Out appears, as Us, (Gothic,) &c. &c., nor the various compounds of Out in English, to some of which, Skinner and Junius have allotted distinct Articles, as Out-Landish, Out-Law.

In the same column, where these words occur, I find in Junius, Outragen, Desciscere, Degenerare; as a term in Chaucer, and Outrage, which we should directly refer without scruple to the English Out, &c. The Etymologists, however, justly refer us to the French Outrage, which is sometimes written Oultrage, and the Italian Oltraggio, which bring us to the Latin Ultra, a term of similar meaning to Out, though belonging to a different Element. When these coincidences take place, we find some embarrassment in deciding on the question. The French Outre and Outrér exhibit likewise the form and sense of Out; but in old French, these words are written Oultre, and Oultrer, and belong to Oultrager, &c. The Saxon Utan not only signifies Extra, but it is explained by Lye as a "Verbum Hortantis, Age, Agedum, Agite;" where we have precisely the sense which I have affixed to Ut or Out, that of Stirring up—Exciting, &c.

In my German Lexicon, the succeeding article to Aus, Out, contains a compound of this word, where it is actually applied to Stirring up the Ground; "Aus-Ackern, To plough up, break up the "Ground." Here the Aus and the Ack, in the term Ackern, have the same meaning; and I have shewn, that Hack, Hough, (Eng.) Hacken, (Germ.) &c. &c., are to be referred to the same spot. — Wachter has given the original idea of Aus, when he explains it in one of its modes of application by "Funditus, Radicitus. Inde Austilgen, Exscindere; Ausrotten, "Exterminare; Ausjætten, Eruncare;" where we see, that the Latin

Latin Ex still corresponds with Aus. This sense of Excitement is perpetually visible in the Latin Ex, as in the very explanatory term, which I have found it expedient so often to repeat, Excitement, Excito. In the words, which are directly adjacent to Ex in our Latin Vocabularies, we have its genuine idea, as in Ex-Acerbo, To Ex-Asperate; Ex-Actus, Driven Out; Ex-Acuo, To Sharpen; Ex-Agito, To Ex-Agitate, &c., To Drive Out or Ab-Out, &c. &c. I have shewn, that Age, Agito, Acuo, and Acerbo, belong to the metaphorical application of the action expressed by Occo; and thus we see, how the Ac, Ac, Ex, and Oc convey the same fundamental idea. We know moreover, that the Greek Ex. (E.F.) has the same mode of application in such compounds as Ex-Ago, (Εξαγω, Incito, Impello,) and Ex-Otheo, (Εξωθεω, Expello,) Το Ηιτ or Drive on, away, Out; where again the Ac and the Oth belong to the same race, as in the French Oter, Oster, and the English Houst, &c. "To Out."

We all know likewise, that in English, UT is another form of Out, as Utmost, Utter. In Saxon, Uter is "Outer, "Utter, Exterior;" as Lye explains it. To Utter, Eloqui, is 'To Out, to produce or bring any thing Out,' Utterance or Outrance, in old English and in Scotch, is a term expressive of the most violent action. Dr. Jamieson explains Utterance in one sense by "Extremity, as respecting distress, or implying the "idea of Destruction;" where let us again mark the kindred term Ex, in the explanatory term Extremity. We all remember in Macbeth,

"Rather than so, come fate into the list,

Dr. Warburton observes, that *Utterance* is a Scotch word for *Oultrance*. Here again the form *Oult* seems to create difficulty. The succeeding word to *Outrance* in Dr. Jamieson's Dictionary, is Out-Red, which means "To Disentangle, to extricate.—Rubbish, "what

[&]quot; And champion me to the UTTERANCE."

"what is cleared out;" where we have unequivocally the form Out, and are brought to the idea, supposed in my hypothesis. To Out-Red, belongs our name Out-Red; as Out-Ram belongs probably to Out-Room, To make clear Room, Aus-Raumen, (Germ.) To Remove, &c.

In Lye's Dictionary, I find adjacent to Urian, "To Out, Ex-" pellere," &c. the term UTHian, "Permittere, concedere, dare, "dedere;" which means "To Out," as it were, 'To afford an Out-let, just as Ex=Esti, and Ex-on, have the same meaning from the same idea; (Εξεστι, "Licet. Hinc Εξον, cum " liceat. Tota dictio hæc est, Εκποδων εστι, via aperta est, obstan-" tibus amotis.") I shall shew in a future Volume, that Licet belongs to Locus, Room or Place, to do any thing in. I suspect, that EASO, (Εασω, Εαω, Sino, &c. valere jubere,) ΕΑΤΕΟΝ, (Εατεον, Remunciandum est, valedicendum est,) belong to Eks, &c. (EE;) under the same idea. In Shakspeare, UTIS is used for a violent breaking Out of Mirth—An Outcry, uproar, "By the Mass, here "WIII be old UTIS: It will be an excellent stratagem." (Second Part of Henry IV. Act II: S. 4.) In Chaucer we have OUTHEES, and in barbarous Latin Hutesium. We here see, how the terms for Noise, Hoot, &c. connect themselves with the idea expressed by OUT—UTTER, &c.

I have supposed on a former occasion (p. 269,) that Hostis, which meant originally a Stranger, was derived from the idea of the Person admitted to the House. I must now suggest to the Reader, that it probably belongs to these terms of violence, Hit—Otheo, (Ωθεω,) To Drive Out, &c. If this should be the case, we shall see, that Hostia, the Victim, is the Hit or Stricken down animal. Let us mark the Ict and Ic, in v=Ictim, v=Ictima, v=Ictim, the Hostia, which must be referred to Ico, &c. To Hostia, belongs the Host, the Hostie, "the consecrated wafer, representing the "body of Christ,—the great Sacrifice or Victim for the sins of "Mankind."

"Mankind," as was before observed. The Hostage, Otage, &c. may mean the person Driven or Carried off by Violence, as a Security. The sense, which I have given of Hostis, precisely coincides with that of Hostio, the verb, which actually signifies "To Drive off—away—Out," &c. as in Pacuvius.

"Nisi coerceo protervitatem atque Hostio ferociam."

As a substantive, Hostorium means "Lignum, quo modius æqua-"tur;" or, as R. Ainsworth explains it, "The Stritchel, or Strick-"less, to Strike the bushel, or other measure of corn, over;" which means the instrument which Hits or Strikes off-over, or Out the abundant corn. Hostio is explained by "To recom-"pense, or requite, to return like for like;" which means to repel injury for injury—to give Tit for Tat, that is, blow for blow, or to give a person a Rowland for his Oliver. I have justly however seen, on a former occasion (p. 269,) that Hostis ultimately belongs to the House, though I did not arrange, as I now imagine, the precise mode by which they are connected. In this part of my discussion, I have endeavoured to shew, that the House, &c. the Spot of Security-Defence is derived from the same idea as the Latin Defendo, which Robert Ainsworth actually explains in the first sense by "To Strike or Keep off, Out or "away." Thus we see, that the House, &c. the Hostis, and the Hostorium, remote as they seem in sense from each other, convey the same fundamental idea, and are all comprehended in this short explanation of the Latin word, as denoting 'The object which 'Keeps off, Out'-'The person whom you Keep off, Drive off, or 'Out,' and 'The instrument which Strikes off, or Out.'

I have been much embarrassed (p. 218,) in endeavouring to discover the origin of the English Oath, with its parallels; but I now finally imagine, that it must be referred to the train of ideas here unfolded, and that it means 'To Drive Out or away,' by Cursing, Banning. I have supposed, that Orkos, (Opnos,) belongs

to a similar idea; and I have observed, that in the term Ex=Orcise. we see the violent "action of Driving Out or away by strong "adjurations." Let us note the explanatory terms Ex and Our there adopted, which convey, as I imagine, the original idea expressed by OATH, &c. Wachter has brought us to this notion under Eid, Juramentum; when he says "Græcis Aras sunt Diræ, " quibus cum se devovere quondam cogebantur jurantes, hinc "Junius EID Execrationem interpretatur." In the Greek ATE, ATAO, (Ατη, Damnum, Αταω, Lædo, noceo, noxam seu damnum infero,) we see the true idea, and they should be considered perhaps as directly belonging to OATH, EID, ATH, (Sax.) &c. The preceding word in Wachter is Eid, Jus, fas; which he derives from the Saxon Ae, Lex; and he inveighs moreover against another Etymologist, who refers it to Eid, Juramentum, by observing, "Sed " quo pacto ex Jure fiat Juramentum, nec ego intelligo, nec ipse " forsan intellexit." If the original meaning of Eid, Juramentum, is Damnum; the sense of Eid, Jus, is that of Condemnatio. see how Jus, Juris, and Juramentum, belong to each other. From Damz 20 is derived, we know, our vulgar term of swearing. term Curse is acknowledged to belong to words expressing Violence, as Ban is to Bannish. But a term which belongs, as we shall all agree, to the Gothic AITHS, Juramentum, will decide on the truth of my hypothesis. This term is the Gothic verb AIT II an, which Lye actually explains by "Eliminare, Exter-"mimare."—To Drive Our. In the same column with AITHan, we have Airtha, Terra; where we are brought to the Spot supposed in my hypothesis.

TO OUT, Ex, &c. belong, as I have before observed (p. 210,) Issue, Issir, Uscire, (Eng. Fr. Ital.) signifying Exire; and I have not failed to discover, though darkly, that they are related to High and Hoist, To Raise up. In Scotch, To Usche means "To "Issue, To go Out," as Dr. Jamieson explains it; and the succeeding

succeeding word in this writer's Dictionary is "To USHE, To "clear;" that is, 'To clear Out.' To Issir, the French seem justly to have referred their term Huis, to which Usher, originally denoting the Door-Keeper, belongs. To Huis we surely must refer Ostium, and from this we directly pass to Os, Oris, the Extremity or Outside of any thing; the part Out of which things Issue or proceed. In On-is we see the form 'R; and this brings us to Or-Ior, which I imagine to correspond with ^R-Ear, &c. where the 'R is doubled. The OR, in ORior, ORigo, ORdior, Ondo, Onder, &c. assuredly belong to each other; and here we see, how we pass into the form 'RD, as ORD-ior, ORD-o, &c., and how the race of words is generated, which I have before produced (p. 138.) In these words we see only the idea of the Base or Foundation; yet I shew, that the OR, in Orior, belongs to Oro, (Oew, Excito,) Aroo, (Aeow,) Aro, (Lat.) EAR, (Eng.) To Stir or Raise the ERA, (Epa.)*

In

I produced on a former occasion some terms in Hebrew, which appeared to be more directly connected with these words Ex, Issue, &c. and which I referred to the idea of Stability, as of objects Raised or Established on a Base, or Foundation. It is true, that the sense of Stability, as of something Set or Fixed upon a Base, is oftentimes the prevailing idea; yet that, I now imagine, is but the Secondary notion. In my former interpretation, though I frequently used the terms Raised and Erected, I did not fully understand, that my attention was to be particularly directed to the idea conveyed by these explanatory words, and that an action of Excitement supplied the fundamental notion. I shall again place under the view of the Hebrew Scholar, some of the terms, which I have before produced, with a different vein of illustration; and I must then leave him to decide on the merits of the question. Mr. Parkhurst interprets NY IZA, by "To come or go forth " or Out in almost any manner;" and ру IZK, signifies, as he explains it, "To pour, " pour Out, liquids, &c.—To pour Out, as melted metals, to fuse, found, cast, Fundere." We here see, in Fuse, Fundere, the idea of Dispersion, Agitation, &c.; but in Found, if it belongs to Fundare, we pass into the idea of the Base or Foundation. This example of Fundere and Fundare, Ex Fundo Eruere, vel Super Fundum Spargere, et in Fundo vel Super Fundum Ponere, will shew us how intimately and, in some cases, almost indissolubly, two ideas are connected, apparently most remote from each other; namely, that

• In the collection of words, denoting what is Set—Established, as on a Base or Foundation (p. 165,) I produced the Greek term Istemi,

of Agitation-Dispersion, &c., and that of Stability and Firmness, as of objects Established on a Base or Foundation.—The succeeding word, in Mr. Parkhurst, to pyr is TR, "To 46 form, fashion, shape, model to a particular form;" and they seem to belong to each other, just as Molten, Melt, belong to Mould, which, we see, directly connects itself with the Mould of the Earth. In the same opening of Mr. Parkhurst's Lexicon we have וכד, "IKD, "To burn," and יכד IKR, "To be bright;" where we see the idea of Agitation, &c .- in IKH, "To obey readily and cheerfully;" which Mr. Parkhurst refers to Eiko, Eiko, it To yield, obey," as he explains it. I shall shew, that Eiko, (Eiko,) W=EAK, &c. belong to each other, under the idea of the substance easily Agitated or Stirred about, the Soft-Yielding substance, as we express it. Let us mark the term Yield, which not only agrees with the sense of To obey, but with that of DY To pour forth, or Out, as 'To Yield fruit.' N. Bailey explains Yielding, by "Which Yields, Brings se forth, gives up, submissive, complaisant, pliant." The succeeding term to this Hebrew word is yo' IKH, "To strain, stretch, distend;" which means 'To Stretch Our;' and the next word is you IKZ, "To Awake," &c. where we have the idea of Exciting and Stirring up, &c. Another adjacent term is pur ISK, "To Lay, Set, or Spread, as a a snare or toil," as Mr. Parkhurst explains it; where I formerly thought, that the original idea was to be found in the explanatory terms "Lay, Set," but I now think, that it exists in the term Spread. In the same column with py IZK, "To pour Oit," we have Nº IZG. "To place, set or leave in a certain situation or condition;" but whether this term signifies To Spread, &c. or belongs to the Element ZG, I must leave the Hebrew Scholars to decide.

In Hebrew, אור HDH, means "To send, thrust, dart forth," which Mr. Parkhurst has justly referred to TT IDH, "To cast, cast forth, cast OUT," where we see the true This latter word means the Hand, either as denoting the member which Casts, ab-Out, &c., or the part thrust Out from the body, as Mr. Parkhurst supposes. > œes "A side, border, extremity;" as signifying the Out-side, as we express it, "I der wise "An Extensive country;" where we see from the very explanatory word of M. Phurst Ex-tensive, its original idea of a Country Stretching Out. The word means more er, according to the same writer, "A trophy or monument of victory, probably "bec see made in the shape of a large hand (the emblem of power,) erected on a "pillar"." The idea of the word is that probably of something Erected-Raised, or Stand g up or Out. The same word means "To put or hold forward or forth, either "by e voice, or some overt act, to profess, confess openly and freely, whether as an " obj t of praise or worship;" to which Mr. Parkhurst refers Udo, Ado, Acido, (Ydu, Adu, 2ano.) The Hebrew word means 'To bring forth or Out, Ex-promere, Ex-primere tyerb _____ To Ex-press or To UTTER any thing.' I have seen on a former occasion, that brew term belongs to Uut and Utter (p. 212,) yet I have not duly understood the original Istemi, (Iotapu, Colloco, Statuo,) and it is certain, that no term in many of its applications, conveys more strongly the sense of Stability. Yet I could not avoid seeing (p. 187,) that the opposite sense of Routing Out was sometimes conveyed by these terms, though I gave a different turn of explanation to this sense. Thus An-Istemi, (Anotapu,) which signifies in one of its senses "Extruo, Ædifico," means in another "Everto, subverto." In this term An=Istemi, (Anotapu,) we see most unequivocally the idea

of

original idea, with which these words are impressed.—I have perpetually observed, that the terms for Noise are derived from the idea of Stirring up a surface. The preceding term to 77 IDH, "To send forth," is 71 HGH, "To bring or carry forth or away; -To "bring forth or UTTER words, or a Voice," as Mr. Parkhurst explains it, which he has justly referred to the Greek Ago, Egeomai, Aye, "To bring, carry;" Hyropai, "To lead." In one sense it signifies "Study and intention of mind;" and when doubled 29 27. HG=IG, it denotes "Intense meditation, earnest contemplation," as in Agitare secum, in animo, &c. &c. Perhaps the Hebrew 712 IGCh, "To afflict, grieve;" and its succeeding word in Mr. Parkhurst's Lexicon, yn IGH, "To labour.—To be weary or fatigued "with labour;" express the same metaphor, Agitare, "To trouble, vex," &c. &c. I considered some Hebrew words (p. 206,) under the forms ISM, ISB, משב ישם signifying "To Place, Settle," &c.; and I have shewn, that the same sense appears under the form of ZM, (p. 209.) I must leave therefore the Hebrew Scholar to consider whether the form ISM be a compound of IS and SM, or whether the I be not an addition. The same difficulty will sometimes occur under the form ISK. In Hebrew, 70' ISD, means "To found, lay the basis or foundation," which might belong to Sisto, &c. or to Istemi, (Ιστημ,) 'Sto, &c. The succeeding term to this Hebrew word in Mr. Parkhurst's Lexicon is "D' ISD, "To smear over," which in our translation is explained by Pour. In Hebrew, DE" IST, occurs in one conjugation, signifying to "Extend, Stretch Out," as Mr. Parkhurst explains it; where in the Ex and Out, adopted in this explanation, we see the true idea. Mr. Parkhurst has recorded under TN AsH, Fire, the verb of Being, ושרו ISH, denoting Is, Est, &c. (Eng. Lat.) and we shall now understand, how they belong to each other, under the same fundamental idea of Excitement. In TAN AGR, "To Gather," we have the Greek Ageiro, (Ayrigu,) as Mr. Parkhurst supposes. In the Chaldee, NIN AChCh, signifying "To join, connect, consecrate," [which in Arabic is AChI, "To bind, fasten by binding," we perhaps have the Greek AGCHO, (AYXW,) and the English HOOK, &c. To these Eastern terms, Mr. Parkhurst refers the Hebrew TIN a Brother, &c. "a person Connected or Consociated with us." In Hebrew, ITN AChZ is "To Catch, seize, lay hold on," where it might be considered, whether the word belongs to the form 'C, &c. or CC, as in Catch, &c.

of Excitement or Stirring up, which, in my conception, is the original idea; as the ordinary Lexicographers explain it by "Surgere facio, Erigo, Excito jacentem, vel mortuum; -- Everto, "subverto; Exstruo, Ædifico; Excito, Exstimulo." This term, we know, is applied to the strongest idea of Excited action, when it signifies the Resurrection, Avacracic. We cannot help noting, how Ex is used in these explanatory terms for Ex=citement; nor can we forbear observing how Ex or E is at once applied to express Stability and Destruction, Ex-truo, E-verto. the first sense of the Greek Istemi, (Iotqui,) should not be that of "Colloco, Statuo," but that of "Erigo;" and hence we shall be brought to the use of the word in such applications, as in the passage of Sophocles, produced by the Lexicographers, Oelor ous IZTHZIN, which they justly explain by "Arrigit aures," though they have not provided for this sense in their general explanation of the We have seen, that the Persian استندن Is raden has been explained by "To Arise, Rise up, Stand," &c. &c.; and likewise, Usterden של means "To Shave, Erase." To Erase is nothing but 'To Raise, Rout, Stir up,' &c. Though the Latin 'Sro perpetually relates to Stability, yet in one sense it is justly explained by "To Stand Upright, to be Erect-Steterunt Coma;" where we perceive the more original idea. I have supposed, that the term Istemi, (Ιστημι, Colloco, Statuo.—In Aor. 2. perf. plus q perf. Sto, consisto, Unde Est;—Esse, Natum, ortum Esse,) we may perceive, how the verb of Being, Est, Is, &c. and the Pronouns or Articles of Being, Iste, Is, Hic, &c. have been suggested from the idea of what is Placed—Situated, &c. 1 have likewise had occasion frequently to observe, how these words expressing Being, are connected with terms of Excitement. We now see, that both ideas may be true; and it would be idle to discuss, in what proportions the Primary or the Secondary idea pre-Vails. In the very term Existence-Existo, "To Rise, Spring," &c.

the preposition Ex, as we now see, equally expresses the idea annexed to Est, Iste, Is, Hic; and if we adopt the kindred term Ex-Sto, we have in Ex and 'Sto, terms of the same fundamental meaning, and under the same Radical, alike belonging to these words of Being.—Whether Sisto belongs to the Element 'ST, quasi 'Sto, will be considered when the Element ST is discussed. I shew in other parts of my Work that names for Touth—Warriors, &c. belong to our Element 'C, 'D, &c. under the idea of Excitement in Motion—Action, &c., and if we explain this race of words, denoting Being, by 'Qui EXistunt vel EX-'STant, quasi 'Erecti and EXcitati,' we shall see how all these terms coincide with each other in the same fundamental idea.

I have justly seen on a former occasion (p. 455,) the connexion between words expressing Being and Moving, or Going from Place to Place; and as I then considered verbs of Being under the idea of what is Placed or Situated, I suggested, that the verbs of Motion might have originally signified "To Place," if I may so say, 'To Go from Place to Place.' This is an extremely probable idea; yet I have at the same time expressed my embarrassment on the subject, by observing that I was unable to determine "the precise idea from which these terms denoting " Motion are derived;" and I suggested (p. 475,) that they should perhaps be referred to the notion of Excitement, which I proposed fully to illustrate in the course of my Work.—I am now arrived at the point of my discussion, in which these words denoting Motion may again be examined; and I trust, that all our difficulties will vanish in this state of our Enquiry, in which the intermediate idea, connecting terms of Excitement and Position, has been so fully unfolded. Among the terms of Motion, I produced the Greek Eimi, (Euu, Eo,) Iemi, (Inui, Mitto,) Odeuo, Odos, (Οδιγω, Iter facio, Οδος, Via,) Otchomai, (Οιχομαι, Abeo,) ΕΕΚΟ, ΙΚΟ, Ikneomai, Ikano, (Hru, Venio, Iru, Venio, Accedo, Irveoucu, Venio, advenio, advenio,—Supplico, obsecto, Irana, Convenio, adeo, sequor, supplico,) and hence Iketeuo, Iketes, ("Ireteuw, Supplico," hoc est, Adeo Supplicandi causâ, ut in Irveopea, Iretus, Supplex,) the Latin It, Iter, &c.—the Saxon Eode, Ivit; the old English Yede. In this discussion I shall find it necessary to adopt the Latin Ex, and the English Out—Issue, as general terms expressing the idea of Excitement in the action of Stirring up, Out, &c. to which notion I conceive all these terms ultimately to belong, though I do not pretend to adjust the precise degree of affinity, which these explanatory terms may have to the words examined.

I have suggested, that the term Eimi, (Eim, Eo,) might be quasi Ejmi, but however that may be, we see the true form of this verb of Motion in Eis, Eisi, Ithi, Ito, &c. (Eimi, Eig, Eigi, Ibi, ITW, &c. Eo,) as in the Latin Is, IT, ITer, &c. We shall now understand, that in Ex=Eis, (Efeic, ab Efeici, Exeo,) and Ex=Is, (Lat.) 'You Issue or go Our,' the Ex, E1s, and Ex, Is, have the same meaning, just as Issue and Out have. In the terms IES, IEsi, Es, Eτο, from Iemi, (Ιημι, Ιης, Ιησι, Ες, Ετω, Mitto,) which directly signify 'To Cast or Throw Out,' we see the idea more atrongly. In the compound Ex-IAsin, (Exwan, Emittunt, ab Example, Emitto,) 'They Throw Out, or Cause to Issue Out;' it is impossible to distinguish between the senses of Ex and IAS, as it is between Issue and Out. We shall now see how the ITH, in ITHUS, (1805, Rectus, Directus,) Raised up, Upright, Straight Upright, as we express it,) Straight, Direct, &c. has the same sense as the ITH, in ITHi, (10...) The one signifies Raised up, so as to 'Issue or Stand up or Out;" and the other means 'To Issue or Go Out, ab-Out, &c., To Out, or Ab-Our, if I may so say. In Euthus, and up-Aitha, (Euduc, Rectus, Ymaida, Coram, Recta,) we have the same idea as in ITHUS, (1805.) In the verb ITHUO, (1800). Recta feror, Recta pengo; Impetu feror, Prorumpo, &c.) we have the strongest idea of Excitement, as it relates to 'What is Raised up or Routed.

* Routed up to action—what is Stirred Up or Out—what Breaks 'Out, Issues Out, forth, on, forward or Right on, Straight forward,' as we express it. It is marvellous to observe how uniformly. similar metaphorical expressions are applied in different Languages to similar purposes. In the ITH of ITHu-phallos, (Ιθυφαλλος, Penis Erectus,) we have the sense of 1st and 'St in 1st-emi, (Ιστημι); and 'Sto in such phrases as Oρθον ους ΙΣΤΗΣΙΝ Arrigit aures, 'Steterunt comæ. We now understand, that the verb of Being, Eimi, Eis, Ei, Esti, &c. (Eimi, Sum, Eig, Ei, Esti, Est,) and the verb of Motion, Eimi Eis, Ei, Eisi, (Eimi, Eisi, Eisi, Eo, Eo, Is, It,) have the same fundamental idea, just as if we should explain one, as Eis, &c. (Eig, Es,) by Existis, or Ex= Stas, and the other Eis, (Eis, Is,) by Ex=Is, and there is no other difference but that the term 'STO passes into the sense of Position or Stability, while Is, (Lat.) relates to Motion. The Ex remains faithful to the original idea in both applications. We shall now understand, why Est, he Is, and Est, he Eats, bear the same form, as they both convey the same fundamental idea. he Is, we have he Outs, or Stands Out, Ex=Stat; and in Est. he EATS, we have he Outs, he Scratches or Tears Out, or Thus we see, how the Ex and Ep, in Ex=Epit, convey the same notion. We shall now perhaps be more inclined to receive the idea, which I suggested on a former occasion, that EDO, "To "UTTER or put forth; -To set Our," &c. as R. Ainsworth explains it, is not derived from E and Do, but that it appears in its Radical form. If this should be the fact, Epo, in the senses 'To 'EAT,' and 'To put forth,' will have the same fundamental meaning; though, as in other examples, they are distinguished by some differences of sound and form from each other, in order to mark the different offices, which they perform. But if Edo, Edidi, should be derived from E and Do, the E or Ex is still employed with its true force.

This connection between the terms denoting Being, and terms expressing Motion, Excitement, &c. will open to us new modes of conceiving the same subject. So intimate is the connection between the verb of Motion and the verb of Being, that in Latin In is directly used, as Esse might have been. Thus 'Amatum 'IRI,' means "To be about to be loved," as 'Amatum Esse,' signifies "To be loved." If it had been 'Amatum Ex-Iri,' which it might have been as to the sense, we should have seen more fully in EX the fundamental idea, as it relates to what we call the Issue of an event; and we cannot help observing in the explanatory term ab-Out, how the English Out still continues to be inserted, and to preserve the same idea. In English, we express the future time by the verb of motion, 'To be Going to be mar-'ried,' &c.; and thus it is in various other Languages. Reader perhaps might now be inclined to conjecture, that possibly the termination of the Latin Infinitives, in Am, Mon, Aud ARE, ARI, ERE, ERI, IRE, IRI, are derived from the verb of Motion; though on this point there is some difficulty. In IRE, IRI, they directly coincide in form. In the ancient mode of writing, the 'R was doubled, in order, as it should seem, to express the idea more strongly, as Am-Ani-En, &c. &c. In such words as the English Come, Become, the French Devenir, and the Latin Evado -Evenio, and the Greek Αποβαινω, &c. &c. we see how the verb of Motion connects itself with the use of the verb of Being, 'Whence 'Comes it,' (Unde Est,) 'He Becomes Poor'—Est pauper,—"Faire "Devenir fou"—' Facere, ut quis insanus Evadat vel Sit.' or Facere, ut quis insanus Ex-EAT, if I might so say, -- Apio Toi avons ' AΠΟΒΑΙΝΟΥΣΙ, Optimi homines Evadunt—Aπεβη, Evenit.' We observe too, that the idea of Rising up-Springing or Issuing forth or Out, &c. is indissolubly connected with that of the verb of Being, as in Γωομαι, Orior, Sum, Υπαρχω, Initium do, Sum, Existo, ab Αρχη, Origo, Ανατελλω, Produco, Emitto, Extrudo, -Enascor, Existo.

Existo, Orior, ut Sol, &c.—Tella, Facio, Fio, Orior, Meligaques Ouros υστερων αρχαι λογων Τελλεται, which is commonly translated by "Melliti hymni posteriorum sermonum principia Sunt," &c. &c. I suppose, that these terms Est, Out, &c. are originally derived from the idea of Stirring up the Ground; and it is impossible, I think, not to mark, that such words as the Greek Tello, (Τελλω,) and the Latin Tollo, &c. belong to the action of Tilling the Tellus or Ground. In one Greek word we have at once the sense of the Verb of Being, and of Stirring up, as Pelo, Pelomai, Medu, vel Πελομαι, Sum, Verto; and no one, I think, can doubt, that Pelo belongs to Poleo, (Πολεω, Verto, Aro,) To Plough. I have before represented the original idea, annexed to Is, IsTE, &c. by a participle form Is-ens, IsTE-ens, in order to compare them with Exist-ens (p. 278,) or, as I may now represent it, Ex=Sist-ens, Ex= ^ST-ans, or Ex= ^T-ans, where the Ex and ^ST, or ^T in ^STo, alike express the primitive force of Is and ISTE. We shall now understand in this state of the discussion, that Ex=IT-ens, if I may be permitted so to say, might have been equally employed, in which Ex and IT would still have expressed the primitive force of Is and Iste, In other words, Is, ISTE, (Lat.) IT, (Eng.) &c. &c. mean nothing but the 'Our or Oured object—the ITUM, Ex-ITUM, the 'Gone forth or Out object,' if I may so say, the 'Issued Out object,' or the 'Raised, Standing Out object,' &c. &c. As I before confined my attention to the connection of the Demonstrative part of Speech, as connected with Position, (p. 454,) I shall only here consider the relation of these words, as connected with Motion. Let us mark the terms Eo, "Thither or to that place," and Adeo, where in Eo, we can hardly distinguish between the Verb Eo, and the Demonstrative Pronoun Eo; and in Adeo, we seem to confound the Verb Adeo with the compound Ad and Eo. AD-Eo brings us to ID=Eo, which will unequivocally shew us, that AD and ID belong to each other. In ID=Eo, the ID at once directs

directs us to the Demonstrative ID, and yet AD leads us to terms of Motion, "ITHE AD locum;" where the IT and the AD present themselves as kindred terms, as in the compound AD=IT. In the Us of Usque we have the same idea as in AD. In Huc we seem to confound the sense of Motion to a place with that of a Demonstrative term; and in the compound AD=Huc, we again perceive their union. We have seen, that the Oos and Eoos, $(\Omega_6$, Ad, Euc, Ad,) belong to AD, E1s, (E1c, Ad,) and we shall now understand, why under the same form as Eoos, (Eus, Usquedum, Quo-Ad,) we have Eoos, (Ews, Aurora, Oriens,) which means nothing but the spot where the Sun 'Rises up or Out, Comes Out.' Surely the English East and its parallels must be referred to **Eoos**, $(E\omega_s)$; and the w=Est is only another form of the word with some slight difference, in order to mark the opposite state of the same object or idea. This artifice in Language is that, on which its chief operations are founded, and which all acknowledge in the example of verbs, as Loving, Loved, &c. &c. I have before observed (p. 445,) that the Greek Eks, and Eis, (Ef, Eig,) should only be considered as different forms of each other; and we shall now fully understand the connection between those relations of From and To, which these words express, when we remember, that Ex-ITus, Going From, actually means the "Issue or end of a "business," according to the very words of Robert Ainsworth, or the point 'To which things tend.' Thus, then, Eks and Els, (E. Eis,) alike relate to the idea expressed by Issue, the Beginning and the End, the From and the To. In the term Event, &c. &c. from Evenio, we have the same union of ideas. We observe how To, under the form T[^], which I have shewn to belong to the Demonstrative The, retains the same idea of motion. I have referred EK=As to EK=Ast-os, (Εκας, Procul, Eminus, Εκαστος, Singulus,) and as Ex=AsT signifies Is-IT-the Out, Distinguished object,

so Ek=As means Out—Out, Away, Away. I have shewn, that in Saxon, Oth means Usque, but it means likewise Out, as Oth-Byrstan, Erumpere, To Burst Out, (p. 448.)

We see, how these words signifying To, as AD, Us-que, coincide with the sense of the English Till, under the Element TL, on which I have before expressed my doubts. I cannot help however observing in this place, that Till, in Scotch, signifies not only To, but From, though "improperly," as Dr. Jamieson observes. In the eye of an Etymologist, all the senses of a word are equally proper. We cannot but observe, that Till, To, coincides in form with Till, 'To Stir up the Ground;' and if it signifies From, in its original sense, we perceive how it corresponds with the different meanings of Eks and Eis, &c. (Ef, Eig.) and for Till differs nothing in its fundamental sense from what reason. Telos, (Τελος, Finis, Exitus, Εις τελος, Denique, Ad extremum,) 'The End, To the End.' In the ordinary arrangements of the Lexicographer, Telos and Tello, (Telos, Finis, Exitus, Tello, Facio, Fio, Orior,) are considered as separate Roots, without any relation to each other. We shall now however understand, that they belong to each other, as Exitus does to Exeo. We shall see moreover, that Till, (Eng. Scotch,) signifying To, and Telos, (Teλos, Exitus,) may belong to Tello, and Ana-Tole, (Τελλω, Orior, Avaroun, Oriens,) just as Eis and Eoos, (Eis, Eus, Ad,) according to my hypothesis, belong to Eoos, (Eug, Oriens.) The Scotch Critics will now perceive, that Till, the Verb, may signify "To entice," and yet belong to Till, the Preposition. Dr. Jamieson explains Teal or Till, by "To entice, to wheedle, to inveigle by flattery; " generally, To Teal on, or Teal up." In Teal up, we see the true idea of Raising-Stirring up or Exciting to any purpose, &c. In the phrase "Thou'lt Till my bride away," we have nearly the sense of the Latin Tollo. Robert Ainsworth gives us among the senses senses of Solicito, "To Entice one to do a thing," a term, as we know, originally signifying "To Stir or dig up, properly the "Ground."

There is an Hebrew term which will unequivocally explain to us the hypothesis, which I am now endeavouring to illustrate, respecting the origin of words of Being, &c. &c. This term is ארות ATH, which signifies in the first sense, according to Mr. Parkhurst, "To come, come to, come near, approach, come speedily." In this sense, we see the idea, which we might express by the kindred Latin words, in the compound, AD=IT, or by the kindred English word AT—'He ATS,' if this term had been a verb. The same word אתה or אתה, AT or ATH, means Thou, and AT אתה means The, where we have 'The Is, (Lat.) IT, (Eng.) The Outed forth object—the ITus, if I may so say. But את or את AT or ATT, signifies "A sign, token—Ensign," &c., that is the ID, (Lat.) It, (Eng.) 'The remarkable Out object—the Ex-Itum— 'AT which the attention is fixed'—Again AT signifies, as a Particle, "With, To, Toward," מאת M-AT, "From with, From "the, French D'Avec," where we see the sense of AD, (Lat.) AT, (Eng.) But there is still another meaning of this Hebrew word, where we are brought to the very spot supposed in my hypothesis. As a Noun, AT, denotes "A Coulter," because, as Mr. Parkhurst supposes, it "comes before the ploughshare in ploughing." The Hebrew AT, the Coulter, means probably that which 'Routs up or Out the Ground.' The senses of the parallel term in Arabic will serve to illustrate this train of ideas. The Arabic ETI means "Coming, arrival, bringing, leading, coming "unawares, surprising;" and it denotes likewise "Being, Ex-"isting;" but in another sense, which I conceive to be the original one, it signifies "Abolishing, Ruining, Erasing, Des-"troying," as Mr. Richardson explains it; that is, Routing or Rooting Out. In the preceding column of Mr. Richardson's Dictionary

Dictionary we have JETOU, "I. Coming, coming suddenly, "surprising. a. Producing, bringing forth copiously, shooting "forth buds, producing fruit, bringing forth young;" where we have the genuine sense of Issuing Out. In two other senses of this word we have "The right way, straight path.—Any thing "Erect, upright in walking," where we see the sense of ITHUS, (1806, Rectus,) &c. &c.

I shall not pursue to a greater length my observations on the origin of the terms of Being, and of the Particles, with which they are connected. All my former discussions in the third Section of the second Chapter remain precisely as they were, respecting the relation of this great race of words to each other, except that in considering their original idea, another mode of conceiving them has been applied. When we again examine that race of words with this clue before us, we shall be enabled to trace relations, which might otherwise appear strange or remote. We shall perceive, that the terms of Being are surrounded on all sides, and are perpetually accompanied by terms of Excitament; though they are manifestly attached likewise, on various occasions, to terms, which denote Place or Position, as of things Fixed or rather Raised upon a Base or Foundation. We have seen how these ideas, apparently so remote, are reconciled with each other; and how the various parts of Language become uniform and consistent. I have now unfolded, as I conceive, every thing which relates to this subtle enquiry, with all the precision, which the nature of the question will admit; and I have proceeded, according to my view of the subject, as far as it is possible to advange in the discovery and detail of those direct and unequivocal facts, which fall within the sphere of our knowledge. There is in this enquiry, as in all other researches, a certain point, at which darkness com nences; when all our attempts to investigate and explain become obscure—doubtful and theoretical. We are now arrived

at this point, and at every step which we proceed beyond this limit, we shall find ourselves involved in the clouds of mystery and theory.

I have observed on former occasions, that the Interjections expressing Excitement or emotions of the mind, which are supposed to be removed from the sphere of Language, evidently attach themselves to the familiar terms of Excitement, and likewise to terms denoting Being-or Demonstrative of persons, things, &c. Thus Heus! EJA! AT, (Lat.) "But.—In distinguishing.—Threat-"ening. — Admiring, Dispraising, objecting and answering."— AT=AT, (Lat.) "An interjection of surprise.—Hoida.—How now,". &c. &c. ATT=ATai, ATT=ATai=Ax, Or-Oroi, (ATTATAI, ATTATAIAE, Οτοτοι,) &c. &c. &c. are to be referred to terms, which performs efficient offices in other parts of the Language (p. 452.) It is impossible not to see in the combination EJA-AGE, that these words are only different forms of each other; and in examining these Greek words in our Vocabularies of that Language, we cannot but see, that the adjacent terms ATTO, and ATUZO, (ATTW., Prosilio, ATUZO, Terreo,—Perturbo,) present to us the same idea of Excitement in the Radical At. Perhaps in AT=Uzo, the Element is doubled. as in AT=AT, &c. in order to express the idea more strongly. examining these words, our eye is again drawn to terms under the same form ATTA, (ATTA, pro ATWA, Aliqua, quædam,) ATTA, (Arra, Vox, quâ juniores Senes compellant, sodes, amabo, Pater. Lat. Atta, Senes.) Surely we shall be of opinion, after the observations already made, that the AT in all these words conveys the same fundamental idea of Excitement, whatever may be the precise notion, by which they are connected.

But the term ATTA, (ATTA,) denoting the Old Man, is attached to a great race of words, which are to be found through the whole compass of Language, as the appropriate and familiar name for Father, as Atta, Atey, Attata, Ottse, Tat, Dad, Tot,

• Tetta.

Tetta, (Terra,) &c. &c. &c. collected in a former page (486.) all our difficulties commence, and Theory alone prevails. It is impossible, I think, to doubt, that these terms belong to the words denoting Being, Is, ISTE, &c. which are likewise to be found through the whole compass of Language, and which, as I have now shewn, are perpetually connected with terms of Excitement, some of which are applied, as we have seen, to the action of Stirring up the Ground. Yet the Theorists on Language inform us, and not without some reason, that these words for Father are derived from the infantine sounds AT, ATTA, TA, TA, DA, DA, &c. (see page 479.) On this point of Theory I am not only unable to decide, but even to conjecture. The Reader is in possession of all the evidence, from which he can form any opinion on the subject; and he must interpose his own judgment on the facts before him. I may safely affirm, that all the Radical words, with which these terms for Father can be connected, have passed not only under the eye, but under the discussion of the Reader. We have seen how they appear to form one continued chain, as ultimately connected with each other. We have seen too, how the form ^C, ^D, &c. is attached to those of ^RC, RC, &c. ^R; and it is not pretended, that in the production of these forms, any such infantine sounds were efficient. I cannot leave this subject without adding another fact to those already recorded, respecting the relation of terms of Being to terms of Excitement. I observed in a former page, that in the same column of Mr. Shaw's Dictionary, where Athair, a Father, is recorded, was found likewise the verb of Being, ATA, Is; and I now add, that in the same column are the following terms of Excitement, ATHAR, The Air. sky; ATHA, A Blast of Wind; ATHach, Waves; - ATHach. A Giant; AT, Swelling; ATHain, A firebrand; ATach, Fermentation; Atachanam, To prate, &c. The At in the sense of Prating might furnish our Theorists with a conjecture, that this

sense of Excitement, Agitation, &c. was attached to the Element ^T, &c. from the Idle—Agitated—Babble, or AT-ing of Infants, if I may so say, just as Babble, Bubble, Hub-Bub, Puff-Pop-Bob, &c. &c. &c. may be supposed to belong to Bab—Pap— Papa, &c.—I must again repeat, that on these points of Theory I am unable even to form a conjecture, as it is placed beyond the limits of research and discussion. All which concerns the Theory of Human Speech, as I have before observed (p. 485,) may be exhausted within the compass of a few sentences or pages. The Theory of Language leads us to the discovery of no affinities in the actual relation of one word to another; nor have the writers on this subject, with all their pretensions to unfold at once the whole scheme of Human Speech, supplied us from this source, I might almost say, with a single Etymological fact, which has not been universally understood and acknowledged by the most ordinary and superficial observers.

The terms, which I produced in a former page (195,) denoting Youth-Warriors, &c. &c. I now refer to the idea of Excitement, as expressing the Vigorous-Active powers of such personages. Among these terms we may class Assueter, Assuetes, (Auruntup), Adolescens valde robustus; -- decens, moderatus; -- Pastor; -- Qui facile huc illucve movetur, Awayrys, Idem,) which some have justly referred to Aisso, (Aisso, Ruo,) Aizeos, (Aignos, Juvenis, qui robore juvenili viget,) Ειτμεος, (Ηιθεος, Adolescens,) Αίτες, (Αιτης, Socius, qui amatur libidinose,) Aupax, Ausim, with their parallels before produced, Oser, Osar, &c. (Span. and Ital.) Auso, (Ausa,) from which Suidas derives Ausones, (Αυσονές, οι βασιλεις, παρα το Αυσω το τολμω, οι παντα επιτολμωντες τω προσταγματι,) Aj-Ax, Ai, quasi Aj=As, (AIRS,) AIETON, (AINTON,) ITES, (ITHS, Temerarius, Audax,) Itamos, (Ιταμος, Temerarius,) Aιτhaloeis, (Αιθαλοεις, Ardens,) which unequivocally belongs to AITHO (Aιθω, Uro,) AIDulos, (Αιδυλος,) AIDelos, (Aidylos, Tenebricosus; — E conspectu tollens, Extialis,) which in

its sense of Exitialis, belongs to the race of words before us; but in that of Tenebricosus to A and Δηλος; &c. &c. The DL, TL, in these terms, seem to have the same meaning, as the Thal in Atasthalos, (Ατασθαλος, Magnorum damnorum auctor,) which plainly belongs to Ate, (Ath,) and the remainder is either Asthalos a compound of As and Thal, or it is simply Thalos. The TL, DL, belong to Tellus, and To Till—To Stir up the Ground, for the same reason; and hence we have the terms of violence, Deeleo, (Δηλίω, Lædo,) Deleo, &c. Perhaps Es=Thlos, (Εσθλος, Bonus;—Probus;—Frugi, Utilis, Strenuus, Fortis,) may be likewise a similar compound. The At=Ys means probably the Youth. In Saxon, Hyssa denotes, as Lye explains it, "Hirquitallus, puer pubescens, juve-"nis;" and in the same column we have Hyse, or Hise, Mas, Masculus; Hys, His, the Pronoun of Being.

I cannot forbear producing various terms, with which these Saxon words are surrounded, which convey the train of ideas, now under discussion. We see Hysian, "To Hiss, Irridere, sub-"sannare;" and Hyspan, or Hispan, "Irridere, subsannare, ex-"probare;" Hiscan, Reprobare; Hysr, Turbo; Grassari, vastare, and Hyrwian, Exprobrare, injuria, afficere; to which Lye refers the term Harrow. The preceding word to Hyrwian is Hyrwe, Torriculum, facula; though Lye adds, "At "dubitat Somnerus annon idem sit cum Hyspe," Fornaculum. "Quærendum interea, utrum non sit Occa, Ang. An Harrow." In the same column we have HYRTHling, "Colonus, Agricola," &c.; Hyrtan, Refocillare, animare," &c., where we are brought directly to the EARTH, and likewise to the idea of Excitement. We see how HYRTan appears to connect itself with HEARTen. We have likewise in the same column Hyrstan, Murmurare; which means to EARTH, or to Grate upon the EARTH, and HYRSTing, Frixio, from the noise in Frying; and HYRT, HURT, "Læsus, vulneratus;" where we have an action of Violence. Another Another form of the Saxon Hyst is Yst, which Lye explains by "Procella, Turbo, Tempestas;" and in one sense by "Æstus "maris." We now perceive, that the Latin Æstus belongs to the Saxon Yst. I see in the opening of Lye's Dictionary, where this Saxon word is found, Yth, Unda, fluctus, which belongs to the same idea.

The Greek Aites, (Aitys,) denoting the o equipmos, is a Thessalian word, and is the title of an Idyllium in Theocritus. There is a Persian word, which perhaps may belong to it. Mr. Richardson explains عين Hiz, by "1. An iron shovel. 2. A utensil used in " baths. 3. Puer scortum." In the opening of Mr. Richardson's Dictionary, where this word occurs, there are various terms, which belong to the train of ideas under discussion, as the Persian Heij, which signifies "Tearing up,-Instigation;" and the succeeding word under the same form, which means "Raising (dust); " provoking (to anger.)—Making an attack.—A battle, a combat.— " Perturbation, fury, agitation, intoxication.—Hij, used in crying "to camels." The word dum Heit, signifies "Low Ground;" and "Heita, &c. Come hither, Come hither! Approach," before produced; and فيط Heit, " Calling out, crying, vociferating, being "tumultuous, Arriving at, Approaching." This will remind us of our term Heit, used by Carters to their horses, of the French term HurHuat, as it appears in the well-known proverb, "Il " n' entend ni A dia ni A Hur HUAT," and of the German HOTTE, "A cartman's crying to make his horses turn to the right hand," before produced. We shall be reminded likewise of the Interjections belonging to our Element, HEUS, &c. which I have before referred to the idea of Excitement. Junius produces HEIT in this sense, and reminds us of a passage in Chaucer, where the term is thus used, "HEIT Scot, HEIT Brok." It is not necessary to increase the collection of this species of words, which are every where to be found.

I have justly seen on a former occasion (p. 257,) the relation of Augeo and its derivatives, Auctor, &c. the Greek Aeko, Auxo; (Aεξω, Αυξω, Augeo, accumulo, proveho, promoveo,) to Ex, as in the phrase, 'Quod Auget alius Ex se;' and that these words are connected with the idea of the Origin, Source-Foundation, Base, &c. I have produced a passage from Shakspeare, in which Grounds and Authors are used in the same sense, where we are brought to the spot supposed in my hypothesis. All this is just, and is sufficient perhaps for every purpose of Etymological accuracy. Yet I imagine, that this word Augeo, &c. must be classed with Ex, &c. among the terms of Excitement now under discussion; and that the precise idea annexed to this word is that of something, ' quod Ex-surgit'-or of something, 'Which is Raised up, as from 'a Source or Origin, what is Elevated-Advanced or Highed up,' if I may so express it. The English Raise, we know, is applied in the same manner, as 'To Raise the price—Raise one's reputation, 'Augere pretium, famam, To High-Higher or Heighten, the 'price, reputation,' if I may so say. In the phrase produced by my Lexicographer under Aexo, (Asto,) we find a word adopted in his translation, belonging to this metaphor, Adahor AEEEI, Ex-Tollit. Robert Ainsworth explains Auctus by "Increased, Heightened," &c.; and the explanatory term, which I have adopted, Exurgo or Ex-surgo, he explains in the first sense by "To Rise up," and in another sense by "To Increase." It would be idle to accumulate instances, which illustrate the union of these ideas; as it is most evident and acknowledged. I have supposed, that Auguro belongs to the notion of Routing into any thing; and thus we see, how the Aus in these words conveys the same fundamental idea, and how it agrees with the sense of Ac in Aco, Acito. I perceive, that R. Ainsworth explains Auctor in the first sense by "Properly an " Increaser or enlarger.—A Father, founder, or principal person."— " Primus Pater urbis et Auctor;" the person, from whom the city took took its Rise; by whom it was first Raised or Erected. I shall shew, that Raise, Rise, Erect, belong to Rout,—'To Rout up;' and such I conceive to be the relation, which Augeo bears to Ago, Occo, &c. On a former occasion (p. 258,) I precisely described the sense of Augeo, as I now conceive it, in the following words, "To Raise up—Promote or Advance any thing, as "Proceeding from its source or origin. Hence to Raise—Ad-"vance—Promote—Add to—Increase in general."

To Augeo we must surely refer the old English word EKE, 'To Eke out any thing,' and its parallel terms, produced by the Etymologists, as Eacan, &c. (Sax.) Aukan, Oge, &c., to which Junius refers the Danish Auger, the Belgic Oecker or Woecker, the German Wucher, as it is now written, the Saxon Oker or Woker, the Welsh Occr, denoting Usury. The German Wucher, Usury, and Wuchs, "the Product, Grows," are derived from the verb "Wachsen, To Wax, grow, burnish, increase," in which explanation we must note the English Wax. Here we are brought to the form of WC, which will be more particularly considered on another occasion, when we examine the Element BC. We cannot but note the explanatory word Burnish, To increase, and observe its connection with Burnish. To polish, and Burn, in which words we do not only see the sense of Increase annexed to the idea of Excitement, but we perceive likewise, that the idea of Excitement is associated with the action of Scratching upon a Surface. The verb 'To Exe' supplies us with the particle Exe, Etiam, and its parallel terms Auch, (Germ. &c.), and yet these particles seem to belong to Ac, (Lat.) &c. as I have before suggested (p. 450.) We shall now understand, how these words may all belong to each other; as I have shown, that the terms of Being, and the particles belonging to them, are attached to words of Excitement. In Welsh, Occa, as we have seen, means Usury; and the preceding term in Mr. Richardson's Dictionary is Oc, Over against .- Also, of, or

out of. The adjacent words are Och, O! Alas! Och, A Groan, Ochain, and Ochi, "To groan bemoan, sigh;" which belong to Achos, (Axos,) as the Welsh Lexicographers justly suppose; and we have likewise Ochr, "A side, the Edged rim of a thing." Ochri, "To make a sharp rim or Edge," which belong, we see, to Edge, Acuo, &c. In the next leaf of Mr. Richards' Dictionary to that, in which the above words occur, we have Og, A Harrow. Let us mark the term Usury, which belongs, we know, to Utor, Usus, in the ancient Language, Oltor, Olsus, To Use, &c. sense of Use, Practice, Employ, &c. is derived from the same idea of Stirring up or about, &c. &c. The term Utor corresponds in one of its turns of meaning with Versare or Versari, and Exerceo, which, we know, signify to Stir up the Ground. R. Ainsworth explains UTor in one sense by "To be Conversant, and Usus by "Use, Exercise, Practice." He explains Exerceo by "To Use, to " practice," &c. In old English, Ure means the same as UsE. and they seem to belong to each other. In Scotch, Ure means " Practice, toil," in one sense, and "Soil" in another, as Dr. Jamieson explains it.

In the same page of Lye's Saxon Dictionary, where Aukan, Augere, is, we have Auhjon, Turbare, Turbari; and Auhjodus, Seditio, Tumultus; where the idea of Excitement or Commotion is directly expressed. An adjacent word to Eacan, To Eke, Augere, is Eacnian, Concipere, Parturire; which, we see, is derived from the sense of Increasing, as connected with the idea of 'Bringing Out,'&c. We perceive, that the first n in Eacn-ian is an organical addition to the C. Perhaps the English Yean and the Saxon Eanian, may be derived from Eacnian, by the loss of the C. The next word to Ecan, To Eke, Augere, in Lye, is Ece, Æternus; and if they directly belong to each other, the sense of Eternal might be derived from the idea of that, which is Increasing—Advancing, or still Proceeding forward, what is Eked Out, as we say.

In Scotch, High is a verb; and hence they have "To Hight, "Hight, Height," which means, says Dr. Jamieson, "To Raise "Higher, To Heighten.—Thus provisions are said to be "Higher, when the price is Raised;" and he justly refers us to the Saxon Hihtan, which he explains by Augere. An adjacent word in Lye's Dictionary to the Saxon Hihtan, Augere, is Hihth, Height, Altitudo. In Hight we see directly the sense of Augeo, Auxi, &c. Again, in Scotch, we have Heis, Heeze, Heys, Heisie, "The act of lifting up,—Aid, furtherance,"—Heys and How, "A Sea cheer." The preceding terms to these are Hek for Hack, corresponding with our English word Hack, and Hekkil, a Hackling, where we are brought, according to my hypothesis, to the original idea of Stirring up a Surface.

We can but note the explanatory word Aid, and remember the parallel term Ease; and we may then ask, whether these words likewise should not be referred to the same idea of 'Raising' 'up, Stirring up or off, so as to remove incumbrances.' I have given a different notion respecting the original turn of meaning, annexed to these words, which is extremely probable; yet I must again and again repeat, that I perceive the sense of Excitement more prevalent, as I advance in the consideration of Language. We talk of 'Easing a person of his burden;' and, I think, we perceive, that the general idea of the term is that of 'Lifting up or off-'Taking off or away any incumbrance;' or in other words, that it coincides with the idea annexed to the Latin Levo, "To lift or "hold up-To Ease one of a thing, to lighten, to disburden, to " Alleviate, to deliver, or rid, out of," as R. Ainsworth explains it. The term is applied to Relief from a burden when we talk of an EASEment, "A Privy, or house of office," says N. Bailey, and 'A House of Ease;' and in the Law term Easement; which the same authentic Lexicographer explains by "A service, which one "neighbour has of another, as a way through his Ground, " a Sink,"

"a Sink," &c. In the sense of a Privy and Sink, we seem to perceive the idea of something which is to 'Carry off or Take off 'the burden of Dirt-Filth,' where we come still nearer to the original meaning of the word. In a former page (234,) I produced two quotations for the word Ease, which brought us to the Spot, from whence it was derived; and it is curious to observe, how words attach themselves to their original source. The Saxon Eath, Facilis, seems to revert to the same spot, when in the compound EATHmed or EATHmod, it signifies "Humilis," to which our name Edmede belongs. The Med signifies Mood. I shall shew, that the explanatory term Rid belongs to Rout for the same reason; and that the genuine idea of the word appears, when we talk of 'Ridding away Rubbish.' The Latin Ocior, Ocium, or Otior, Otium, &c., the French Aise, &c. belong to Ease; and perhaps the Reader will be more inclined to my idea, when he remembers, that this origin gives us the same fundamental sense to the same form Oc in Ocior, &c. and Occo.

I have justly, as I imagine, on a former occasion (p. 232,) collected the words denoting Ease, &c. which belong to each other; from whence it will appear, that the original idea is not manifest in the ordinary use of this race of words, but that they commonly relate to the sense of Quiet and Repose, as in a certain fixed Spot or Base. Still however I think, that the primitive notion is that of *Excitement*, whatever may be the precise process, by which the secondary sense exists; though perhaps some of the words, attached to this race, may be considered as derived wholly from that secondary sense. I must leave however the adepts in each Language to arrange the peculiar mode, by which one sense has passed into another. I have before observed (p. 235,) that the Persian term for Quiet, Asa " Pacifying, Soothing," is adjacent to the Arabic اس Uss, "A Foundation, basis;" yet the same Arabic term has the sense of Excitement when we Ess, as Mr.

Mr. Richardson then represents it, means "Driving or checking "sheep by crying Is, Is;" and a term, under the same form in a preceding article, is the Arabic "اسرا As, (or Is,) A word used " in Driving of Sheep. Us, A sound which frightens and renders "Serpents submissive." In the article before this we have still a word under the same form, the Persian (M) As, which means, among other things, "Hairy, bearded (like ears of corn.) Pointed "(like fish bones);" where we have the idea of what is Acute, or has a sharp point or EDGE, &c.; and likewise "Us, a blow, "slap, box on the ear," where we have the strong sense of Excitement or Violent action. The preceding article is the Persian Azine, which means "1. A Hammer, mallet or beetle of 2. A small file. 3. A beating, stamping, pulsa-" wood or iron. "tion, pulse." Here we are brought to the sense and form of the Greek Axine, (Agon.) In the preceding column of Mr. Richardson's Dictionary we find ازيوه Azire, " A mattock, beetle, smith's "hammer," and the Arabic Az=Iz, "A thundering, crashing, "creaking, rumbling, harsh or dreadful noise;" where we see, as I imagine, the genuine sense of the Element, as denoting Excitement of action, &c., and we find too, that it is here doubled, in order to express this idea of Excitement more strongly. the terms denoting what is Laid Quiet-Composed, &c. I have produced the Greek Isos, Isoo, (1005, Æqualis, 100w, Æquo,) relating to what is Plane, Level, Smooth, &c. which I conceive to be taken as the Latin Æqui and Æquo are, from the idea of an action of Violence, in Levelling the surface of the Ground, by 'Throwing or 'Casting down-off-away, any incumbrance from its surface, &c. We see, that the term Level, which is derived from the idea of Stirring or Raising up, 'à Levando,' though it denotes in one sense what is Smooth—Calm in opposition to a state of Excitement and Violence, as "A Man of a Level temper," expresses under another sense the strongest idea of formidable Violence, 'To ' Level

Level all before it—The Levelling Principle,'&c. &c., as I have before observed. I have produced in a former page (228,) various words, which in their ordinary use relate simply to the idea of the Base, as the Bottom and the Top, as Ach, (Welsh,) a Stem; Ac, (Gal.) A Son; Uios, (Tios, Filius,) Uas, (Gal.) Upon, &c.; and I must leave the Celtic Scholars to adjust, whether the original idea annexed to some of these words, was not that of Rising up, as from a Base. I must leave them likewise to decide, if such should be the primary idea of some words belonging to this class, whether other terms were not solely derived from the secondary notion. The secondary notion, existing in such words by this process, may then be considered as their original and genuine idea.

These however are minute points of dicussion, which on many occasions we shall never be able to arrange with accuracy and precision. We must be contented therefore to contract our enquiries within those limits, in which intelligible facts may be discovered and detailed. We shall oftentimes be enabled to trace and to ascertain, with sufficient clearness and fidelity, the general affinity existing in a race of words; though all our diligence and acuteness might be in vain exhausted, if we should attempt to adjust and describe those peculiar relations, by which the various terms of this kindred series are connected with each other. The Etymologist, as well as the Philosopher, will sometimes best perform his duty, when he stops short in the career of his research; and bounds his enquiries within that sphere, which is destined for the exercise of Human knowledge in the discovery of truth.

Terms denoting Fire—Air and Water, derived from the idea of Excitement—Agitation, &c.

Terms for Fire and Air.

Æstus. (Lat.) Any species of Agitation, Commotion, &c., Heat, the swelling of the waves of the Sea, &c.

HEAT, HOT, HEISS, AITHO, &c. (Eng. Germ. Gr.)
IGNIS, AGNEE, OGEIN, &c. ESH, YOG, ATISH, &c. &c. (Lat. Hindoo, Sclavon. Heb. Gips.

Pers. &c.) Fire.

AITHER—ÆTHER, ATHAR, &c. (Gr. Lat. Irish, &c.) Air. Atmos, Atmosphere, &c. (Gr. Eng. &c.) Air, Wind.

WE may well imagine, that the words denoting the Elements of Fire—Air and Water, would be derived from the idea of Agitation and Commotion; and such, I conceive, is the origin of the terms which belong to our Radical ^C, denoting these Elements. We have seen the terms HEAT and HOT, with their parallel words Hete, Hæste, &c. (Sax.) Heiss, (Germ.) Hitte, (Belg.) Aitho, (Aιθω,) &c. &c., which are produced by the Etymologists. The Latin Æstus supplies us with the senses of Fire and Water, as connected with Agitation, and likewise with the metaphorical application of these ideas. The term Æstus is explained by R. Ainsworth in the following manner; "Properly, Any burning, " scorching HEAT; Hot weather; the Hot steam of an oven or "furnace; the burning of a fever. (2.) Any boisterous mo-"tion, as the boiling of the Sea, when it ebbs and flows, or "rises in surges and waves; the tide or eddy; a torrent or The metaphorical signification is taken sometimes " stream. 5 P " from.

"from the former; as Ulceris Æstus. Cic. An inflammation: "Sometimes from the latter; as Explica ÆSTUM meum, i. e. "fluctuationem, my doubt. Plin. Met. Any distemper of the " mind, and the sway of unruly passions; as (3.) Anger, "(4.) Love, (5.) Ambition." I have produced the whole of this explanation, that the Reader may be thoroughly aware to what a variety of purposes the idea of Agitation may be applied; and that he may not wonder to see a Race of words, impregnated with these various notions, when he finds them all comprehended under the same term.—Among the words relating to Fire, which belong to our Radical ^C, &c., we have to reckon the following: Esh. (Heb.) אשתא Eshta, (Chald.) the Latin Ignis, the Sclavonic OGEIN, the Croatian OGAYN, the Dalmatian OGANY, the Polish OGIEN, the Bohemian OHEN, the Lusatian Wogen, the Turkish OTH, the Irish IDH, the Gipsey Yog, the Hindoo AGNEE, the Persian Azer, اتش and اذر ATISH, or AUTASH, &c. &c. &c.

Lhuyd has collected the terms from the Sclavonic Ogein, to the Irish Idh, under Ignis, in his Appendix. In the terms which have the n after the G, as in Ignis, we perceive an organic addition of the n to the G, which we have had perpetual occasion to observe, and of which we have seen a variety of examples in a great race of words, under the form 'NG, or 'GG, though in these cases the organical n precedes the 'G, 'C, &c., as Ассно, or Ancho, (Ayxa, Strangulo, Ayxaua, Angor,) &c. &c. In Agchone. Anchone, (Ayxorn, Suffocatio,) we have the organical n both before and after the C, &c. I have shewn, that from hence have arisen the Persian Eng=Iz, انكية "Exciting.—A Coal;" انكيث ENK = Isht, "A Coal;" Eng=Usht, "A Finger," i. e. the Scratcher, where we have both forms 'NG, and 'Z,-Autash, Eng-Iz. Kindling Fire.—Fuel, Coal, &c.—the Scotch Ingle, Fire, and the Greek Anthr=Ax, (Avbeat, Carbo,) where we have likewise both forms 'NT and 'X. The Latin Ignis has been derived from

sense.

from Ingenis, "quia ex eo nihil Genitur, hoc est, Gignitur,"-from Nascor and Aurens, "quia perpetuo generatur alius ex alio." Some however have referred us to the Greek Auge, (Auya,) as a parallel term, which is a very probable conjecture; though I have supposed on a former occasion, that Auge, (Augg,) belongs to the Eye, Eage, (Sax.) &c. under somewhat of a different turn of meaning, though with the same fundamental idea. Martinius reminds us, under Ionis, of the Greek Ionue, (Iyvva, Juzy,) the Mind, Soul, &c., which is derived from the same notion of Excitement, as I have already shewn, with respect to the Saxon Hige, Mens. I have before produced the Tuscan terms ARSE VERSE, Averte Ignem; where we have two words brought together, which convey fundamentally the same idea. The term v=ERSE denotes Fire, and ARSE, Averte; where in ARSE we have the simpler form of v=Erro, which I have shewn to be derived from the idea of EARTHING, or Stirring up the EARTH. In Norfolk, &c. EARTHING means Ploughing.

In the Greek Aitho, and Aithusso, (Aibw, Uro, Accendo, Fulgeo, Aibusow, Splendeo, Suscito, Moveo, Quatio, Jacio, Extendo, Prerumpo,) we see directly the idea of Excitement—Agitation, &c. In the same page of my Greek Vocabulary I find terms relating to the Air—Breath, which I imagine to be originally taken from the same idea, though the gentler state of the Air is sometimes expressed by these terms, as Aitho, (Aibw, Respiro, Expiro,) Aithra, (Aibew, Aeris Serenitas, Suda tempestas,) Aither, (Aibne,) to which, we know, belongs the Latin Æther, with the derivatives in modern Languages, Ether, Ethereal, &c. In Athreo, (Abew, Conturbo tempestate, procellâ,) we see the idea of Agitation more fully. In the preceding leaf of my Vocabulary, I find a word under the same form, Athreo, (Abew, Video, cerno, intueor,) which is derived from the idea of Stirring up—or Routing into any thing, as Dirt, just as Scrutor, belonging to Scruta, conveys the same

sense. The term Athroos, (Algoos, Confertus,) seems to belong to ATHREO, (Alpoos,) under the idea of what is Stirred up or together, in a heap. In these words, under the form 'TR, a difficulty occurs, whether they may not be attached to the Element TR. If they should, the vowel breathing preceding the first consonant may be organical or intensive, or the Elementary form may be a compound of the 'T and TR. All the terms under the form 'TR, above produced, seem related to each other; and surely the AITH in AITHer, (Aibno,) belongs to the AITH in AITHO, (Aiba.) In other Languages we have the same form 'TR for the Air, Sky, &c., as in the Irish ATHAR—AEDHAR, and the Arabic Asir. In the same column of Mr. Shaw's Dictionary with the former word, I find Atha, Athach, Waves; where in Atha we unequivocally see our Radical 'T, &c. denoting Agitation. Arabic اتب Asın means "The Sky, Æther," says Mr. Richardson, who gives us as the first sense of the word, "Signing, impressed," " stamped, imprinted on the Ground, (a footstep,)" where we are brought to the spot supposed in my hypothesis. I must observe however, that this sense of the word brings us to various other terms in Arabic, &c., where we seem to have the form TR. SR, &c.

Among the senses belonging to Aitho, (Aiθω,) &c. and its kindred terms, is that of 'Black—a colour produced by Burning,' as Aithon, (Aiθων, ardens, Niger seu rutilus.) Hence Aithiops, (Aiθων,) is the person with the Sun-Burnt complexion. An adjacent word to this, Aithuia, (Aiθωα,) denotes "Mergus, Fulica," for the same reason, that Fulica belongs to Fuligo. The Greek AAZO, (Aαζω, Calidum halitum efflo, exhalo, Aαξω, Lædo, Violo,) relates to Agitation — Disturbance — under two different ideas. The Auch in Auchmos, (Auχμος, Siccitas ex Æstu vehementi,) conveys the same idea of Heat. An adjacent term to this in my Greek Vocabulary is Auo, (Aυω, Sicco, Arefacio, Accendo,

Avw, Clamo,) relating at once to Heat and Noise; which may belong to this race of words, and have its Radical form in the future Auso, (Aura,) unless it is attached to the Element 'B, 'V, In the same column I see likewise Aucheo, (Auxeu, Glorior,) Auchen, (Auxqu, Cervix,) which must be referred to the same train of ideas of being Stirred up—Raised up—Swelling up—. Among the terms of Agitation—Stirring up, we must class the following words, relating to the Wind; as Asthma, (Ασθμα, Flatus, &c.) Atmos, (Atmos, Flatus, &c.) Atmosphere, Autme, (Aυτμη, Halitus,) &c. Under the form Aut we have Aute, (Aυτη, Clamor,) the term for Noise, which the Lexicographers derive from Ava, Clamo; and in this word we see the true form 'T. In the term for burning, ARDeo, we have the form 'RD; in URO, the form 'R; and in Ussi, that of 'S. The terms ARDEO, ARDOR, with their parallels in modern Languages, present to us fully the action of Excitement. Assus might belong to these words denoting Fire, under the sense of Agitation; yet I have given a different idea to it in another place, and supposed it to be derived from the Scratched—Corrugated—Parched or Scorched up form; produced by the action of Roasting.

This distinction however is perhaps too minute, as we cannot well separate the kindred ideas of the Scratched and the Agitated surface from each other. Thus we see, how Ardeo and Aridus ultimately belong to each other; and in Aridus, Areo, we come to the form 'R; and we see, how these words directly bring us to the Ground and its Grit, Area, and Arena. In Aza, (Aζα, Fuligo, sordes ex ignis flammis adhærentes,) we seem to see simply the idea of Dirt, as in the term Ashes; and yet we perceive likewise, how these words are connected with the action of Burning. In Azo, Azaino, Azaleos, (Aζω, Sicco, arefacio, Aζανω, Sicco, Aζαλεος, Aridus,) we see the idea of a Dry, Gritty state, or of Dry Dirt. Under the same form with Azo, (Aζω, Sicco,) relating,

relating, as I imagine, to Grit, Dirt, we have Azo, (AZo, Veneror, colo,) To Venerate; and we now understand, that these words. remote as they seem in sense, directly belong to each other. The two-fold meaning of the explanatory word Colo, To Cultivate the Ground, and To Venerate, will shew us the relation of the two senses of Azo, (A(u,) To Stir up the Grit, or Dirt, and 'To 'be in a Gritty state;' and this is precisely the relation which Aro, (Lat.) bears to Areo. Wachter has seen, that the German Eren, Terram colere; EAR, (Eng.) &c. &c., and Eren, Honorare, Venerari, belong to each other, and to ARO, &c. In Azoleo, (Αζωλεω, Irascor,) the Az is surely significant, as in the other words; and here we have the same form as Azaleos, (Alahos.) In Azoleo, (Alahos,) we see unequivocally the idea of Excitement; and perhaps the Zol is significant likewise, as in Zeloo, (Zelow, Æmulor, Sector,) 'To be Zealous or Jealous,' which I shall shew to belong to the idea of Stirring up the Solum, as in Skallo, (Skallo, Fodio, sarculo circumcirca sarrio, findo;—Scrutor.) We perceive, how these Greek words approach to each other, in their senses of Sector and Scrutor; and in the compound Chamai-Zelos, (Xapas (7) λος, Humilis, Humilia Æmulans,) we see, that the sense of Zeal, which is precisely that of Grubbing into any thing, (as we express it,) is brought to its original spot. In the same column of my Greek Vocabulary, in which Azo, (AZu,) is, I find Azoi, (AZoi, Servi, Servæ, &c.) which may either belong to the race of words denoting Youth, produced on a former occasion; or it may be directly attached to Azo, (Aζω, Veneror, Colo,) as denoting either the persons, 'qui Colunt magistros suos,' or the persons, 'qui Colunt terram.' We cannot decide on these points without knowing the precise idea annexed to the word.

In Aistho, (Aωθω, Exspiro,) we have the same sense, as in Aitho, (Aωθω); but Aistho, (Aωθω, Audio,) in the sense of Audio, brings us to Aisthanomai, Aisthesomai, (Αωθωνομω, Sentio, proprie

sensu corporis, Audio, Mente percipio,) where we see the idea of Excitement, either in Bodily or Mental perception; and this is another proof of the truth of my hypothesis, with respect to the origin of the race of words produced in a former page (787,) as Audio, &c. In the same and the succeeding column of my Greek Vocabulary, I find Ais, Aid-os, (Ais, Aidos, Orcus, Pluto,) Aisa, (Aisa, Parca; — Fatum, Insania,) Assalon, (Αισαλων, Æsalo, Accipitris genus,) Aisulos, (Αισυλος, Iniquus, nefarius, &c.) Aisimoo, (Αισιμοω, Consumo,) Aisumnao, (Aισυμναω, Rego, Impero,) Aister, (Αιστηρ, Torris, titio,) Aistos, (Aiotos, De quo nihil sciri potest, obscurus, incertus, qui, quod de medio sublatus est, ideo conspici nusquam AISTOO, (AIGTOW, Memoriam alicujus aboleo,) Aisueter, (Augustyp, Adolescens valde robustus,) (AIGOW, Ruo,) Aischos, (Aurxos, Turpitudo,) where the Ais in all these words has probably the same fundamental idea of Excitement—with more or less of an Intensive signification in an action of Violence, &c. The senses of Fate-Madness-Death-The Hawk-The bold bad man—Consuming or Destroying—Uprooting the memory, &c., convey this idea in the strongest manner.—The terms Aistos, and Aistoo, (Αιστος, Αιστοω,) have been derived from the privative particle, and Isemi, (Ionpu, Scio,) where the Is has still the same idea as in the In the Ep-Istamai, (Emistapas, Scio,): other terms for Perception. we can hardly discern, whether the sense of Diligence and Knowledge inclines most to the metaphor of Excitement or Stability; that is, whether it signifies 'Erectus sum ad aliquam rem facien-'dam,' or 'Insto alicui rei.' In the English 'Under-Stand,' and the German 'Ver-Stehen,' we have the metaphor annexed to the Action of Standing, as with Stability.

Terms denoting Water, derived from the idea of Excitement, Agitation, &c.

Æstus. (Lat.) Water in a state of Agitation.

AQUA, UISGE, ÉASC, &c. &c. (Lat. Irish, &c.) Water.

Asc, Esc, Isc, &c. &c. (Celt.)
The names of Rivers.

EGOR—ÆQUOR. (Sax. and Lat.)
The Sea.

Ugros, Eager, &c. (Greek,

Eng.) Wet; the current of a river.

OGEN, OKEANOS, OCEANUS, &c. Greek, Latin, &c.) The OCEAN.

Ichthus, IASG, f=Ish, &c. (Gr. Ir. Eng. &c.) Belonging to the Aqua, &c.

w-Ash, wh-Et, Udus, w-Ater, Udor, &c. &c. (Eng. Lat. Eng. Gr. &c.)

Ooze. (Eng.)

Osiers, &c. (Eng.) Belonging to the Ooze.

We shall agree, that the name for Water would be likewise naturally derived from the idea of Commotion—Agitation, &c. Among the terms, attached to our Element, which denote Water, or the objects and accidents belonging to it, we may class the following words: AQUA, (Lat.) with its parallels in modern Languages, AcQUA, (Ital.) &c., UISGE, OICHE, EASC, EASCONG, (Irish.) Asc, Esc, Isc, Osc, Usc, &c. (Celt.) names of Rivers; OKEAN-0s, (Ωκεανος.) OGEN, (Ογην, Ωκεανος.) Hesych.) AIGEIN, EIGION, (Irish and Welsh.) the OCEAN; UGROS, (Υγρος.) HYGER, or EAGER, (Eng.) the current of a River; EGOR, (Sax.) ÆQUOR, (Lat.) the Sea; ICHTHUS, (Iχθυς.) IASG, (Irish.) Fish, the inhabitant of the Water; YTH, (Sax.) Unda; OOZE, (Eng.) ÆSTUS, (Lat.) EDDY, y=Est; UDOR,

UDOR, $(\Upsilon \delta \omega_{\ell})$, w=ATER; w=ASSER, (Germ.) w=ATER; w=ATO, (Goth.) w=ASH, w=ET; UD-us, (Lat.) OUODe, (Russ.) v=ODA, (Scl. and Dal.) w=ODA, (Boh. and Pol.) v=IIz, (Hungar.) Whey or wh=IG, (Eng. Serum.) hw=ÆG, wh=ISGY, (Sax. Eng.) &c. &c.

I shall produce my remarks on these words in the order, which I conceive most expedient for the illustration of the subject. The Etymologists, among other conjectures, derive AQUA from Ayu, "quod in perpetuo Actu, seu motu sit, vel quod Agatur " (unde Αγωγος ρυαξ Hesych.) vel quod sit potabilis. Nam Αγω "etiam est bibo." The Etymologists have, we see, brought us to a kindred word; and thus Ago and Agua are only different forms of each other, and alike relate to Agitation or Commotion. From the Irish Uisge, denoting Water, is derived Usque Baugh, 'The Water of Life, Aqua Vita, Brandy.' Mr. Shaw interprets Uisge Beatha by "AQUA Vitæ, Whisky." Let us note the word wh=Isky, which is nothing but UISGE, The Water, by water of distinction. In Irish, Beatha is Life; which belongs to Bios, Biot-os, (Bios, Biotos,) and Vita; so that Usque Baugh, or Uisge Beatha, precisely corresponds with Aqua Vitæ. The term EAGER, denoting the current of a River, bears the same form and sense as EAGER, ACER, (Lat.) the adjective. In the Poems attributed to Rowley we have HYGER, and HYGEA.

The Saxon Egor, signifying in Latin Æquor, as Lye explains it, occurs in the succeeding column of Lye's Saxon Dictionary, to Egean, Occare, and Eggian, Excitare; to which unquestionably it belongs. We shall hence understand the original idea annexed to the Latin Æquor, which surely belongs to these terms of Excitement, though it appears to relate only to the notion of a Plain Surface. Nothing is so difficult, as to discover the primitive

[&]quot;As Severnes HYGER lyghethe banckes of sonde." (Ælla, y. 626.);

[&]quot;As when the HYGRA of the Severne roars." (Battle of Hastings, P.II. 691.)

sense, when two ideas, belonging to the same spot, alike apply to the word. This difficulty however may be unravelled thus. We cannot doubt, that the Latin Aguor belongs to the Saxon Egor; and that Egor has nothing to do with the idea of the Plain surface, but with that of Excitement.

I have supposed, and justly too, that Aguo belongs to the Surface of the Ground; and that its true meaning appears in the sense, which R. Ainsworth gives it, of "To Equal, or lay flat "and level." The original turn of meaning however, as I have suggested on another occasion, would have been more accurately represented, if it had been explained by 'To Rout up a surface, 'To up-Root any thing, so as to lay it flat—Equal or Level 'with the Ground;' and hence to be Level-Equal in general. Thus we see, that Æquo and Æquor were alike derived from the idea of Excitement, and connected with the action of Routing up the Ground; though the Latins oftentimes annexed to it the idea of a Plain—Level Surface, because Æquo took this turn of meaning. It is curious to observe, how words still recur, or rather adhere, to the source from which they are taken, though by a secondary process. Bouon, the Sea, I suppose to be taken from the Ground; and we find accordingly, that it reverts to this sense; and R. Ainsworth considers it to be the more original idea; "Æquor, Any plain, or level superficies, and by a synec. "(1.) The Earth. (2.) The Sea." It is curious likewise to observe, how terms pass into meanings directly opposite to that, from which they were taken. Thus Æquabilis—Æquable, express a sense precisely opposite to the notion of Excitement; and Level bears a similar meaning. Yet Level, as we know, is applied to the most violent action of Routing up, so as to Lay Low or Level with the Ground, as 'The Levelling Principle—The Levellers;' and is derived moreover from the idea of 'Stirring-Raising up-or 'Lifting up—Levandi,' as I have before suggested.

ICHTHUS,

ICHTHUS, (1x805, Piscis,) the Fish, is the animal living in the Agua, &cc. or Water. The Latin Piscis and the English Fish belong, we see, to each other; and they should, I imagine, be referred to the Greek ICHTHUS. (12005.) The p and f, in p-lscis and f-IsH, should only be considered as a labial breathing, if I may so express it, before the ^C, ^S, &c. The Etymologists properly refer us to the parallel terms for Fish in other Languages, where we have the form PS, FS; as the Gothic Fisks, the Saxon Fisc, the German Fisch, the Belgic Visch, the Runic and Danish Fisk, the Islandic Fiskur, the French Poisson, the Italian Pesce, the Spanish Pescado, and the Welsh Pysg; all which they derive from the Latin Piscis. Various origins are produced of Piscis, as quasi Pascis, quia Pascit homines—Pecus—Pio, (IIII) &c. &c. &c. Lhuyd produces the Celtic terms for Piscis, as Pysg, Pysgodyn, (Welsh,)-Pysg, plur. Pyzgaz, (Cornish,) Pesk, (Armoric,) and Iasg, (Irish.) In the Irish Iasg, or Iasc, as it is sometimes written, we have the form of the Greek ΙCHTHUS, (Ιχθυς.) Our familiar name Fisher, we know, belongs to Fish, and so does Pisk, &c. In Sanscrit, Matse is a Fish; and I imagine, that the m in m-ATSE represents the other Labials p and f in Piscis and Fish. The first incarnation of Veeshau is called the "Matse, Avater." Let us mark the term Veeshno, who is sometimes represented underthe name Bisher, the God of the Sea; where we cannot help observing, that the Poseidon, (Moresday,) or Pospon of the Greeks, is only another form of the Sanscrit terms, and that the v=Eesh, \$\preceq\$Os, in these words belongs to the race of words denoting Water. We shall find a great race of words under the form BS, PS, MT, &c. &c., denoting Water, what is Whet, &c., all derived, as I imagine, from the form 'S. We see in the w of w-Ater. wh-ET, &c. how these labial consonants have arisen.

In Saxon, YTH, as we have seen, is "Unda, fluctus," which is adjacent to Yst, "Procella, turbo, tempestas." In the same

page with Yst, in Lye's Dictionary, I find YRTH, EARTH, and Ynsian, "Irasci,—fremere;" which certainly belongs to the EARTH or Dirt, Excited or Stirred up by the Harrow, or HERSE, &c. &c. I have supposed on a former occasion, that HITHE. from the Saxon Hyth, in the sense of a Station for vessels, as Queen's HITHE, Lamb-HITHE, corruptè, Lambeth, belongs to our Element 'T, &c. denoting An Enclosure. It may mean the Spot, adjacent to the YTH, or Water. In the following passage the Saxon terms Hyth, Yst, and Yth, which I have here exhibited, are introduced, "Sio an Нутн byth simle smyltu æfter eallum "tham YSTUM and tham YTHUM urra geswinca. Hic unicus "Portus est semper serenus post omnes turbines et omnes tem-" pestates nostrorum laborum."—I must add likewise, that Hyth is sometimes used for Yth, Unda, fluctus, as Lye observes under I have produced in another place the terms adjacent to Hyтн, denoting Commotion—Agitation, &c., as Hyтнian, Grassari, Vastare. On the whole, we shall be disposed, I think, to imagine, that HYTH, the port, is derived from YTH, the Water.

Let us now turn our eyes to the Celtic Dialects, where the name for Water appears most conspicuous, as belonging to the Radical ^C, &c. Shaw explains Uise, or Uise, by "Water, "a River;" and we may accordingly expect to find our Radical ^C, ^S, ^G, &c., used for Rivers, and for the names of Places near Water or Rivers. I shall not attempt to make an enumeration of the names of Rivers and Places belonging to our Radical, as the fact is universally acknowledged, though our Antiquarians have not been aware of the extent, to which this fact may be applied. We may well imagine, that the Critics in Greek and Latin literature have been almost or totally unconscious of the application of this Radical for Water in the names of Places, which are the objects of their enquiry.—The following observations of Lhuyd and Baxter will be sufficient to explain this fact,

as it more particularly belongs to our own country, and may give us a glympse of its importance in investigating the names of Places in other regions. "As for the names of Rivers," says Lhuyd, "we often find that when a Country is new peopled, the "new-commers take the appellatives of the old Inhabitants for "proper names. And hence it is, that our ancestors at their "first coming (whenever that was) called so many Rivers in " England by the names of Asc, Esc, Isc, Osc, and Usc, which the "English afterwards partly retained (especially in the North) "and partly varied into Ax, as Axley, Axholm; Ex, whence "Exmouth, Exeter; Ox, whence Oxford for Ouskford; and Ux, "as in Uxbridge, &c. This, I say, proceeded from our igno-"rance of the Language of our Predecessors, the Güydhelian "Britains, amongst whom the word signified nothing but Water, "as it doth yet in the Highlands, and in Ireland." Baxter's Glossarium.) He then illustrates the same idea with respect to the Avon, which is the appellative term for a river.— We may observe, that this circumstance not only takes place with respect to new-comers, but among the ancient Inhabitants likewise, when these terms change their forms.

Through the whole compass of Language, the proper names of Rivers are perpetually taken from the general appellative names, with some differences in form; as in the ordinary process of Languages, the same Radical, containing a certain idea, has supplied under various forms various turns of meaning, belonging to that original notion.—Sometimes the fact has been sufficiently palpable to excite the notice of the Enquirers, and sometimes it has been totally obscured; because the observers were destitute of the clue, which has been afforded by the principle unfolded in these discussions. If in the present instance, for example, Lhuyd, instead of talking about Asc, Esc, Isc, Osc, Usc, Ax, had adopted the phraseology of my hypothesis, and had told us, that the names

of Rivers perpetually appeared under the Radical 'S, 'C, and its cognate letters, without any regard to the vowels;—the fact, which he really means, and which he would have been ready to grant; we at once see, how this hypothesis would have generalised the subject, and how the eyes of the observer would have been opened, with respect to the extent of the fact, which he is desirous of illustrating. Baxter makes the following observation: "Isca, "hoc est Aqua; atque hæc veterum Brigantum sermone Uisc " erat, et hodiernis etiam Pannoniis sive Boiis Uiis. Uisc proprio " positum intellectu, Tractus quidam est sive Agmen Aquæ. Certe " verbum Ussco sive Guisco Ostidamniis est Adigere, et Britannis " nostris Induere. Erant Iscæ in Britannia pene innumeræ. "Apud Belgas etiam flumen Esch vel Asch est, quod pro Isca " venit. Quin et flumen Axona, quod in Belgica Secunda est " (modo dictum Aisne) dici videtur tanquam Asc Avon vel Asc "aun, quod Tractus est Amnis." (Glossarium Antiquitatum Britannicarum, p. 140.)

Unquestionable as the derivation of Oxford is from Ox, Water,—the Isis, and Ford; still however some have imagined, that Oxford or Oxenford is 'The Ford for Oxen.' It is curious, that Bosphorus, from Bous and Poros, (Boug, Mopog,) means the Passage of the Ox, for a reason which no one has been able to discover. Various causes for this name, drawn from Mythology, have been produced, which I shall not attempt to record. only exhibit another derivation, which I must leave to the judgment of my Reader. We know, that the name of Bosphorus was given to a narrow strait of water, which we may imagine was generally chosen as the place of passage. I suppose therefore, that the Bos in Bosphoros is a mistaken translation of the equivocal Radical AX, &c., which under various forms is used to denote Isc, Usc, Ux, &c. &c. Water, and the animal called an Ox; and thus the mistake will be precisely of the same sort, as that of the Antiquarians quarians in their derivation of Oxford. The Radical $^{\lambda}X$, $^{\lambda}S$, $^{\lambda}K$, &c. &c. supplies the name for the animal Bos in the Teutonic and the Celtic Dialects, as in Oxa, (Sax.) Ochs, (Germ.) &c. Y_{χ} , Ag, (Celt.) produced on a former occasion, and which I suppose to be derived from the same idea of Excitement, under the metaphor of the animal, which Drives forward—Pushes—Butts—with Force and Violence.

Bochart derives Ogen, (Myn, Mesavos,) and Oceanos, (Mesavos,) from the Hebrew and ChUG, which he represents by Og, and explains by Maris Ambitus. (Geograph. Sac. lib. i. c. 36.) Hesychius explains Ωκεανος by Αης, θαλασσα, και ποταμος υπερμεγεθης, where, in its double sense of Air and Water, we see the common idea of Agitation. We perceive moreover, that the sense of Ok in Oceanos, (Ωκεανος,) Okus, (Ωκυς, Celer,) is the same; and this is so evident, that some of the Etymologists have referred these words to each other. The Celtic terms Aigein and Eigion coincide, we see, with the simpler form Ogen, (Oyy); and we see in the term Ocean, from Ocean-os, (Queavos,) how by a secondary process we are brought back to the original state of the word. Let us mark the explanatory term Thalassa, (Θαλασσα,) which might be derived from Thal for Sal, Salt, and 'S or Assa, Water. If the 'S or Assa does not signify Water, it is a Celtic addition from the construction of the Language to Thal or Sal, which unquestionably denotes Salt. In Mr. Shaw's Galic and Irish Dictionary, SAIL and SAILEAS signify "The Salt-Water, the Sea." The Greek Thalassa, (Θαλασσα,) belongs directly, as it should. seem, to Saileas. In these Dialects, Salann and Sailte is Salt; and in the Welsh and Armoric we have Halen, Holen, where in the Hal, Hol, we perceive the intermediate step between Sal and Als or Al, (AAc, AAcc.) SAL, SALT, means simply Solum, Soil, or Dirt. The adjacent words to Salann, Salt, in Mr. Shaw's Dictionary, are SAL, Dross, rust, and Salach, Unclean; Salaigham, To Defile, pollute.

On the whole perhaps we shall imagine, as Thalassa, (Θαλασσα,) seems to belong directly to Saileas, and that no part of the word denotes Water, but that the term signifies only Salt, as in the simpler form Sail. In the same opening of Mr. Richards' Dictionary, where the Welsh word Eigion, "the Ocean," occurs, we have EHEGYR, "Swift, speedy, quickly, forthwith." We have likewise Egr, "Sour, sharp, tart, biting, Eager, poinant;" which belong to Aigre, (Fr.) Acer, (Lat.) The preceding term to this is Egr, An Acre; and in the same column we have Egoni, To open; where we plainly perceive, from what idea the sense of Opening is derived, and that we are brought to the spot and the action supposed in my hypothesis. The Welsh Lexicographers have justly reminded us, under Egor, of the Greek O1GO, (O174,) which I have before referred to the same idea. Again, we have in the same column Egni, "Force, or Endeavour " to do a thing, Vehement endeavour, an effort, strength, vigour;" where we unequivocally see likewise the idea of Excitement annexed to these words, which I have produced on another occasion. Let us note in some of these terms the organical addition of the n to the G; and thus the names for Fire and Water have assumed similar forms, as in Ignis, Ogein, &c., and Ogen, (Oyp), &c. &c.

I shall now examine those terms, denoting Water, which may afford us some difficulty; as in many cases they appear remote from the more simple form exhibited by our Radical. These terms are Water and its parallels, Udor, (Tdwe,) &c. If we considered only the Greek Udor, (Tdwe,) and remembered, that the familiar Celtic name for Water appears under the form DR, as Dwr, (Welsh,) Dour, Dur, (Cornish and Arm.) we should imagine, that the Dor in Udor, (Tdwe,) belonged to these terms, and that the U was a prepositive vowel of some sort, Articular or Organical. We cannot however but perceive the connexion of Udor with Water; and when we remember the terms Wash and Whet, where we see

the simpler form of Water, we plainly perceive, that Wash, Whet, and Wat in Water, and therefore the Ud in Udor, represent a Radical part, and that the Ter and Dor is probably not significant. Thus, then, the Greek Udor, (Youe,) may be considered as a Saxon term, where the Up is significant and Radical; as the AsH, Et, are in w=AsH, wh=ET, &c. &c., and as the UD is in the Latin UD-us, the Greek Up-as, Upei, &c. &c. (Mos, eos, Mes,) &c. We see other additions besides r to the Radical Consonant D, as its Cognate t, and likewise n, as Unat-os, Unateo, Unn-on, (Youros, Ydateu, Ydvov, Tumor terræ, Tuber,) &c. &c. The preceding term to Upor, (Map,) in my Greek Vocabulary, is UDO, (The, Celebro, cano, dico,) where we have the same idea of Excitement and Commotion, as referring To Uno, (Υδω,) belong Ano, Alido, &c. &c. (Aδω, Alido, Cano.) To the Greek Udor, (May,) directly belongs another term in that Language, Oduromai, (Odupopai, Fleo.) The Etymologists produce the parallel terms for Water, as Wæter, (Sax.) Wasser, (Germ.) Wato, (Goth.) Watn, (Swed.) Vand, (Dan.) Wuode, (Ruthen,) Voda, Woda, (Scl. and Pol.);—for WASH, as Wascan, Wacsan, (Sax.) Waschen, (Germ.) &c. &c.; -for Wet, as the Saxon Wat, the Swedish Wat, &c. The form of the Sclavonic Voda, or, as it is written in Russian, under the form of our English B, Boda, will remind us of the Phrygian term for Water, preserved in Orpheus, BEDU, (Bedu.)

Και ΒΕΔΥ νυμφαων καταλειβεται αγλαον υδωρ. (Frag. 19.)

We here see, how the forms $^{\Lambda}D$, $w^{-\Lambda}D$, $v^{-\Lambda}D$, $b^{-\Lambda}D$, or BD, pass into each other; and when the form BD is constituted, another great race of words is to be found, which will require a distinct discussion in a separate and an ample Volume. Whether the two forms have passed into each other, and by what process this has been effected, I shall not now enquire. I shall however examine a few terms under the form $w^{-\Lambda}D$, &c., and shall shew, how they are related to each other, whether we conceive them as belonging

belonging to the Element 'D, &c. or BD, &c. That WHET, and its parallels Water, &c. are derived from the idea of Excitement— Stirring up, &c., will receive confirmation from remembering the verb 'To Whet,' which actually signifies 'To Stir up-Excite,' &c. We cannot but perceive, how the term w-EATHER connects itself in form and meaning with w-Ater and with AITHER, (A.One); which latter word the Etymologists have produced as parallel. I suppose, that these terms are derived from the idea of Agitation—Commotion; and accordingly the German Wetter means in one sense "Boisterous, stormy, windy, tempestuous, and violent "WEATHER." Hence we shall not wonder to find, under the same form as Weather, the name for the "Vervex, Aries," the Boisterous animal. Though the Etymologists see no relation between Weather, the Element, and the Animal, yet they derive the Animal from the same idea—from Wederen, (Belg.) Witherian, (Sax.) "quod sit animal mirifice refractarium." The German WIDER, Against, which belongs to this Saxon and Belgic verb. I find in the same column of my German Lexicon with Wetter, the violent Weather, or Storm, and Widder, the Ram; the Violent animal; from whence we shall learn, that WIDER relates to an action of Violence, and that it means the Violent and Strong opposition,—" Das ist diesem gerade Zu=WIDER, That is directly " or diametrically Opposed to this."-To Wider belong Wieder. 'Again,' and Weder, 'Neither,' originally applied to the Violence of a 'Recurring action, and of Refusal.' Even our familiar preposition WITH belongs to these terms, denoting actions of Excitement-Violence, Opposition, &c. The original sense of WITH appears in such examples as 'To WITH=Stand,' and 'To be angry With.' Lye justly gives us, as the first sense of the Saxon WITH, "Contra, In, Adversus-WITH gecynde, Contra naturam "-Irsian With, Irasci, indignari, excandescere in." The Etymologists acknowledge, that the Law term WITHER-Nam, the Vetitum Vetitum Namium, is derived from Wither, Contra et Nam, Captio.

The parallel terms, which the Etymologists have produced to Wave, in other Languages, are Vague, (Fr.) Waeg, (Belg.) Wag, (Sax.) Wasser=Wogen, Be-Wegen, (Germ.) "Movere, Agitare; "Unda enim nihil est nisi Aqua mota," says Skinner. We here see, that if the words produced by the Etymologists are parallel to Wave, Wave must be considered as belonging to the Element ^G or VG. I must observe, however, that the Element ^B supplies a great race of words denoting Water; and this mode of change, from the G, &c. to the Labial at the end of words, is not very familiar. However this may be, we may observe in general, that the Elements 'G and 'B, as denoting Water, must be considered as distinct from each other. The German term Be=Wegen, as it is explained by my Lexicographer, precisely represents the sense, which is supposed in my hypothesis to be annexed to this race of words; —"To Move, Stir, Shake; —To "Move, Incite, Excite, Actuate, Stir up, Induce one to." The form Vague, the Waves, brings us to Vague, (Fr.) which we express by Vague, Unsteady, Vagus, (Lat.) Vagabond; Vacillo. (Lat.) Vacillate, Waggle, &c. The German Be=WEGen brings us to WAG, WAGON, or Wain, WAGE War, WAGER; where in the two latter words we have the Excitement of Hardihood and Adventure.—From the WAGER of Adventure, deposited or laid down, we pass to Wages, the Laid down or Stipulated Hire. with its parallel terms GAGER, (Fr.) En-GAGE, En=GAGE; where. in the phrase 'To En=GAGE in a perilous enterprize,' we again revert to the original idea of Excited action. Hence we pass into the form Gager; and thus we see, how by the most natural process terms may be generated, which belong to each other, though totally unlike in form.—The term Weigh, with its parallels, belong to Be=WEGen, as the Etymologists understand;

and it alike refers to the Motion of the Scales, and of the mind, in deliberating.

The term Wash or Washes is used as a substantive, to express Watery, Fen or Boggy Land. Junius says, that it is applied in Norfolk to "Terra quædam plana et plerumque arida, "cui nomen à lavando vel alluendo ductum;" but Lye has justly referred it to the Islandic Vos, Væsa, "Locus palustris et "humidus." In the term Ooze, and Oozy Ground, we see plainly the words for Water, under the more simple form, as in Isc, Usc, &c. without the labial sound, as in w=Ash, v=Os, v=Æsa, &c. Hence has been derived the name for the fertile, habitable spots in Ægypt, called Oases: originally applied, as I imagine, to the Oozy Ground, or Ground attached to or connected with Water. Our great Bard has brought us to this derivation—by applying the word Ooze to the Oasis Ground of Ægypt, if I may so say, when it has been Watered by the inundation of the Nile.

"The higher Nilus swells,

- "The more it promises: as it ebbs, the seedsman
- "Upon the slime and Ooze scatters his grain,
- " And shortly comes to harvest." (Antony and Cleopatra.)

Bochart has given to the term Oasis an Arabic origin; in which, as I imagine, he is mistaken. The Etymologists have derived Oze or Ozey, from Ost, Squamma, Solum Squammosum. To these terms Ooze, &c. we should probably directly refer the Greek Asis, and Asios, (Asis, Coenum, sordes, limus, Asios, Limosus.) On a former occasion, I referred Asis to the Ground, as denoting Dirt merely; yet I think we perceive, that it has advanced a step further, and has passed into the idea of Watery Ground, as in Ooze. This appears, I think, in the combination Asio en Leimoni, (Asim the Neimanni,) in the Oozy meadow, or Leimon, which belongs to the Limus, or sLime. The quarter of the Globe Asia, means the Fertile

Fertile Land—as if well supplied with Asis, (Aou,) Moist—Watered Soil, in opposite to the dry, sandy Desert,

The succeeding word to Oze, Ozey Ground, in Skinner, is Ozier; which he refers to the French Osier, Ozier, and the Greek. Oisua, Oisos, (Oioua, Oiouc, Salix.) These words surely mean the production belonging to the Oozy Soil. The preceding word to Oisos, (Ouros, Vimen, Salix,) is Oison, (Ourow, Funis nauticus, retinaculum;—Funis,) which we shall imagine, I trust, to have denoted originally the Rope made of the flexible Ozier. We cannot doubt, I think, that ITea, (ITEA, Salix,) belongs to Oisas. (Owos); and this brings us to the w=ITH, w=ITHY, and w=Icker. An adjacent term to Itea, (1760,) is ITUS, (1705, Circumferentia et curvatura rotæ, omnis extremitas rei rotundæ, umbo,) which meant originally the flexible ITEA, (ITEA,) or Withy, split and bent into a circular curve. I have supposed, that the Flexible Ozier and its parallels belong to the terms for Water, by the process above stated; as I think, that the Ozier means unequivocally the tree, which belongs to the Oozy Ground; and if that be the case, the other part of the process cannot, I think, be doubted. I am confirmed in this idea by the German word WEIDE, which at once means 'Pasture Ground,' and a WITHY. If however I had perceived only the idea of Flexibility, as in the w=ITHY, and ITea, ITus, (ITEA, ITUS,) I should have thought, that this idea was taken from the Water, having the property of easily yielding to impressions, as in Typos, Humidus,—Flexibilis, or from the more general sense of Excited motion; as objects which easily Move here and there are more Plexible. Hence Flexibilis means in one sense "Inconstant, Wavering," as R. Ainsworth explains it. I have sometimes thought, that the Ash may be derived from the idea of its Flexibility. The Yielding property of Water, or of Watery. Slimy-Muddy Matter, brings us at once to the idea of what is Soft—Yielding—Weak; and hence we have the term now adopted— WEAK,

WEAK, and WAX, Cera. The succeeding article in Junius to WEAK, "Mollis, tactui cedens," is WEAKY, Humidus, Madidus. The Etymologists have justly referred w-EAK to EIKO, (Enw, Cedo,) which signifies likewise 'Similis sum;' where we see the idea of soft Plastick matter, of which the Eiko, (Enw, Imago, Effigies,) the Image, is formed. In EIKE, (Eug, frustra Temere,) we have the Mud-Stirred up in a state of confusion. The same idea appears in the phrases 'To be in a Muddled-Muddy state,' and in the Latin term Turbate. The Wick or Week of a Candle is the Soft substance, of which this part of a candle is made; and a WEEK, Septimana, is nothing but a period which Wags on, if I may so say, or keeps Moving on by Recurring changes—or periods—per Vices. Let us mark the Latin Vices-Changes, which belongs to these words and to the same idea. Thus WEAK-WICK or WEEK are derived from the same fundamental idea, as WEEK, Septimana. The two former mean the Soft—Yielding substance, which easily Wags-is Stirred or gives way; and the latter means what Wags or Proceeds onwards. The term Week and Vices precisely correspond with each other. If I had not observed, that WEAK connects itself with WICK and WAX, which seem to relate particularly to Plastic materials, I should have imagined, that Weak was derived from the more general idea of the Excited-Violent action, by which things less powerful are subdued—or rendered WEAK. The opposite ideas of Strength and Debility are, we know, annexed to the same term, with some slight change in its form, by the operation of what Grammarians call an Active and a Passive signification, as 'To Conquer-To be 'Conquered, To Subdue—To be Subdued, Sub=IGO, Sub=Actus, 'VICI, VICtus.' We perceive, in the verb "To Weaken," an active sense; and this might have conveyed the same idea as Vici. We see too, that Vici is a term belonging to this race of words, as denoting actions of Violence. In vulgar English we have a term

term for Beating, under a similar form—Wack, relating to an action of Violence. In German, Weichen means "To soften, "Weaken, mollify, to soak, steep, macerate;" where, from the explanatory terms Soak and Steep, we should imagine, that this sense of Weichen was related to Water; yet, in the phrase Weicht, Weicht. Make Way! Clear the Way! Away! Avoid! &c. we seem to see the sense of Excitement, as belonging to the more general idea. It is impossible oftentimes to distinguish the peculiar notion annexed to a word, when different turns of meaning, existing in the Element, are equally applicable to it.

We have seen, that wh=Isky means the Isk, &c. Water, by way of distinction, the Strong Water; so Whey or wh=IG might mean the thin Watering fluid, in a depreciating sense. In Scotch. Whice means "A thin and sour liquid of the lacteous kind," says Dr. Jamieson. From this word our party term Whig is commonly supposed to be derived; as denoting the poorer sort of Presbyterians in Scotland, who were obliged to drink this species of liquid. Others however have adopted different derivations, on which it is difficult to decide. Which might belong to the terms denoting Motion, WAG, &c., and mean the liquid produced by the action of Curdling—with which the idea of Commotion is perpetually annexed. The term succeeding Wigg or Whig, "the "thin serous liquid," in Dr. Jamieson's Dictionary, is WIGGLE. which Dr. Jamieson explains by "To Wriggle;" and he refers us to WAIGLE, "To Waddle, to Waggle." Let us mark these terms WADDLE, WIGGLE, WAGGLE, &c., and remember Vacillor. Boggle. We cannot but note, how Boggle belongs to Bog; as Vacillor, To Vacillate, connects itself with Vagus and Vague, the Wave; and we cannot but perceive likewise, how they all belong to each other. The term in the preceding column of Dr. Jamieson's Dictionary to Waigle, is WAGGLE, "A Bog, or marsh;" where we unequivocally see, how these terms are connected.

There

There is another term, Whig, which Dr. Jamieson explains in one place by "A Species of fine wheaten bread," and in another by "A small oblong roll, baked with butter and currants." He refers this term to the German Wagghe, "Panis triticeus;" from which, and his first explanation, we might be led to think, that the Whig meant the Wheaten bread. The German "WECKE, "Wigs, round Wigs; - Ein Butter=Wecken, Roll Butter," bears the same form with WECKen, the term of Excitement, Er=WECKen, "To aWAKen;—To Raise up, Excite," &c., as my Lexicographer Hence we shall imagine, that the WHIG or WECKE explains it. is so called from its Raised up—Swelling or Roll form. We should at once say, that Wig, the covering for the Head, meant the Swelling out—Bushy figure, if we did not recollect Periwig, and remember the parallel terms Perruque, (Fr.) Parucke, (Germ.) This word has great difficulties; and it has been derived by the Etymologists from various sources, as the Hebrew פרע Perah, which is explained by 'Capilli verticis,'—the Greek Πηνικη—Πυρειχος, &c. The latter derivation is that of Wachter, who rejects the idea of another Etymologist, by whom the word is written Baruke, and is supposed to be derived from Bar, Caput, and Huke, Peplum. He produces, however, the article of Somner, preserved also in Lye. "HICE. Paruca; Vocab. Dewes. "Non liquet," (inquit Somnerus,) "fortasse, Perruqua, i. e. Galericulus." The doubtful term HICE is perhaps confirmed by our English term WHIG; where we seem to see the UCKE and UQUE, in Par=UCKE, Perr=UQUE, which would lead us to conceive, that these words are compounds, and that Par or Perry might denote the Head or Top. The Whig might mean the Raised up object, and belongto terms of the same meaning, which we have so often observed. The Saxon Hicæ occurs in the same column of Lye with HEXTA, Altissimus; and we see how wHig may convey the same idea. The Element BR supplies a great race of words, denoting the

Top, or Head Part, as Brow, with its parallels Braewe, (Sax.) &c. &c. Let us mark the name of this celebrated Etymologist. WACHTER, which belongs to our race of words denoting Excitement; as WACHT, The WATCH; WECKen, To aWAKE, &c. We have seen the term WHEATEN, above adopted, which belongs likewise, by a process removed only two steps backward, to the same idea. The Etymologists justly refer WHEAT, and its parallels Hwat, (Sax.) Westz, (Germ.) &c. &c., to White, (Eng.) Hwit, (Sax.) Weiss, (German,) which belongs to the colour of WATER; and I have shewn, that WATER, WASH, WET, &c. &c. are attached to the idea of Excitement, as we see it in Wecken, &c. &c. Such is the process, by which words, containing ideas totally removed from each other, may have been originally derived from the same fundamental notion. In the next column of my German Dictionary to that, in which Wachen, To Wake, Watch, is, I see Wacksen, "To Wax, burnish, grow," &c., and Wacksen, "To Wax, or sear something, do it over with Wax." We cannot but imagine, that these words, under a similar form, have a similar fundamental idea; and hence my former conjecture will be confirmed, in which I suppose, that WACKSen, "To WAX, "burnish, grow," &c., is derived from the idea of Stirring up or Raising up. Wax, as I have shewn, is nothing but the Soft— Yielding substance, derived from the idea of an object easily Stirred or Moved.

We shall now understand, that the Latin Uter, and the English Udder, with its parallels Outhar, &c. (Ουθαρ, Uber, Mamma proprie belluarum;—Ubertas, feracitas, pars agri maxime foecunda,) belong to the forms Water, Udder, (Υδωρ,) as denoting substances, Swelling out with moisture, or Watery substances. We hence see how it denotes the Fertile Soil, as Abounding with or Prolific from moisture. The explanatory terms Uber and Ubertas have the same relation to each other.

We are brought likewise to the original spot in an adjacent term, Oudas, (Oudas, Solum, Pavimentum;—Humus, terra.) We shall not wonder, that Oudas and Outhar, (Ουδας, Ουθας,) are connected with each other, when we recollect the relation of the explanatory word Humus to Humidus. In Udnia, (Tôpia, Hydria, vas aquarium,) we have the same form as in Outhar, (Outag,) &c. In Upnon, (Torov, Tumor terræ,) which is acknowledged to belong to Upor, (Your,) we have likewise the Swelling-out substance. The Greek Askos, (Aonos, Uter, pellis; follis, culeus,) conveys a similar idea of Rising or Swelling up, as Moist substances, and belongs to the form Isc, &c. &c. I have shewn on a former occasion, that an adjacent word to Askos, (Aoxos,) under a similar form, Askeo, (Aoxea, Colo, Exerceo,) is derived from the idea of Stirring up or Raising up the Land in Cultivation; and thus we perceive, how they both convey the same fundamental idea. I have suggested on a former occasion, (p. 387,) that there is some difficulty respecting these words; and I am still of the same opinion. I cannot doubt respecting the origin which I have attributed to UTER; and I have before observed, that UTER and UTERus belong to each other, under the idea of the Swelling-out form. I think, we cannot doubt; and yet UTERUS is surely connected with the Greek USTERA, (Yorepos, Matrix, Uter,) which brings us to another Greek word, USTEROS, (Totepos); and this does not seem directly to attach itself to the race of words, which I am now discussing. I have likewise suggested on a former occasion, (p. 386,) that a word under the same form, the adjective UTER, is a compound of two parts, corresponding with such terms as This perhaps is not precisely the case, as it is Eter-os, (ETEPOG.) a compound consisting of three parts, and directly corresponding with our term Whether, and its parallels Hwæther, (Sax.) Cwathar, which I have shewn to be a triple compound, consisting of Who, Qui, &c. and Eith-EB, which is the same double combination, as in ET=ER-os, (Eregos.) I shall not proceed to a greater length in my examination of the Race of Words, denoting WATER; as the observations which I have already made will sufficiently unfold every thing which more directly belongs to the objects of the present Volume. As we pass into the Consonant forms w-^D, w-^T, b-^D, &c. &c., we entangle ourselves with a great race of words, which will constitute a future theme of ample and important discussion. It is marvellous to observe the process, by which the different Elementary Characters pass into each other; and 'as 'we advance forward in these enquiries, we shall be enabled more fully to understand and admire the secret workings of that controuling principle, which still continues to multiply, to mark and to separate these changing forms, as they pass through all their varieties of symbol—of sound and of meaning.'

Terms denoting Noise, as inseparably connected with the idea of Excitement, in Stirring up or Grating upon a surface, as the Ground, EARTH, &c., under the form' ARS, &c.

Herse, Harke, &c. (French, Germ.) The Harrow.

HIRTUS, HIRSUIUS, ERTO, &c. (Lat.) What is Rough or

HARSH. (Eng.)

HOARSE, HAS, HEISCH, &c. (Eng. Sax. Germ. &c.)
EREUGO, RUCTO. (Gr. Lat.)

HRUTAN. (Sax.) Stertere, To AROUT. (English,) To make a Noise, and to Stir up the Earth.

HRUKJan, (Goth.) Crocitare.
HIRSP. (Scotch,) To Jar.
HIRST, HIRSILL. (Scotch,) The
Harsh Grating of Mill-stones
against each other.

HRUXLE. (Sax.) Strepitus.

HRISTLan. (Sax.) Crepere.

HURTLE. (English,) A Clashing Noise.

^RATTLE, ^RUSTLE, &c. &c. (Eng.)

[^]RACLER. (French,) To [^]Rake, Scrape, &c. &c. &c.

I shall in this Article produce the terms belonging to the forms of our Element AC, AD, &c. AC, D, &c. &c., which denote Noise. My hypothesis is, that these terms are either derived from or inseparably connected with the idea of Scratching or Grating upon a Surface, as the Earth; by which action the Harsh, Grating Noise, is produced. We see, that the term Grate at once expresses the Action and the Noise; and I shall shew in a future Volume, that it belongs to Graze—Scratch—Scrietch, &c. &c., and ultimately to terms for the Ground, Creat, &c. We cannot but note the explanatory term Harsh, which I have

been

been obliged to anticipate, and which is connected, as I imagine, with such terms as HIRTUS, HIRSULUS, produced in a former article, and ultimately to the HERSE, HARKE, &c., the Harrow, &c. I shall produce various terms which have been before noted, though I shall omit others relating to the same idea; as their true force will sometimes be best seen by a comparison with those words, to which they are more immediately related, and which I have sufficiently discussed on former occasions in their due places. I have collected in a preceding Article, (page 627,) the race of words under the form 'RD, 'RT, 'RS, &c., denoting what is HARSH or Rough to any of the senses; to which race the terms under the same form, denoting the HARSH Noise, more particularly belong.

The English HOARSE is the HARSH-Rough Noise. Etymologists have justly produced, as parallel, the Saxon Has, the Danish Hass, the Islandic Hoas, the German Heiser or Heisch, the Belgic Haersch, which they imagine to be formed from the sound, "Videntur à sono ficta; asperitate enim suâ Raucedinem "exprimunt." Lye, in his Edition of Junius, has the term HACE, Raucus, as used by Chaucer; which he refers to the Belgic Heesch, the Saxon Hase, and the Islandic Hæs. This term HACE, in the Lexicon of Junius, precedes HACK, HATCH, or HASH; where we see combined the idea of Noise, and that of Tearing up, or Cutting up any Surface. An adjacent word to the Saxon HAS is Haswe, Lividus; and in another sense, "Aridus, sive " potius, Ariditate Asper." The Latin Asper belongs to the same race of words; and it is justly explained in one sense by Robert Ainsworth, "HARSH, Grating." Some derive Asper from Ασπορον pro Αγονον, "sterile, vel non seminatum." In German, Husten is a Cough; and the preceding word to this is Husche, "A Box, cuff, or blow on the ear;" where we have the idea of Noise—connected with the more violent action of Excitement. Let us remember the terms Hiss and Hir, which belong to each other

other for the same reason. Husky is a colloquial word bearing a similar meaning to Hoarse, Has, Hace, &c. We connect HACK with the action of Coughing, when we talk of a HACKing Cough. Dr. Jamieson produces, as I have before observed, HACE, HAIS, as signifying Hoarse, and Huschart, A Cougher. In the succeeding column of this writer's Dictionary we have HACK, "A Chop, Crack "or Cleft," &c., which belongs, we see, to HACK, To Cut; and we cannot but note, how Chop, Crack, relate at once to the Cut and the Noise. I find likewise "HACK, -Muck-HACK, A Dung-fork "with two prongs, shaped like a Hoe," or Hough. Here we are brought to the very action of HACKing up the Dirt, supposed in my hypothesis. The Muck=HACK, or two-Pronged fork, brings us likewise directly to the Hook, which I have before referred to the same action. In the combination Hook-Land, which means "Land plowed and sowed every year; called also Ope Land," we are again brought to the spot from whence this term and its parallels are derived. Hook-Land, or Ope-Land, is the Land HOOKED or HACKED up, Opened or Plowed up every year, in opposition to Fallow land.

A word adjacent to Husche, &c., in the German Vocabularies, is Hurtig, "Active, Speedy, Quickly," &c.; where we have the form 'RT, with the due meaning of Excitement, or Agitation of Motion, belonging to this race of words. In Saxon, Hraca is Tussis, where we have the form 'RC; and I must here observe, that the words, which appear in English under the Element RT, &c., without a breathing before R, are often written in Saxon with an H before the R, which will shew us, that the words under the form RT, without the breathing before R, belong to our Element 'RT with the breathing before it. Thus, in the column where Hraca occurs, we have Hracod, Raked, Ragged, Hrad, Rode, &c. &c.; and in another place we have Hrutan, To Rout, Stertere, Ronchisare. In Rout we perceive at

once the action of Stirring up the Ground, and the Noise. In EREUGO, (Ερευγω, Ructo, vel evolvo, quasi Eructando effundo,) ^Ructo, to Eructate, we see the idea of the Rough Noise; and L have shewn in a former page (601,) how it belongs to the action of Stirring up the Ground. In Vomis and Vomo this relation is manifest, as I before observed; but in the Ex=ERama, (Εξεραμα, Vomitus,) from Ex-Erao, (Eξεραω, Evacuo, expromo,) which is acknowledged to be derived from Ex and ERA, (Ex, Epa, Terra,) the Ground, we directly see the very metaphor which I have supposed. We see too in Erao, (Epaw,) the Er of Ereugo; and hence we perceive, how the forms 'R, 'RG, RG, pass into each other. In the same opening of Lye's Gothic and Saxon Dictionary, where HRUTan is, we have HRYsan, Movere, Quatere, and the Gothic HRUKJan, Cantare, Crocitare; HRUTH, Æstus, Commotio; HRUXLE, Strepitus. Let us mark the Croc in Crocitare, which belongs to Scratch, Grate, &c., and to Creat, the Ground. same leaf of Lye's Dictionary we have Hroc, the 'Rook, Cornix. Graculus, the Noisy bird; where let us note the Grac in Graculus. belonging to the Croc in Crocito. In the same column we have HRISTLan, (Sax.) To 'Rustle, Crepere, Strepere; HRISJan, (Goth.) Quatere, concutere; HRISEL, HRISL, &c. (Sax.) Radius textorius. which means the Rattling Shuttle; Hriscian, Vibrare, Vacillare, Stridere: HRIS, Frondes; where we have at once the idea of Commotion and Noise: HRISEHT, Setotus, which means the HIRSUTE object; HRISTenda, Astridulus; HRISTung, Difficultas Spirandi, where we find the sense of Noise in Stirring up or Drawing up the Breath; and HRITHian, Febricitare, which relates to the Agitation or Irritated state of the frame in the paroxysms In the same column we have HRIOH, Asper, concitatus, which Lye justly refers to HREOG, Rough; Hreoh, Rough. This will again shew us, how the forms AR, ARG, RG, pass into each other, HR, HReog, or hREOG, ROUGH. In the same column with . with Hrech, we have Hrech-full; and in the next Hrecw, Raw, and Hrecwian, To Rue; where in Rue and Raw we see how the form R^ has arisen. In the same leaf we have Hreran, To Rear, Agitare, Commovere, which is nothing but the Element ^R doubled to express the idea more strongly Hr=Er=an; and in ^Re-Ar we have still another form. In the same column we have Hrere, Rear, Rere, Crudus, Incoctus, which means what is done in an Agitated—Confused—Rough—Rude manner; and 'Hrere—Mus;' Rere—Mouse, Vespertilio, the Hurrying or Flitting about Bat, as we express it, and Hreth, Trux, Asper, Sævus; where we have the form ^RT, which brings us to Wrath, Rage; and thus we see, how by the most simple and natural process words have been formed, remote in form and meaning to each other, though all ultimately connected under the same fundamental idea.

I have already produced the Scotch HIRST, HURST, the HARSH spot, if I may so say, the 'Locus Hirsutus,' the Rough, Rugged Spot; as likewise the adjacent terms in Dr. Jamieson's Dictionary, HIRST, HIRSP, HIRSILL, HIRSLE. Dr. Jamieson explains HIRST by 'The Hinge of a Door,' which means the object making a HARSH grating noise. In the second sense we have Miln-Hirst, the place, "on which the cribs or crabs (as they call them) ly, within "which the mill-stone Hirsts or Hirstles," Rudd. "learned writer," says Dr. Jamieson, "properly refers to A. S. "Hyrr, Cardo. This he derives from Hyrstan, To Rub or make "a noise. But there is no evidence that the v. signifies To rub. "Its only senses are to murmur, and to fry or make a noise, as "things do when fried. To A. S. Hyrr, we may add Hearre, Isl. " Hior, Teut. Harre, Herre, id." The Saxon Hyrr belongs to the form 'R, and to the Latin Hirrio, &c. &c. Let us mark Cardo, and remember the English Card, To Card wool, which belongs, for the same reason, to Crates, Grate, Scratch, &c. &c. Mr. Ruddiman had probably authority for the sense of Hirstan,

to Rub, or Grate upon a surface, which, according to my hypothesis, is probably the original idea. Dr. Jamieson explains Hirsill or Hirsle, in its second sense, by "To Graze, Rub on;" where we have the genuine notion. In the first sense he explains it by "To move, or slide down, or forward, with a Rustling noise, "as of things rolled on ice, or on Rough Ground;" where let us mark the term Rustle, and remember Rattle, Ruttle, in which we have the form of the Element, when a vowel breathing is acquired between the two Consonants of the Radical, and lost before the first. Ruddiman justly refers the word to Hyrstan, and to HRISTL-an, Crepere; where, in the latter, we see how the forms 'RS and RS pass into each other. I am unwilling to record the conjecture of Dr. Jamieson, who is not contented with this indisputable derivation, but seems rather inclined to refer the word to the German and Belgic Aersel-en, Aarzel-en, retrogredi, q. culum versus ire, from Aers, podex. Our Lexicographer is moved to propose this conjecture, because a person is said to HIRSILL down a hill, "when instead of attempting to walk or run "down, he, to prevent giddiness, moves downward sitting." Here Hirsill means To Grate or Rub Roughly or Harshly against the Ground, in his motion downward. "To Hirsp" Dr. J. explains by "To Jar, to be in a state of discord;" where we have again the HARSH-Rough Noise; and this word he refers to the English Rasp and its parallel terms. The word Rasp is only another form of HIRSP, as in similar instances above produced of the form ^RS and RS passing into each other. The p is only an organical addition to the S.

Lye explains the Saxon Hyrstan by Murmurare and Frigere, where we alike see the idea of Scratching or Fretting upon a surface, so as to produce Noise; and by a metaphorical application we have likewise the Corrugation of a surface from such an action. The succeeding word to this term in Lye's Dictionary is

HYRSTing, Frixio, Frixura, a Frying or Parching, where we have the same idea of a Corrugated or Scratched Surface from the similar effects of a Scorching Heat. I have adopted the word Scorch for the purpose of observing, that this term is derived from the Scratched or Corrugated Surface. I have used the word Fretted on this occasion, because it is the appropriate term to express Scratching up a Surface, as 'To Fret channels on the Cheeks'— 'To Fret a grave;' as used by Shakspeare, and because it belongs to Frigere, Frixio, Frixura, and the Latin Frico, in which latter word the idea of Scratching over a Surface is fully manifest. I have adopted the word Corrugated, as here we have the Ruga, the Furrowed Ground, under the form RG. In the same column of Lye's Saxon Dictionary where these words occur, we have "HYRTH-ling, q. d. EoRTHling, EARTH-ling," says Lye, "Colonus, "agricola, terricola, arator;" where we are directly brought to the spot supposed in my hypothesis. The succeeding word is HYRTling-beri, which he explains by "Agricolarum burgus sive Hodie Irtlingborough, (vulgo Artleborough,) in agro "Northantoniensi." Perhaps the town in Norfolk, near which I am writing these observations, Attleborough, is derived from a similar source.

In the same column we have Hyrt, Hurt. Læsus. Hyrtan, "Refocillare, animare, confortare;" Hyrsian, Concurrere; Hyrst, Ornamentum. In Hyrt, Hurt, and Hyrsian, Concurrere, we have the more violent action belonging to our Element, of objects Stirred up, together, &c, or Struck together or against each other, &c. Hyrst, the ornament, may have the same meaning as Fretted in the ornamental work, called Fretted work; or it may belong to the more general idea of Dressing or cultivating the Earth. I shall shew, that Dress belongs to Dirt; and we know, that Dress equally applies to Cultivating the Ground, ("And the Lord God took the man, and put him into the garden of Eden

"to Dress it, and to keep it,") and to the ornament of Garments. We know too, that Colo means "To till or husband Ground," and "To deck, trim or adorn." The Saxon Hyrtan, Refocillare, animare, confortare, belongs to the idea of Stirring up or Exciting, in a metaphorical sense. If 'To Hearten' should belong to this word, we shall then understand the origin of Heart. The Hart, the animal, means the Stirrer up—the Pusher, &c. with his horns. I have conjectured, that the Latin h=Ortor belongs to the same idea of Stirring up or Exciting to action; and in h-Ortus we are directly brought to the Earth. I have already produced the German h=Urschen, Incitare, (p. 792); and thus we see, that these terms for Exciting to action should be considered probably, as more directly belonging to each other.

I have before had occasion to explain the term HURTLE, as at once expressing the ideas of Agitation and of Noise, (p. 632); and it is again necessary to produce it in this place. In the passage of Shakspeare, "The Noise of Battle HURTLED in the air," Mr. Steevens has observed, that "To HURTLE is to Clash, or "move with Violence and Noise." I have shewn, that HURTLE belongs to HURDLE; and that HURDLE conveys the same idea as Crates, which R. Ainsworth explains by "A bundle of rods, " wattled together.—A Dray or Harrow to break clods.—A Grate " of wood or brass." We here see, how HURTLE and HURDLE connect themselves with the HERSE or Harrow; and we moreover understand, that HURDLE and HURTLE belong to each other, just as the explanatory word Grate, the substantive, is connected with 'To Grate,' the verb, which directly expresses the idea of the Rough Noise, as attached to the action of Scratching upon a surface. The terms Grate, Crates, Crash, Crush, Scratch must be referred to each other, and to the action of Stirring up the Grit or Dirt of the Creat or Ground. Let us mark the term WATTLE, which is annexed to the same spot, nearly under the same idea, whatever

whatever be the Element, to which we should think fit to refer it. The term HURDLE might remind us of HUSTLE and HUDDLE. before produced; and I have observed, that HUDDLE, denoting Agitation and Noise, is justly applied by Milton in his expression, "The Huddling Brook." In Scotch, Hussilling signifies, as Dr. Jamieson explains it, "A Rattling or clashing Noise;" and the next word to this, in our Author's Dictionary, is "To "HUSTLE. To emit such a sound as an infant does, when highly " pleased, or a cat, when said to pur." Dr. Jamieson seems not to understand, that they belong to each other; but he refers the former to the Saxon HRISTLung, Strepitus; the Gothic Hrista, Rista, Quatere, and the English Rustle; and the latter to the Islandic Huisla, "In aurem susurrare." In Saxon and in Gothic, as I have before observed, Husel and Hunsa-Hunsle mean "Eucharistia, panis sacer, seu Eucharisticus;"-" Victima, Sacri-"ficium," to which belong our old words Housel'D, Un=HouselD, relating to the receiving of the Sacrament. If these words belong to the Latin Hostia, under the idea of the Sacrificed or Destroyed Victim, they must be referred to the terms of Violence, which are attached to our Element. Yet Husel-Gang means "Eucharistiæ "aditio, seu participatio," which might lead us to suppose, that these terms belong to HUSTLE, under the idea of the Crowd going to perform Religious ceremonies, or Mass, as it is called; where, in Mass, we have unequivocally the idea of the Mass—Heap or Crowd of people. While I am examining these words in Lye's Dictionary, I cast my eyes on Husel-Box, which he explains by "Eucharistica patina;" from whence the Commentators will be confirmed in their idea, that the Pax or Pix, which Bardolph stole, was the Pixis or Box, "in which the Consecrated Host was used " to be kept," as Theobald observes.

Terms denoting Noise, under | Husky-Heisch, &c. (English, the form 'S.

Hiss, Hiscean, &c. (Eng. Sax.) Hisco. (Lat.) Relating to the Cracked, Hacked surface, and to Noise.

Hispidus. (Lat.) The Hacked-Fretted or Rough surface.

Hushtiden. (Pers.) To Hiss, &c. wh-Isk, wh-Isp. (English,) To sweep over a surface.

wh-Izz, wh=IsT, wh-EESE, wh-Isper, wh-Istle. (Eng.)

Hush—Hist. (Eng. &c.)

HICK-up-YEX, YUX, &c. HAWK. (Eng. &c.) The Noise made by the action of Stirring up or Drawing up the breath—phlegm.

HUSTEN. (Germ.) A Cough.

German.)

HUSTLE. (Scotch,) A Rattling or clashing noise.

HUSTLE-HUDDLE. (Eng.) An of commotion and action Noise.

Huzza—Juck, Juckzen. (Eng. Germ.) A Noise.

Juckzen. (Germ.) To Itch, To Scratch or Fret upon a surface.

Iuzo, Iacho, Echeo. (Gr.) To Make a Noise.

IACHam. (Celt.) To Yell, &c.

HOSTE-HEIT, &c. (German, Eng.) The cry of Excitement, by carters to their used horses.

HOOT, ADO, AEIDO, UDO. (Eng. and Gr.) To make a Noise.

' HuE and Cry.'

HEUS. (Lat.) Ho! &c.

Among other terms, which are produced in the opening of Lye's Dictionary, where Hyrtan, Refocillare, appears, I find "Hysian, "To Hiss, Irridere, subsannare;" where we perceive the Saxon and English terms, denoting Noise, belonging to the form of the Element Element 'S, &c. without the r. I shall now examine more particularly the words, which appear under this form. An adjacent term to this is Hyspan or Hispan, Irridere. I find likewise Hyrwian, Exprobrare, injuria afficere, vexare; on which Lye observes, "Hinc vet. Ang. To Harrow;" and the preceding term is Hyrwe, Torriculum, facula; but Lye observes on this word, "At dubitat Somnerus annon idem sit cum Hyspe," Fornaculum. "Quærendum interea utrum non sit, Occa, Ang. An Harrow." The sense of the Furnace or the Torch, if the word has this meaning, is taken from the idea of Fire, as in a state of Excitement. The Latin Uro has the double sense of "To Burn," and "To "grieve, tease, vex."

The Etymologists produce the parallel terms to Hiss, as Hiscean, Ahiscean, Hischen, (Belg.) &c. &c. Adjacent to Hiss is Hit, where we see at once the action and the noise. Lye explains the Saxon Ahiscean by Irridere, and Hiscan by "Reprobare, "exprobrare." We have already seen the term Hosce, Subsannatio, recorded by Skinner, and its parallels Husce, "Contumelia, "contemptus, opprobrium, convicium," and the English HOAX, To jeer; and I have shewn, that they are derived from the same metaphor of Scratching-or Vellicating a suface, as in the Latin Perstringere. In the same column of Lye's Saxon Dictionary with Husce, we have Huæstrian, Murmurare, and HRYWsian, Deflere; where we again see terms belonging to our Element, denoting Noise, HRYSC, Irruptio, invasio repentina, impetus: Hyrsian, i. q. Hrysan, "Movere, quatere." The term between these latter words is HRYSEL, "Arvina, adeps, lardum," &c. The idea of the Greasy substances is derived from the Muddy, Greasy Dirt of the Ground, to which the idea of Agitation is equally attached. The explanatory word Greasy or Grease connects itself with Grate, Grit, &c. by conceiving the same object under different points of view. In the Latin Hisco we have

at once the Fretted—HACKED surface, and the Noise. R. Ainsworth explains Hisco, "To Gape, to open the Mouth, to speak.—"To Mutter;—To Chark, chap or open." Let us mark, that Chark belongs to Scratch, &c. In the Terræque Dehiscunt, we are brought to the primitive spot. The succeeding word in our Latin Vocabularies to Hisco is Hispidus, "Rough, bristly, shaggy, prickly;" and hence we shall learn, that this sense of Roughness is attached to the Rough—Broken—Fretted—Corrugated surface, according to my Hypothesis.

In Persian we have شتيدن Hushtiden. "To Whistle, Hiss, " or make any noise with the lips.—To preserve, keep any thing." We shall see whence this latter sense is derived, by considering an adjacent term in Mr. Richardson's Dictionary, the Persian Hish or Hush رهش, which means "Understanding,—Care, atten-"tion, study;" and which brings us to the sense of the Saxon HIGE, and (שׁהֹב, HISHTEN, "To roll round or involve;" where we directly come to the idea of Stirring up or about. There are various terms in the same opening of Mr. Richardson's Dictionary which are manifestly connected with the idea of Excited-Dis-The three preceding terms to the Persian turbed—Violent action. Hish are the Arabic Hes-Is שתואון " Broken into large pieces.— " A Whisper, Muttering."— Hes=Hesit شهسية " Muttering, "whispering; the rattling of a necklace or other jewels, of armour, "&c., the Noise of a man, &c. moving himself in the night, " especially when lying among leaves.—The winding of a stream, "A Butcher," where we شهاس "A Butcher," have the sense of HACK=HACK-" Expeditious," &c.-The succeeding term to Hish is the Arabic شش Незнян, "Driving the " leaves off trees with a stick, &c.-Light, nimble, chearful, brisk." In the preceding column we have the Arabic هزهز Huz=Huz.— " Rapid, (River.) - Swift, active, brisk." - قوهون Hez=Hezit, " Moving.—Sedition, tumult, intestine war,"—غزيز HEZ-Iz "Mak-"ing

" ing camels brisk and travel fast (by singing to them)-Sound.-"The whispering or murmur of the winds, especially through "trees.—The rolling sound of thunder." In Welsh, HWTT10 means "To Hiss out, to explode;" and the preceding term to this, in Mr. Richards' Dictionary, is Hwr. "Away, come out "there, get thee gone; fie, fie!" In the same column we have "Hwswi. A House-wife, a thrifty woman; Hwsmon. A Husband-"man, also a good Husband, or thrifty man."-"Hwstr. Morose, "forward, that will not be intreated, inexorable." We should imagine, that the Hwsmon was the House-Man, and Hwswi the woman belonging to the House. Yet perhaps these words are attached to Hwsrr, Morose, which is not directly connected with the House, but belongs to the terms of Excitement, under the idea conveyed by HARSH. Thus, then, the terms HwswR and the Hwsmon, may mean the Sharp-Severe people in the management of their affairs. In the same column we have "HWRDD, An "assault, onset or attack," &c., which I have before produced. In the preceding column I find "HwDE. (an interj.) Here, take it; 'also, Come on then, go to.-Hwdwg. A Bugbear;" where we have terms of Excitement,-Hwck. A Sow-or Hog, &c., which I have shewn to mean the Hougher or Router up, and Husting, "To Whisper, to speak softly, to mutter;" which brings us to the words now under discussion.

Let us mark the explanatory term Whisper, and remember other terms for Noise, under kindred forms, Whizz, Whist, Whistle, Wheese, &c. &c. The Etymologists refer Whisper to the Saxon Hwisprian, the Belgic and German Wisperen, &c.—Whizz to Hiss, Whist to Zitto, (Ital.) Hwister, (Dan.) Susurro;—Whistle to the Saxon Wistlan, &c., the German Wispelen, &c., and Wheese to Hweosan, (Sax.) Difficulter respirare;—Expumare,—Hwesa, (Swed.) Sibilare; Hwith, Hwitha, (Sax.) Aura; all which words are supposed to be formed from the sound "à sono ficta."

From

From Whistle we are brought to Fistula, where we see how these forms connect themselves with each other. Dr. Jamieson in his Scotch Dictionary explains Whish, Whush, by "A Rushing or "Whizzing sound;" and 'To Whish' by "To Hush." We cannot but perceive, how these terms belong to Hist, Hush, &c.; and we see, that they are all connected with the idea of Excitement, whether we suppose Hush, &c. to be the gentle Noise, by which Attention is demanded, or whether we suppose, that some of the terms for Attention signified 'Be Roused or Excited to Attention,' as I before suggested. The game of Whist is the game in which Silence or Attention should be observed. The succeeding word to Whisht, "Hush, be silent," in Dr. Jamieson's Dictionary, is WHISTLE, "Change of money;" where our Author refers us to the Scotch Quhissel, under which he properly produces, as parallel, the Belgic Wisseln, and the German Wechseln. My German Lexicographer explains Wechsel by "Vicissitude, Alteration," &c.; where we see, how it belongs to Vices, of which relation Junius, among others, bas been aware, who produces Wissil, "Scotis "Mutare, emere," the same term as the Whistle in Dr. Jamieson. We now see, how the word Whistle, denoting at once Noise and Change, brings us to the common idea of Agitation-Com-The same fundamental sense still continues to motion, &c. operate, and to produce without error these varieties of meaning. The terms for Agitation - Noise, &c., under the Element FSL, must be considered in another work. We have seen however, under the form ^DL, ^SL, &c., the terms HUDDLE, HUSTLE, (Eng.) the Scotch Hussiling, A Rattling Noise; Hustle, the Noise of pleased Children, &c.

In the same page of Dr. Jamieson's Dictionary, where Hustle is, we have Husto, Husta, or Hosta, "used as an expression of "suprise, and perhaps of some degree of hesitation:—Heck!" Husto, quo 'Habbie," says Dr. Jamieson; where, in Heck, we have a similar term, Huzze, "To lull a child, S. pron. with so

" strong a sibillation, that it cannot properly be expressed in " writing."—" Нитнегіп, A slight shower, or wetting mist," which is derived from the idea of the Noise. The next word is HUTHerin, "A Beast between the state of a cow and a calf, a young heifer;" which Dr. Jamieson has justly referred to Hudderin, "Slovenly. " It is generally applied to a woman, who is lusty and flabby in "her person, or wears her cloaths loosely and aukwardly." The idea of Agitation and Confusion brings us at once to the 'Disorderly 'appearance—The Rough—Coarse figure.' In the same page of Dr. Jamieson's Dictionary, where Hutherin is, we have Hur, "a Fat, over-grown person;" Hur, the Cottage; Basket; Huttit, Hated, &c.; Huttis Ill, Some kind of Disease; HUTTOCK, a Cowl; in all which, HuT has the same radical meaning, and is derived originally from the same action. The Hut, the Cottage, has been already explained; and in the sense of the Basket we have the secondary idea of the Enclosure. HUTTOCK is the Enclosure of the dress, as in Hoop. I have shewn, that HATED or HUTTIT belongs to the metaphor of one person being Stirred up or about, if I may so say, Routed or persecuted by another. We shall not wonder, that HUTTis Ill, "some kind of "Disease," is found among terms denoting Agitation, or a Confused-Disorderly state of things, when we recollect, that an appropriate word for Disease is the very term Disorder. moreover, in the same page of Dr. Jamieson's Dictionary, Hushion, Hushel, Hush, and 'To Hush.' The term Hushion has been explained by a Cushion; but our Author supposes it to be the same as Hoeshins, "Stockings without feet;" which I shew in another place to be the same as Hose, originally denoting the covering for the Hock, the part adjacent to that, which Houghs up the Ground. " Hushel, An Auld Hushel," means any vessel or machine that "is worn out;" and Hush means "The Lump, a fish." That these words are somehow connected with the idea of Agitation-or a Disorderly state of things, as referring perhaps to the condition

and appearance of a worn-out or misshapen object, will be manifest from the term Hush, used as a verb, which actually denotes Agitation-Commotion, &c. Dr. Jamieson explains 'To Hush' by "To rush, To Hush in, To rush in, to make one's way with force "and HASTE." Let us mark the explanatory HASTE, which is only another form of Hush; and let us note moreover another explanatory word Rush, which is attached to the form RS, and which I shall shew to belong to Rout, &c. I have often found it expedient to interrupt the regular course of my Enquiry by the explanation of certain terms, not expressing the train of ideas immediately before me, when such terms appeared to connect themselves more particularly in form with those words, which it was necessary for me to produce in the illustration of the subject directly under discussion. The Reader will hence more fully understand, how the same fundamental idea may furnish the various significations of words, which on the first view appear to have no relation in sense to each other.

I have supposed, that these terms for Noise, as Whiz, &c., are connected with the action of Stirring up—Scratching up or over a surface; and we accordingly find, under a similar form, the word Whisk, Scopula, 'To Whisk over—about,' &c.; where we actually see a term which relates to the action of Sweeping over a Surface. The word Whisp, which Junius explains in one sense by "Straminis manipulus leviter contortus ad aliquid abstergendum," comprehends two notions belonging to the same train of ideas, as it denotes the substance, which is Contortum—what is Wisked round or about, Wound round or about in its form, and likewise what is used 'Ad Abstergendum,' or to Whisk over a Surface. This union of kindred ideas in a word is perpetual. The terms denoting Twisting—Rolling or Winding about, are commonly derived from the notion of Stirring or Turning up—about, &c. any surface, as in Torqueo, Volvo, &c. &c. We shall

now understand, that the exhalation from damp Ground, which is called a "Will of the Wisp," means the object which Whisks or Whisps nimbly about, here and there. Lye has placed Wisk, Scopula, in a separate article to that, in which Junius produces the phrase 'Wisk away,' which, as he says, means in Scotch, "Repente se alio proripere atque ex oculis hominum amoliri;" though we now see, that these two senses represent the substantive and the verb belonging to the same idea. Dr. Jamieson however justly explains Wisk by "To Hurry away, as if one "quickly swept off any thing with a besom." The succeeding term to Wisk, in Lye's Junius, is Wysnand Wyndis, which, as Junius tells us, is a Scotch phrase, corresponding with Chaucer's expression, "Whisking blastes." Lye however imagines, that Junius is wrong in his idea about Wysnand, and supposes, that it signifies "Aridus, Marcescens," from the Anglo-Saxon Weosnian, Marcescere; to which belong the Swedish Wisna, the Islandic Visna, &c.; and, as he might have added, the English Wizen. These ideas cannot be separated. The term of Excitement, which expresses the action of Stirring up a Surface, so as to make it in a Rough, Corrugated, or Wrinkled state, as we express it, brings us directly to the Wrinkled or WITHERED form. Thus we perceive, how WITHER is attached to the term of Commotion, Weather, though not for the reason which the Etymologists give us, "ut illa proprie dicantur To Wither, que post exactam "florescendi tempestatem paullatim flaccescunt atque elan-" guescunt."

The term Whease, which I have just produced, conveys the idea of the Noise, which accompanies the action of Stirring up, or, as we express it, of Drawing up the breath. The Wheasand, the Throat, is that which makes a Wheasing Noise. In the term Hick-up we have likewise the Noise, with the idea annexed of somewhat Stirred up—or of a Twitching—Catching—Hacking motion.

motion, upward. This is precisely the sense, which I have supposed to be originally affixed to these words. The preceding term to this in Junius is Hichell, Hamus, Pecten; which means 'The Carder—the Teaser—Twitcher, or Scratcher of Flax.' The Lexicographers refer Hick-up, Hick, Hicket, as Junius has it, to the English Yex, the Saxon ge-Ocsung, the French Hoquet, the Islandic Hixte, the Danish Hicke, the Belgic Hick, Hickse, Huckup, the Barbarous Latin Hoqueta, the Welsh Ig, Singultus; and they produce, moreover, the Saxon Geoxa, and the German Gaxen, Gixen. Skinner observes on these terms, "Omnia à sono ficta;" and Junius produces the French Hocher, Quatere; where we see the idea of Agitation belonging to this race of words.

In Skinner, the succeeding word to Hickock, Hicker, as he expresses it, is Hick-wall, or Hick-way, "Vireo, Lynx, Picus, "Picumnus, Picus avis;" which he derives from Hicgan, "Moliri, " Niti, Perscrutari, quia sc. rostro, magnà vi impacto arbores et " parietes pertundit." Here Hick=wall means the Hacker-Fretter or Pricker upon a Surface. Junius and Skinner have other articles under YEX and YUX, bearing the same meaning as HICK in Hick-Up. Hiccius Doctius is a quaint mode of expressing in a Latin form a Drunken man, as if to conceal the accident The term Hiccius denotes the person, which had befallen him. who has the Hick-up; and Doctius or Doccius has no meaning, but is used as having a similar sound with Hiccius, and a Latin The Doctius however, though intended to have termination. this coincidence in sound with Hiccius, may still allude to Doctus, under the idea of the Wisdom or Learning, which persons in this situation often assume. The English term HAWK, Screare, is another form of these words, denoting Sound, with the idea of Stirring or Raising up the phlegm, as we express it. The Etymologists refer us to the German Hauchen, Inhalare, Anhelitum Efflare; the Danish HARCKer, Screo; and the Welsh Hochio.

Mr. Richards explains Hoch by "A HAWKING or Humming." Hawk, the Bird, is contracted from Havock, and belongs to the Element 'V. The HAWKER or Pedlar might mean the person who HAWKS or Cries things about; but I have given other conjectures on this word in another place.

In German, Iuch, Iuchhe, Heisa, correspond with our word Huzza; and Juckzen, the verb, means "To Huzza, cry Huzza." The succeeding term to Iuch is Iuch-Art, "An acre of Plough-"Land;" where we are brought to the spot supposed in my hypothesis. The next word is IUCHten, "A Juff, a Russia-Hide;" where we have either the idea of the Surface—Top— or Covering, I have shewn, that Hide means the Suror the Rough Surface. face-Top or Covering, belonging to Hide, the portion of Land, the Surface of Land.—We are not only brought to the spot, from which I have supposed Iuch to be derived in the adjacent IUCH-Art; but we have another adjacent term, which indisputably connects the idea of the Noise expressed by Iuckzen with that of Scratching or Fretting upon a Surface. Jucken signifies "To ITCH " or Fret." I have shewn, that ITCH is only another form of the German word. Yuck, in Lincolnshire, as Skinner observes, has the same meaning. Again, in German, IAUCHZen means "To " shout, rejoice, exult, triumph, cry Huzza with clapping your " hands," as my Lexicographer explains it. The preceding word to this brings us likewise to the idea supposed in my hypothesis. The preceding term is IATen, which means "To weed-IAT-Haue, "the Grubbing-Ax;" where, we see, the word means To 'Scratch 'or Grub up.' In English, 'To Yox the Dogs,' relates to a cry of Encouragement, where we have at once the idea of Noise, and that of Excitement.

In Greek, Iuzo, (Iuζω, acutum clamo, strideo, cano,) means a Shrill cry. The adjacent word Iugks, (Iuȳ̄̄̄, Motacilla, avicula veneficis in usu, Illecebræ amoris; Illecebræ quævis,) the Wagtail,

tail, belongs to this race of words, as denoting Agitation, both as it relates to the Tail-wagging bird, and to the Excitement of passion. In Greek too, IACHO and ECHeo, (Iaxw, Vociferor, clamo, Hyew, Sono, resono,) denote Noise; and to the latter word, we know, Есно belongs, (Нхи, Echo, Sonus reciprocus, vox repercussa,) to which terms of Noise we must add ADO, ALIDO, UDO, (Adu, Audu, Cano, carmine celebro, Ydu, celebro, cano, dico.) IACChus, the Mystic title of Bacchus, belongs to IACHO, (Iaxa,) as some understand; though various other conjectures have been formed respecting the origin of this term. These words are derived from the Celtic IACK, A Yell, scream; IACHam, "To "Yell, scream," as Mr. Shaw explains them. The succeeding word to IACH, in Mr. Shaw's Dictionary, is IACH=dar, "The "Bottom, foundation, lower part, nether;" where we are brought to the Ground, the Spot, from which, as I suppose, these terms were originally derived. In the same column we have "IAGH, "An Island," which means, as I conceive, Land. In the preceding column we have I. Low.—An Island; where the radical form C, G, &c. is lost.

In the same column of my Greek Vocabulary, where Iacho, (Iaχω,) is, I find Iatt=Atai, (Iattatau, Interjectio lamentantis, Heu!) and again, Iatt=Atai=Ax, (Iattatau, Interjectio, Heu! Eheu! ab eod.); and we might now conjecture, that these terms, with the various Interjections belonging to our Element, At=At, (Lat.) Heus! Heigh-Ho! Aachee, (Fr.) Ach, (Germ.) &c. &c., are attached to the race of words denoting Noise. I have introduced on former occasions these Interjections with terms signifying This—That! and with those, which express actions of Excitement:—We shall now understand, from the tenour and spirit of these discussions, how the race of words, called Interjections, may alike attach themselves to terms conveying these ideas. The consideration however of such words would soon involve

involve us in the mists of Theory; and we must be contented to mark those, in which the Consonant form exists, and which seem unequivocally to belong to other terms, performing regular and efficient parts in Language. When the Consonant has disappeared, it is in vain to enquire about the origin of such terms. In many cases the ordinary opinion is just, that the Interjections are mere vowel sounds, which are not to be referred to any terms within the pale of Language. The Etymologists have supposed, that Ho! in Gee=Ho! belongs to the German HOTTE, "A Cart-"man's crying, to make his horses turn to the right;" which appears in the Consonant form, and which, I think, we cannot help referring to the terms expressing Noise and Excited actions. Le Duchat says, that the French AACHEE, "Detresse," is a substantive formed from the interjection Ah! and he produces the following quotation as authority for its use. "Or jugez quelle AACHEE "il a d'ouyr telles novelles." In HOTTE we have the idea of Noise and Excitement. The verb Hotten means To Advance or be Urged forward, "Es will nicht recht HOTTEN, It will not "go or advance rightly." HEIT is a term used by Chaucer, with the same meaning, as I have before observed. "HEIT," says "Junius, "Chaucero est particula vel interjectio, quâ utuntur equos " in carro jugatos minaciter propellentes."

- " Depe was the way, for which the cart still stode;
- "This carter smote and cryde as he were wode,
- "HEIT Scot, HEIT Brok, what spare you for the nones?
- "The fend you fetch, qth he, body and bones."

I have before produced Hest, be-Hest, a Command, which the Etymologists have justly referred to the German Heissen, "To bid, "tell, command—To Call a body or thing,"—the Belgic Heiten, the Saxon Haten, Vocare. I have shewn, that these words have been derived from the idea of Exciting persons to action; and I may add, that in this case the notion of Excitement cannot be separated from the office of the Voice in Calling. We have seen,

that

that Heissen occurs among the terms relating to Excitement, Heiss, Hot, and Heischen, To Ask; and to Noise, Heisch or Heiser, Hoarse, as I have before observed.

I have shewn too, that هيبع Hij is a term used " in crying to "Camels;" and that the same word signifies "Raising (dust,) " provoking (to Anger). Making an attack.—A Battle, a com-" bat.—Perturbation, fury, agitation, intoxication." A word under the same form means in Persian, "Tearing up, Instigation;" where we have the genuine sense of the Element. Arabic, Heita, Heiti, Heitu and Hite means "Come "hither, approach;" and the same word HEIT signifies "Low Again, in Arabic, هيط HEIT means "Calling out, " Crying, vociferating, being tumultuous.—Arriving at, approach-"ing near." In the preceding column of Mr. Richardson's Dictionary we have هيش Неівн, " Motion, commotion, tumult.— "Loquacious, verbose;" and the term before this is هيس Heis, "Treading down, trampling upon, beating to pieces.—A plough, " any instrument for cultivating the ground. HEISI, Cheer up! "Be of good courage! success to you!" In this word we have every thing, which can confirm my hypothesis. In the same opening of Mr. Richardson's Dictionary we have the Arabic هيا Heya, Ho! Holla! Hark you!—Нен, аф "Ha! Ha! "—the Persian (Her, "Ho! Hark you! Holla!—Have a care! "Softly! "Touch it not!—A Tumult, a crowd, a multitude;— " אם He, The Sound of the breath;" the Arabic פאבן HYKH, " Used in making camels kneel; HUJEKH, A camel braying, when " ordered to kneel; فيد Heid, Crying to camels," Under this word Mr. Richardson refers us to Had, هاد which he explains by "Moving, disturbing.—HADD, Sound, especially the roaring or " murmuring of the sea."

In French, HUET is to HOOT after a person; and HUE is "A "term used by carmen, &c. to their horses, when they chuse to

" have them go forward, or rather turn to the right." The French likewise say, Hur=Huat, "Il n'entend ni a Dia, ni a Hur=Huat, "He does not know his right hand from his left." In Hue the radical consonant is lost; but in the adjacent word Hucher, "To "Hallow, to call or shout to," and Huchet, "A Huntsman's or " Postboy's Horn," the Consonant appears. In old French, Huz and Hutin denote Noise, which the Etymologists refer to Huesium or Hutesium. In French, Hoyer means "Quereller, tanser, et "quelquefois appeller," as Le Duchat explains it, who derives it from Vocare. That HOYER, denoting Noise, is connected with the idea of Scratching up the Ground, will be manifest from the word preceding it in Menage, which is HOYAU, the Hoe or Hough. In the French word we see, that the Radical Consonant is lost, as in the English Hoe; but in the mode of writing the same word Hough, it is preserved. The succeeding word in Menage to Hoyer is Huau, the Owl, which probably belongs to Hoyer, denoting Noise. The word Screech, in Sreech-Owl, belongs In the French term however a difficulty occurs. The Huau is interpreted Hibou, where Hibou belongs to the Element 'B; and the Huau may be quasi Huav. In HUETTE we might think to find a proof, that these words belonged to our Radical 'T; but the Huette might be formed from Huau by the construction of the Language. The French Etymologists derive HUCHER from an old word Hus, a Cry; and they remind us of the Latin Heus, and the English Huzza.

Skinner and Junius have the word Huzz, which the former explains by "Obstrepere, Murmurare, vox procul dubio a sono "ficta;" and in another article he produces Hase or Hauze, which, as he says, is "Nimio clamore obtundere, perterrefacere;" where he justly reminds us of the Saxon Has, the German Heiser, Heischer, "Raucus, vel Heischen, Postulare, Flagitare, vel Interject. "minatoria Haw, vel à Teut. Hase, Stultus."—The succeeding word

word to Huzz, in Skinner, is Hy, or Hie, Hie on, &c.; which he explains by "Festinare, Properare." Here the Radical Consonant is lost; but Skinner justly refers us to the Saxon Higan, Contendere, Festinare, where the Consonant is found. In Hie we have the Cry of Excitement. To Hie, or High, as it might be written, is To Egg a person on. I have before shewn, that Egg, Eggian, (Sax.) must be referred to the idea of Excitement, as connected with Stirring up the Ground, in the Saxon Egean, Occare. I take every occasion of bringing the Reader back again to the primitive or prevailing idea.

Let us mark the explanatory term adopted above, the English Hoot, which must be referred to this race of words. Skinner refers Hoot to the French Huer, Huyer, Exclamare, with the remark, "utr. à sono fictum." Lye reminds us of the Welsh Hwhw, Bubulare. We shall now understand, as we have before seen, that Hue, in Hue and Cry, belongs to this race of words. The Etymologists have justly referred us under this term to Hoot and Huer. In Hue, as we see, the Radical consonant is lost, as in Hew, which belongs to HACK, and in Hue, Shape—Form—Colour, &c., which I have shewn likewise to belong to HACK.

Junius reminds us, under "Hue and Cry," of the barbarous Latin word Hutesium, where the true form appears, as in Hoot. The term Utis occurs in Shakspeare, and means Breaking Out into Noise or Uproar. In the Second Part of Henry IV. (A. II. S. 4.) one of the Drawers at the Tavern in East-Cheap says to the other, "Sirrah, here will be the Prince, and Master Poins anon: "and they will put on two of our jerkins, and aprons; and "Sir John must not know of it: Bardolph hath brought word;" to which the other replies, "By the Mass, here will be old Utis: "It will be an excellent stratagem." The Commentators are here contented with the observation of Pope, who observes, that Utis is "an old word yet in use in some counties, signifying a merry "festival,

"festival, from the French Huit, Octo, ab A. S. Eahta, Octavæ " festi alicujus. Skinner." Mr. Steevens properly observes, that "Old, in this place, does not mean ancient, but was formerly "a common augmentative in colloquial Language. Old UTIS " signifies Festivity in a great degree." In Chaucer we find OUTHEES, another form of UTIS. (See Mr. Tyrwhitt's Note on Chaucer, ver. 2014.) Perhaps in UT=Is, HUT=Es-ium, &c., the Element 'T, 'S, &c. is doubled in order to express the idea more strongly.—I shall here close my observations on the race of words, which are found under the forms 'RS, 'S, &c. denoting Noise-Sound, &c., as I trust, that the terms, which I have already produced, will be fully sufficient to illustrate the force of my arrangement, and to establish the principles of my hypothesis. I shall now proceed to consider the form of our Element RC: and the Reader will perpetually find, in this part of my discussion, terms denoting Sound, connected with the same train of Some of these I have already produced; but they will be best seen, when they are examined among the words, with which they are inseparably blended. The writer finds himself frequently embarrassed in the choice of his arrangement, when he endeavours to balance the degrees of advantage, which might be derived from the exhibition of certain terms in different portions of his work. I have laboured to adopt that species of arrangement, which may form the strongest impression on the mind of my Reader, by the different modes of collection and separation, with all the diligence which I have been able to exert.

Amidst all the views, under which the Mechanism of Language may pass before our eyes, we shall still contemplate the same proofs of that exquisite process, by which all its operations are so faithfully and efficiently accomplished, proceeding on the same principles,

principles, and directed to similar purposes. We shall behold the various races of words under the same Element, while they assume innumerable forms, and perform innumerable offices, all preserving, in distinct and marked characters, their general refation, and their peculiar affinities, without error and without con-We may there trace clearly and unequivocally those fusion. 'strong conections,' and those 'nice dependencies,' by which the whole and its various parts are discovered to be indissolubly united with each other, arranged in the most consummate order, uniformity and regularity. In considering the plain and impressive facts, which we are enabled to ascertain by a successful enquiry into the secrets of Language, we shall alone perceive those mysterious workings of the Human mind, which we have in vain endeavoured to learn amidst the unprofitable researches of Metaphysical refinement. As we involve ourselves in the toils of our own reason, the faculties become lost and bewildered; and we continue to wander in the labyrinth, which we have raised around us, without a clue to guide, and almost without an object of pursuit. We seem to 'bend our eyes on vacancy,' and all our disquisitions appear to be wasted in a vain and fruitless enquiry, where there is no beginning and no end, where no facts have been proposed, on which our reasoning could be originally established, or to which it might be ultimately referred. It is in the treasures of Language alone, that the great materials of knowledge are deposited, which relate to the operations of the Human mind in forming and propagating ideas. The metaphysical deductions, which are derived from the study of Language, duly and diligently pursued, are founded on the evidence of examples, which accompany the reasoner at every step of his progress, and which directly conduct him to the object of his research. When we cast our eyes over a series of words, fully unfolded, under all their secret bearings and relations to each other, we are directly admitted

mitted into the inmost recesses of the Understanding, and discover the hidden springs, from which its movements have been impressed. In this series of words we at once contemplate a continued series or chain of ideas, with a clear and distinct view of the various links, of which it is composed; as they are regularly generated through the successive stages of their progress, from their original source to their final and perfect completion. In the artifices of Human Speech we are presented with a series of facts, which may be distinctly traced—minutely detailed, and unequivocally exhibited. Hence, and hence only, can the workings of Intellect be described with clearness—precision and fidelity; and when we have successfully unfolded the various parts, of which the great Machinery of Language has been formed, we shall then probably have at last discovered all, which can ever be known or taught on the Mechanism of Mind.

CHAP. IV.

R ^. C, D, G, &c., or RC, RD, RG, &c.

Terms, expressing the idea of Stirring up-Breaking up-Scratching up—over or about, a surface; as connected with an action performed on the Ground, or EARTH, (Eng.) aRETZ, (Heb.) Rus, (Lat.) &c., with various degrees of force and violence, as Rout, ROOT UP, RAKE, RAZE, RADO, &c. &c. &c. To these are attached terms denoting Furrows, Tracks, &c., as Ruge, (Lat.) RUTS, RIDGES, ROUTES, ROADS, &c. &c. From the idea of the surface Broken up, or Scratched up, into Ruts, Ridges, we have terms denoting what is Rough, Rugged, Ragged, &c. To the action of Routing up the Ground is annexed the idea of Commotion—Agitation—Tumult—Violence, &c.; and hence we have such terms as Root, Rush, Rash, &c. Hence too, we find a Race of words, which signify by metaphorical application to Rout-Stir up, Agitate-Vellicate, &c. the feelings or frame, as Ir-RITATE, RAGE, &c. &c. With terms, which express the action of Scratching and Grating upon a Surface, or of ROUTING-RAKING up the Ground, &c. are connected words, denoting the Grating, Rough Noise; and hence we have such words as RADO. Rudo, Rugio, (Lat.) RATTLE, Rustle, (Eng.) RACLER, (Fr.) Terms, which are derived from the action of Routing out a surface, in order to Clear off or RID away any incumbrances inequalities, &c., so as to make it Level, Straight, or to reduce it to a Fit-Proper-RIGHT direction or state; to make it Fit-**Proper**

Proper and Ready for any purpose, as Rid, Right, Ready, &c. &c. Hence terms relating to a Right—Proper—Arranged, well Regulated state of things, in Laws—Morals, &c. &c., as Right, Regulate, &c. (Eng.) Rectus, Rego, Regula, (Lat.) &c. &c. From the form RGL, RgL, we pass into the form RL; and hence a Race of words has been generated under the form RL, as Rule, from Regula, &c. &c. To the form RGn, or RgN is directly attached the form RN; and hence has been derived a Race of words under the form RN, as Runco, (Lat.) Rukane, (Purayn,) &c. &c.

RC, RD, &c.

Words expressing the idea of Stirring up—Breaking up—Scratching up—over or about a surface, as connected with an action performed on the Earth, aRetz, &c. (Heb.) Rus, (Lat.) &c. &c. Terms derived from or connected with such words, conveying the idea of Commotion—Agitation—Violence—Tumult—Noise, &c.

Rout, Root up, wRoeten, Reuten, Reissen, Roeden, &c. &c. (Eng. Sax. German, Belg. &c.)

RAKE, RAZE, RASOT, RADO, &c. (Eng. Fr. Lat. &c.)

RUTTUM—RUTELLUM. (Latin,)
Instruments for Stirring up
the Dirt, as a Mattock.

ROST rum, RUG chos, RIS, ROSTELLum, RUSSEL, &c. (Lat. Gr. Lat. Germ. &c. &c.)
The Snout, that which Routs up the Dirt.

ROOTLE, or wROOTLE. (Eng.)
To Rout up the Dirt.

Route, hRudan, Rudo, Rugio, Regko, Rustle, Rattle, Racler, &c. &c. (Eng. Sax. Lat. Gr. Eng. Fr. &c.) To make a Noise.

Ruglo. (Welsh,) To Shovel up Dirt, To make a Rattling Noise.

RUSH, hREOSan, RUO, RUTUM. (Eng. Sax. Lat.)

RASH, ROUT, RIOT, RAGE, ROISTerer, ROGUE. (Eng.) &c. &c.

Regnuo, Rasso, &c. &c. (Gr.)
To Break, Dash to pieces.

eRis, Rixa. (Gr. Lat.) Contention.

&c. &c. &c.

In this portion of my Work I shall exhibit a series of facts, which will illustrate, as I trust, in the most impressive and unequivocal manner, the principles of the System, which I have undertaken to establish. Through other parts of my discussion

I may hope to have conciliated the attention and conviction of my Reader in the great and leading points of my argument, whatever difficulties may have sometimes arisen in his mind, from the consideration of particular words, in their more immediate relation to each other. On the present occasion, however, these difficulties will, I think, be considerably diminished, if not altogether cleared Even in the examination of Races of words and removed. which ultimately belong to each other, we shall find, that each of these Races in assuming a distinct form will exhibit likewise a distinctive peculiarity, and may afford a different degree of evidence, especially to those, who have not yet divested their minds of the received conceptions on the subject of Etymology. In the Race of words, which I am now about to examine, the form, which they assume, will, if I do not deceive myself, appear at once to the eye and the mind of the Reader, as a compact and retentive form, if I may so express myself, under which he might conceive or expect to be included a series of terms, ultimately belonging to each other.—He will moreover manifestly see some strong impressive words, unquestionably attached to each other, which relate to the same train of ideas, and which express Actions of Violence—Commotion, &c., as connected with an action of Violence or Commotion, &c. performed on the Ground.—Though he will perceive, that a great variety of senses is to be found under this Race of words, and that all our sagacity and diligence must be oftentimes exerted in order to discover the connexion of these senses with the fundamental notion; yet he will not fail to observe in general the same vein of meaning pervading the whole Race, in the most marked — distinct and unequivocal characters.

I shall consider, in the present Chapter, that Race of Words, which belongs to the form of the Element R.—C, D, G, &c., or RC, RD, RG, &c. when there is no vowel breathing before the R;

but

but when a vowel succeeds the R, and is inserted between that letter and the second consonant C, D, G, &c., I have found it frequently necessary in the preceding part of my Work to introduce words, under this form, RC, RD, RG, &c. with no vowel breathing before the R; and to shew, how they are connected with words, which belong to the form 'RC, 'RD, 'RG, &c. when the vowel breathing precedes the R. This change from one form to the other is most simple and obvious. We shall at once see, that when a vowel breathing exists between the two Consonants R and C, &c., the process is nothing but the loss or the addition of the vowel breathing before the R. Thus it will be instantly understood, how ERUTHros, ORYZa, EREUGO, or eRUTHros, oRyza, eREUGO, (Epubeos, Opula, Epeura,) RED, RICE, RUCTO, have passed into each other; and it is acknowledged, that the following terms are immediately connected together by the same process; as WROTAN, (Sax.) and ROUT; HREAC, (Sax.) and Rick; Hristlan, Hruxle, (Sax.) and Rustle; Hrug, (Sax.) and Rough; Hreosan, (Sax.) and Rush; Rræcan, (Sax.) and Reach: HRACOD, (Sax.) and RAGGED, &c. &c. &c. My hypothesis is, that the Races of words under these two forms 'RC, 'RD, &c., RC. RD, &c. with and without the vowel breathing before the R. should be considered as ultimately belonging to each other; and that they are remotely or directly connected with terms under the same Elementary characters, denoting the Ground, with the actions and operations performed on it; as EARTH, ERDE, ARETZ, &c., HARROW, HERSE, HARCKE, &c. &c., which I have already discussed, and RAKE, ROUT, ROOT—up, &c. &c., which form the subject of the succeeding Enquiry.

Though I conceive, that the words under the Elementary Character AC, &c., RC, &c., with or without the vowel breathing before the R, are all ultimately to be referred to each other; that

is, though there are obvious points of union, at which, as we have seen, the races under both forms pass into each other; yet still we may consider the Race under the form RC, &c. with no vowel breathing before the R, when it is once constituted, as generating by its own powers, if I may so express it, a distinct class of words, conveying a peculiar train of ideas, by which they may be distinguished from the words under the form 'RC, where a vowel breathing precedes the 'R. I find it necessary to anticipate a few terms belonging to the form RC, without a vowel breathing before the R, from which the Reader will be enabled to perceive the general turn of meaning, which pervades in various degrees the Race of words under that form. I have found it necessary to anticipate these terms, because there are no synonimous words in our Language, which so aptly express the peculiar train of ideas, conveyed by that Race; and we shall at once see, how strongly those terms express the idea of Stirring up—Excitement— Agitation, as connected with an action referred to the Ground or EARTH, (Eng.) aRETZ, &c. (Heb.) Rus, (Lat.) &c. &c.

The terms Rout, Rake, Raze, Root up, belong, we see, to the form RC, &c.; and they bring us directly to the action of Stirring up the surface of the Ground, Earth, aRetz; By such an action, we know, are formed Furrows—Tracks, &c.; and hence we have Ruts, Ridges, Routes—Roads, &c. &c. From the idea of a surface so Routed or Rooted up in Ruts, Ridges, &c. we pass into the idea of that, which is Rough, Rugged, Ragged or Broken, Rude, &c. &c. The action of Routing up the Ground brings us to a race of words, which express Commotion—Agitation—Tumult—Violence, &c. &c.; and hence we have Riot, Rush, Rash, &c.; as likewise to a Race of words, which convey the idea of Disturbing, Annoying, Aggrieving, as Ir-Ritate, Rack, &c. &c. The Noise, accompanying the action, which we express

by 'To Rout up—Rake up the Ground,' or to Scratch and Grate upon a surface, has produced a race of words, denoting Noise in general; and hence we have Rado, Rudo, Rudo, Rudo, (Lat.) &c.; Rattle, Rustle, (Eng.) &c.; Racler, (Fr.) &c. &c. These few words will give the Reader a very sufficient idea of the peculiar turn of meaning annexed to the Element RC, &c. when a vowel breathing does not precede the R. We have seen indeed the same train of ideas expressed under the form of the Element AC, &c. with the breathing before the R; but under the form RC, &c. without a breathing before the R, this train of ideas is perpetually prominent and conspicuous; and it presents itself to our view in the most distinct and unequivocal characters, through a wide compass of Human Speech.

Rout, the verb, is peculiarly applied, as we know, to the action of Stirring up the Ground or EARTH; as 'To Rout up, or ROUT in the Dirt.' The Etymologists have curiously separated the terms belonging to this word. Junius produces Route, as denoting a Noise, 'Stertere;' and Skinner, Rout or Root, bearing the same meaning. The latter exhibits Rout, in its metaphorical sense, "To Rout an army," which he has referred to the French Route and the Italian Rotta; and Route he conceives to be quasi Ruptura, from Rumpo. Rout, Turba, the confused Heap-Collection or Multitude of People, belongs to the metaphor of Routing up the Dirt in confused Heaps, &c. Our two Etymologists, Skinner and Junius, have put the substantive Rout, Turba, in a separate article; and they record the various words to which it may be referred, as the Belgic Rot, the German Rotte, the barbarous Latin word Rutta, the Welsh Rhawd, Rhawter, Turma the Danish Roode, Manipulus militum; the Greek ROTHOS, (Polos, Tumultus, vel Fragor.) Lye likewise records the modern Greek word Routa and Routta, (Ρουτα, Ρουττα); and he observes, moreover, "Mihi videtur summam sapere antiquitatem. Nam Hiberni " habent

"habent Ruta eodem significatu." All these words belong to each other, and receive their force from the action of Routing up the Dirt.

Turba and Turma are attached to the Turf, or Ground, for the same reason; and it is acknowledged, that Tumultus, Tumult, is derived from Tumulus, the Heap of Dirt. We perceive, that Tumulus, Tumultus, Turma, Turba, all belong to each other; and it will be shewn in a future Volume, that they are attached to the Element TM, TF, denoting the Turf or Ground. Rour, the substantive, bears the same relation to the verb 'To Rout,' as Turba does to Turbo. My German Lexicographer explains ROTTE by "A ROUT, Crowd, Crew, Clutter, Club, Gang, Set." Rout, in English, is used with this sense, when it is applied to a 'Crowd or Clutter' of people met together for the purpose, as it is supposed, of some amusement or diversion. In German, the word is chiefly applied to a Troop of Soldiers, or a Gang of The adjacent word to Rotte in the German Conspirators. Lexicons is Rotz, Nasi Mucus, which brings us directly to the idea of Filth or Dirt. In Hebrew, my RGS, signifies, says Mr. Parkhurst, "To meet together, assemble in a tumultuous "manner;" and as a substantive, "A Confused Assembly or " Multitude."

Root, as a verb, 'To Root,' is placed by Skinner in a separate article; and he refers it to the Saxon Wrotan, Versare Rostro instar suum; the Belgic Roeden, Roden, Extirpare; Vrueten, Wroeten, Terram Suffodere; the German Reissen, Reuten, 'Aus-Rotten,' Extirpare; Russeln, Terram Rostro fodere, from Rostellum, Rostrum. He imagines moreover, that Wrotan and Roden may be derived from the Latin Rotare; and he adds, "Felicissime alludit "Gr. Opurru, Fodio." We see in the Greek Orutto, (Opurru, Fodio,) and Wrotan, the form of the Element 'RS with the breathing before the R, as likewise the original idea. Rota is that

that, which Roots or Routs up the Ground, in moving or rolling along. Root, Radix, Skinner likewise places in a separate article; and he appears to see no affinity between this substantive, and the verb to Root up. He refers the substantive to the Danish Roed, Radix; the German Kraut, &c. Herba; and Junius and Lye produce as parallel the Runic Rotar, the Swedish Rot, the Islandic Root. Though these Lexicographers explain Root by Radix, they do not seem to understand, that these words are only different forms of each other. In Greek, we know, the form is Riza, (Pia.) We shall agree, that Root, Radix, the substantive, belongs to Root—'To Rout up, out,' &c. The Latin Etymologists have seen however, that Radix is connected with Rado; and Rado, "To Scrape, Scratch," &c., as we shall likewise at once agree, means 'To Rout up any Surface.'

The Latin Rutrum, "An instrument wherewith Sand, or * such-like is digged out," directly means 'The Router up of Dirt,' and brings us at once to the spot supposed in my hypothesis. Rutabulum, "A coal RAKE," is another of these terms. Etymologists have justly referred these words to Ruo, Ruitum, and Rutum, where we fully see the idea of Commotion-Disturbance, &c. expressed by Rout, &c. The compound e-Rutus, under the form RT, signifies precisely the same as Routed outup, &c. In 'Ruo we have the form 'R, or R'; but in Rutus, part. à Ruo, "Thrown down, Digged up," we have the form In the same Index of R. Ainsworth, where Rutus is, we find recorded the ancient words Rutellum, "A little Mattock," &c., Rutabri, pl. Rastri, from Varro, and Rutuba, "A Tumult, trouble. "or disorder." The Tub or Tab in these Latin words belongs to Turbo. Ruo is explained by Robert Ainsworth in the second sense, "To Rush, to run headlong, to Break out with violence." Break with violence is the original idea of the term; and Rush, we see, belongs to this race of words. Ruo is used in its primitive

mitive sense in the following passage, where it is applied to Breaking with violence the clods of the Ground:

" Quid dicam, jacto qui semine cominus arva

There is an adjacent word to Rutrum, belonging to our Element, which directly signifies the Ground—Land, &c., as Rus, "The "Country, a place without the city.—A Country House or Farm, "where husbandry is exercised." In Ruris we see how S sometimes passes into R. Hence are derived, as we know, the terms Rusticus, Rustick, Rustique, (Fr.) Rural, &c. &c. &c. Varro derives Rus from Rursum, "Quod in agris quotquot annis Rursum " facienda eadem, ut Rursus capias fructus; appellata Rura." Some derive Rus from Apoura. The old Glossarists justly interpret Rus by "Villa, Terra, Ager." In Mr. Shaw's Galic and Irish Dictionary we have "RATH, A Fortress, garrison, a Village, an "artificial mount or burrow, a prince's Seat."—The Prince's Seat is nothing but his Land, Grounds, Farm, &c .- "Mea Rura "videbis." In Persian, إلى Rag is "A Villa, a Summer-House;" and رستا Rusta, "A Market-town, a Village," &c.; رستا RUSTAY,—" A Rustick life;" and Cuil RUSTAI, "A Village, a "Market-Town." Mr. Richardson produces likewise, as Arabic and Persian, כساق Rustak, "A Village, a Market-town, an en-" campment of tents or huts."

We shall all agree, that the idea of Action would be derived from the principal action of Routing up—Stirring up, or Cultivating the Rus or Land. Hence we have the Greek Rezo, (Pezw, Facio,) and the Latin Res. Under the forms 'RC, 'RD, &c. with the breathing before the R, we have w=Ork, Ergon, Erdo, (Egow, Facio.) On the first view w-Ork, &c. and Rezo, (Pezw,) seem very remote, but the term wRight brings the forms into contact with each other. The original sense of Res appears in Res Rustica, which, we know, is the appropriate combination to ex-

[&]quot;Insequitur, cumulosque Ruit male pinguis arena. (Georg. I. y. 104-5.)

press what relates to Agriculture, as 'Varro de Re Rustica,' &c. In Mr. Shaw's Galic Dictionary, Raod, Rod, and Rud, mean 'A 'Thing.' We shall now understand, how Kata=Rezo, (Καταρεζω, Demulceo manu, Χειρι τε μιν Κατερεξεν,) may belong to Rezo, (Ρεζω,) from the fundamental idea of some process performed on a Surface. We must not wonder, that Rezo, in this compound, denoting a gentle action on a surface, should belong to terms, which denote the most violent action, as the explanatory Greek word to Καταρεξεν, which the Scholiast on Homer has applied, "Κατεψηξε," at once contains both ideas, Καταψηχω, Mulceo;— Æquo;—Contundo, &c.

The succeeding word to Rezo, (Pe(w, Facio,) in my Greek Vocabulary, is Rethos, (Peθoc, Membrum, quævis pars corporis;— Facies,) which my Lexicographer places as a Root; but we now perceive, that these words belong to each other, just as Facio does to Facies, and as Make in English is at once the verb of Action and a substantive, denoting the Make or Shape. Hence, as I imagine, has been derived our ancient word RUDDE, &c. &c. for 'Shape, *Complexion; though it is commonly supposed to belong to Rep, Junius has connected Rudde, Shape, Complexion, with RED, by a very dexterous explanation: "Chaucero est illud qualitatum naturalium, præcipue tamen sanguinis temperamen-"tum, quod barbaris nuncupatur Complexio, Anglis Complexion. "Horatio Epodon XVII. videtur dici Verecundus color." Our ancient Poets have certainly perpetually combined RUDDE with RED, from the same idea probably, which has possessed their commentators, that these words belonged to each other. In the passage produced by Junius from Chaucer, the RUDDE of Sir Topas is said to be "Like Scarlet in graine;" and we frequently find such expressions, as Rudd-Red, (Reliques of Ancient Poetry, vol. III. p. 5.) "Har Rode was Red," quoted by Dean Milles on a passage in Rowley. In this passage, however, Rode is applied

to a white colour, as the general characteristic of a Complexion, though the face is described at the same time to be *Red*. It is thus that the lamenting Damsel pourtrays the person of her departed lover:

- " Blacke hys cryne as the wyntere nighte,
- " Whyte hys Rode as the sommer snowe,
- " Rodde hys face as the mornynge lyghte,
- "Cale he lies ynne the grave belowe."

In old English we have Rood, Rude, &c. as a name for the Cross, because it denotes, as I conceive, the Image of Christ on Junius has justly referred this word Roop, Rood-tree, Rood-beam, &c. to the Runic Roda, Simulachrum; and Dr. Jamieson, in his Scotch Dictionary (sub voce Rude), has adopted this idea. The Commentators on Shakspeare have duly understood, that the ancient form of swearing By the Roop, ("An Early " stirrer By the Roop,") refers to the Cross, or to "the Image of "Christ on the Cross." (Second Part of Henry IV.) The Roop-Loft meant the place in the Church, where the Images of the Saints were exhibited. (See Old Plays, vol. I. p. 52, and Reliques of Anc. Poet. p. 298.) In Welsh, Rhith means, "An "outward form, figure or shape; an appearance, colour or pre-"tence; the seed of living creatures," as Mr. Richards explains it. In Mr. Shaw's Galic and Irish Dictionary we have RIOCHD, RIUCHD, "The Shape, or likeness." The succeeding term is Riochuaidh, "A Plague, contagion, pestilence," which belongs to an action of Violence—to Rout, &c.

The names for various Colours have been derived, as we can readily imagine, from the various Colours of Dirt—Mould—Soil. I shall shew, that the very term Colour belongs to Soil, Solum, Colo, &c. Under our Element RD we have the word Red, which must be referred to the same spot. Red occurs in various Languages, as in the Saxon Red, Read, &c., the Belgic Rood, the Danish Rod, the Runic Raudur, the German Roth, the French Rouge, the Italian

Frets

Italian Rosso, the Welsh Rhudd, &c., which the Etymologists produce, and which they justly refer to the Greek ERUTHROS, (Ερυθρος.) RED or ERUTHros means the Colour of the EARTH. In Hebrew, we know, ADM signifies RED, and the Ground. To the Runic Raudur Lye has justly referred the Saxon Rhoder, "Firmamentum." The English Ruppy, with its parallel term Rudu, (Sax.) and Ruddle, Rubrica; Rudul, (Island.) Rothel, (Germ.) Rutilus, (Lat.) belong to RED. In RUDDLE we actually see the RED Dirt. In the term Russer—the Russetine, we see that species of Dingy Rep, which again brings us to the colour of Dirt. In German, ROTH is RED, and ROTHEL, RED Oker; and in the same Language the Russetine is called 'Rothlicher Apfel,' and Russling. The term is adjacent in my German Lexicon to Russel, a Snout, the Router up of Dirt, and Russ, Soot; where we are directly brought to the sense of Dirt, and an action connected with it. Under Russus, in the Vocabulary of Robert Ainsworth, we have Lutea Russaque; where Luteus and Russus are placed as nearly synonimous to each other; and Luteus, we know, at once relates to Dirt, and to a Colour. The Etymologists, under Russer, refer us to Roux, Rousset, (Fr.) Rossetto, from Rosso, (Ital.) Russus, (Lat.) and to the Greek Rousios, from Roa, or Roia, (Pourios, Puniceus, a Poa, vel Poia, Malum Puniceum,) where Roia, (Poux,) is quasi Roja. The name Rousseau belongs, as we likewise know, to these words Roussir, &c., and means the RED-Haired Man. The succeeding word in my French Vocabulary to Roussir is ROUTE, the ROAD, which brings us to the spot supposed in my. hypothesis. The Rose, Rodon, (Podon, Rosa,) &c. &c. belongs to the idea of Red. Some Etymologists refer Rosa to Ros; and others to Pew and O(w, "quod ingentem odoris fluxum emittat."

The succeeding word in Skinner to Russetine is Rust, which might signify the substance of a Dirt-like colour and nature, or it may mean that, 'quod Ropit Superficiem'—which Scratches—

Frets—or Corrodes the Surface of any thing. Rust occurs in various Languages; as in the Saxon Rust, the Belgic Roest, the Danish and German Rost, Rubigo, &c., which some derive from the English Rest, or the Greek Rastone, (Pasturn,) or from Rosso, Pousus, Russeus, Rubens, "quomodo et Latinis Rubigo est à Ruber." Cymræis denique Rubigo dicitur Rhwd vel Rhydni à Rhudd, "Ruber." Lye reminds us of the Greek Erusibe, (Equality, Rubigo,) Eruthros, (Equality), Euros, (Euros, Caries,) which are all to be ultimately referred to the Dirt of the Earth. The Etymologists might have recorded likewise the Latin Ærugo. If the first Ær in Ærugo, or Ær-Rugo, be derived from Æs, Æris, the Rugo might belong to Rust. Rusty, or Restie Bacon, "Porcus "Rancidus," is derived by the Etymologists from Rust.

We have seen the term for Noise, Rout or Root, Stertere; and we here unequivocally see, that it is attached to the action of Routing or Rooting up a Surface. Skinner has referred it to the Saxon Hrutan, Stertere; the Belgic Rotelen, Grunnire; which, as he says, are "Omnia à sono ficta;" and which he refers to Rottle and Rattle. He adds moreover, that as the Belgic Rotel and the German Russel signify Rostrum, they may be derived from the Latin Rostellum, i.e. "Vocem Rostello emittere." We shall now understand, that Rostrum, Rostellum, Rotel, Russel, &c., were originally applied to the Snouts of animals, as being the part, which Routs up the Ground. Rootle or Ruttle, 'To ROOTLE up the Ground, is used for Rour in familiar Language.—The Latin Rostrum is only another form of RASTRUM. Nothing, we should imagine, could be more obvious than this truth; yet the Etymologists only compare these words together for the purpose of deriving them from a different origin. "ROSTRUM " dicitur à Rodendo, ut à Radendo RASTRUM." We perceive, that Rodo and Rado are only different forms of each other. The terms of Noise, Rout, Rottle, Rattle, Rustle, &c. are derived

rived from the Noise made in the action of Routing up the Dirt, &c. Junius, under Route, "Stertere," produces the Belgic term Rottelen, or Reuteln, "inconditum ac varie streperum sonum "gutture aut naribus edere;" and he records likewise Rothos, (Poθos, Strepitus,) and Rothones, (Pωθωνες, Nares,) the nostrils; to which Lye adds the Islandic Hriota. ROTHON, (Pullar,) belongs to the same idea as Rostrum. In Greek, REGKO, (Peyras, Sterto,) means "To Route, Stertere;" and Rogenos, (Poyyos,) Ronchus, (Lat.) is the substantive expressing this noise. We here see, how the Element RG, &c. has passed into the form RN. The Etymologists justly acknowledge, that Runco, Runcino, &c. To Weed, where we at once come to the Ground, belong to these words, and to Rugchos, (Puyxos, Rostrum, Rictus.) Let us mark the explanatory term Rictus, belonging likewise to this race of words. While I am examining the word Rugchos, (Puyxos,) in my Greek Vocabulary, I cast my eyes on Rocho, (Рыхи, Dentibus fremo,) another term denoting Noise, which belongs to this race of words. From Rugchos, (Puyxos,) or Runcho, we are brought to the form RN; and hence we have Roncho, Runco, Averrunco, Runcina, &c.; though in Rukane, (Puxann, Runcina,) we have again the form RC. We see in RICTUS and Ringo, how the forms are connected; and again, in Ris and Rin, (Pic, Piv, Pivoc, Nasus,) we have both forms. I shall consider the words, which belong to our Element RC, &c... and which have passed into the form RN, in a separate article of my Work.—The Latin Rostrum directly appears in other Languages; as Rostro, (Ital. Span. &c.) An adjacent word in the Italian Dictionaries to this term is ROSTA, "A Fan, Un eventail " pour chasser les mouches;" where we see the idea of the ROUTER or Driver away, in its more gentle sense. The succeeding word in my Spanish Dictionary to ROSTRO is ROTA, "Rout, Defeat;" and in the same column of Mr. Neuman's Dictionary with this latter word, I find Rozar, "To Stub up, to " clear

"clear the *Ground* of brambles and bushes," and Roznar, "To bray, to cry like an ass;" where we have the idea of *Noise*, under the form RZ, with the organical addition of the n after the Z.

To the form of Russel, Rotel, the ROUTER up, we must refer the Welsh Ruglo, where we are directly brought to the original Mr. Richards explains Rhuglo by "To Rub." "To Shovel Dirt or Mire together." The preceding term is RUGHL Groen, "A jingling RATTLE, a RATTLE made with stones put in "a dryed, undressed skin;" where we have the idea of Noise, as connected with the word Ruglo, which relates, we see, to Stirring The word before this is RHUOL, "Handy, ready, up the Dirt. Also, Rife, common;" where we naturally find the " dextrous. idea of what is Dextrous and Common applied to so Common and Familiar an action, as that of Digging up the Ground. In the next column of Mr. Richards' Dictionary I find "Rhuso, To leap or skip, " or start back, to be hindered, stopt, or stayed;" and RUTHRO, "To Assault or Attack, To Rush upon;" where we have the sense of Commotion-Agitation, &c., as attached to this race of words.—To the same form RSL, and the same fundamental meaning, we must refer the Welsh Rhistyllio, "To Curry a Horse," and the Galic RISTEAL, "a sort of Plough," &c.; with the Sirnames RASTLE, RASTAL, RUGGLE, &c. Under the form of RATTLE, &c. we have the French RACLer, "To Scrape, To shave, or RAZE off," &c., which those, who write on the Theory of Languages, have produced as one of the original words, formed on the principle of Onomatopæia*.

In

^{*} The Author of the Mechanisme du Langage, (vol. II. p. 327,) has told us, that "L' Articulation rude R par laquelle l'organe frôle l'air, c'est-à-dire le pousse d'un mouvement suivi, mais par soubresaults, forme seule un clef ou germe radical servant à "nommer

In the term HARCELer, which belongs to HERSE, HARASSER, we have the *l* added to the ^RC, with the breathing before the ^R, as

in

"nommer la classe des choses rapides, roides, rudes, ruineuses, rompues, qui ont " des inégalités ou des rugosités," &c. &c. In order to illustrate this idea, our Author has collected eighty-four words in Greek, Latin and French, beginning with an R, which belong to different Elements, RC, RM, &c., without any observation annexed to each of these words, on the mode, by which they are connected. Among these words, about fifty terms are found, which will be introduced in their due places in the present discussion. The previous remarks and the collection do not occupy four pages of a duodecimo volume; and this is all the knowledge, which our great Theorist on the formation of Languages has imparted to us, on the origin of the words beginning with an R, through the whole compass of Human Speech. Yet even this, such as it is, has been perpetually said by the most humble of our Philologues in the Vocabularies of a School-boy. R. Ainsworth tells us, that R "is used by Poets in describing Motion, « Noise, Indignation, or Violence." Though the writers, who have advanced this idea. had no reason whatever on such evidence for adopting it as a general principle in the mechanism of Language; yet the Reader will understand, that I can have no objection to such a Theory, and that I have in fact demonstrated the truth of the position. I have proved, or endeavoured to prove, by a most numerous and arranged series of examples, containing probably all the Radical words in a great variety of Languages, in a laborious and patient investigation, that according to the phraseology of my System, the Elementary forms 'R, 'RC, RC, &c., or 'R, 'Rc, Rc, belong to each other; and that they exhibit a Race of words, which express Agitation-Commotion, &c. I have added moreover, that the Race of words under these forms relates either remotely or directly to the EARTH, and to the action of Stirring up its surface; and that they derive their chief force and universality in Language from this important operation.

Nothing however can exceed our astonishment, that Theorists are to be found, who have ventured on the evidence of about eighty words, containing the letter R, which are used to express Rapid motion—Rough objects, &c. to establish a general principle for the solution of all other words, containing this letter, amidst that infinite variety of different and discordant senses, which these words are acknowledged to convey. If I might be permitted to declare my opinion plainly and freely on this occasion, I should certainly observe, that I have ever considered the exhibition of such a Theory, as the consummation of Literary inanity—folly and presumption, when delivered in an assuming tone of invention and research, as if some precious and infallible secret were about to be imparted to mankind, by which all the mysteries of Language would be at once unravelled and unfolded to the view. Yet all these pretensions, however lofty and imposing they may be, have produced nothing; and the discovery has commenced and terminated at the same point.—Our Theorists have profited nothing by the principle, which they have promulgated, as it still continues

in Racler, it is attached to the form RC, with the breathing after the R. We here see, how the form harceler and Racler may belong to each other. While I examine Harceler, To Harass, I cast my eyes on Hardi, Bold; Hargneux, Quarrelsome; where we see, that the Harc, Hard, and Harg, contain the same fundamental idea. I see likewise Harder, To swap, which belongs to Hard; and Haras, a Stud; Hardes, a Herd; Hardes, Attire, clothes, which means the Hoard of things. I have supposed, that Hoard, the collection, belongs to Herd, the Flock, which is derived, as I have shewn, from the Violent action of Driving away. Thus it is, that words with forms and meanings, most remote, may belong ultimately to each other.

We have seen, that Junius has two articles of Rout, Turba, and Route, Stertere. Lye produces the term Rout in two other Articles; "Rout. Rowt. G. Dougl. Refer ad Rawt, Mugire. "Hinc To Make a Rout, Turbas excitare;" where we have the idea of Noise; and Rout, Via, iter, proprie militum." Rout, Via, is the Path or Ground, Routed up in passing over it; where we are directly brought to the Spot, supposed in my hypothesis. Road is only another form of Rout, Via; and To Ride is 'To pass upon the Road.' The term preceding Rout, in the Lexicon of Junius, is Roust, produced by Lye, which he explains by "Rugire,

continues in their hands to be illustrated only by the same evidence of the same eighty or ninety examples, by which it was suggested.—They do not propose any clue, nor in fact do they pretend to have discovered or even conceived any clue, under the guidance of which they can advance a single step in the great Labyrinth of Language; and so scanty are their sources of knowledge for forming any judgment whatever of this vast and complex edifice, that they have no reason to believe, that they are arrived even to a prospect of the avenues, by which it may possibly be approached.—Of the whole tribe of Etymologists, the writers on the Theory of Language seem to be the least provided with materials of knowledge, and least gifted with powers of investigation for the advancement of their art; and of all others, the author of The Mechanism of Language appears to be the most unfurnished—unable and inefficient.

"Rugire, clamare, vociferare;" where we have another word denoting Noise. Let us mark the explanatory term Rugio, where we have a different form of the same race of words. Lye refers us, under Roust, to Roist, which Junius interprets by "Grassari," violenter agere, and Roister, Grassator;" and he considers them as belonging to the French Rustre. Lye records, under Roist, the term HlutReister, Clamosus, which is compounded, as he says, of Hlut, "Clarus, Sonorus," and Reister, corresponding with Roister, Grassator; the French Reistre, Miles equo movens; the Runic Hrister, Concussor; Hraustur, Robustus, which he compares with the Greek Rosis, (Paoric, Corroboratio.) To Roist, we see, is to make a Rout—Riot, or Disturbance. The term Roisterer is still used as 'The Kicker up of a Row,' as we express it

Let us mark the term Row, which is either quasi Rout, Riot, &c., or it must be referred to the form 'R. Mr. Grose explains the use of Row, as a Northern term, by "To Rake, or "Stir about, as ashes in an oven." Skinner, under Roister, refers us to the French Rustre, Reistre, the English Rush, Rustle, and the German Reiter, Eques.—Among the terms denoting Violence or Commotion, as belonging to our Element, we might here produce Reise, recorded by Junius, as a term in Chaucer for "Abigere, Fugare."

" As I trowe, I have you told inow

Junius has brought, as parallel terms, the Saxon Hræs, Impetus, and likewise Rese, an old French word for Une excursion militaire. In the same page of Junius we have Res, Rees, Furor, which Lye refers to Rese, Furere; the Swedish Rasa, Furere, and the English Rage. In Spanish, Rota is "A Rout, Defeat.—"Course;" which latter sense agrees with Rout—Road, &c. In the same column of my Spanish Dictionary I find Rozar,

[&]quot;To REISE a fende, all loke he nere so Row."

"To Stub up, to clear the Ground of brambles and bushes.—
"To nibble the grass, applied to cattle.—To Scrape, or Pare
"off.—To Graze, to touch slightly," as Mr. Neuman explains it.
We are here brought to the very spot and the action of Stirring or Rout-ing up or over the Surface of the Ground, in its more violent and more gentle sense. We see, that the Spanish Rozar contains the senses of Rout—Rodo—Rado, (Lat.) Raser, &c. &c.; all of which, as we perceive, belong to each other, and are derived from the same Spot. The succeeding word to this Spanish term, in Mr. Neuman's Dictionary, is Roznar, "To Crack "hard things, and grind them with the teeth.—To Bray, like an "ass;" where we have the idea of Noise, annexed to the Element. Hence it is, that Rozno, in Spanish, signifies "A little Ass," from the Noise made by that animal.

The preceding word to Roister, in Skinner, is Rogue, which he explains by "Profligatissimus, Nebulo," &c .- "in legibus nostris "Erro, Mendicus;" and he records the derivation from the French Rogue, "Arrogans, Impudens, q. d. A Bold or Sturdy Beggar." Rogue belongs to this race of words, denoting Violence and Disturbance; and denotes the audacious, annoying Roisterer or Router about, one who makes depredations on the property or peace of others, 'Qui in alium Grassatur.' The Latin Grassor has a similar relation to Gradior, as Rogue and Roister have to ROUT about here and there, and to RIDE, ROUTE, &c. The Etymologists have produced likewise, under Rogue, the French Roder, Vagari; the Saxon Wregan, Accusare, and the Greek RAKOS, (Panos,) which are ultimately to be referred to our Element RK, or ARK, signifying 'To Rour up—Tear up—to pieces, &c., To · Annoy—Disturb,' &c. Junius records, moreover, the Hebrew רע RG, or RnG, Malus, pravus; to which Skinner has probably referred, when he produces the Hebrew Rong, as parallel to Rogue. The Hebrew yn RG, or RnG, "To Break, Break off, Break in " pieces, "pieces, Rend, Destroy," exhibits the full sense of the Element. Mr. Parkhurst produces as derivatives to this word, "Ring, Wrong, "Wrangle, Wring, Wrench, Range, Rend, Rent, Old Eng. Ran, "Seize. Also Rough, Ruffle, Rugged, Rogue. Qu. Welsh "Rhwygo, To Rend, Eng. Rag, Ragged." All these terms, with the exception of 'Ruffle,' belong to the race of words now under discussion. The n, in some of these terms, Ring, &c., is only an organical addition to the sound of G. Where the W is the first Letter, it must be considered as representing the vowel breathing before the 'RG.

RIOT is only another form of Rout. It is marvellous to observe, how words retain their original idea in the phraseology, with which they are connected. Thus we talk of 'Kicking up a Rior. 'or a Row;' where we are at once brought to the original spot, under the same idea, as in the phrase 'To Kick up a Dust,' · Pulverem Excitare.' The Etymologists refer us, under Rior, to the French Riote, the Italian Riotto, and even to the Belgic Ravotten. Some of the French Etymologists and the French Ravoder. derive RIOTE from the Latin RIXA; and we shall hence see, that this Latin term must be added to the race of words now before us. The Italian form of this word, RISSA, has reminded Martinius of the Greek Eris, (Epis,) where we see the form ARS, as in ERETHIZO, (Epilica, Irrito.) Let us mark the explanatory term Irrito, which we shall acknowledge belongs to these words, either under the form of the Element 'RT, with the breathing before R. or RT, with the breathing after it. If we take the ancient mode of writing it-Inrito, to be the true one, then Rito belongs to the form RT, with no breathing before the R, as in RIXA, &c.

Martinius cannot help seeing, that it has some affinity to the German Anreixen, or Reizen, which my Lexicographer explains by "To Intice, allure, incite, wheedle or tempt, set, egg, spur, "toll or till on; Zum Zorn Reizen, To provoke one to anger,

"Stir him up to it," &c.; which, we see, is a word of the same family. Another German term, Reissen, has a similar meaning, "To pull, Tear, pluck, draw;" where we are brought to the original action, without a metaphor, of Stirring up—Tearing up or ROUTING up a Surface. Reissen signifies likewise, "To draw, "chaulk, skitch, design," as my author explains it; where we likewise manifestly see the idea of Scratching up or over a Surface. My Lexicographer explains "Sich los Reissen, To get Rid, Rush "out;" where in Rush and Rip we see two other terms belonging to the words now under discussion. I have already compared Rush with Ruo; and the Etymologists have referred us, under this English word, to the Belgic Ruyschen, and Rüsselen, Strepitare; the German Rauschen, the Saxon Ras, Impetus; Hreosan, Ruere; the Greek Roizos, (PoiCos,) Arasso, Resso, (Apassu, Allido, Prosu, Rumpo,) &c.; which all, more or less, remotely belong to each other. Rush, Juncus, with its parallel terms Resc, Risc, Ærisc, has been referred by Junius to Ruyschen, &c., from the Noise made by them in motion, which will be considered in a future page. Rip means to Clear a surface of any incumbrance—as of Dirt, rubbish, &c.—To Rout out-off or away; and is connected with a variety of terms, which will be fully illustrated in the course of these discussions. In German we have another form of Reissen, with a minute difference of meaning, the term RITZen, which means "To get a "chap to your skin, get a Scratch, hurt, bruise, Scratch or fret "your skin;" where again we unequivocally see the idea, which I am illustrating.—In Saxon, REOSAN means "To Rush, Ruere;" which is another form of Hreosan; and an adjacent term is REOTAN, "Crepitare, Strepere," which Lye justly refers to WREOTan. The word between these terms brings us to the action, from whence they are taken; -REOST, "A Rest. Lignum, "cui inseritur Vomer. Item ipse Vomer."

The German term Reizung, "Inticing, Inticement," &c. is particularly applied to the Charms of Beauty, "Reizungen der "Schonheit, Charms, tempting or attracting Beauty;" and thus we see, how ideas most remote from operations on the Ground may be derived from that Spot. Let us note the explanatory words Toll or Till, To entice, which belongs to the same metaphor of 'Stirring up the Ground,' or 'Tilling the Tellus.' Rig. Impudica mulier, or Riggish, is a term applied to a Wanton Woman. from the idea of Desultary-Disorderly motion;-" Holy Priests " bless her when she is RIGGISH." (Ant. and Cl.) In the phrase "To Run your Rigs," we see the original idea. In the expression "He played REAKS," produced by Skinner, we have a similar notion. Rig is derived by this Lexicographer from Ride; and the latter phrase he derives from Rex, (Lat.) or Rice, (Sax.) Imperium, and explains by "Regem egit." Rut, in French Ruit. " Pruritus ad Venerem, seu Catulitio Cervorum," has been derived by some from this German word Reizen, Incitare, which, as they have seen, belongs to the Latin Irrito. Menage derives Rut from Rugitus. In these coincidences, it is difficult to decide. If the term conveys the idea of Noise, it must be referred to the words denoting Noise, which are derived from the action of ROUTING up a surface. In Skinner, Rut occurs between the terms Rustle and Ruttle, or Rottle. The force of the Element RT is fully visible in the Sanscrit Language, where it signifies 'To Stir up-To Rout-Rake up,'&c. Ruttee, in the Hindoo Mythology, is the Wife of Munmoden, and her office is to Excite to love the hearts of men, as her husband's office is to inflame those of women. (Kindersley's Specimens of Hindog Literature, p. 20.) In the same Mythology, Rudra, or Mahadeo, is the Destroying Deity, (Maurice's Essays, vol. II. p. 89,) which means The ROUTER up.' We shall understand, that the original idea of the Element is unequivocally visible in this Language, when we learn.

learn, that the persons, who cultivate the Lands, are called RYOTS.

In Scotch, Rutour is 'A Spoiler, an Oppressor," as Dr. Jamieson explains it; where we see the precise sense of the Hindoo RUDRA.—Dr. Jamieson has justly referred us, under this Scotch word, to Roister, "A vagabond, a free-booter, a plunderer;" under which term our Lexicographer has duly produced the corresponding terms in other Languages, as the old French word Rustre, A Ruffian, &c. &c.; Roister, (old Eng.) explained by Junius, Grassator, which I have before produced with Roist, Grassari, Roisterer, &c.; the French Routier, and the Barbarous Latin word Rustarii, Rutarii, Rotarii; the Irish Ruathar, Pillage, &c. &c. Dr. Jamieson here records the terms denoting Horsemen or Troopers, as Reuter, (Germ.) Ryttere, (Dan.) A Rider; and he refers us, moreover, to the word Ryot, 'To destroy, To 'ravage.' The RIDER, and its parallels Reuter, &c., mean persons, who travel on the ROAD, as I have before observed, with an idea oftentimes annexed to them, which belongs to the general sense of the Element of 'Routing up or about-Pillaging-Plundering,' The preceding term to Ryot, in Dr. Jamieson's Dictionary, is "RIOT, Festivity, indecent mirth;" but under neither of these words are we reminded of the English Riot, nor are they referred to each other. The succeeding word is Ryor, which, says our author, Mr. Macpherson views "as perhaps an error for Rowt, "q. crowd, army. Or it may signify destruction, E. Rout, from "the v."—The succeeding terms to Royster, in Dr. Jamieson's Dictionary, are "To Royt. To go from place to place without "any proper business, to go about idly.—Royt, A reproachful "term.—It may perhaps denote an Unsettled fellow."—ROYTYT. with the same idea as Ryor—"Rox, perhaps a crowd, a throng." In the same leaf of this Dictionary we have "Rome-RAKARIS," which does not mean "Those who search the streets of Rome

"for relics," as Lord Hailes supposes; but those who go RAKing—RAIKing, (Scotch,) or Rambling to Rome, as Dr. Jamieson has rightly seen, who refers us to the Scotch RAIK, RAKE, &c., "To range, to wander, to rove at large."—The corresponding Welsh term to the Irish RUATHAR is RHUTHRO, "To assault or attack, to Rush upon," as Mr. Richards explains it; and again we have, in the Welsh Dialect of the Celtic, An-RHEITHiaw, "To "Spoil, to plunder, to rob."

In German, Reuten signifies "To Root out, extirpate;" and the succeeding word to this in my German Lexicon is "REUTER, "A Rudder, Riddle, cribble, winnow, fan, range." This double sense of a Rupper and a Ripple will shew us, that these terms must convey the same fundamental idea, which is that of Stirring up or about any thing for different purposes. In the term RIDDLE we are brought to an action of Agitation employed about Dirt; and I shall shew, that it belongs to RID, as denoting the instrument, which Stirs about Dirt-for the purpose of Ridding or Clearing away one part from another. The Etymologists refer us, under Rudder, Clavus navis, to the Saxon Rother, Remus; Redra, Remus; the Belgic Roeder, Roer, the German Ruder, &c., which they consider to be quasi Righter, Director navis, though some imagine, that the Belgic Roer belongs to Roeren, Movere. The Belgic Roer belongs to the form Rear; and in the English Row we see only the 'R, though it may have appeared under another form. In OAR we have the breathing before the 'R; and in the sense of ORE, Metal, 'quod Enuitur ab ERA,' (Epa,) if I may so say, we are brought to the original spot and action. The German Ruder means A Rudder, and An Oar; and Rudern signifies The word Row has the same form and meaning as Row, To Rout about. The Etymologists refer Row to the Saxon Rowan, Berowan, Rewan, the Belgic Roeden, Roeyen, the German Ruyen, the Danish At Roe; all which Skinner derives from the German

German Regen, Movere. He reminds us moreover of the Greek ERESSO, (Eperow, Remigo, Impello,) which I have shewn to be derived from the same idea of HARROWING or Stirring up the The German Regen signifies, as my Lexicographer explains it, To Stir, move, agitate, excite something," which, we see, precisely corresponds with the sense of the Element, as I have unfolded it.—The preceding term to Reuten, to Root out, in my German Dictionary, is Reuspern, which my Lexicographer explains by "To hauk, to Retch in spitting, to keck, spit, and spawl, cast "out, void phlegm by Reaching and hauking;" where we have the same idea in both words, that of Stirring up-Throwing or Casting up—out, &c. In the latter word we have likewise the idea of Noise added, which belongs to the action of Stirring up or Throwing up any thing. Let us mark the terms RETCH or REACH, which are attached to our Element under the same idea. The Etymologists refer it to the Italian Recere, the German Brechen, and Recken, Extendere.

The English RASE—eRASE—RAZOR, &c. have been duly referred to the French Raser, Rasoir, Rayer, &c., the Latin RADO, RASI; and the Etymologists have produced likewise other parallel words, as the Italian Rasare, and the Belgic Raseren, Rayeren, &c. In RASURE, eRASE, as they are commonly used, we have the more gentle meaning of Scratching over a Surface; but in RASE or RAZE out, denoting Utter devastation, we have the strongest sense, as we see it in ROUT out, &c. &c. The French RASER contains both these senses. The Etymologists justly remind us, under RASE, of the Greek Raio, which must be considered as quasi RAJO. We find the true form of this word in the future RAISO, (Ραιω, Ραισω, Profligo, Corrumpo, destruo); where we again see a term used in the most violent of the senses, which belong to these words.—Skinner places in a separate article "A RASHER of "Bacon," which he justly considers as Rasura Laridi. The Latin RADO

Rado, and its parallels, bring us at once to the idea of Scratching up or Scraping up or over a Surface; as the Rus, &c., the Ground. Robert Ainsworth explains Rado by "To Shave.—To Scrape, "Scratch up; To rub against, to Grate." We perceive, that Rado, in the sense of Grate, expresses the idea of that Harsh Noise, which is made by Scratching up a Surface, and which, as we have seen, is a constant attendant on this race of words. The Etymologists justly compare Rado with Rasso, (Passu, Allido, collido, deturbo,) and Resso, (Passu, Frango, Rumpo;—vehementer Ferio, Allido.) We have before observed, that Rasso, (Passu,) directly connects itself with Arasso, (Apassu, Palso, Illido); where we perceive, how the forms pass into each other. The preceding word to Rado is Radix, the Root, which, as I have before observed, at once brings us to the spot, supposed in my Hypothesis.

The terms adjacent to RASE, in Junius, which are attached to our Element RS, and which I have not examined in other places, are RASCHAND, RASSIE, RATCHES, RASH, RATHE, RASP.—G. Douglas, observes Lye, under the word Raschand, has the following passage: "RASCHAND unabasitlie, the schaft in sounder;" which is a translation of "Impavidus Frangit telum." The Editor of G. Douglas derives this word from RASCHIS, Fragores, "quod " à sono vult factum," says Lye; who prefers, as its origin, the Islandic RASKA, Frangere. RASSIE, Junius explains by "Fragilis " cum friabilitate," and refers it to Rasso, (Ρασσω, Allido, Frango.) We perceive, that these various words belong to the same idea of Breaking to pieces, and the Noise attendant upon such an action. Junius has added a remark on RASSIE, "Verbum est à quibus-"dam colonis Terræ attributum;" by which we are at once brought to the Spot, supposed in my hypothesis. RATCHES is a species of Dog, the name of which is to be found in various Languages; as in the Saxon Ræcc, the Islandic Rakke, which

Verelius derives from Rakka, Circumcursare. The idea of Running or Raking about, in its gentler or more violent sense, has supplied these names for the Dog.

RASH is justly referred by the Etymologists to the Belgic Rasch—the Danish Rask, the Runic Ras, the German Rasen, Furere; the Greek Ragdaios, (Ραγδαως, Præceps.) Meric Casaubon derives it from Ogaous. RASH, the Cloth, I refer to the idea of It is marvellous to observe, how words are attached to their original turn of meaning, though they appear to be applied to a very different purpose. I have supposed, that RASH belongs to RASE—Rout, &c., which relates to the action of Violent or Sudden Dispersion—of Breaking up—Scattering any thing upon or over a Surface. Now it is curious, that RASH is applied to Eruptions, suddenly Breaking out—and Scattering or Dispersing themselves over a Surface. We perceive, that the very terms Eruptions—Breaking out, are metaphors of the same kind, and are applied to Violent Eruptions or Breakings out upon the Skin. Thus we perceive, how RASH, in the sense of Violent Breakings out on the Skin, belongs to RASH—RASE—ROUT, &c., which relate to the action of Violently Breaking up out—to pieces, &c., Scattering-Dispersing, &c.-Rush is only another form and sense of RASH. The Etymologists, under Rush, have justly referred us to the Saxon Hreosan, Ruere; Hrysan, Movere; Ruysch, (Belg.) Rauschen, Fremere; ge-Rausch, Strepitus, (Germ.) the Greek Rasso, Arasso, Resso, Roizos, &c. (Ρασσω, Αρασσω, Pulso, Allido, Ρησσω, Rumpo, Poiζos, Stridor,) &c. The Latin Ruo, Ruitum, as we have seen, belongs likewise to our Element. RAUSCHen means, in German, "To Bustle, Rush, make a Noise or Bustle;" where we have the sense of Noise; and we perceive a similar idea in the meaning of our word Rush; and hence we have this term adjacent to Rustle.

RASHING, in old English, belongs to these terms of Violence, and

and more particularly relates to the original sense of these words, that of Scratching, or Tearing up-to pieces, &c. In the Ballad of Sir Lancelot du Lake we have.

> "They buckled then together so, "Like unto wild boares RASHING; "And with their swords and shields they ran "Attome ariother slashing. (Rel. of Anc. Poet. vol. I. p. 219.)

"RASHING," says Dr. Percy, "seems to be the old hunting term "to express the stroke made by the Wild Boar with his fangs. "To Rase has apparently a meaning something similar. " Mr. Steevens' Note on K. Lear, A. III. S. 7. (Ed. 1793. vol. XIV. "p. 192) where the quartos read,

> " ' Nor thy fierce sister. "'In his anointed flesh RASH boarish fangs."

" So in K. Richard III. A. III. S. 2. (vol. X. p. 567, 583.)

" 'He dreamt

"'To-night the Boar had RASED off his helm."

In an adjacent stanza of the Ballad above quoted we have "And "RUSHING off his helm," where we see a similar idea of 'Tearing 'up or off;' and this brings us to the form Rush, the word, expressing Violent Motion.

The term RATHE belongs to the idea of Excitement, as relating to 'The Quick-Rapid Motion, exceeding another species of Motion.' To RATHE belongs our familiar term RATHER, in which the idea of Motion appears to be lost. RATHER, however, conveyed the sense of Quicker, and it is justly explained by the Latin Citius. The Etymologists refer RATH and RATHER to the Saxon Rath, Rathe, Cito, Velociter; Rathor, Hrathe, the Belgic Rade, &c., Expeditus, Rapidus; the Runic Hrathur, Acer; the Greek Radinos, (Padivos, Celer, Agilis, velox, mobilis); Radios, (Padios, Facilis.)

RATHE

RATHE is commonly applied to 'The Early or Quick-appearing productions of Nature; as in RATH-Fruit, RATH-Wine, produced by Skinner, and the "RASHE-Primrose" in Lycidas. Mr. Warton finds "RASHED-Primrose" in an old writer, which he imagines to be Provincial for RATHE. Meric Casaubon derives Rathe, &c. from the Greek ORTHROS, (Oplipos, Diluculum); on which Skinner pleasantly observes, "quod sane longius distat quam Mane à Vespere." This is a very probable conjecture, and we perceive, that it coincides in form with the Saxon Hrathe, and the Runjc Hrathur; where the breathing is before the 'R. The Greek ORTHROS, (Oρθρος, Tempus antelucanum,) belongs to Orthos and Orthoo, (Oρθος, Rectus, Oρθοω,) which signify 'To Stir up—Raise up.' We all understand, that the idea of Rising up is attached to the Morning, or the first appearance of day. Our great Bard has described the first appearance of the morning by the image of a person standing ERECT, or on Tiptoe.

"And jocund Day "Stands Tiptoe on the misty mountain-tops."

In Saxon, the term *Hrad*, Præceps, is adjacent to *Hrad*, *Rode*, Equitavit; where we are brought to the true spot. *Hræd* likewise means "Celer, Agilis,—Paratus, *Ready*." I shall shew, that Ready is derived from the idea of *Agitation*, in the action of *Stirring up* a surface, so as 'To Rid off or Clear off any incumbrance from it, and to Prepare it, or Make it fit and Ready for any purpose.' In Saxon, Recen signifies "Cito, protinus," from which the Latin Recens is directly derived. In the same opening of my Saxon Lexicon, where this word occurs, we have Recan, "To *Reckon*, Curare, Solicitus esse," which I shew in another place to belong to the same metaphor as *Solicitus* does; and this word, we know, is derived from the idea of 'Stirring up the Ground—Solum Citandi.' That I have conjectured rightly respecting the origin of these terms, Rathe, &c., will be unequivocally manifest

manifest from considering the parallel terms. Wachter places the word RAD in various articles, under which we find the following explanations: "Cito, celeriter"—"Celer, alacer"—"Substantive "Cursum et Cursorem denotat, et dicitur antiquitus de Rota, "de curru, de fluvio, de impetu fluvii, et de omni impetu in "agendo, quamvis literis aliquantulum mutatis" — "Rota," — "Currus," under which he produces other terms, denoting a Wheel, as ROTA; and to which he refers RHEDA, or RHEDE, (Pedy,) and other terms conveying the same sense,—"Fluvius im-"petuose currens."—"Cursus Fluvii." The succeeding articles to these are RADen, "Currere, Properare, celeriter, et cum im-"petu ferri;" and RADen, "Exstirpare." The latter of these words he refers to Rotten, which he explains by "Rumpere terram. " sive id fiat aratro, aut fodiendi instrumento, quod faciunt coloni, " sive Rostro, quod faciunt sues;" where we are brought directly to the very idea, supposed in my hypothesis.

RASP, and its parallel terms, belong to RADO, as the Etymologists acknowledge. They have produced, as parallels, the French Rasper, the Italian Raspare, the Belgic Raspen, the German Raspen, or, as now used, Raspeln, the Swedish Raspa, the Danish Raspe, &c. Skinner has another article for the term RASP, or RESP, which he refers to the Belgic Respen, Rispen, &c., Ructare, and the German Rauspern, Screare; which, as we have seen, relates at once to the action of Casting up phlegm, as we express it, and to the Noise made by that action. Ruspor is an old Latin word, which signifies "To Scrape as a Dog, To Root in the Ground as a Pig "doth;—To Search diligently.—Also to Cut," as R. Ainsworth explains it; where we are at once brought to the spot, supposed in my Hypothesis. Martinius likewise produces Ruspino, which he refers to RASPare; and to this form belongs the Italian name RUSPINI. The English word RASberry Skinner refers to Raspo. Raspolo, (Ital.) "Rubus Idæus, et ejus baccæ;" and Minshew derives

derives it from the Greek Rops, (Party, Virgultum.) The Ras-Berry or RASP-Berry is 'The Berry, which appears RASPED or Scratched 'on its surface.' The Latin Fragum, and the French Fraise, the Straw-Berry, are derived from a similar idea of the Broken-Corrugated appearance of the surface, and belong to Frango, Fregi, Fraiser, &c. &c. The French Framboise is supposed to be Frais de Bois.—The Italian Raspo and Raspolo, or Raspollo, signify a 'Bunch of Grapes,' which might be taken from Grappo and Grappolo, terms of the same meaning: They probably however belong to Raspare, To Rasp or Scrape, for the same reason, that Grappo, the Bunch of Grapes, belongs to Grappo, the action of Griping or Seizing. I shall shew, that 'To Gripe' is 'To Grope 'up' or 'Scrape up,' and that it is derived from the action of Groping up-Scraping up-Graving up, if I may so express it, or of Scratching up the Ground. We know, that Carpo, to which Capio belongs, conveys at once the idea of Scratching or Scraping upon a Surface, and that of Seizing. Hence, I imagine, it is, that Raspo, the Bunch of Grapes, the object Griped or Carpt, is attached to Raspare, To Scrape, Scratch, or Carp.

In the same column of Junius, in which Rout occurs, we have Rouse, which he justly refers to Raise and Rise. We shall now understand, that these terms signify to Stir up or Rout up. In Raise and Rise we see little more than the sense of Elevation; but in Rouse we approach nearer to the idea of Excitement expressed by Rout. In the same column I see likewise Rous, which Junius explains by "Receptum et pervulgatum inter "potatores;" where we are directly brought to the strongest sense of Excitement expressed by Rout—Riot, &c. Junius refers this word to the German Rusch, Semipotus, and Lye to the Islandic Russ, &c., Temulentia. We now perceive, that Rouse is used for a Riotous kind of Drunken Frolic, both in Ancient and in Modern Language, "The King doth wake to-night and takes "his

" his Rouse." Hence we have the English Ca=Rouse; and the French Ca=RROUSSE, and the Spanish Ca=RAOS, where the 'Ca is the Teutonic addition of Ge. Verstegan, says Lye, derives it, with the approbation of Skinner, from the German Gar-Ausz, "Pocula exhausta, ad verbum, All out;" and yet he adds, though with some reluctance, and without seeing the process of formation, "Ego vero haud scio, annon sit a Rouse." My German Lexicographer explains Rausch by "An inebriation or surfeit "in drinking;" the succeeding term to which is the verb belonging to it, Rauschen, which he explains by "Eine Gerausche "machen, to bustle, Rush, make a noise or bustle." The explanatory term Ge=RAUSONE, an acknowledged compound of Ge and Rausch, is the very combination or :word, from which: CarRouse, &c. has been formed. If have already shewn, that Rush is another of these words. It is impossible surely to doubt, that the English Ca-Rousal, the French Ca-RROUSEL, and the Italian Ga-RROSELLO, belong to Ca=Rouse, Ca-Rrousser, just as Rustle, &c. belongs to Rush, &c.; yet the Etymologists appear to see no connection between these words; and Menage seems to acquiesce in the conjecture of Menestrier, who informs us, that Carrousel is derived from Carrus Solis, because this diversion was invented by Circe, the daughter of the Sun, in honour of her father.

The Etymologists, under Raise and Rise, have referred us to the Islandic Reisa, the Gothic Raisjan, the Saxon Arisan, the Belgic Riisen, the Italian Rizzarsi, Drizzare, se tollere, q. d. se Rectare, seu Directare, hoc est, Erectum in pedes statuere, Regen, Erregen, (Germ.) Movere; Rear, (Eng.) &c. &c. In Arise and Arose we have a vowel breathing before the ARS. We cannot but note; in e-Rigere, To Set up, To be erect, how Regrus and Rego, Right, &c., which might seem only to refer to the Straight Road, are attached likewise to the idea of Excitement, and signify To Raise up, &c. In Scotch, Ruse—Roose signify, says, Dr., Jamieson,

mieson, "To Extol, to commend; sometimes written Reeze;" which mean nothing but To Raise up—Exalt or "Extol," as our author explains them. In various Languages the Element supplies a race of words signifying 'To Boast—Praise,' &c., some of which Dr. Jamieson has collected; as the Italian Ruzzare, the Islandic Rausa, &c. &c. Our author, however, objects to the conjecture of Ihre, who derives them from the Islandic Risa, To Elevate. Lye and Junius have produced Rouse and Ruse, under this sense of Laudare; yet even the coincidence in the form of Rouse, Excitare, and Rouse, "Laudare vel Extollere," suggests no suspicion, that they may belong to each other.

I cannot help producing some of the terms, attached to our Element, in the opening of Dr. Jamieson's Dictionary, where Ruse is found; and here we shall still see the same sense of Excitement-Commotion, &c., as "To Rusch, To Drive, to put to flight, "&c., Rushie, A broil; Ruskie, A basket of Rushes;—Rute, "A blow;" where we are referred to Rout, A blow, to which we have a verb annexed, "To Rout. To Beat-Rute or "Roop-Goose, so called perhaps from their Noise; RUTHER, "A loud noise, a tumultuous cry, an uproar."—"RUTHER, RUDDER," so called from its Routing about the water,—Rutour, "A Spoiler, "An oppressor," before produced, where we directly see the ROUTER—" RUTILLAND Rauin," which occurs in Lindsay, and is printed, says Dr. Jamieson, Rutill and Rauin. "If Rutilland," adds our author, "be the original word, it must allude to the glossy "appearance of the Raven; Fr. Rutiler, Lat. Rutilare, to glitter." "In later editions it is Ratling, as synon. with Ralpand, an epithet "used in the description of the raven in the preceding stanza." It is surely not possible for Dr. Jamieson to doubt, that the 'RUTILL—RUTILLAND Rauin,' whatever it may be, refers to the Noise, and means 'The RATLING, RUTTLING, &c., Raven,'—Junius has produced Rise, Virga, Surculus, next to Rise, Surgere, and he

has

has referred them to each other for the same reason, as Surculus belongs to Surgo. I shall again produce this word, when I examine in a future page various terms, denoting vegetable productions 'RISING or Sticking up—sometimes under the idea of a bristly kind of appearance,' among which I shall place Rushes, &c. &c.

We have seen, that Junius has referred Raise to Rear. Rear, Skinner has produced the Saxon Araran, Up-Araran, Erigere, and Hreran, Agitare; from whence we learn, that the term signifies 'To Stir up.' We see likewise from hence, that the vowel breathing is lost before the first R in Rear, and I imagine, that we should consider it as a compound in the same form of our Element 'R doubled, quasi 'R=EAR, AR-ÆR, HR=ER, in order to express the idea more strongly, just as in On-Ooro from Ono, (Opage idem quod Opa, Concito.) The same compound we find in AR=OURA, (Apoupa,) belonging to ERA, (Epa.) In Roar or AR=OAR we have the Noise attached to 'R=EAR, in the action of Stirring In Up-AR=OAR we cannot distinguish between the Agitation and the Noise. Junius has two articles for this word, as "Roar-"Roar, Fremere." and Roore, Rore, "Concitatio ex concursu "turbulentæ multitudinis." Under the former, he produces the parallel terms Raran, (Sax.) Reer, (Fr.) Reeren, (Belg.) Papers, σφοδρος им та карта, and the latter he refers to Rear and Raise. Lye justly explains the Saxon HRERan by "To Rear, Agitare, com-"movere;" and the succeeding terms are "HRERE, Rear, Rere, "Crudus, Incoctus," and HRERE, Mus; RERE Mouse, "Vespertilio, "Nycteris." The term Rear means Raw, and I shall shew in another place, that Raw signifies what is Coarse or Rough, which is derived from the idea of a Stirred up-Broken up or Cor-Rugated surface. The parallel terms to Raw are Hreaw, (Sax.) Rauw, Roh, (Germ. and Belg.) and to Rough we find Hruh, Rouw, &c., where

we see the various forms, into which these words have passed. The 'REAR Egg' has been referred to Rarus, (Lat.) and to Reo, (Pew, fluo.) The Latin 'R=Ar-us exhibits a similar form of the Element 'R doubled, and it signifies 'What is Stirred about or 'Scattered and Dispersed about—here and there, so as to be thinly 'sprinkled.' In REO, (Pew, fluo,) we have the idea of Agitation annexed to Water. The Rere-Mouse may mean the Mouse which appears at the Rear or extremity of the day. The term 'R=EAR belongs to Arr=Iere, (Fr.) and its parallels Arr=Ears, &c. &c., where we see the idea of the Back—the Low part, as belonging to the AR-OURA, (Apovea,) the Ground. The Ground, when considered as the Extremity, alike suggests to us the idea of what is Extreme—in the relations which we express by Bottom and Top— Backward and Forward—Last and First; and hence we have ERE, Before, with its parallels in the Teutonic Dialects, Ær, (Sax.) Eher, (Germ.) &c. &c. To ERE belongs ERST, where we have the form ${}^{A}RS$, and from Erst we pass into f=Irst; and thus it is, that Languages have been formed. ERE, when referred to *Re- *Ar, may be considered as denoting the Source, from which things are 'RE=ARed, Arise, or when expressed in Latin by kindred terms, "Onigo, ex quâ res Oniuntur. The Elementary characters 'R, RS, &c. still continue faithful to their office, whatever forms they may assume; and we cannot but acknowledge, that all these changes are effected without error, and without confusion.

RAKE, RACA, RAECKE,
RAECKELEN, RECHE, RACLEN,
RATELEN, RAKA, RASTAL,
RASTRUM, RASTELLUM,
&c. &c. &c. (Eng. Sax. Belg.
Germ. Fr. Ir. Lat. &c. &c. &c.)

RAKE. (Eng.) The person who goes Raking about.

RAKE. (Eng.) A Hollow in a mine.

RACK for Hay. What is made in a Grate-form, or like a surface Raked or Grated with marks—lines, &c.

To RACK off Wine. Quasi, To Rake off or out the Dregs.

REACH—RETCH. What is Drawn out or along — Stretched — Extended, from the metaphor of *Raking* over—out or along a surface.

RACK. To Torture by Stretching.

RETCH. Vomere, Screare, q. To Rake up—out, &c.

RACAILLE—RASCAL, &c. (Fr. Eng.) The Rakings—the vile refuse.

RASCAL Dear. Feræ strigosæ, Lean Dear—Vile animals, of Raked—Scratched or Scraggy forms.

RAKE, To RAKE up the Ground, belongs, as we shall instantly agree, to the race of words now before us, 'Rout up,' &c., and brings us directly to the spot, supposed in my Hypothesis. The Etymologists refer us, under RAKE, to the Saxon Raca, Rastrum, Rastellum, the Belgic Raecke, &c., Rastrum, Raeckelen, Sarculare; the German Reche, the French Racler, the Italian Razzolare, "Ra-"dere et Fodicare instar gallinæ, Rastro, converrere;" the Runic and Swedish Raka, the Danish Rage, the Islandic Reka, the Irish Raca, Racam, &c. &c. The English word RAKE only gives us the idea, in its ordinary use, of the instrument applied in Gardens, but the Latin Rastrum means the Harrow. Rastrum, and its parallel terms, might be considered only, as different forms of the words belonging

belonging to HARROW, as HERSE, &c. In German, HARKE is a "RAKE, HARROW," &c. Robert Ainsworth explains RASTrum by "A RAKE, HARROW, a drag to break clods with-RASTRIS "glebas qui frangit inertes." In the Dialects of the Celtic, I find in Lhuyd, under RASTrum, the Cornish Rackan, the Armoric Rastel, the Irish Raka, Hoirste, and Rastal. I find likewise RASDAL, A Rake, and RASDALam, To Rake, gather, in Mr. Shaw's Galic and Irish Dictionary. Hence our name RASTAL is derived. In the same Dictionary we have RACam, To RAKE; and an adjacent word to this is 'RACHam, To Go,' which means 'To RAKE 'about or move on the Road,' &c. The Greek Erchomai, (Ерхория,) should not be considered perhaps as directly belonging to the Celtic RACHam, yet the original idea of the word is that of an action of Violence, as it appears in the sense of "Invado, Persequor." We see, in these explanatory words, how readily the simple idea of Motion, as Going, Following, connects itself with an action of Violence. In the Latin Gradior, Ingredior, Grassor we see the union of the same ideas.

The English term Rake, as denoting the Person, means the loose Character, who goes Raking, Rioting or Rowing about, as we express it, the Roisterer. The spot and metaphor, from which Rake in this sense has been taken, will be manifest from a passage in Shakspeare, where personages of this kind are called Land-Rakers. The Robber Gadshill, the companion of Falstaff and the Prince, says, "I am joined with no foot Land-Rakers, "no long staff, six-penny strikers; none of these mad, mustachio, "purple-hued malt-worms, but with nobility, tranquillity, burgo-"masters," &c. (First Part of King Henry IV. A. II. S. 1.) Some have compared the English Rake, the person, with the Syriac term of contempt, Raka, (Para, Matth. c. v. ver. 24); and though we should not perhaps consider them as directly belonging to each other, yet we shall find, that the corresponding Hebrew

term contains the same fundamental idea. Skinner produces the combination, RAKE=Hell, which I shall examine in a future page.-The term RAKE is produced by Skinner, as signifying Fodina, " nescio ab RACA, Guttur," as he observes, quia puteus Metalli-"cus est, instar Gutturis, profundus et inanis." RACA, Guttur, and RAKE, Fodina, mean only the Hollow - RAKED, Dug out, &c. &c. Though Skinner and Lye explain these words RAKE, &c. by RASTRUM, I should not have understood, that the former Etymologist had considered the Latin term as belonging to these words, if it had not been printed in Italics in the phrase " Rastro Converrere." We must add to these terms belonging to the RASTrum, RAKE, the French words RATeau, a Rake; RATELer. To RAKE; RATisser, To Scrape; RATurer, To Scratch, which will remind us of the French Raser, before produced, To Shave, To Trim, to Raze, to Overthrow; RAZOIR, the Latin RADO, RASI, the English RASE, RASURE, ERASE, RAZOR, &c. with their parallel terms in other Languages.

I find, moreover, adjacent to RATeau, in the French Dictionaries. RATelier, "A Rack, in which Hay is put for Horses;" RATINE, Ratteen, a sort of Woollen stuff; RATE, Spleen; RAT, a RAT: RATatiner, To shrink; RATer, "To miss, to fail of "obtaining any thing;" which, however remote they may appear from each other, must be all referred to the same train of ideas. RATine, RATTEEN, the Woollen stuff, means the Rough-Coarse Cloth, such as a Surface appears, which is all in a Scratched up state. Menage confesses his ignorance respecting the origin of this word; and Le Duchat, though he informs us on the authority of a French and Italian Dictionary, that this Stuff is called "Rouescia di Fiorenza, c'est-à-dire Revesche de Flo-"rence;" yet he asks, whether Ratine does not come from Florentina. The terms Rouescia and Revesche convey the same idea of the Rough Cloth. The Editor of the last edition of Menage

Menage has seen, that Revesche has some resemblance to the German Rauh, and the English Rough. Le Duchat derives it from Reversus, and he tells us likewise, that the word, as an adjective, means Rude; in which sense he derives it from Ripa.— RASH, in English, is a Species of Cloth, which Skinner refers to the Belgic Ras, the Italian Raso, Rascia, "Sericum, Sattin, q. d. " Sericum Rasum, Villi enim expers est." Rasch, in German, means, as my Lexicographer explains it, 'The English Serge;" and Serge is "A sort of Woollen stuff," as N. Bailey explains it. Hence RASH, (Eng.) Rasch, (Germ.) and Ras, (Belg.) mean the ROUGH Stuff. The Italian Raso, Satin, and Ras, (French,) belong to Rasus, &c., as Skinner supposes. RATE, the Spleen, Menage confesses to be of difficult origin; but he asks, whether it may not be derived from Jecorata, Rata, Rate; and the Editor imagines, that it is taken from the form of a RAT. The term RATE belongs to RATeau, the RAKE, &c., and is a metaphorical application of this term, as being the supposed Seat of that, which RAKES—Vexes or Disturbs the mind. We know, that Spleen, in English, signifies at once the Organ—and the Vexation, supposed to arise from that Organ. RATER, "To Miss, to fail of ob-" taining," seems to be directly connected with RATE, the part, in which Chagrin is situated, arising from disappointment in our wishes.

RAT, the animal called in English a RAT, we shall instantly agree to be the Scratcher—the Scraper, and to belong to RATeau, RAKE, RATURER, &c. &c. &c. Obvious as the affinity is between RAT and RATURER, I do not find, that any of the French Etymologists are aware of their relation. RAT is commonly derived from Mus; and Menage observes, though this derivation does not displease him, that it is more natural to derive RAT from the German Ratz, a word of the same meaning. The Editor, who produces from Wachter the parallel terms in other Languages, concludes,

concludes, that the word is certainly Teutonic, and perhaps even Celtic. Rat occurs in various Languages, as in the Saxon Rat, the German Ratt, Ratze, the Belgic Ratte, &c., the French Rat, the Italian Ratta, the Spanish Raton, the Danish Rotte, the Islandic and Swedish Ratta, &c., which the Etymologists have produced. Some have derived these words from Raio, (Paux, Corrumpo); and others have observed, that they are taken from the German Reissen. In Shaw's Galic and Irish Dictionary we have Radan, a Rat. We find Rat, in old French, used "pour" canal de mer," as Le Duchat observes, who derives it from Rasus, or from Rapidus. The term Rat, in the sense of a Channel or Hollow, belongs to Rut, &c., and the animal is that, which makes Ruts or Hollows, &c.

The succeeding term to this in Menage's Dictionary is Ratafiat, the Liquor called Ratafia, which he supposes to be "un mot des Indes Orientales." Leibnitz supposes it to be a corruption of Rectifie; and 'M. de la Croze, who was for a long 'time in America," says Le Duchat, "observes, that when 'a native Indian drank Brandy to the health of a Frenchman, ' he said Tafiat; to which the Frenchman answered, drinking to 'him again, Ratafiat.'--If this account be precise, such must be the origin of the word. RATatiner, "To Shrink or contract," as my Lexicographer explains it, is derived from the idea of the Scratched—Cor-Rugated Surface, which presents to the mind the notion of 'What is Shrivelled or Contracted, in opposition to that, 'which is Plump and Smooth.' We know, that Rugosus, Shrivelled, belongs to Ruga, the Furrow, which, we now see, is to be referred to RAKE, &c. Menage derives RATatiner from the animals, RATS, "qui etant pris, ou surpris se ramassent, et " rentrent, pour ainsi dire, dans eux mêmes." Thus we see, how these terms RAT, RATatiner, &c. belong to RATEAU, the RAKE.

The French RATELier, "A Rack, in which Hay is put for "Horses,"

"Horses," must belong to the idea expressed by RATELer, To - RAKE, and so, as we perceive, does the English RACK; and we have only to enquire, what is the peculiar idea by which they are connected. RACK and RATelier, might signify that, into which Hay is RAKED or Gathered. They probably, however, relate to the figure of the RACK, composed of a series of bars with insterstices, like the figure of the RAKE, or the series of lines made on the Ground by RAKING, or Scratching upon its surface; and this idea I imagine to be the true one. RACK and RATelier have, as I conceive, the same relation to RAKE; that Grate, the Iron Lattice-work, has to Grate, the action of Scratching lines on the Ground. I have illustrated the same idea on a former occasion. The English RACKET, Raquette, (Fr.) relate either to the RACK-like form, or belong to RACKET, Strepitus, which is derived from the Noise, made by RAKING or Scratching upon the Ground, as Grate, we see, likewise denotes a similar species of Skinner places a RACK of Hay, and a Kitchen-RACK, in Noise. separate articles. Under the former he adopts the idea, which I have exhibited, "fort. ab. A. S. Race, nostro Rake, Rastrum "à luculentâ septorum Fænilis et Rastri similitudine;" and the latter he supposes to be derived "a spinæ dorsi similitudine." RACKET, the Instrument, occurs in the French Raquette, the Italian Rachetta, the Spanish Raqueta, and the Danish and Belgic Racket; and these the Etymologists derive from Rete, which relates perhaps to the RACK-like form; unless we should suppose, that it rather belongs to the primary sense—the action of RAKING up fish. The Etymologists derive RATE from R_{uo} . (Puw, Traho.) Let us mark Ruo, (Puw,) and its parallel term Rustazo, (Puotala, Trahendo rapto, Traho,) To Draw, Drag. or, as we may express, to RAKE up, off, away, &c.

The RACK of Mutton, a Neck of Mutton, is derived from a similar idea of the RACK-like form, or, as we might put it,

of a Scraggy - Broken appearance. Let us mark the term Scrag, which is itself applied to a Neck of Mutton, and which I shall shew to belong to the Scratched, Broken Surface. mologists refer the RACK of Mutton to terms, which are derived from the same idea, as Hracca, (Sax.) Occiput; Raca, (Sax.) Guttur; the Belgic Rugge, the German Ruck, Dorsum; Rache, Rachen, Gula, and Rachis, (Paxx, Spina Dorsi.) terms belong to the idea of 'The Rough, Substance - Broken, 'Scratched or RAKED up into RIDGES, RUTS,' &c. The RACK of Mutton, is not, however, "Tergum Ovillum," as Junius supposes, but "Cervix Ovilla," as Lye has justly observed. Skinner has RACK in the sense of 'Cart RACK,' which he refers to the Belgic Ruck, Tractus, where we are at once brought to the original Spot, the RUT, on the Ground.—RACK in the sense of 'To RACK off Wine;' "Vinum elutriare," means 'To RAKE off, as it were, the Wine,' or 'To Rake off the impure part or dregs from the pure.' The explanatory phrase, adopted by Skinner, 'Vinum Elutriare,' means literally 'To Mud off the Wine,' or 'To remove the Mud or Dregs 'from the Wine:' "Elutriare est è Luto purgare," as some justly explain it. Skinner derives RACK in this sense from Reccan, (Sax.) Curare, though he records a French phrase, which he finds in Cotgrave, "Vin Raque quod exponitur Sordidum et "Fæculentum à Vinaceis secundâ expressione extortum."

It may often happen, that some embarrassment will arise from the difficulty of deciding on the peculiar notion, to which a word immediately belongs; though we perfectly understand the general train of ideas, with which the term must be involved. The word RACK, Torquere, To Torture, affords perhaps an example of this nature. It has been referred by the Etymologists to the Belgic Racken, the German Recken, Extendere; the Danish Recke, the Gothic Rakjan, the Islandic Reckia, the

Greek Resso, (Ρησσω, Rumpo,) the Hebrew γρη RKH, Expandit, or Rakak, Atterere, vel Rasas, Confringere, conterere, lacerare. These words all belong to the same train of ideas, conceived under different points of view. RACK, To Torture, might simply mean 'To RAKE up the feelings,' or, as we express it by a similar metaphor, 'To Harrow up the feelings;' and this indeed is the meaning of the term; yet it has obtained this meaning, in some instances, through the medium of the sense expressed by the German Recken, Extendere, To Stretch out, to which belongs our word REACH, or RETCH, from the idea of torture, as in the phrase, 'Stretch'd upon the RACK.' In old English, under the form RACK, we have the sense of Stretch-Extend —REACH. "Your Sins are RACK'D," occurs in Love's Labour Lost; where it means Extended, as Mr. Malone observes. In Coriolanus, we have,

" A pair of tribunes that have RACK'n for Rome,

"To make coals cheap."

Here Mr. Malone observes, that "To Rack, means to Harrass" by Exactions;" wherein Rack is used in its original sense, as we see it in the term Harrass, which I have shewn to be derived from the Herse or Harrow. The idea, which we annex to such terms as Stretch, is generally attached to that of 'Drawing or Dragging any thing upon—over, or along the Ground,' or, as we might express it, of 'Raking upon, over, or along the Ground, with various degrees of force and violence.' It is marvellous to observe, what an impression this action of Drawing or Raking over the Ground has made on the mind, and to what a variety of purposes, as it should seem, the most dissimilar and discordant, it has been applied by metaphorical allusion. The explanatory terms here adopted will fully unfold this point. The Latin Traho, Traxi, means "To Draw,

"to Prag. - To Wrest, to force, - To Draw, or Stretch out," &c. &c. &c.; and Tractus means, among various other things, "A Drawing in length,—A Tract, or space of,—A Trace or mark, "a Streak." We shall now see, that Draw, Drag, Tractus, Trace, Tract, Streak, Stretch, &c., are all related to each other. But whatever we may think on this point, let us only consider the terms, which are acknowledged to belong to Traho, through their various senses in different Languages, Traho, Tractus, Tracto, &c.; Tragen, (Germ.) Traire, (Fr.) &c. &c. &c., and we shall be astonished to find, through what a wide range of Human ideas this metaphor has passed. We instantly see, that these terms have been applied to denote a Line or Mark-A Country, A Feast — An Exercise of the mind — A Bargain, &c. &c. &c., as in 'TRACE, or TRACK,' 'TRACT of Land,' 'A TREAT.' 'To Treat on a subject,' and 'A Treatise or Tractate,' 'A Con-'TRACT,' &c. &c. &c. — I shall shew, that the verb Torqueo, To Torture, is itself one of these words; and we cannot separate from the idea of Drawing the TRACE—mark—or Furrow, the action of Turning or Stirring up the Ground, by which the TRACE or Furrow is made. We thus see, how the notion of the RAISED or RAKED-up Furrow, or RIDGE, is connected with that of RAKING along, or REACHING, or Stretching forward. these ideas are so involved, that it would be a vain attempt, if we should endeavour to separate the one from the other. The Etymologists therefore have justly produced Resso, (Pyerau,) which means 'To Break up - RAISE - RAKE, or ROUT up the Ground into RIDGES,' as a kindred term to RACK, belonging to REACH.

The German Recken signifies, as my Lexicographer explains it, "To Rack or Torture one, put him to the Rack;" and it means likewise "To Retch yourself, Retch out;" and the phrase produced,

as authority for this sense, is "Die gesetze RECKEN, wie die "Schuster das leder, To Wrest and Stretch the Laws, as Shoe-"makers use the leather," where we see how RACK connects itselfwith RETCH or REACH. In WREST, we see the form 'RS, and the action of violence. — Under REACH, the Etymologists produce the Saxon Recan or Racan, Arecan, &c.; the German Reichen, the Italian Recare, the Greek Orego, (Opeyw.) REACH is applied, to express certain Tracts, or Lengths, which Stretch along the banks of a River, as 'Lime-House REACH, Greenwich 'REACH,' &c.; which may be said to belong both to the verb REACH, as Skinner first supposes, and, as he afterwards conjectures. to the Saxon Hnicg, Dorsum, q. d. Dorsum littoris. - REACH is used likewise "Pro nisu womendi;" where it is applied, as an action of Violence and Agitation, with the idea annexed to it of 'Stirring up-Raising up, or Raking up something.' Skinner refers this word to the German Brechen, Sich Erbrechen, the Belgic Braecken, Vomere; and all these, as he says, are derived from the German Reshan, Extendere. Whether the Greek OREGO. (Opeya, Pedes, vel manus Extendo,) Orguia, (Opyma, Spatiums interjectum vel inter pedes divaricantes, vel ambas manus expansas, Passus,) directly belong to Reach, &c., I must leave the reader to judge. I have shewn however, that these words under the form 'RG, attach themselves to the terms of Excitement. ORGE, (Oeyn, Ira,) &c. &c. &c., which I suppose to be derived from the same metaphor of 'Stirring up the Ground.' Thus we see, how all views of the question bring us to the same point, whatever might be the precise relation which words bear to each other. Junius refers Retch in Spitting, Screare, to the Saxon Hrace, Screo, the Islandic Hraake, Sputum, the Danish Harcker. Screo, the Belgic Rachelen, &c., "Rauco screatu pituitam sursum "evocare ac sputando egerere," the Welsh Rhoch, Fremitus, the

the Greek Erzugomai, (Epsvyopai,) and the Latin Ructo; all which terms belong to the Element 'RG, &c., either with the breathing before or after the R, conveying the same ideas of Stirring up—RAKING up, with the consequent attendant of Commotion—Noise, &c. &c.

The succeeding words in Lye's Saxon Dictionary to Racan, Extendere, are RACA-Teag, and RACCENTA, Catena, which belong to the idea of Stretching out. Lye, in his Edition of Junius, produces the term Raketyne, as used by Robert of Gloucester, which he has justly referred to these Saxon words. In Lye's Saxon Dictionary, the word "RACAN, Extendere, - To " REACH," immediately succeeds RACA, a RAKE, RASTRUM. The next word in Junius to Raketyne is RAIKED, which he refers to the Scotch Raik, Gradus citatus, A Long Raik, " Iter longum, "To RAIK home, accelerato gradu domum abire;" where we are directly brought to the Course - or Tract, sometimes with an accelerated motion, upon the Ground. He records under this word the Islandic Reika, ambulare, and the Irish RACHA, Inc. He adds likewise, " Huc non incommode referri potest nostrum " Rake, Homo dissolutus." Dr. Jamieson explains RASKE, RAKE. &c., by "To Range, to wander, to rove at large - To RAIK on "RAW, To Go or march in order, - To go side by side in "a Row;" where let us mark Row and Row, which are quasi RAG, &c., and mean the regular Course or RAKE. In the phrase, "He brings twa, thrie, &c. RAIR a day, applied to dung, "coals, &c., in which carts and horses are employed, as equi-"valent to Rraught," we are brought to the idea of RAKING or Dragging on a surface. The term RAIK, means likewise "The Extent of a course, walk, or journey;" where we again see how we may pass into the sense of REACH—from the idea of a Course or ROAD only, when the notion of a forcible action is

not prominent. The combination Tongue-RAIK, means Eloquence, i. e. A continued Course of Speaking. In Scotch, RAK means To REACH, "To attain." Let us mark the explanatory term Range, above adopted, which I shall shew to be quasi RAGGE, belonging to the same train of ideas.

The Hebrew pro RKH, contains the idea of Stretching out, as connected with an action of some Violence and Agitation.

Mr. Parkhurst observes on this word, that "It expresses Motion of different parts of the same thing, at the same time, one part the one way, and the other, the other way, with Force.—

"To Stretch forth, extend, distend, expand.—It is used for Jehovah's Stretching forth the proper SChKIM, "or conflicting, at the same time, one part the one way, and the other, the other way, with Force.—

"To Stretch forth, extend, distend, expand.—It is used for Jehovah's Stretching forth the proper SchKIM, "or conflicting, at the same time, one stretching of the strength of gold by "Beating,—for Stamping on the Ground with the foot, and so "Beating out the part on which one Stamps, flatter and wider, "an action similar to the last,—for the Expanding or Stretching "forth the Earth and its produce:—As a Noun prop "RKIH or RKING, "An Expansion, the Celestial fluid or Heavens in a state "of Expansion, the Expanse, Gen. i. 6, 7."

We have seen, that RAKE means 'The loose fellow, who 'RAKES, or RIOTS about.' The succeeding term to this in Skinner is RAKE=Hell, which he supposes to be either derived from RAKE=Hell, according to the Proverb, "RAKE Hell and Skim the Devil," and you will never meet with such a fellow," or rather from the French Racaille, Fæx Plebis. Rake=Hell, or Rakell, seems to have had originally only an accidental coincidence with Rake Hell, in the Proverb, and belongs probably to the French word produced by Skinner. Junius writes it RAKELL, and has seen that it has some affinity with RASCAL. He tells us likewise under this word, that RAKELL in Chaucer means 'Temerarius, præceps.' My German Lexicographer has the following notable explanation

RECKEL, "A Rake or Rake-Sham, Lungis, Lath-back, Slim-slow "-back, dreaming Lusk, Hum-drum, Lingerer."

Skinner refers Rascal to the Saxon Rascal, which he derives from the German Rahn, Macer, and Schaal, Cortex. From hence he deduces the French La Racaille, Sordida Plebecula, Fæx populi. He records likewise the Greek Rakia, Paria, "quod "idem sonat teste Casaubono in Athenæum à quo Fr. G. " Racaille vir eximius deflectit." Junius is aware of the peculiar application of Rascal to Deer, "Rascaille Deer, Capreæ rejiculæ." Some think, as he observes, that the word is corrupted from Rejiculus; though he imagines, that it belongs to the Italian Rasca, "Araneæ telam, et per consequens quamlibet nihili rem "denotat." Hence he derives the Belgic Rekel, Vilissimus canis. and the French Racaille. Lye imagines, that the Saxon Rascal, "Fera strigosa," has a great affinity to the Islandic Raska, Corrumpere. RASCAL is peculiarly applied to Lean Deer, as every reader of Shakspeare well knows. It is used in the following passage, both in its general and peculiar sense. " Dol. You muddy RASCAL, is that all the comfort you give " me?, Fal. You make fat RASCALS, Mrs. Doll." (Second Part of Henry IV. A. II. S. 4.) Dr. Johnson observes on this passage, "Falstaff alludes to a phrase of the Forest. Lean Deer are "called RASCAL Deer. He tells her she calls him wrong; being "fat, he cannot be a RASCAL."—" So in Quarle's Virgin Widow, "1656.— 'and have known a RASCAL from a fat deer;'" as Mr. Steevens observes. Dr. Johnson has strangely misunderstood the sense of this passage. It means, "If I am a Rascal, you " make me so, as you make lean animals or RASCALS fat." The reply to the speech of Falstaff is, "I make them! gluttony and " diseases make them: I make them not." Mr. Malone justly observes, that "To grow fat and bloated is one of the

"consequences of the venereal disease; and to that Falstaff probably alludes."

My French Lexicographer explains RACAILLE by "Rabble. "scum of the people, RASCALITY, Trash." We should instantly agree, that RASCAL and RACAILLE would be naturally derived from the Filth or Dirt of the Ground; but we shall now see, that they belong to a peculiar state of this Dirt. or to the RAKED away Dirt, the vilest of the Dirt or Rubbage. French RACAILLE is that, which is RACLE—RAKED off—the Offscourings, &c., as Scum is attached to Skim—the vile part— Skimm'd off. — A Scrubby Fellow belongs to Scrub-Scrape, &c., under a similar metaphor to that, by which RACAILLE and RASCAL are attached to RACLER. We see, that RASCAL, is particularly applied to Lean Deer; under which sense it perhaps comprehends another idea, which we annex to a surface, when it is Rocaille or Raked over. The idea of Leanness, as opposed to the smooth, even, plump appearance of fat objects, is perpetually connected with the metaphor of a Scratched - Corru-GATED — Uneven Rough Surface; and this may be the idea annexed to RASCAL, the Lean Deer. We have seen, that the Saxon Rascal is explained by "Fera Strigosa," where, in the explanatory term Strigosa, we have precisely the same metaphor. Robert Ainsworth interprets Strigosus by "Lean, lank, scraggy, "thin, bare, meagre." The Latin Strigosus, is acknowledged to belong to Striga, "A Ridge land, or single furrow drawn at "length in ploughing," - Strigo, &c.: The first sense of Strigo is "Striga Note, To Mark or Scratch into Furrows;" and the Equus Strigesus is the 'Equus, quasi Strigis Notatus,' though the Etymologists conceive it to be the Equus, "qui præ macie Strigare "vel quiescere cogitur." The mind oftentimes embraces both the active and passive sense on the same object, when the object

object will admit of this union. Thus the RASCAL Deer means at once, 'The Vile RAKINGS, and the RAKED, the RACLÉ animal, under 'its meaning of the RACLÉ Matter,' i.e. 'The RACAILLE, and the 'RACLÉ form,' if I may so say. We have seen, that RAKE means 'The RAKING about person;' and we talk likewise of "A person as "thin as a RAKE," which means 'The person of a RAKED—Strigose form.' Sraggy belongs to Scratch, for the same reason; and we sometimes use the phrase 'A Vile Scratch,' in which we certainly see the idea of 'What is Vile, connected with a Scratched appearance.' I have before shewn, that HAG, and HAGGard, belong to a race of words, which signify, 'To Affright—To HACK, as it 'were, or To Scar,' as we express it; and they comprehend likewise the idea of 'The HACKED—or Scarred figure,' if I may so say. When we apply Scar-Crow to a person, it is generally done to a person of a Scarred Scraggy figure.

I have observed, that the English RAKE has been compared with the Syriac term of contempt, RAKA, (Pana, Matt. v. 24.); and though perhaps these terms should not be considered, as directly belonging to each other, yet the corresponding Hebrew word contains the fundamental idea annexed to the Element. Mr. Parkhurst explains this word אָרָס RKA, by "To " evacuate, exhaust, Draw forth, extenuate, attenuate;" and he gives us, as derivatives from it, WRECK, RACK, RAKE. word means likewise the Temples and Spittle. Taylor explains the word thus, "Attenuare, Tenue. To be thin,—as a wafer,. " or thin Cake. — To be thin of flesh. — Hence, the Temples as "a part bare of flesh. - But in Cant. iv. g. the sense seems to " include the Cheek also. To be thin as Spittle. - Though in "the word רק" RK, "there may be an Onomatopœia, alluding "to the sound of hawking up or ejecting the Spittle." The fundamental sense of this Hebrew word is 'To RAKE or ROUT, up, out, or about.' Hence we have the idea of Emptying - and of

Thinness, and of Spitting out any thing. In a passage of the Psalms, it is directly connected with the imagery of RAKING away Dirt. "Then did I beat them, as small "as the dust before the wind: I did Cast them out as the " Dirt in the Street;" where the term to Cast out is the Hebrew רק RK. No passage can be more in point for the confirmation of my hypothesis. This word is applied to the Lean-Fleshed kine of Pharaoh, which, as we see, precisely corresponds with the sense of the 'RASCAL Deer.' This is curious: The word means, the Temples, Brow, &c.; from the RAKED or Scored marks—the Ruge or Wrinkles, which belong to it. Let us mark the explanatory term Cast, which is used in a similar sense for 'To Bring up any thing from the stomach—throat,' &c.; and it is applied in its original sense, when we talk of 'Casting' a pond, or clearing out its Dirt. The Hebrew word, as Taylor justly observes, comprehends at the same time the idea of I have just shewn, that the English REACH, and the Latin and Greek Eructo, Ructo, Ereugo, (Equipo, Ructo; -Emitto, vel evolvo, quasi Eructando, effundo,) are derived precisely from the same idea of RAKING up. In Chaldee the corresponding word to this Hebrew term means Lacuna, as Castell informs us, where we are at once brought to the Furrow. In Syriac it means Attenuo, and Expuo; and hence the term of contempt, Raka, Pana, "Sputatilicus, Vilis," &c. In Samaritan 'it signifies "Effudit - Attenuavit;" and in Æthiopic, 'Tenue ' reddidit.'

The preceding terms to this Hebrew word א רק RK, which belong to our Element, are these, רצף RZP, "To Strow, or Spread;" א RZG, "To pierce through, perforate, bore;" רצה RZCh, "To Kill, slay, murder;" רצה, "To be pleased with, to like, "affect;" רצה RZD, "To Leap, Exult;" א RZA, "To Run;" א RZZ, "To run here "and."

" and there, or with swiftness and violence; To run or dash one "against another, - To break, crush, oppress greatly;" where we perceive, that all these terms, with the exception of דצה, "To be Pleased with," relate to actions of Violence or Commotion, such as we have found to be expressed by this race of words, ROUT, &c. Mr. Parkhurst has justly produced, as parallel, under רצץ RZZ, the Greek Rasso, Resso, (Ρασσω, Ρησσω,) the English Rush, the German Risch, the Saxon Raus, and the English Race and Risk. The succeeding words to דק RK, are רקב, "To Rot;" where in the explanatory term Rot, we see a similar meaning and Radical, and are brought to the dirt of the Earth, in a Broken Dissipated state; רקר RKD, "To Leap, skip, bound," to which Mr. Parkhurst has justly referred RACKET and RIGAdoon, as they all belong to the same idea of Agitation; and חקרו RKCh, "To make a composition of various spices, to compound " several aromatics or perfumes, according to the art of the "Apothecary or Confectioner." This word is derived from the idea of Routing about things, so as to Mix or Mingle them all together. The other terms, which succeed these, belonging to our Element, I have considered in different portions of my Work.

"didst Run, or Concur with him." We shall now understand. that דן RZ, To Run, and רצה RZH, "To be pleased with, to like, "affect," are only different forms of each other, and that they both relate to Excited action, to Running, &c. The latter word, in the sense of Being pleased with, is derived from the metaphor of Running with, or, as we express it under the same metaphor, by an appropriate term, 'Concurring with.' The explanatory term Συντρεχω, Con-Curro, has, we know, the same Original and metaphorical meaning as the Latin Con-Curro, To Run with, or To Con-Cur with; and those meanings coincide with the two senses of these Hebrew words, [Συντρεχω; "(1.) Concurro; "(2.) Convenio, Consentaneus sum, Consentio; (3.) Adjuvo; "(4.) Evenio, ad alicujus voluntatem."] The Hebrew word in one of its' senses signifies "To accept with complacence and pa-"tience, as punishment for sin, to acquiesce in," as Mr. Parkhurst explains it; where the original sense more strongly appears. The term occurs in the following passage of Job xiv. 6. "Turn " from him, that he may rest, till he shall Accomplish," (ידצה iRZH) "as an hireling, his day." Here the word seems to signify little more than 'To Run through, or Pass through, as in the 'accustomed Course.' This Hebrew word is often rendered in our Translation by Accept, and in Latin by Acceptum Habeo; which, though they do not contain the same metaphor, yet express with sufficient precision the idea of Concurrence with any accident, object, &c. Taylor in his last example of the use of this Hebrew word, (Jeremiah xxiii. 10.) explains it by Voluntas, though in the English translation it is rendered Course: He refers us however to the Root, ארן RUZ, To Run,—" For the land is "full of adulterers; for because of swearing the land mourneth: "the pleasant places of the wilderness are dried up, and their " Course" מרח חם m-RUZ TEM, " is evil, and their force is not " right."

"right." The Septuagint likewise translate the word by Δρομος. Hence we may learn, how the adepts in the Hebrew Language have been confounded by the similarity of these Roots.—The Arabic Loo Ryza appears to correspond with this Hebrew word. Mr. Richardson explains it by (1.) "Consent, agreement, acquiescence, "permission, connivance. (2.) Intention, wish, will, desire, resignation," &c. &c.—The Welsh Lexicographers have compared their word Rhynga, (bodd,) To please, To give content, with this Hebrew word ry Ratzah, and with the Chaldee ry Ranga. The Hebrew ry RZ, in the sense of Run, brings us to such terms as Race, &c., which Mr. Parkhurst has seen. To this Hebrew word Mr. Parkhurst refers, with a formative ry A, as he expresses it, the important term ry ARZ, Arez, Arets, the Earth, from its Breaking or Crumbling to pieces.

Through the whole compass of Language the Element 'RC, ARD, &c. RC, RD, &c. &c., exhibits the idea of Breaking—Dashing — or Crushing to pieces, &c. &c. Mr. Parkhurst has justly seen the necessary and inevitable connexion of this idea with the Ground or EARTH, &c. I have before produced, under the form ^RC and 'RD, &c., the Greek Ereiko, Ereido, Orectheo, Arasso, ARATTO, &c., (Epeiko, Frango, Epeido, Trudo, - Pass. Fundi, Humi sterni, Ορεχθεω, Sternor, dicitur etiam de sonitu fluctuum ad litus allisorum, Αρασσω, Αραττω, Pulso, Illido.) Mr. Parkhurst has justly reminded us, under the Hebrew רצין רץ RZ, RZZ, To Dash, or Break to pieces, of the Greek Rasso, Resso, (Pagow, Allido, Pyoow, Frango, Rumpo, Vehementer ferio, allido,) to which we must add Regnuo, Regnumi, (Pnyruw, Pnyrumi, Frango,) &c. It is curious, that Mr. Parkhurst, who is an adventurous Etymologist, should not perceive under our Element any terms of Violence and Commotion, which he could refer to his Hebrew term, but Rush, Risk, Race. I have already produced Rush; and

the term Risk, as the Etymologists understand, occurs in various Languages, as Risque, (Fr.) Riesgo, (Span.) &c. Wherever we turn our eyes, the same ideas perpetually recur; and the writer finds himself obliged frequently to produce the words, which he had before examined in other parts of his discussions: The Reader however will be hence enabled to consider the argument under various points of view, and to observe, how the same words connect themselves with different portions of the same train of ideas.

wRikkle.

Words denoting, or relating to a surface Stirred up—Broken up, ROUTED—RAKED, &c.—RAISED OF RISING up in RUTS, RIDGES, &c. &c., so as to assume a ROUGH, RUGGED, cor-RUGATED appearance, or to be in a ROUGH state.

Rut, Ridge, Ruga. (Eng. Lat.)
The Furrow, or the Raised
Dirt from it.

Rough, Rugged, &c. Hruhge, Hruh, Ruh, Ruych, Rouw, Rauch, Roide, Rozzo, &c. &c. (Eng. Sax. Belg. Germ. Fr. Ital. &c.)

Regnuo, Resso. (Gr.) To Break up.

Rug, Regos, &c. (Eng. Gr.)
The Rough Covering.

RAG, RAKOS. (Eng. Gr.) What is Broken or Torn to pieces. RIGEO, RIGID, &c. &c. (Gr. Lat.

Eng.) What belongs to the Rough surface.

Ruga, Rutis, Rusos, Ride, &c. &c. (Lat. Gr. Fr. &c.) A Wrinkle, quasi

RICTUS. (Lat.) Os in Rugas diductum.

The Raised up—Ridge like object.

RICK, ROGUS. (Eng. Lat.)
RUCK, hRIC, RIG, &c. (Germ. Sax. Scotch.) The Back.
ROCK, ROC. (Eng. Fr.)
RUSCUM, REEDS, RUSHES, &c.
(Eng. Lat. Eng. &c.) The objects, which have a Rough, Bristly appearance, &c. &c. &c. &c.

The Rough Noise.

RAUcus, Rugio, Rudo, Regko,
Route, &c. &c. (Lat.
Gr. Eng. &c.)

I shall consider in this article those terms, belonging to the form of our Element RC, RD, &c., which are directly or more remotely

remotely connected with the idea of 'A Surface Stirred up, Scratched 'up-Broken up, or Routed up, Raked up, or Raised up, &c., 'into Ruts-Ridges,' &c. &c., by which it assumes 'A Rough-'Rugged—cor-Rugated appearance.' We shall find, as we have seen in other cases, that under this train of ideas are involved those terms, which relate to 'Whatever is Harsh, Rough-Grating—Annoying, or Disgusting to any of the senses.' We perceive, how the words Rut and Ridge bring us to the Ground, and how they connect themselves with the Latin Ruga, which signifies, we know, A Furrow, and it likewise denotes "A crum-"ple, a plait, a fold. — A Wrinkle." Rugosus not only means Furrowed, but it signifies moreover, as my Lexicographer explains it, "Rough, Shrivelled, full of Wrinkles, crumples, or " plaits, - withered;" and here we see, how unequivocally the idea of what is Rough or Rugged, connects itself with the Furrowed surface, or, as we express it by a term derived from the same source, the cor-Rugated surface. The Etymologists see no term corresponding to Rut, the Furrow, but Rota, the wheel, and its parallels, Rad, (Sax.) &c. The term is not to be found in Skinner and Junius, though it is added to the work of the latter by Lye. The Rota, &c., as we shall now see, is the part, which Routs up the Ground, or makes Ruts upon it. Our Etymologists have produced Rut and Rutting, as it relates to the Stirred up or Excited passions of Deer, which I have before considered. We cannot but see, how the explanatory word RAISED, and its parallel term RISE, relate to the ROUTED To be Roused, is to be RAISED, Stirred up or up surface. Excited. It has been duly understood, that Rugged, Rug and Rough, belong to each other. Among the parallel terms to Rough, the Etymologists have produced the Saxon Hruhge, Hruh, Ruh, &c., the Belgic Ruych, Rouw, the German Rauch, Rauh, the French Roide, the Italian Rozzo, the Greek Russos, (Puoros, Rugosus,)

Rugosus,) and the Latin Rudis. The Etymologists refer Rug to the Greek Regos, (Phyos, Culcitra); and we are justly reminded likewise of the Saxon Rocc, and the German and Belgic Rock, Tunica, and the Welsh Rhwg. The Greek Regos, (Phyos,) has been acknowledged to belong to Regnuo, Regnumi, Resso, (Phyou, Phyou, Phogo, Frango,) which, we know, among other things, refer to the action of Breaking up the Ground. The Welsh Lexicographers understand the relation of their term Rhwygo, "To rend, to tear," to these Greek words; and they likewise refer us to the Chaldee yr RnGnG, Frangere, and the Hebrew yr RGnG, Findere, scindere. In the same opening of Mr. Richards' Welsh Dictionary, where these words occur, we have Rhuwch, "A Rough Friezed mantle or garment, a Rug," as this writer explains it. In the same Language, Rhuchen is "A Coat; a "leathern jerkin; also a web in the eye."

Names of Dresses of various sorts appear under the form RC, &c., which all originally belonged, I imagine, to the same idea of Rough, either as the coarse, outward covering to defend from the cold, or as ornamented in a Rough manner, if I may so express it, with Fretted work-Fringes, &c. &c. Skinner has two articles of ROCHET and ROCKET, denoting Coverings for the person, the former of which he refers to Rochet, (Fr.) Roccietto, &c. (Ital.) Roquete, (Span.) Exomis; Rocc, (Sax.) &c., and derives ultimately from Rige, (Sax.) &c. Dorsum; and the latter he considers as belonging to the same terms, adding moreover, "Fr. "Jun. deflectit à Gr. Paros." Junius explains Rokette thus: "Chaucero est Linea vestis fœminarum, quæ eidem quoque " Suckenie dicitur G. Surquenie." To this race of words belongs the French Roquelaure, which in English we call Rocelo, "A great "loose coat or cloak," as N. Bailey explains it.—The Latin Etymologists will now understand the origin of the Latin terms RICA. "A woman's hood," and Ricinium, "A woman's short cloak."

Festus describes RICA, as "Vestimentum quadratum, et Fim-" briatum;" and we shall understand from the sense of Fimbriatus, which R. Ainsworth explains by "Escalloped, Fringed-Jagged," &c., how we pass into the idea of the Rough—Broken— Cor-Rugated appearance. But this does not rest only on the evidence of conjecture, as I can produce a term directly parallel to the Latin RICINium, where the sense of RUGA absolutely appears. In Galic, ROCAN means "A Plait, fold, or Wrinkle," and "A Hood, "Mantle, Surtout," as Mr. Shaw explains the word, placed in different articles. The same term likewise means "A Cottage, "Hut," and "Rolling," where we have still the sense of the Rough—coarse covering; and we have likewise the idea of Rough Agitation, which is annexed to these words. An adjacent term is Roc-A Rock, which I shall shew to be the Rough RIDGE. In Latin we have RICINUS, "A vermin called a tike, "which annoyeth sundry kinds of beasts, such as dogs, sheep," &c., which signifies the Rougher, if I may so say, the Scratcher or Fretter upon a surface—the cor-Roper. We shall now understand, that the Latin Ropo, Rosi, belong to these words, and that they are only different forms of RADO, RASI, where we unequivocally see the idea of Scratching upon a Surface.

In the opening of my Greek Vocabulary, where Regnuo, (Pηγνυω,) occurs, we have the following terms, belonging to our Element, which must be referred to the same fundamental idea of what is Broken or Stirred up—about, &c., what is Routed about, as it relates to Noise—actions of Violence—Commotion—Agitation, &c., such as Regko, (Peγκω, Sterto,) where we have the Harsh—Rough Noise; Rasso, (Paσσω, Allido, Collido, Deturbo,) Raio, Raiso, (Paιω, Pauσω, Profligo, Corrumpo, Destruo,) Raino, quasi Rajno, (Paινω, Perfundo, Aspergo, Irroro,) Razo, (Paζω, Perfundo, Aspergo,) Rathamigx, (Paθaμιγξ, Gutta,) Rathagos, (Paθaγος, Strepitus, proprie ex aquâ concussâ, sonitus, tumultus,) &c.,

RAZO, (Paζω, Voro, impr. de canibus, à sono,) RAX, RAGOS, (Paξ, Paγος, Acinus,) the Rough or Hard Grape. In RAISTER, (Paιστης, Malleus,) the derivative from Raio, (Pauω,) we have the true form, RS. Raino, (Paιω,) belongs to Rain, in German Regen, where the true form appears.—These words denoting Sprinkling, RAZO, RATHamigx, (Paζω, Paθαμιγξ,) originally referred, as I imagine, to the idea of Splashing, as we express it, derived from the action of Routing about, or Stirring up or about the Dirt. In Homer it is applied in its original sense to the Splashing of Horses kicking up the Dirt—Filth, &c. in running:

Or de or immor

Υψοσ' αειρεσθην, ριμφα πρησσοντε κελευθον' Αιει δ' ηνιοχον ΚΟΝΙΗΣ ΡΑΘΑΜΙΓΓΕΣ εβαλλου.

(11. 4. v. 500, &c. Vide etiam A. v. 536, &c.)

In the same opening of my Dictionary we have RADIOS, (Padios, Facilis,) &c., which I shall shew to be derived from the idea of RIDDing or ROUTing up or away any incumbrance, as Dirt, &c.

From Regnuo, (Phynuw, Frango,) are acknowledged to be derived Rakos, and Rakoo, (Paros, Lacera vestis,—Ruga oris senilis, Parow, Lacero, pannosum reddo;—De senectute Rugosum reddo,—in pass. In Rugas contrahor,) which will remind us of the English Rag, the little torn piece of cloth. This affinity is seen by the Etymologists, who moreover direct us to the Saxon Hracode, Laceratus, and the Welsh Rhwg. Some of the Commentators on Shakspeare have understood, that Ragged, in old English, means Broken, and that it belongs to the sense of Rugged, as "My Voice is Ragged," (As You Like it,) which Mr. Rowe has changed into Rugged; and in our Author's Rape of Lucrece, it is used as an opposite term to the idea of Smoothness.

"Thy Smoothing titles to a RAGGED name."

In the following passage of Richard the Third, Elizabeth thus addresses

addresses the stones of the Tower, within which her children were confined; and here we see the term combined with its kindred words.

"Rough cradle for such little pretty ones.

"RUDE, RAGGED nurse!"

The verb 'To Rag,' "Opprobriis mordere, sævidictis protelare," as Lye explains it, might have been interpreted "Opprobriis "Lacerare," where we should have had the true metaphor, as belonging to Rag, the Lacerated or torn cloth. Lye, who produces this verb, sees no affinity between that and the substantive. He derives the verb To Rag from the Islandic Ræigia, "Deferre;" and he produces moreover the compound Bala=Rag, "Probris et "maledictis incessere, vexare;" the former part of which compound he refers to the Islandic Baul, Bol, "Maledictio, Diræ, quod "supra vide in Bale," which is all right; though he might have at once referred it to the English Bawl.—Let us mark, under Rakos, &c. (Paros,) the explanatory term Ruga, where we again see, how these ideas are entangled with each other, according to my hypothesis.

The term Ruff may have arisen from Rough, pronounced, as we know, Ruf; yet I shall shew in a future Volume, that the Element RF contains a race of words bearing a similar meaning. We perceive in the parallel terms to Rough, that the Element ARG appears with the breathing before the R in ARG, as HRUHGE; and we find in some, that the second Consonant of the Radical has been lost, as Ruh, &c. To this latter form we must refer the word, in old English, Rou. This word occurs in the Poems attributed to Rowley.

"Is shee so Rau, and Ugsomme to hys syghte?" (Ella, y. 303.)

Rue, Sorrow, belongs to Rough, as denoting the Rough, dismal appearance, or as having been Roughly handled. The adjacent word in Lye's Saxon Dictionary to "Hreog, Hreoh, Rough, Turbi-"dus, Ferus," is "Hreon-full, Rue-ful, Turbidus." Rue is referred

by the Etymologists to the Saxon Hreow, Hreowan, Hreowsian, &c., the Belgic Rouwen, the German Rewen, &c.; and Junius thinks, that the Gothic Hranka-Dubo, Turtur, is derived from the Rue-ful noise, made by this animal, "à luctuoso gemitu," which is right. The Saxon Hreowian and Hreowsian signify "Lugere;" and Reowian is intenpreted by Lye, "Peenitere," and Reowsian, "Ingemiscere, deslere, poenitere."

RAW is the Rou or Rough looking object, and it belongs to the Saxon Hreow, the German Roh, the Belgic Rouw, &c. Rauch, in German, signifies Rough; and Rauch likewise means "Smoke, Fume," which may directly belong to Rauch, Rough, under the idea of what is Annoying or Offensive to the Smell, as Asper means in Latin, "Stinking, Fetid," or it may be attached to that race of words, which denote Air—Wind, &c., and which are derived from the idea of Agitation or Commotion. Our English word Reek, and its parallel terms, are immediately connected with Rauch, Smoke, which the Etymologists have recorded, and which I shall detail in another place; yet I must here produce two of these terms, Rakelos, and Raikelds, Paicelos, Painteger, which Hesychias has respectively explained by Endmos, and Kalens, and which must be referred to the idea conveyed by Rough, &c.

The succeeding term to Raw is RAW, Mugipe; where we have the idea of the Routh, Harsh Noise, expressed by this race of words; and the next term is RAW, which Lye explains by "G. Douglassio est opprobni: nomen. Fortasse ab Isl. Raa, "Caprea. Huic conjecturæ favet, quod Scoti dicunt 'As wild as "RAY'—V. Roe-buck." The RAY is quasi RAG, which brings us in form and meaning to the English term RAG, before explained, Lacerare, Vellicare; To Rout, Row, &c. The Ray of Roe, the Deer, is quasi RAG, Rog, &c. The Etymologists refer "Roe-Buck," Caprea, to the Saxon Rage, Rahder, Ban, the Gesman Reh, the Belgic Ree, Rem, Reyn, Reyners Reyners, which

some think to be quasi Rangifer, "à cornuum ramis, Teutonice "Rancken, nuncupatis," and which others derive from Reyn, Purus, "ob concinnam nitidamque totius corporis speciem, quæ " maxime in hoc animalculo elucet."—These terms for Deer, the RAY, Row, quasi RAG, Rog, are derived probably from the idea of Excitement or Motion, belonging to our Element. We see in the form Rein-Deer, that the N was originally an organical addition to the second Consonant of the Radical, the record of which is preserved in the Y of Reyn. I shall shew, that Rain, Ragn, (Sax.) and Run, belong to our Element RG, for the same reason. The RAY, REGE, Damula, Caprea; Hrage, (Sax.) may possibly belong to Hircus, Hirsutus, the Rough animal; and hence they might be transferred to animals, bearing some resemblance to them in form and qualities, as Swiftness, in whom the idea of Roughness is not so apparent. — The RAY, the Thorn-back, Scate, &c., Roche, (Germ.) is so called from its Rough, or Scratched appearance; and the Ray of Light, from Radius, belongs, we know, to RADO, To Scratch upon a surface. called the Roach has been referred by Skinner to the Saxon Hreoc, the French Rosse, Rouget, Rutilus piscis, "à Rubeo colore "sic dictus;" and he adds other terms for the same colour, Rouge, (Fr.) &c. The terms for RED, under our Element RC, RD, &c., have been considered on a former occasion. In Saxon, Reohche means likewise a Roach.

The Etymologists have justly referred us, under Ruga, to the Greek Rutis, Rusos, (Putic, Ruga, Puσος, Rugosus,) Riknos, (Puxos, Rugosus,) Roikos, (Poikon, σκολίον, καμπυλον, σαμβον, ΡΥΣΟΝ, PIKNON. Hesych.) They refer us likewise to the Latin Rigeo, and the Greek Rigeo, and Rigos, (Piγια, Horreo, Exhorreo, Piγος, Rigor, frigus vehemens,) from which, we know, have been derived the terms in Modern Languages, Rigid, Rigour, Rigide, (Fr.) &c. &c. Those objects, which are Rigid, Hard, Stiff, &c. oftentimes pre-

sent to us the idea of the Rough, cor-Rugated surface. Martinius has likewise reminded us of the French Ride, A Wrinkle, and the Latin Ringo. Let us note the English word WRINKLE, which is quasi WRIGKLE, and the Latin Ringo, quasi Riggo. In WRINKLE we have the breathing before the 'RK; and the Etymologists have referred us, under this word, to the Saxon Wrincle, the Belgic Wrinckel, the German Runtzel, and the Danish Rincke. In Norfolk, a Furrow or RIDGE is called a Ringe. In RICTUS, "A grinning or scornful Opening of the Mouth," which is nothing but the Ruga, the Furrow, or Opening Chap, &c., we have the true form of Ringo. The Etymologists explain Ringo by "Ut "faciunt canes, cum ex ira os diducunt in Rucas," where we are brought to the kindred term Ruga, whatever may be the precise idea, by which the words are connected, though they derive it from Pic, Pivoc, Naris, and Puyxoc. I have already shewn, that Ris. Rugchos, (Pis, Puyxos,)-Rostrum, mean the part, which Routs up the Ground in Ruts, Holes, &c.

The phrase in Horace, "Risu Diducere Rictum Auditoris," will bring us to Risus and Rideo, which we shall now understand to be derived from the idea of the Rugæ, or Rictus, into which the face is Crumpled, if I may so express it, in Laughing. Though some Etymologists derive Rideo from Padios, yet others perceive, that it has an affinity with Rictus. The Latin Rideo directly connects itself in form and in its original meaning with the French Rider, To Wrinkle. From Rideo, we know, is derived Rideolus, and the terms in modern Languages, Ridicule, (Eng. Fr.) Ridiculous, &c. &c. An adjacent word to Rideo, in our Latin Vocabularies, is Ridica, which is explained by "A strong" Prop, particularly of a vine;" and which Martinius seems to think may belong to the German Riten, Findere, or to Rudis, Fustis. The Latin Ridica belongs, I imagine, to the Ruthollow, &c., precisely as the parallel term, produced by Martinius,

the Greek Charax, (Xaque, Sulcus terræ, aratro aut fossoris instrumento excavata fossa, peculiariter vallus, vallum, quo castra muniri solent;—Vallus, Sudis, Pertica, adminiculum vitis,) denotes at once the Furrow or Hole, and the Stake stuck into it. This word belongs, we know, to Charasso, (Xaquasa, Scalpo, Imprimo;—Sulco, ut ceram, Terram,) which has precisely the same sense, under another Element, as that, which I have annexed to Rider, Rideo, Ruga; namely, of Scratching or Routing into Ruts, Furrows. Let us mark the explanatory word Scratch, which is only another form of Charasso, (Xaquasa,) and let us mark Cera, which belongs to Char in Charasso, and to Scar, (Eng.) the substance, on which Marks—Scars or Scratches are made.

The Ridge of a Furrow, is, we know, the Dirt, which is thrown up—Elevated—Raised or Routed up by making the Furrow, the Hollow or Rut. Ridge then denoted 'What is Protuberant-or RAISED up, in general; and hence we have various words belonging to our Element, conveying this idea; as the English RICK—the Latin Rogus, and the German word for the Back, RUCKEN, &c. The Etymologists produce under REEK or RICK, Strues, the Saxon Hric, Hricg, &c., Dorsum, fastigium; Hreac, Strues, Meta; and the Islandic Rok, Segetes in cumulis collocata. This sense of Corn lying on the Ground in regular Heaps, brings us more directly to the original sense of the continued Ridge; and hence Ridge is applied with great propriety to the 'Continued -RAISED part of a House—Hill, &c. The Latin Rogus, the "Ex-" structio lignorum," in the funeral Pile, is supposed by some to be derived from Rogo, "quod in eo Dii manes Rogentur." Martinius asks, whether it may not be derived from Pwjy, Fissura, " quod sit strues ex fissis—lignis;" and he adds, among other conjectures, respecting its origin, the German Rauch, Fumus, and the Hebrew רעה RGH, Depascere. He produces however a Glossary, where we have "Poris, Ruga, Rogus, Pwywr," which connects

the word with the genuine idea. He records, moreover, the Sicilian term Rogos, (Poyos); which is explained by Σιτοβολιον, Granarium, "unde videtur esse nostrum Rogge pro typha fru-"mento," which will be explained in another place. Let us mark the Latin Rogo, which is only the verb, of which Rogus The idea of Asking—Enquiring—Seeking or is the substantive. Searching into any thing, connects itself with the action of Routing or Raking up the Dirt; as Scrutor is quasi Scruta Eruo, &c. Thus, then, Rogo is To RAKE up, &c.; and Rogus is that which is RAKED up—the RIDGE, &c. In Irish, Rogam, is "To "Choose," as Mr. Shaw explains it; and it is actually adjacent to the term Rochmhar, signifying "Digging." Among the explanatory words of Rogo, in R. Ainsworth, are Crave—Intreat— Borrow, &c. I shall shew, that Crave belongs to Grave—Grub up, &c .- Borrow to Bore, Burrow, the Hole or Hollow in the Ground; and the term Intreat, we know, directly belongs to Traho, Traxi, Tractum, To make Traces or Hollows on the Ground, though under somewhat of a different term of meaning. While I examine Rogo, I cast my eyes on Ructo, "To Break "wind upward;" and I shew in another place, what we now see, that the metaphorical expression Breaking up brings us to the true idea of the word. Thus we perceive, how Roco and Ructo convey the same fundamental idea; and thus it is, that senses most remote from each other may be connected by somecommon bond of affinity. The Etymologists, under Ridge, refer us to Hrige, Hricg, (Sax.) Rugghe, (Belg.) Ruck. (Germ.) Ryg, (Dan.) Rig, (Scotch,) Dorsum; Ricg-ban, (Sax.) &c., Riggin-Bone, (Chaucer,) Spina Dorsi, Rachis, (Paxis,) &c. In Junius we have RIGGE, Sulcare, as a term used by Gawin Douglas in his translation, "Vel te Sulco, Serrane, serentem;" where we are brought to the idea supposed in my hypothesis:

[&]quot;Of the, Serranus, quha wald nathing schaw, ." Quhare thou thy Riggis telis for to saw."

In Welsh, RHYCH is "A Furrow; ground Broken up;" where we have at once the sense of RIGGE, the Furrow, and the Rough, RUGGED, Broken Land. The adjacent word to RHYCH is Rhych, Bran, which belongs to Rhuchion, Bran, Gurgeons, and Rhuchio, "To sift or sierce," which I shew to be derived from the idea of ROUTING or RAKING away the Dirt. The succeeding word to RIDGE in Skinner is Ridgeling, "vox quæ apud Higgin. exp. "Ovis Reicala vel Rejicula, fort. a Rejiciendo, addita term. dim. " ling. q. d. ovicula quæ a grege Rejicitur vel Ejicitur." If there exists such a term as Ridgeling in this sense among Rustics, it cannot be derived from a Latin compound, as Rejicio. "Washed," is another article in Skinner, which he has explained by "Kersey made of wool washed only on the Sheep's Back, "Pannus è lana adhuc ovis tergo increscente abluta confectus;" and which he has justly derived from the German Ruck, Dorsum, &c.

The succeeding word in my German Dictionary to Rücken, the Back, is Rücken, "To Rock, hitch, stir, move, wag or ad"vance forward or further." These terms, we now see, belong to each other, just as the Raised-up object belongs to Raise, To Stir up. It is curious to observe, how words still continue to be referred to the spot, from which they are taken, though they are applied after a manner differing from their original use. In English, the term Rock is particularly applied to the Shaking of the Ground, as 'The Ground Rocks under me;' and we all remember in Shakspeare,

" Come, my queen, take hands with me

The Etymologists have referred 'Rock the Cradle' to the Greek Οργαζειν, Ανοργαζειν, which Hesychius explains by "Τα παιδια ταις " χερσιν αναπαλλειν," the French Rocquer, the Islandic Hrocka, "cum impetu quodam moveri," and the German Rucken, Cedere. We

[&]quot;And Rock the Ground, whereon these sleepers be." (Midsum. N. D.)

see in this sense of Orgazein, (OgyaÇen,) the idea of Excitement-Agitation, from which I have supposed ORGE, (Oeyn,) &c. to be derived. Rock, Colus, the term belonging to Spinning, is so called from its Rocking motion. In Rock and Reel, we see the due combination of terms denoting Motion. The Etymologists refer us to the parallel terms Rock, (Belg. Dan.) Rocken, (Germ.) Rocca, (Ital.); and Skinner thinks, that it belongs to Rocca, "Rupes, qui sc. Coli capitulum, instar Rupis, protuberat." My hypothesis is, that Rock is ultimately derived from the idea of Rocking up, if I may so say, or Routing up the Ground; and we cannot but observe the Latin Colus, which certainly belongs directly to Colo. Rockets, the Fire-works, must be referred to the idea of Agitation. Skinner derives Rocket and its parallels Rochelli, Rochetti, (Ital.) Ragetten, (Germ.) from Rogus, Rogulus. The term preceding Rackete, a Rocket, in my German Lexicon, is RACKET, "A RACKET, Bandy, Battledore;" where we are brought to the idea of Agitation—Commotion, annexed to this race. In our ordinary phrase, "To make a RACKET," the sense of the Element is unequivocally manifest. The Rock, Rupes, or RIDGElike protuberance, comprehends the two ideas of the Rough or Craggy, and the RAISED-up object. The Etymologists have referred us to the parallel terms in other Languages, as Roc, Roche, Rocher, (Fr.) Rocca, Rocchia, (Ital.) Roca, (Span.) Rots, (Belg.) &c.; and they have justly moreover reminded us of the Greek Rox, Regnumi, Rachia, (Ρωξ, Fissura, Ρηγνυμι, Rumpo, Ραχια, Littus petrosum.)

In the Greek Rachia, (Paxia, Crepido littoris petrosi, littus petrosum, rupes in mare procurrens, Strepitus,) we have at once the Rock, and the sense of Commotion or Noise—the Racket, &c. In the same column of my Greek Vocabulary with these words we have Regko, (Paxia, Sterto,) where we have again the idea of Noise. In Rachis, (Paxia, Spina dorsi,) we see the Ridge

of the Back; as in Rucken, (Germ.) and in Rachizo, (Pazila, Per spinam disseco, - Disseco,) we see one of the strongest actions of violence expressed by this race of words. The ordinary Lexicons produce on this occasion the well-known passage of Sophocles, describing the Devastations of the frantic Ajax; where the Elementary sense is fully apparent: Εν εισπεσων εκείρε πολυκερων φονον Kuxλω PAXIZΩN. The medical term Rachitis, the Disorder in the Spine, has been borrowed from the Greek Rachis, (Pays); and we should, on the first view, at once say, that the English term RICKETS, the Disorder in Children, was directly taken from the medical word. On this point, however, some difficulty arises. Skinner, though he records, under RICKETS, the term Rachitis. from Paxis, yet he adds, "Mallem, deducere à nostro Reck, vel "Retch, Teut. Recken, Extendere, quia sc. in hoc morbo-"Apophyses ossium protenduntur et extuberant." In order to determine the origin of this word, we should obtain evidence respecting the time, when it was used. If RICKETS was used before the term Rachitis was adopted by Medical writers, then we should agree, that RICKETS is not derived from Rachitis. We should imagine, in that case, that it was formed from the general sense of the Element, denoting an Unsteady Motion; and the word is used in this general sense, when we talk of a RICKETY Chair, a Chair which Rocks or moves to and fro with an Unsteady motion. If RICKETS preceded the term of Art—Rachitis, it must be owned, that the coincidence is extremely singular. It must however be added, that the familiar use of the term RICKETS, the general application of the adjective RICKETY, and the improbability, that the vulgar name for a Disorder is derived from a word of Art, would lead us finally to conclude, that RICKETS has not been adopted from Rachitis, (Pazitis.).

The word Rocke occurs in Junius, which, as he says, signifies in Chaucer to Lurk; and he refers us to the word Ruck, signifying

fying likewise in Chaucer, "To lye in wait, to lurk." These words, we see, are the same. Lye observes on this term, "Rucke down Plebeculæ Somersetensi significat Incurvare se "terram versus alvi levandi gratiâ, fortasse per aphæresin pro "Crooke vel Crouche down. Northamptonienses vulgo dicunt, To go "to ground." Ruck is annexed to the idea conveyed by Ruga—Ridge; and means, To be contracted, as it were, into Rugæ or Ridges. In the phrases 'To be all in Rucks,'—'You struck me 'all of a Ruck,' the term Ruck has unequivocally the same meaning. Again, in Junius, we have Rouchen, Rouk; which, as he says, "Chaucero est Jacere," where he justly refers us to, Rucke,

"The shepe that ROUBETH in the fold."

Mr. Grose justly explains Rucks by "A Wrinkle or Plait. All in. "a Ruck. Your gown sits all in a Ruck. North." and "To. "squat, or shrink down."

In Mr. Shaw's Galic and Irish Dictionary, Rac is "A Wrin-"kle;" and RAG means "Stiff," which connects RIGeo with Ruga. Rocan likewise signifies, as we have seen, "A Plait, " Fold, a Wrinkle, and a Hood, mantle, Surtout." In the opening of this Dictionary, where Rocan occurs, we have "Roc, a Rock;" "Roc, a Plain, Field; ""Rod, a Way, Road;" "Roto, Momen-"tum, force, RACE;" Roscam, To Tear; Rocumhar, Digging; Rogham, To Choose, which connects itself, as I have observed, with the Latin Rogo, belonging to Rogus, the Dug, Routed or RAKed-up Ridge, Rick, &c. Again, in Mr. Shaw's Galic and Irish Dictionary, Rug is a Wrinkle; and Rug is likewise the "Perfect tense of the word Beiram;" as this Lexicographer tells us, who explains Beiram by "To take, give, bring forth, bear, to " carry," where in Bring forth, the sense annexed to Rug, we have the same interpretation which is given to the Latin Eruo. Rug has nothing to do with Beiram, though they coincide în

sense. In the same column is RUCHT, "A Sow, and a great Shout;" where we have at once the animal which ROUTS up, and the idea of Noise, which I suppose to be derived from this action. Again, I find "RUCHD, Sudden, vehement;" and among the adjacent words are RUATHAR, "A Skirmish;" and RUAGam, "To "Hunt, chase, put to flight."

The succeeding word to RIDGE, in Junius, is Rye; which is quasi Ryg. The Element RG, &c. expresses the name for this species of Corn in a variety of Languages, as in the Saxon Ryge, the German Rogge or Rocken, the Belgic Rhogge, the Danish Rug, the Welsh Rhygen or Rhyg, the Hungarian Ros, and the Dalmatian Raax, which the English Etymologists and Martinius have produced. Junius details the conjectures, recorded by Martinius, respecting this word, under Secale and Rogus. Some think Rogge may be contracted from Farrago: Others derive it from Rouge, Red; and some think that it may be taken from Poyos, Horreum, because "Gentium plurimæ hoc genere frumenti "Horrea sua distendant." Skinner, however, seems to have approached to the true idea of these words, who derives them from " Hrige, Belg. Rugghe, Teut. Ruck, Dorsum, v. Ridge, quia sc. " ejus aristæ longo et continuo acutiorum spicarum ordine Spinam " seu vertebras Dorsi aliquo modo referunt, vel quia istiusmodi " spicarum serie per totum Dorsum; (i. e.) dependentem Aristam "horrent, it is RIDGED with prickles." The term Ryge, Rogge, &c. may be considered with Skinner, as the Corn RIDGED with prickles, or under the sense of being Rough with prickles, Aristis Horrentes. I have shewn, that EAR, ARISTA and HORREO, belong to a similar idea. RyE is called Secale, belonging to Seco, from its Prickles; and the Briza, (Box a,) of Galen is so called from being of a Bristly or Prickly nature. In the same column of my Welsh Dictionary, where RHYG, Rye, Sing. Rhygen, &c. is found, we have Rhygn, a Notch, or Jag, in which we see the true Elementary sense of a Scratched—Notched Surface, full of Ridges and Ruts, &c.

We shall now understand, that Ruscum or Ruscus bears a similar sense to Rye; and that it is so called from its Rough, Prickly appearance. Martinius quotes an article from Festus, "Rustum ex Rubus;" where perhaps Rustum was only another form of Ruscum. Turnebus imagines, that the "Rustariæ falces" of Varro, as some read it, are those, "quibus ruri secantur Rubi, qui " per agros serpunt." Robert Ainsworth justly explains Ruscum by "A Rough, Pricked Shrub, whereof they make brushes or "besoms." He has quoted on this occasion the well-known passage of Virgil, Horridior Rusco; and has added moreover from Columella, Sepes Horrido Rusco, which, when fully and properly quoted, is Hirsuta Sepes—nunc Horrida Rusco. (Lib. X. v. 374.) Virgil has likewise "Aspera Rusci vimina;" where in Horrida, Hirsuta, Rusco, we have the forms of our Element AR, ARS, RS. The adjacent word Ruta, Rue, means the Plant of the Rough— Pungent quality, or which Routs up, Excites or Irritates the flesh or feelings. In Martinius, the quality of this plant is thus described: "RUTA viridis, si nudam carnem confrices, pruriginem et rubi-"cundas pustulas Excitat." The adjacent word Rutrum exhibits the material sense, of which Ruta is the metaphorical one, and brings us at once to the idea supposed in my hypothesis. Rutrum means, says. R. Ainsworth, "An Instrument, wherewith sand " or such like is Digged out, a Mattock, a Spade, a Shovel, " a Pick ax;" that is, the ROUTER up of the Ground or the Rus; . which is another adjacent term to these words, where we are again brought to the Spot, which my theory has unfolded. Rue occurs in various Languages, as in the French Rue, the Welsh Rhyw, the German Raute, the Belgic Ruyte, the Spanish Ruda, the Italian and Latin Ruta, the modern Greek Rute, (Purn,) &c., as the Etymologists have understood.

Robert Ainsworth observes under Ruscum, "Hinc Angl. "RUSH;" and we shall, I trust, grant, that RUSHES and REEDS are so called from the Rough—Bristly appearance, which a collection of Rushes and Reeds, growing up, present to the view. Rush, Juncus, in Saxon Resc, Risc, Ærisc, is referred by Junius to the terms connected with Rush, the verb, "Proruere, cum quodam " strepitu ac stridore irruere," as Roizos, Poicos, Stridor, Ruyschen, " Sonorum Strepitum, edere, qualem edunt junci vento graviori "agitati." This is a very probable conjecture, and the ideas are so entangled, that we can hardly separate the one from the other. Rush, the verb, as we have seen, is attached to our Element, under the notion of the Rough state of Agitation—Commotion, annexed to the action of Routing or Stirring up the Ground. REED occurs in the Saxon Reod, Red, Hreod, the Gereman Ried, the Belgic Riet, which the Etymologists produce, and which Skinner conjectures may be so called, because the REED grows "instar Radii longitudine in conum desinente." In the same column of Lye's Saxon Dictionary, where Risc is, we have RIT, "Spicæ, Segetes, frugum acervus," where we have a similar idea of the Bristling-up objects. I find in the same column Ryththa, "Molossus, Canis pecuarius," which Lye has justly derived from RETHE, "Trux, ferox, ferus, efferus, sævus, asper," &c.; where we have the idea of what is Rough—Harsh—Violent, &c. attached to this race of words. Again, in Saxon, ROETH is "Asper," which Lye refers properly to Rethe; and again, we have in the same Language HRETH, HRETHE, "Trux, Asper, "sævus," which brings us to the form 'RT, with the breathing before the R, as in HARSH, HIRSUTUS, &c. The preceding words to these Saxon terms in Lye's Dictionary are HRETan, Sternere, where we are at once brought to the idea of laying low upon the Adjacent to the terms Risc and Rit, we have Rocc, "Clamys;—Tunica, toga, vestis exterior," belonging to a race of words.

from

words, before produced, denoting the Rough Covering. The succeeding word is Roccettan, Ructare, Eructare, where we have the sense of the Rough Noise. I have shewn, that Ructo, &c. is at once connected with the idea of the Rough Noise, and the action of Routing up. The succeeding term to Risc and its compounds in this column is Risend, Rapax; where we have a strong term, belonging to our Element, expressing an action of Violence and Commotion.

I have shewn in a former page, that RISE and RAISE are derived from the idea of Stirring up the Ground. The succeeding term to Rise, in Skinner, is Rise=Wood; which he refers to HRIS, Frondes, and HREOsan, Subruere. The words which express Shrubs - Shoots - Brush=Wood, &c. &c. seem to convey different turns of meaning, belonging to the same train of ideas; or rather the ideas are so involved, that it would be idle to attempt a separation. In the Rise-Wood we seem to have the same metaphor as in the term Shoots, - the Rising or Shooting up Wood; yet we cannot separate from such objects as Tender Branches-Boughs - Leaves, &c. the idea of Agitation - Commotion, - from which Rise itself is derived. In some cases we pass into the notion of the Rough-Bristly appearance, which we annex to a surface RISING up in a state of Agitation. In examining the term HRIS in Lye's Saxon Dictionary, we find it attended by words, in which these congenial ideas appear entangled with each other, as in the succeeding terms HRISCian, Vibrare, Vacillare, Crispare, stridere; HRISEHT, Setosus, which belongs to HIRSutus, &c.; HRISEL, Radius textorius, derived from the RATTLING noise; HRISTenda, Astridulus; HRISTLan, To RUSTLE. Junius has two articles of Rise, Surgere, and Rise, which in Chaucer, as he says, is "Virga, Surculus,—As white as is the blossome on the Rise;" and this latter word has been derived

6н

from the former, just as Surculus is derived from Surgo. Lye produces under Rise, Virga, the Islandic Hriisa, Sylva; and he refers these words to the Celtic Rasan, Fruticetum, and Ras, Frutex. In Scotch, Reesk means "A kind of coarse grass "that grows on downs. — Waste land which yields only benty grasses. —A Marshy place, where bulrushes and sprats "grow," says Dr. Jamieson, where we see the idea of the Rough — Hirsute — Bristly appearance; and our Lexicographer has justly referred to this word the Saxon Risc, Rush, and Hrys, Virgultum.

The accidental agreement in form between Rush, the plant, and Rush, expressing Noise and Agitation, will remind us of the connexion between these terms, and will shew us, as I before suggested, that we can hardly separate the idea of the Rushing-Rustling—Rough Noise and state of Commotion, if I may so express it, from the HRIS or ROUGH, Bristly appearance of the RISING up REEDS and RUSHES. We can hardly separate, I must repeat, these ideas from each other in such a case; and in terms expressing the same appearance, Horridus and Horreo, we have certainly the ideas of Agitation and the Bristly appearance, united with each other. In HORREO we have the form 'R; and the Id in Horridus is probably the addition from the structure of the Language. REED, we have seen, assumes the form *Hreod*, (Sax.) &c. &c., to which belongs the Latin Arundo, quasi Arundo. Hirundo, the Swallow, is likewise quasi Hiruno, where we have the idea of Noise; and in the adjacent word HIRUDO, 'The Horse-'leach, a blood-sucker,—An exhauster—emptier,' we have the action of Stirring up or out—Casting out, as in HAURio. HIRudo is quasi HAURudo, the HAURiens. In the adjacent words to these, as HIRTUS, HIRSUIUS, we have the ROUGH object; and thus we see, how all these terms are entangled with each other in ElemenElementary character and sense, though they have passed into different forms by different processes, and perform different offices. The Celtic terms, with which Rasan is connected, will unequivocally shew us, that I have justly decided on the fundamental notion, belonging to these words, denoting Shrubs, &c., whatever peculiar application of that notion may have been adopted. Mr. Shaw in his Galic Dictionary explains Ras by "A Shrub," and Rasan by "Underwood, "Brushwood," and Rath, "Fern;" and in the same column of this Dictionary I find "Ratha, Running, Racing;" "Rat, Motion;" "Rathach, A Hough;" "Rasdal, A Rake;" "Rasdalam, To Rake, Gather;" "Rascradh, To part, "scatter."

In Italian, as we have seen, Rozzo is Rough; and to this belongs Rozza, "A jade, a sorry mare," to which we might add the parallel French word Rosse. Menage refers us under Rosse to the German Ross, A Horse. The French Rosser, To Beat, Menage conceives to be of difficult origin, though he has some idea, that it has been derived from the Latin Rudis, A Staff. Others suppose, that it belongs to Rosse, "mauvais cheval, qu'il "faut battre et frapper pour le faire marcher." This may possibly be the fact, though it might be derived from the general sense of the Element, To Rout, Disturb, &c .- To Rough, if I may so say, To treat Roughly, &c. In Spanish, Rozin corresponds with Rosse, &c.; and hence has been derived the name of that most illustrious of all steeds, Rozinante. This term is a compound of Rozin and Ante: "Al fin le vino à llamar "Rozinante, nombre a su parecer, alto, sonoro, y sinificativo de " lo que avia sido, quando fue Rozin antes de lo que aora era, " que era antes y primero de todos los Rozines del mundo." Thus the Ante, Antes, is meant to be significant under two ideas.

In one sense, Rozin-Ante means 'The Steed, which Before or 'formerly was the Sorry Horse;' and in another, 'The Steed, which 'is Before or the First of all Sorry Horses in the world.' Rounce, in old English, means "A little Poney or Tit," as N. Bailey explains it; and Skinner interprets it by a Rude Horse, and refers it to the Italian Ronzino. Rouncevall means, as Skinner says, "A great "jade," from this Italian word and Valere, "q.d. Equus Valens seu fortis et magnus, omnia a Teut. Ross, Equus." Rosinante he derives from the same source; though he seems under this word to imagine, that Ross, &c. may be taken from the English and Saxon Horse, "per metathesin." These words Rosse, &c. should probably be considered as directly belonging to Horse, and its parallels produced by the Etymologists, Ors, hRoss, Ros, Roussin, &c. (page 630.)

With respect to Rounce and the words under the form RN, denoting a Horse, they cannot be separated from the idea annexed to Ross, and should be considered as directly belonging to it, as the Etymologists imagine. Under the form RN, belonging to RS, we have the same idea of the Rough object-state, &c. from Agitation-Commotion, &c. The Italian Roncare, To weed. is derived from the Latin Runcinare; and adjacent to this Italian word, I find in my Vocabulary Ronzare, "To Buzz, Hum," and to "Ramble, Rove;" where we have at once two ideas which are attached to the sense of our Radical, that of Noise, and of Agitated Motion. The succeeding word in my Italian Vocabulary is Ronzino, "A Nag, Pad;" where we cannot separate the Rough object from the Rough motion attending it. The explanatory word Pad denotes the animal which Pads about. Ronzone signifies likewise in Italian the Stone-Horse; that is, the large Rough Horse. In Welsh, Rhwnsi, sometimes written Rhwmsi, means " A Pack-Horse or Sumpter-Horse;" which the Welsh Etymologists

gists refer to Ronzino and Rozin. In the same column of my Welsh Dictionary I find Rhwngc, "A snorting or snoring." Roncin and Roussin mean, in French, "A Strong Stone-horse fit "for war." The adjacent word to Ronzin is Roncer, "A briar "or bramble;" which the Etymologists have justly referred to Runcare.

The Latin Rudis, Rude, denoted, I imagine, in its original sense, that which is Rough, as referring to the Ground. The first sense, as given by R. Ainsworth, of this word, is "New, "Fresh;" and the passage produced, as authority for this sense, is "Terram Rudem Proscindere;" where we are at once brought to the spot, supposed in my hypothesis. The last sense of this word in the same Lexicographer is "Rustick, clownish," &c., which would direct us to its kindred term Rus, the Ground. Rudis means in another sense Unwrought, where we come to the idea of Rough; but in a term directly belonging to it—Rudus, we at once see the idea of the Rough-Broken Dirt of the Ground or Rus; -- "Rudus Vetus," says R. Ainsworth, "Rubble " or Rubbish of old ruinous houses fallen to the Ground, shards "and pieces of stone, broken and shattered." Some derive Rupis from Rudis, the Rop, "Virga Impolita;" though others suppose the contrary order. Some appear to think, that Rupo. relating to Noise, contains the original idea. "Rupio Commune "ad clamorem omnium animalium," say the Glossarists. "componitur Erudio, id est, Instruere, quasi extra Rudem, vel " Ruditatem ponere. Quidam vero componunt ex E et Rudis." In the word Rudimentum, the Rudiments of any thing, we see the idea of the first RUDE or ROUGH materials of any thing before they are worked into shape—smoothness, &c. Erudio, To Teach, is 'To Remove from a Rude state; to Remove Rudus, or Rubbage.' Thus we see, how a term denoting the highest improvement of the mind, Erudition, is derived ultimately from the idea of Dirt

or Rubbish. This will teach us to understand, how terms, expressing ideas of the most dignified Nature, may be derived from the Lowest or Vilest objects, as we should be pleased to consider them. Rudus, Raudus, and Rodus, are given by the Etymologists as different forms of Rudis. Rudo is, a term for Noise, which, we see, is actually connected with Rudus, the Dirt of the Earth. This term will remind us of Rugio; and in Raucus we have again the Hoarse, Harsh, or Rough Noise. In English we have the term RAWT, which Lye refers to the Islandic ROUTA, "Rugire belluarum more." The term Raucus signifies likewise "A worm which breedeth in the root of an oak;" which has been derived "à Ravo colore," though some conceive it to be These words should be considered only as different quasi *Eruca*. forms of each other; and they are derived from the idea of Scratching—Fretting or cor-Roding a surface. The Etymologists refer ERUCA to Erodo, in the sense of a Worm; and as an Herb called a Rocket, they consider it to be quasi Urica, "quod ignitæ "sit virtutis, et in cibo sæpe sumpta Veneris incendium moveat;" though some suppose it to be so named, "quod linguam "vellicando quasi Erodat," where we have the idea of Vellication or Excitement, whatever may be the precise notion annexed to the word. The bird named a Rook, in Saxon Hroc, has been so called from his Harsh-Rough Noise. The terms which denote a Rough Noise have been perpetually introduced in the various parts of this discussion.

Martinius, under Rudis, has produced the parallel terms in modern Languages, as Rude, (Fr.) Rauch, (Germ.) Rouw, (Belgic,) and Raud, Reudig, (Germ.) Scabiosus. My Lexicographer explains Raude by "Scab, Itch, Scurf, Mange;" and Raudig by "Scabbed, Scabby, Scurfy." In French, we know, Rogne, Rogneur, have the same meaning. The n is an organical addition to the G; and in the English word Ronyon, the G is lost,

lost, and the n only remains. Ronyon, we know, occurs in Shakspeare:

"Aroint, thee, Witch! the rump-fed Ronyon cries."

"Ronyon, i. e. Scabby or Mangy Woman," says Mr. Steevens, "Fr. Rogneux, Royne, Scurf." Thus Chaucer in the Romaunt of the Rose, p. 551.

" Her necke

"Withouten bleine, or scabbe, or ROINE."

Shakspeare uses the word again in the Merry Wives of Windsor. The corresponding word in Italian is Rogna, and in Spanish Rona. The ROYNISH Clown is a phrase in As You Like it; where the Y remains as a record of the second letter of the radical. Renard means, I believe, the Roynish animal, Rogneux. In the ancient orthography, Regn-Ard, we have the Elementary form RG. The portion Ard means 'Nature—quality,' &c., as in 'Drunk-Ard,' &c. Menage derives Renard or Regnard from Reginardus, the proper name, whereas the proper name is derived from the animal; and hence we have another form, as a proper name, Renouard. Some derive Renard from the German Rein, which signifies, say they, "Fin, Rusé."

These terms denoting the Rough Surface, bring us to the idea of Scratching or Fretting upon a Surface, from which, according to my hypothesis, this sense is derived. The French word Rogne means "Mange, Scab;" and Rogner signifies "To Cut, "to pare, to clip, to shred." These words have the same relation to each other, as Scab and Scabies have to Scabo, To Scratch. Menage derives Rogne from Rubigine, and Rogner from Rodo, which we perceive to be only another form of these words, under the idea of To Scratch or Fret to pieces. Some Etymologists derive Rodo from Pww and Edw; and Martinius produces as parallel the Italian Rodere, the French Ronger, and the Hungarian Ragom;

Ragom; and he reminds us, moreover, of the Latin Rado. Ronger we have the organical addition of n before the G; and in Rogner the n succeeds it.

The French Rognon is acknowledged to belong to the Latin Ren; which, as we now see, must be referred to the Element RG, quasi Regn. In the French and English Reins we have the form RN, though they represent, as I conjecture, the second letter of the Radical G or J, quasi Rejn.—We cannot doubt, that the French Rognon, "Kidney;—Testicle of some animals," is connected with Rogne, &c., whatever be the precise idea by which these terms are united. Probably Rognon in its original sense is the Testiculus—the Rogneux—the Scratched—Scarred—Corrugated Surface. The Latin Scaber, which has a similar meaning to Rogneux, signifies in one sense, "Rough, Rugged, Uneven." We might imagine, that the Welsh Aren, "The Kidneys or "Rein," and the Irish Aran, Airne, belonged to Ren; yet this point cannot be adjusted till the Element 'R is fully considered. Rognonner means in French "To grumble, mutter;" where we have the idea of Noise attached to this race of words, and derived from the action expressed by Rogner, that of Scraping or Scratching upon a surface. Another adjacent word is Roide, "Stiff, where again we have the sense "Rigid, not pliable;" of Rough, as in Rigidus. In another sense, Roide means "Rapid, having a violent motion; -Steep, of a difficult as-"cent;" and this sense of Rapid may either belong to the idea of the Steep - Rough precipice, of sudden descent, or to the sense of violent motion, which is annexed to this race of words.

In the same column of my French Dictionary, where Rogner is, we have Roper, To Rove, Ramble, which means 'To Rour-'Row, or Riot about,' in the more gentle sense of these words. The succeeding term to Rodeur, the Rover, is Rodomont, "A Brag-" gadocio, "gadocio, a Boisterous Hero," to which our word Rodomontade belongs. The French Etymologists have referred us to the name of the Warrior Rodomont in Boiardo and Ariosto; but the name for this warrior is itself probably a 'Nom de guerre,' derived from some significant term. Le Duchat explains Rodomont by "Ronge-"Montagne. Nous disons dans le même sens, Avaleur de "charettes ferrées." Rodomont might be derived from such words as Roder, To Rove or Travel, and Mont, Mountain, as Passamonte, in Spanish, &c. I shall suggest however in a future page a very different source for the term Rodomont, which deserves well to be considered.

RC, RD, &c.

Terms derived from the idea of ROUTING up or about the Dirt of the Earth, so as To Clear off or Rid away any incumbrances — inequalities, &c., in order to make it Level — Straight, &c., or to reduce it to a Fit—Proper— RIGHT direction or state, or to make it Fit—Proper and READY for any purpose.— Hence Terms which signify, To Rip out or Clear away difficulties — embarrassments, &c. in general; To Right or Set to Rights a confused, embarrassed state of things, in matters of Policy, Law, &c. — To Re-GULATE — Di-RECT, Govern, &c.—To Advise—Counsel— Judge—Decide Causes, &c.

To RID away Rubbish.

REDDE, REDDen, RETTen, aRIDDan, &c. &c. (Dan. Belg. Germ. Sax. &c.) To Rid.

READY, ge-Rædian, be-Reiten,

Reeden, &c. (English, Sax. Germ. Belg. &c.) To Rid out a place, so as to prepare it for any purpose.

RIDDLE, &c. &c. (English,) To Rootle about the Dirt, so as to Rid off a part of it.

RIDDLE, &c. (English, &c.) The Ænigma, the confused Riddle or Roottle Stuff, requiring to be Riddled — Riddled out—Cleared out, or explained.

RIGHT—RECTUS, &c. (English, Lat. &c. &c.)

REGO, REX. (Lat.) &c. &c.

To di-RECT, the di-RECTOR.

Regulate, &c. &c.

RICHTen. (Germ.) To fit, adjust, Di-Rect, Rule, &c.

READ. (Eng.) Counsel, Advice.

RICHTer. (Germ.) A Judge.

RATH=Herr. (Germ.) A Counsellor.

RADD=Man. (Scotch,) A Counsellor.

RADA=Manth=us. (Greek,) The Radd-Man or Judge.

Reds=Man. (Scotch,) A Scavenger.

&c. &c. &c.

It is marvellous to observe, with what dexterity and precision the mind seizes on different portions of the same action, as considered under different points of view; and how it is enabled by this process to form, without error or confusion, various Races of words which are distinctly separated from each other, though they are all taken from the same Spot, and all impregnated with the same train of ideas. It is curious likewise to observe, to what different and apparently remote purposes even those terms are applied, which more particularly belong to each other, as being derived from the same mode of considering the same common action. The familiar operation of Stirring up or Routing up the Ground is separated by the mind into the various accidents and purposes, by which that operation is attended, and for which it is performed; and hence various Races of words have been generated, referring to these accidents and purposes. One principal and important reason for which men Stir up the Ground, or Rout up, about or away the Dirt of the Earth, is, that they may Clear off or RID away the incumbrances with which it is loaded, in order to make it Level or Straight, or reduce it to a Fit, Proper-RIGHT direction, state, &c., or to Prepare and make it Fit-Proper-Accommodated or READY for any use or purpose. I have here anticipated three terms attached to the Elementary form RS, which belong to the ideas now unfolded, as RID, RIGHT, READY; which I shall shew to be derived from the action of Routing up the Ground. This article will be appropriated to the consideration of this Race of words; and we shall find in the course of these discussions, that such terms will be still found to be deeply impregnated with the force of their original idea, however various may be the modes in which they are applied, and however remote their application may appear from their primitive and fundamental meaning.

The term RID first presents itself to our notice; and here the

the original sense of 'To Rout off or away Dirt,' is manifestly to be discovered. In our phrase 'To Rid the Land or Country of 'any evil,' we are brought to the Spot from whence it was taken; but in the phrase "A good RIDDANCE of bad Rubbish," we see the original idea of Routing away Dirt most decidedly and unequivocally apparent. The Etymologists refer RID to the Danish Redde, the Belgic Redden, the Islandic Rid, and the Saxon Hreddan, Ahreddan, Liberare; Ariddan, Repellere; Arædan, &c., Eruere, Expedire; where in Eruere, To Rout out, we have the genuine idea. Lye explains Hreddan by "To Rip, Rapere, "Eripere;" and Ahræddan by "Rapere, Liberare, Eruere;" where we have the Elementary form 'RD, with the breathing before the first consonant of the Radical. An adjacent term in Lye's Saxon Dictionary is Ahrysian, Excutere, which is another word of the same family. The preceding term is Ahr-Yran, Cadere; Ahr-Uron, Irruerunt, Corruerunt; where we have the Radical form 'R doubled, in order to express the idea more strongly, such as appears in the explanatory term Ruo, where the R[^] is in its simple state, with the Vowel breathing after the R ^. It is doubled in the Greek Or-Oro, from Oro, for the same reason, (Oeueu, Oeu, Excito.) The Etymologists should have reminded us, under Rip, of the German Retten, which my Lexicographer explains by "To Rid, save, free, deliver, or disengage one;" and likewise of the Saxon Retan or "Rettan, Miseriis eripere, liberare, asserere, " tueri." The succeeding word in Lye's Dictionary is Reтн, &c. "Trux, ferox, ferus, efferus," which denotes the ROUTER, Wachter has duly collected under Retten, its parallel terms; and we are reminded of the Greek Eretuein, (Ephruew, Inhibere); Ruter, (Pυτηρ, Servator, à Pυομαι, Libero); Ruo, (Pυω, Traho,) and of the German Reiter, Servator; Reissen, Trahere, and Rat, Salus; which all belong to the same idea.

I have produced on a former occasion a Race of words relating

to Defence, &c., as Eretuo, (Epyruw, Inhibeo, Cohibeo, reprimo,) Eruko, Arego, Arkeo, Eirgo, Arkus, Erkos, &c. &c. (Eguna, Inhibeo, contineo, Servo, Apyro, Auxilior, opem fero, Aprew, Propulso, Auxilior, E1976, Arceo, Prohibeo, Apros, Rete, Epros, Septum,) Arceo, Arx, w-ARD, &c. &c., which all manifestly belong to each other, whatever may be the primitive idea. I have supposed, (p. 76) that they might be derived from the EARTH, the certain appropriate Spot or Enclosure, for the purpose of Defence-Holding, &c. That some of these do actually signify simply an Enclosure is certain; yet I suggest my doubts on other occasions, that they are probably derived from the same Spot—the EARTH or ERA, (Equ.) under the idea of an action of Violence, and that the sense of Defence, &c. &c. is taken from the notion of Driving away or off—HARROWing—ROUTING, &c. &c. (625.) Every thing tends to confirm this hypothesis. We see, that many of the terms directly express Actions of Violence. The term of Repression, Erėtuo, (Ερητυω, Reprimo,) signifies, I imagine, 'To Drive offback or away; and connects itself with the idea expressed by Retten, as some have justly seen. Anceo, a kindred term, signifies, as we know, both 'To Drive away,' and 'To Repress, 'Confine.' We cannot but see, how ER-uko, (Epuna, Inhibeo, Contineo, Servo,) and Eruo, (Equa, Traho; Custodio, Vito,) coincide in sense, and directly belong to each other; and in Enuo we have the idea of Defence, Preservation, &c., Custodio, Vito, attached to the signification of Traho, which can only be reconciled by the hypothesis before us. The sense annexed to Eruo, (Eouw.) of Traho, To Draw, as out of danger, &c., brings us to the kindred Latin word Eruo; and in the phrases 'Eruere Terram,' 'To Rout up the Ground,' and 'Enuene malis,' 'To Rid of evils,' we see precisely the union of ideas, which my hypothesis supposes. In Eruo, Ruo, Ruomai, (Equa, Pua, Puopa,) we have the form 'R; and in Eruso, Rusomai, Rusai, &c. (Equow, Puoquai, Puoai,)

we may perhaps consider the added s, as having arisen from the analogy of the Greek Language in the formation of the Future tense, and not as the Elementary form 'RS, agreeing by accident with that Analogy. Yet in Rustazo, Ruter, Rusko, (Puotazo, Trahendo Rapto, Putro, Retinaculum, habena; Custos, Defensor, Puota, Tueor, e periculo conservo,) we shall acknowledge, I imagine, the Elementary form; and in the sense which Rustazo bears of "Trahendo Rapto," we see the signification of the Saxon Hreddan, "To Rid, Rapere, Eripere," as Lye explains it. In Ruo and Reo, (Puo, Peo, Fluo,) we have the Loose, Desultory motion, arising from Stirring or Routing out—about—here and there, 'ab Eruendo,' just as Ruo, To Rush, and Eruo, in Latin, belong to each other. In considering the words produced above, we see, how intimately the forms 'R, R', 'RS, &c., RS, &c. are blended with each other.

In Persian, رستن Resten signifies "To be liberated, to "escape," which must be considered as directly belonging to the German RETTEN. The same Persian word likewise signifies "To Buzz, (as flies,)" where we have the idea of Noise annexed to these terms. In the opening of Mr. Richardson's Persian and Arabic Dictionary, where this word occurs, we have likewise another Persian term رشتن Resнтen, "To unbark, excoriate, skin.—To Plunder;" where we have precisely the sense of These words signify likewise to Spin; and the succeeding term to RESHTen is the substantive RISHTE, which signifies "A Thread, a line, a series," where we have the sense of the ROAD—ROUTE, Track, Course. In Welsh, Rhyddan means " To "Set at liberty, to free, to set free, to deliver or release, to RID "out of," &c., as Mr. Richards explains it, who refers the English RID to it; and in the same Language, RHISG is 'Rind or bark;" and in Irish, Ruisgam is "To strip, peel, undress;" and the same word means likewise "To smite, strike, pelt;" where we have have the action of Violence. The succeeding word in Mr. Shaw's Dictionary is Ruisam, "To Tear in pieces;" and in the same column we have Ruis, a Road; Ruith, Running, and Ruith, "An Army, troop;" where we have the senses of Road—Route, Race, &c. and Route, the confused multitude. Let us mark the explanatory term Peel and Pelt, which I shall shew to belong to each other, and to Pelos, (Indos, Limus,) &c. for a similar reason, of 'Stirring the Dirt up—away—about,' &c. In the same opening of Mr. Shaw's Dictionary we have Ruse, "The Bark of "a tree, husk, shell, a fleece;" Ruseam, "To strip, heal," (l. peel,) "undress, to gall, chafe, shave;"—Ruseam, "To Strike vehemently;" and in the same column we have Ruta, "A Herd; Rout, A ram;" Rustaca, "Rude, Rustic," &c. &c.

The English word READY, 'To make any thing READY,' is derived from the idea of Ridding or Clearing away from a surface any unnecessary matter or incumbrance, so as to Fit and Prepare it for any purpose. The Etymologists have justly referred this word to the Saxon Ge-Rædian, the Belgic Reeden, the German be-Reiten, be-Reit, the Italian Arredare, Ornare; the Welsh Rhwydd, Expeditus; the Greek Radios, Reidios, and Radinos. (Pudies, Paplas, Padros,) &c. &c. Among these parallel terms they should have produced the German Rusten, "To Prepare or Fit "yourself to something, make yourself Prepared, READY or Fit 44 for some work," as my Lexicographer explains it. We shall at once see the spot from which the German Rusten is derived by considering the terms in German which begin with Rus. In the same and succeeding column of my German Lexicon, where Rusten is, we have Rust, Ruster, the Instep; Russ, Soot; where we are brought to the Ground and its dirt; "Russel, A "Snout—Das wühlen der schweine mit dem Russel, the Rooting "or Routing of Swine,"-RUTTELN, "To shake, wag, or RIDDLE "a Measure;" where we see, that RIDDLE is derived from the action

action of Russeling, Ruttling, if I may so say, the Ground; Rutschen, To Rush, &c.; where we have the idea of commotion expressed by Routing in its simpler form, and Ruthe, A Rod, which I shall shew to mean the ROAD, i.e. the Course—Track— Line, &c. I find likewise Russling, "A Pippin; "golding," which is derived from the colour of the Ground. true sense of the German be=REITEN, which the Etymologists have justly produced as parallel to READY, will be manifest in the following use of the word by Martin Luther. In the passage of St. Matthew, "Prepare ye the way of the Lord, make his paths "straight," we have in the German translation of this extraordinary man, "Be=REITET dem herrn den Weg und macht Richtig "seine steige." Let us mark another word here adopted, Richtig, Straight or RIGHT; and hence we shall see, that RIGHT belongs to the same spot, the ROAD, &c. &c., under a similar train of ideas. In the Islandic translation we find the same term adopted, as in that of Luther; "gReide their veg Drottins, Parate "viam Domini," which Wachter has produced under the term REITEN.

Our Etymologists have justly referred to Ready the Welsh Rhwydd, which Mr. Richards explains by "Prosperous, Easy to "be done, not Intangled, Let or Hindered." In the same column of Mr. Richards' Dictionary we have Rhwth, "Wide or Large, "Wide or open, Vast, Capacious," &c., and Rhythu, "To make "Wide, open, large, or capacious," which is probably derived from the same idea of Ridding or Routing away, so as to make a Clear—open space. It is impossible not to mark, how Vast belongs to Vasto and Waste; and another explanatory term Wide is only a different form of these words. Mr. Richards has referred to these Welsh words the Greek Eurus, (Eugus, Latus); the genuine idea of which appears in the compound Euru-choros, (Eugus, Amplus, Spatiosus,) "Wide is the gate and Broad is the "Way,"

"Way," &c. (Euguxwees n ados) In Euroos, (Eugus, Sitis, mucor, caries,) we actually see the idea of Dirt; and I have shewn, that Eurisko, (Eurisko, Invenio investigando et inquirendo,) is derived from the metaphor of Scratching up, Rouring up the Dirt. It is idle to discuss, whether these words belong to the form 'RS, or AR, in which latter form appear, as we have seen, Eruo, Ruo, (Equa, Pua, Traho,) &c. &c. That the term Rhwth is connected with the idea of Scratching up or upon a surface, will be manifest from the word preceding it in the Dictionary of Mr. Richards, RHWTTO, which he explains by "To Rub." In the same column we have Rhwyd, A Net, which, according to the evidence of the terms above produced, we should imagine either to be derived from the idea of Capacity, and to signify the Large, Wide Net, able to contain, or from that of Ridding-Clearing-Drawingor Sweeping away every thing before it; as we talk of a Sweep and a Drag Net. From the Net we pass into the idea of what Confines - Intangles, &c.; and accordingly we find, that Mr. Richards has explained the verb Rhwydo' by "To take or hold "as in a Net, to Intangle, to insnare," which is directly adjacent to the term Rhwydd, which he explains 'Not Intangled.' Thus we see, how words belonging to the same fundamental idea may have senses, which are directly contrary to each other. cannot doubt, that the RETE of the Latins belongs to the Celtic RHWYD.

The Etymologists have justly referred Radios, Reidios and Radios, (Padios, Pudios, Facilis, Padios, Gracilis, Tenuis, Agilis, Mobilis,) to the terms connected with Ready, as these Greek words are assuredly attached to the idea of Ridding away an incumbrance. We might from hence conjecture, why the Greek Radios, (Padios,) explained by Facilis, is employed as a compound with a sense apparently very different, as in Radiourgeo, (Padiosopea,) which the Lexicographers, in order to preserve their Radical sense

of Facilis, as they conceive it, explain by "Facile ad scelus "aliquod patrandum perrumpo." Here we see, that Radios, (Padios,) is used in its more violent signification of Ridding or Routing, as in Roisterer, Rogue, &c. &c.; and in the explanatory term Perrumpo, we approach nearer to the primitive idea. In Homer, Reidios, (Padios, Facile,) is brought to its original spot, when it is applied with a negative in order to express a Way not Ridded or Cleared out—not be-Bereit, not Ready, (if I may so say,) or Easy to pass through.

Απο γας δειδισσετο ταρρος Ευρεί, ουτ' ας υπερθορεευ σχεδου, ουτε περησαι ΡΗΙΔΙΗ. (Il. M. 52, &c.)

In Reia and Rea, (Pea, Pea, Facile,) the second letter of the Radical is lost; but in the I of Reia, quasi Reja, the record of the lost consonant remains.

In Radinos or Radanos, (Padvos, Gracilis, Tenuis; Agilis, Mobilis, Il. 28. 588. Padaros, Mollis, Tener;—Procerus,) we have the sense of the Slim, Slender figure, as we express it, originally derived, as I conceive, from the idea of an object Rip of its incumbrance. It is applied in Homer, as the Lexicographers have pointed out to us, (Il. 23. 583.) to a Limber Wip, as we express it; where the idea of a Free-Disengaged motion, if I may so say, seems attached to it, Ingofly -- PAAINHN, which the Scholiast has well explained by Ευκινητον, ισχνην. Hence we have Radia, RADamnos, or Rodamnus, Rakis, (Padit, Ramus, Badauros, Podauros, Germen, Ramus tener, Paus, Surculus, Ramus,) applied to the Limber-Plant, Shoot, Branch, &c. The succeeding terms to Rodamnos, (Posauros,) in my Greek Vocabulary, are Rodano, (Posary, Trama, subtemen,) Rodanizo, (Polanizo, Torqueo,) Rodanos (Polanos, Valde rapidus, sed quum Roseus notat, est a Polo.) The term Rodanos, (Padaras, valde rapidus,) we see, is only another form of RADINGS, (Padage, Agilis, Mobilis,) in its sense of Quick motion. The term Rodane, RODANE, (Podam, Trama,) might belong to these words, as alluding to the Rapid mode of inserting the threads; though if the original idea is preserved in Rodanizo, (Podanizo, Torqueo,) it is derived from the same action of Routing or Turning about, over, under the notion of Intangling, just as Torqueo means at once To Turn about and to Twist, Intangle, &c. I have proved, that Wreath belongs to the form ART, for the same reason.

I have shewn on a former occasion, that Ease is probably derived from a similar idea of Removing an Incumbrance; and these observations will tend to confirm this hypothesis. In the phrase which I have here purposely adopted, 'Free, Disengaged motion,' we have the idea of a Pliant motion, derived from this metaphor; and the French Degager, "To free from impediments—Elle a le " corps—l' Air Dégagé," we know, belongs to the same metaphor. Wachter has explained RETTEN by "Expedire e periculis;" and the interpretation which R. Ainsworth has given us of the Latin Expeditus is formed on this metaphor, and will serve admirably to illustrate the whole train of ideas, which I am here unfolding:-"Expeditus, (1.) Disengaged, Freed, Rip of. (2.) Nimbly thrown " or hurled. (3.) Provided, Prepared, &c. (4.) Adj. Prone, "READY, in READINESS! (5.) Nimble, light, speedy, dexterous. "(6.) Easy, fluent." The Greek RAIZO, (Parla, Convalesco, ex morbo recreor,) and Rastone, Rastoneuo, (Pastum, Facilitas, Laboris levamen; - Doloris remissio, Relaxatio animi, Otium, Pas Tursuu, Facile vel libére ago, Otior,) evidently bring us to the idea of being in a state: Rip or Freed from incombrance, as of labour, pain, &c.; and hence it denotes Ease or REST. That these terms denoting Ease, under the Element RD, &c., are derived from the Ridding out a surface, will be unequivocally manifest from the verb annexed; to the Asmoric parallel sterm, Reiz, Easy, / The succeeding term in my Armoric Vocabulary is Reiza, "To put "in order," t with the

We shall now see, that REST belongs to this race of words. remote as it may seem from terms, which sometimes express actions of force and violence. It is sometimes difficult to adjust the precise idea, from which a certain term is derived, though we unequivocally see the race of words, with which it is connected. It was most evident, that REST, the term of Repose, was connected with terms of Violence; and I conjectured on a former occasion, (p. 611) that REST connected itself with such words as WREST, 'To force any thing from its course, so as to REST it, or make it REST and be quiet.' We now see, how such terms as wRest, REST and RID connect themselves with each other. In the parallel terms to REST, as the French ar-RETER, and the English ar-REST, we have an action of Violence most fully exhibited; yet though arRETer is explained in one of its senses by "To arREST, or put under an arREST," yet my Lexicographer, in another sense, interprets the word by "To Allay, "to Alleviate, to Assuage a pain;" where all idea of violence is lost, and we come to the sense of our English word Rest, 'To procure Rest or ease from pain. This sense of the French term, as it relates to the Alleviation of Pain, precisely agrees with the meaning of the Greek words Raszo and Raszone, (Paiζu, Convalesco, ex morbo recreor, Paστωνη, Doloris remissio); and we shall hence learn, that my conjecture on the origin of these Greek words proceeds on just principles, whether in this instance it may happen to be just or not, as we actually see in a French word the union of ideas, supposed in my conjecture. An adjacent word in my French Dictionary to ar=Reter is arRACHer, a term expressing the strongest action of Violence, which my Lexicographer explains by "To Pull out, to Root out, "to Wrest out;" and it is impossible to doubt, that these words belong to each other, under the same fundamental idea. It would be idle to enquire, whether the term REST belongs most to the idea

idea expressed by Rest, or by Rid, as these words are in their fundamental notion indissolubly intangled with each other. It is sufficient to have shewn, that Rest denotes Ease, under the idea of an action of Violence, by which any object has been Forced—Routed—wRested or Ridded from its former state, so as to become Quiet—Freed—Delivered, &c. &c. The word afterwards signifies Repose in general, without any allusion to its original idea.

Skinner produces under REST, Quies, as parallel terms, the Saxon Rest, the German Rast, Rust, the Belgic Ruste, &c., "Omnia à Lat. Restare;" though he adds, "Alludit, ut optime " monet Camdenus, sed tantum alludit Gr. Ραστωνη, Otium," &c. In another article he has "The REST," to which he refers Reste, Resto, (Fr. Ital.); and he has moreover in a third article "The "REST of a lance or musket, à Fr. G. l'Arrest d'une Lance." We shall agree, I think, that all these words belong to each other; and that the agreement in sense of Reste, &c. with Resto, (Lat.) is accidental. Wachter and Junius imagine, that the Teutonic terms Rest. Rast, &c. connect themselves directly with Rast, a term denoting a certain measure in Travelling, "Milliare, Viæ "Mensura;" which brings us directly to the Spot, supposed in my hypothesis, the ROAD, ROUTE, &c. "Similiter Latinis," says Wachter, "unius diei iter Mansio à manendo, et Statio, a Stando. "Hispanis Rato est Spatium temporis, forte a Gothis relictum." The term Rest might perhaps directly belong to this peculiar notion; yet I have given probably the genuine idea. I shew in another place, that RATO, (Span.) and RATE, (Eng.) belong to certain regular portions of the ROAD or ROUTE, &c. In the same column of Skinner, where Rest is, we have RESTY, (Eng.) Restif. (Fr.) Restio, Restivo, (Ital.) Equus contumax; which he derives a Restando, seu Restitando." This may be so; yet the Italian Etymologists derive RESTIO "da Arrestarsi;" which has nothing

to do with the Latin Resto; and we perceive, I think, likewise in these terms the more original notion annexed to the words before us, of an action of Violence. The 'Restif Horse' gives us a very strong idea, how the sense of Rest or Stopping may be connected with an action of Commotion and Violence. While I am examining the word Rest in Junius, I cast my eyes on a term explained in the same column of his Lexicon, Resing; which, as he tells us, is used in Chaucer for Except. He refers it in this sense to Rese or Raise, which is often used for "Auferre, demere, tollere." The explanatory word Except means, we know, 'To take away;' and Resing belongs for a similar reason to such words as Ridding, &c. &c. In the same opening of the Lexicon we have the term of Violence, with the same meaning, Reise, "Abigere, "fugare." — The Hen=Roost is the place, on which Hens Rest.

When men Rour or Rid off—out—away, &c. any incumbrances from a surface, it is for the purpose of making a Spot Even—Level, or RIGHT in its direction, state, &c. In the phrases 'To Rip out a place,' and 'To set a place to Rights,' we cannot but see, how Rid and Right belong to each other; and when Right is applied to a Right line, or Straight direction, ROAD, "RECTA linea, Via," &c., we are brought to the Spot, supposed in my hypothesis. We have seen the expression. adopted by Martin Luther, "Be-Reitet dem herrn den weg, und " macht Richtig seine steige, Prepare the way of the Lord, and "make his paths straight;" or, if we adopt terms belonging to each other, 'Make READY the way of the Lord, and make his 'paths Right;' where we see too, how Right and READY belong to each other. We know, that RIGHT is adopted to express Equity—Justice, &c., or what relates to Rule—Government— Laws—Order, &c. &c.; and from this source have been derived the terms, attached to our Element RC, RD, RG, &c. &c., which convey

convey this train of ideas. It is impossible to distinguish between the minute turn of difference in meaning, which we may conceive Rid and Right sometimes to bear, in the formation of these words, denoting Law—Justice—Equity, &c. I must again repeat, that the words under our Element RC, RD, &c. expressing Justice, &c. originally belonged to the idea of Ridding away the incumbrances, which exist in a Disorderly and Embarrassed state of things, as of injustice—fraud—doubt—difficulties, &c. &c., so as to render them Right—Straight—Even—Equal, Clear of incumbrances, difficulties, &c. &c., or to set them to Rights, &c., and that this idea of 'To Rid' or 'To Right' is attached to the action, which we express by 'To Rout or To Root about—'away—off, &c., as Dirt, Rubbish,' &c. &c.

My German Lexicographer explains Richten by "To fit, " adjust, adapt or accommodate yourself to, dress, frame, Direct, "rule, carry, order," &c. &c.; and hence Richter is 'a Judge; RICHTIG. Right, Regular, &c. &c. Wachter explains RICHten in different articles by "Dirigere, disponere, ordinare.-Instruere.-"Facere, patrare. - Erigere. - Judicare, &c. Punire, vindictam " sumere.—Regere imperio;" and RICHTER by "Rex, Dux, prin-"ceps.—Judex," &c. &c. We cannot but see, how the sense of Erigere, RECTUM facere, 'To make ERECT,' brings us to the idea of RAISE, which I shew in another place to signify 'To Rout or * Stir up.' The Etymologists have produced the parallel terms to RIGHT, as Riht, (Sax.) Recht or Richt, (Germ.) Droit, (Fr.) Retto, Dritto, Diritto, (Ital.) Derecho, (Span.) Recht, (Belg.) Ret, (Dan.) Raihts, (Goth.) Rettur, (Isl.) &c. &c., which they justly refer to RECTUS and REGO.—The term RIGHT cour is a compound belonging to the Saxon Rightwise, in a Right-wise or manner, as the Etymologists understand. We perceive in the terms &RECT, &RIGO, that the sense of RIGHT might have been derived simply from the idea of Raising up or Stirring up; and to this

this idea, under one point of view, it belongs; but when we consider the terms, with which RIGHT, RICHTen, &c. are involved; we cannot separate from these words the notion of Ridding out or away by this action of Raising or Stirring up; that is, 'To 'RIGHT,' if I may so say, means at once 'To Rout or Stir up-'out, so as to Raise up or make e-Rect and up-Right, and To RIGHT-RID out-To Set to RIGHTS-To make RIGHT, Level, ' Straight,' &c. These ideas are here so intangled, that they cannot be separated from each other. I shall not attempt to produce the various forms under which the acknowledged parallels to Right appear, as this has been abundantly performed. Yet I cannot but remark on the French Droit, the Italian Dritto, and the Spanish Derecho, that they might have belonged to the Element TRC, DRC, to Trace—Track—Straight—Drag, &c., unless the evidence had been sufficiently clear, that they were immediately taken from the Latin Di-Rectus. In considering the sense of RIGHT, e-RECT, we cannot but be reminded of the Greek ORTHOS, (Oplos,) belonging to the form 'RT, whatever may be the precise relation of these words to each other*.

To

^{*} I shall not stop to enquire whether the terms belonging to RIGHT should be considered as immediately attached to ORTHOS, (Ogloc.) I shall only say, that ORTHOS, (Ogloc.) is derived from the same train of ideas, and that it belongs to the same Spot and Action, as in Oro, Orso, Koni-Ortos, (Ogw., Ogow., Excito, Koniogros, Pulvis Excitatus, et in aerem elevatus.) The terms Oro, Orthoo, (Ogw., Oglow., Erigo, Arrigo.) mean simply to Era, (Ogloc.) or Earth up, as in Aroo, (Agow.) Aro, &c. In the term Orthotomeo, (Oglocopuw., Recte intelligo, Recte sentio, Recte Tracto.) we have a compound from Orthos, (Ogloc.) which has been acknowledged by some to be derived from the very source which I suppose; namely, that of Stirring up or Cutting up the Ground. We all know, that the word is used by St. Paul in the following passage: "Study to shew thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth." (2 Tim. ii. 15.)—Egyath average corror, Opgotomothat for logical transference. The Commentators produce, among other interpretations of this passage, the opinion of Theodoret, who justly conceives, that it contains a metaphor taken from Husbandmen:—

THE EARTH.

To the Latin Rego directly, as we know, belong Rex, Regis, Regina, Regnum, &c.; and to these, as all acknowledge, the terms in modern Languages are to be referred, as Roi, Reine, (Fr.) Re, Rege, Regina, Reina, (Ital.) Rey, Reyna, (Span.) &c. &c. The French Etymologists are inclined to believe, that these words Rex, Roi, &c. belong to the Hebrew רעה Raah, the Chaldee Rea, &c. &c., signifying to Feed, as denoting "Un Berger, un " Pasteur, un Conducteur, un Governeur," according to the metaphor in Homer, Hopera haur.—The Hebrew term signifying to Feed, or, as Castell explains it, "Educere oves, Regere," &c., may belong to a similar notion; and that it is attached to the Race of words before us, whatever may be the precise idea annexed to it, will be manifest from the adjacent term y RG, which signifies "To Break in pieces," where we have the strongest sense of ROUTing up a Surface: I shall not attempt to produce the acknowledged.

Επαινουμιν μέν και των γιωγγων τους ιυθικας τας αυλακας ακατιμνοντας. ουτω και διδασκαλος αξιιπαινος δ τω zaron two than layer exquency. Others have properly reminded us of the passage in Theocritus, O7400 67110 OPOON, 'To Draw a straight Furrow,' which I have before produced. It is impossible, I think, to doubt the source from which the term is derived, accompanied, as it is here, with the idea of the Workman. I have shewn in another place, that ΕΒ Gazomai, (Εςγαζομαι,) is an appropriate term, and signifies 'To EARTH,' &c. &c. (p. 538.) The term ORTHras, (Oρθροί, Diluculum,) is justly acknowledged by some to belong to ORTHO, Ochw, "To Erect, Raise," as I have before observed; though not " because the morning Raises men to their work," as Mr. Parkhurst thinks; but for the same reason that we talk of the Sun Rising. Mr. Parkhurst however adds, "The Reader " will consider whether it may not be as well deduced from the Heb. "אור" AUR, "and "TUR, "to Turn, as denoting the return of Light." The Greek ORTHros, (Ogless,) certainly more directly belongs to ORTHO, (Ogless); yet the OR in this word, and the Hebrew MR AUR, together with the Greek EER, (He, Diluculum,) the Latin AURORA, &c., all belong to the same Radical 'R, signifying 'To Raise up,' as in Oro, (Ogw.) &c. &c. In Sanscrit, Aubooren is the Dawn, which directly belongs to the Latin term. We see in these words, that the Elementary AR is doubled, in order to express the idea more strongly, quasi AureOr, AureOr, as it probably is in the Latin On=Ion, the Greek On=Ono, (Oguque,) the English AR=Ean and its parallels, the German 'R=UHRen, the Saxon AR=ÆRen, &c.

knowledged derivatives of Rex, Regis, &c., as Regalis, Regal, Royal, Regula, &c., to which latter word belong; as we know, Rule, Ruler, &c., where we pass into the form RL. In Realm or Royaulme, (Fr.) we have again the form RL, which appears at last under that of RM, as Royaume. In Regula and Ruler, we have at once the idea relating to a RIGHT Line, and that of a Governor. Regale, with its parallels Regaler, (Fr.) Regalare, (Ital.) Regalar, (Span.) has been supposed to signify "Regaliter, "(i. e.) more Regio Excipere." These words however belong, as I imagine, to Gala, (Span. &c.) "The choicest part of any "thing." In old English, RIGOLS means, as explained by Skinner, "Instrumentum Musicum, quod alio nomine Clavichordium, a "Clavichord dicitur," which he derives from the French Regaillardir, "Exhilarari." It may belong to the idea of the Chords, placed in a Regular order, for the same reason that the Greek Kavav, Regula, Norma, relates to a similar idea, in the well-known Epigram upon the Organ, as it should seem: Και τις ανηθ αγερωχος εχων θοα δακτυλα χειρος, Ισταται αμφαφαων ΚΑΝΟΝΑΣ συμφραδμονας αυλων. It is curious, that in Persian the parallel term contains the same union of ideas. The term تانون Kanun, means in one sense, "A Canon, Rule, Regulation," &c.; and in another sense, "A "Species of Dulcimer, harp or sackbut; the strings of which," &c. &c. In Saxon, Regol is "A Rule. Regula, Norma, Canon." In the succeeding column of Lye's Saxon Dictionary we have the Saxon Reht, Rectus; Rehtan, Regere, Dirigere; and the Gothic Reiki, Imperium; Reikinon, Regere; Reiks, Rek.

The Spot from which the Latin REGO, &c. has been derived, is unequivocally apparent in the term Regio, A Region or Tract; which Robert Ainsworth explains in different senses by "A bor-"der, a coast.—A straight line," and "A ROAD or Highway," where in Road we have the original idea. The Etymologists derive Regio from Rego, "quod Regiones sub Regibus erant."

If we had not seen so strongly exhibited the original idea in the words expressing Government, &c., we should have thought, that REX and REGO referred to the command of a certain Spot-REGIO or REGION, and that the original idea was deposited only in REGIO: Yet this, as we have seen, is not so; and REGO—REGIO belong to each other, just as di-RECTION. a certain Road, or Tract. We may still, however, expect to find these ideas so involved with each other, as if the REX or Governor was the person appropriate to a certain Region; and the interpretation of the Lexicographer is sometimes founded on this idea. In Saxon we have Rice, which Lye explains by "Regio:-Regnum, "Imperum, Ditio, Jurisdictio," From the Saxon Rice, &c. has been derived a termination to substantives in our Language, signifying Power-Jurisdiction, Authority, &c. &c., as connected with a certain spot; Bishop-Ric, &c, "Terminatio," says Lye, "plurium " substantivorum Munus et Dominium significantium, ut Cin-Ric, "Regnum; Bisceop-Ric, Episcopatus; unde nostra Bishop-Ric, "&c.—Occurrit etiam tum in initio tum in fine nominum virorum: "ut Ricard, i. e. Ric-Weard, Fred-Ric, Pace dives sive Potens." Hence is derived our word Rich. Lye explains the Saxon Ric. RICC, RICA, RICE, by "RICH, Dives;—Item, Magnus, Potens, "Præpollens, Nobilis." The Etymologists, under Rich, produce the parallel terms in other Languages, as the Saxon Ryc, &c., the German Reich, the Belgic Riick, the Danish Riig, the Runic Rigur, the French Riche, the Italian Ricco, the Spanish Rico. Lye has justly observed on this word, "Olim Riche et Rice prima " significatione dicebantur Potentes. In Arg. Codice Reiks passim est Princeps." In German, Reigh signifies at once a Kingdom and Rich.—The name of Raja is applied, we know, by the Hindoos, as one of their most familiar words for a Prince or Powerful Chief, which we must refer to this race of words, the Latin

Latin Rex, Reois, &c. &c. In the Gipsey Dialect, Ri and Raune are titles of respect for a Gentleman and Lady, Sir and Madam.

In Mr. Shaw's Galic and Irish Dictionary we have "RIOGH, "RIGH, A King;" and "RIOGHAN, A Queen;" "RIS, A King;" "RAC, A King or Prince;" "RAICnead, A Queen;" "RIGH, RI, " A King;" "Richead, A Kingdom;" "REACHT, Power, Au-"thority;" "REACHTaire, A Lawyer, King, Judge;" "REACHT, "A Man." I find in the same column "Ris, History,—Intel-"ligence, Knowledge," which may relate to Knowledge in the History of Kings. In the same column we have Risa, Bark; and I have shewn, that such terms as RISA are derived from the same idea as the name for a King; namely, that of Ridding or Clearing away or off a surface. Peel means at once the covering, and the action of Stripping it off. In the same column we have RIOTHAM, To Run, To RACE; where we are brought to the very spot, the ROAD, or Ground. In the next column we have RISTeal, A Sort of Plough, &c. The adjacent word to RIGGH, A King, is RIODH, A Ray; and I shew in another place, that the Radius, the Line, Mark, &c. belongs to the action expressed by RADO, that of Scratching upon the Ground. In the same opening of Mr. Shaw's Dictionary, I see RIAGHUIL, A Rule, Government: RIAGHAILtach, "Regular, sober, peaceful." In the same column I find RIADH, "A Running, Racing;" where we are again brought to the original spot, to which RIGHT-ROAD, &c. belong; and in another article we have RIADH, "Correcting, taming, subduing "grief;" where we have at once the idea of RIGHTing, if I may so say, and of Routing, &c. Let us mark, that the term adopted in the explanation of Mr. Shaw, Cor-Recting, is the very term which I have applied, RIGHTing. In the same column we have RIAGH, "A Cross, gallows;" and in another article we have RIAGH, Religious. Remote as these words appear, we now see, that

that they convey the same fundamental idea, and mean the Cor-Rector and Cor-Rected, the RIGHTer and the RIGHTeous.

Let us mark the explanatory term Religious. I have sometimes thought, that the ReL in Religio is quasi Regul, as in Rule; and that it means 'A well Regulated or Ruled life.' Gellius defines it thus in one of its senses: "Religiosus pro casto atque " observanti cohibentique sese certis legibus finibusque dici cœptus." The ordinary derivation from *Relego*, (Re and Lego, To Read,) cannot, I think, be at all admitted. "Qui omnia, quæ ad cultum "Deorum pertinerent, diligenter pertractarent, et quasi Relee gerent, sunt dicti Religiosi ex Relegendo." (Cic. de Natur. Deor.) It would be more naturally derived from Relego, To Banish, as relating to Consecrated spots, from which the profane were Banished. The difference in the quantity of the words, as it is called, is nothing. Under this idea the original sense would appear in such phrases as 'Religio est'-'Religiosi Dies'-'Religiosa De-'lubra;' and here the following familiar definition might be adopted, " Religiosum est, quod propter sanctitatem aliquam Re-"motum ac Sepositum est." In the same column of Mr. Shaw's Dictionary, where RIAGHuil and Reaghailt appear, we have REULT, A Star: I have been much embarrassed to discover from what source this term is derived; though we might conjecture perhaps, that the Reult was quasi Riaghailt, and that it related to Bodies, whose courses were duly Ruled or Regulated. sometimes thought too, that the Realt might relate to the Rolling Bodies. In Celtic, the form RL exhibits the sense of Roll, as derived from the true form of our Radical RT and RT1. Mr. Shaw's Dictionary we have Rolaim, To Roll; but in the preceding and succeeding columns we have the true forms, Roith, A Wheel; and ROITHLeagan, A Circle, wheel; and ROTH, A Wheel; Rothlein, A Whirl. I suggest these ideas for the consideration of the Celtic Scholar, who, I trust, will acknowledge, that

that I have never ventured to interpose my opinion on Celtic terms, without a diligent study of their relations to each other; whatever may be the errors into which my imperfect knowledge has sometimes necessarily led me. The adepts in Celtic Literature must be contented to bear a portion of the shame, which is attached to the errors and the ignorance of their disciples, who are ardent to receive instruction, and able to appreciate its value. It has however unfortunately happened, that the means supplied by the master are very inadequate and imperfect indeed; when they are contrasted with the curiosity—the ardor and the purposes of the scholar.—Nothing will be performed effectually, till a full and copious Dictionary shall appear, at least in one Dialect of the Celtic, in which the various senses of each word shall be distinctly unfolded and illustrated by examples, produced at some length, with a perpetual appeal to kindred terms in other Dialects. In this Dictionary the origin of Celtic names should be diligently detailed, and every occasion should be taken to illustrate the Religion and policy of the Celtic tribes, as the Druid ceremonies, &c. &c.; though all this should be performed without any view to the establishment of any favourite hypothesis on the disputed points of Mythology-History, or Language.

In Welsh, Rhi is "A Lord, a baron," &c.; Rhiaidd, Noble, &c., and Rhiawdr has a similar meaning. Rhial signifies Noble, and Reol is 'A Rule.' Again, Rhwysg is "Authority," Rule," &c., and Rhwysgo, To Rule, bear sway, &c. In Welsh too, Rhyswr is "A Champion, a Hero, a wrestler, a warrior," a combatant," which belongs, I imagine, to the Race of words, attached to our Element, expressing actions of Violence. In the same column of Mr. Richards' Dictionary we have Rhysgyr, Violence, force, &c. &c. The Welsh Lexicographers refer the word Rhyswr to the German Ris or Riese, a Giant, and to the British and Thracian names of Rhys, Rhesus, the Syriac we Rishai, Præcipuus,

cipuus, Excellens, and the Arabic Raiis, Princeps, Capitaneus. As there are different senses annexed to our Element, from which the name of the Illustrious Personage—the Powerful, Strong— Violent Man—the Head or Chief, may be derived, I must leave the adepts in each Language to decide on particular cases of I have endeavoured to distinguish these points whenever I had the due evidence before me. The Pentateuch commences with a term, B-RAS, בראש (In the Beginning,) which signifies, as Mr. Parkhurst explains it, "Prior, First,-Principal, "Chief, most excellent, the Head of animals—the Head, summit, " or top of a mountain.—An Œconomical, or Political Head, Su-" perior, Ruler, Director, Governour," &c. I have shewn in another place, that our Element expresses the Top, under the idea of the RAISED-up Furrow or RIDGE. Whether such be the notion in this word and its parallels, or whether it belongs to the idea expressed by the explanatory term di-Rector, I cannot In the Syriac, Samaritan, Æthiopic, Arabic, &c. are decide. acknowledged parallel terms to this Hebrew word. In the same column of Mr. Richardson's Dictionary, where RAAS, "The "Head, A Prince, A Chief," occurs, we have the Persian RAST, which our author explains by "Good, RIGHT, true, just, " sincere, faithful, loyal." In Arabic, رسيك Reshid, is "One of "the Attributes of God," says Richardson; and the subsequent interpretation of "A di-RECTOr, a conductor, guide," &c. brings us to the train of ideas now under discussion. Hence has been derived, as is acknowledged, the name of Haron-Al-RASHID, so familiar to every Reader of the Arabian Tales. Mr. Richardson explains Rashid راشد by "Faithful, pious, orthodox, following "the RIGHT path," where the term RIGHT shews us, to what particular idea this word must be referred.

While I am examining terms belonging to the idea conveyed by Rectus, when it expresses Order and Regularity, as referring.

to the RIGHT ROAD, Track-Course, &c., I might produce such words as RITE, RITUS, (Lat.) RITE, (Eng.) RATUS, RATIO, (Lat.) with its parallels, &c. Reason, &c. &c. The Lexicographers understand the connexion between RECTUS-RITE and RITUS. They explain RITE by RIGHTLY, and RITUS by "A RITE or ceremony, " particularly in Religion.—A Course or order.—A Way, fashion or " manner;" where, in the explanatory terms Course and Way, we are directly brought to the ROAD. The term RATUS is only another form of Ritus and Rectus; and in a passage produced by R. Ainsworth, "Astrorum RATI et immutabiles Cursus," we see the true idea of the RIGHT or REGular Courses or ROADS of the Stars. The term Ratio means in one sense, "A Way, or means; "a manner, an expedient, fashion," where in the term Way we see the true idea of the certain ROAD. Let us mark the word Expedient, belonging to Expeditus, which I have shewn to convey a similar. idea to RID and RIGHT; and thus we see, how we are again brought to the RIDDED or RIGHTED ROAD. It would be idle to discuss whether Ratio means simply the ROAD, or the RIGHTED ROAD, as these ideas cannot in many cases be separated from each other. It is sufficient to shew, that RATIO belongs to the idea of the Way-Course-Track-Road, &c. Under this idea we shall understand, how Ratio attaches itself to the words in Latin with which it is surrounded, RASUS, RADO, RASTrum, which relate to the action of making Scratches—Tracks or Traces upon the Rus or Ground.

The term Ratio, Rationis, we know, occurs in various Languages, as Reason, Raison, (Fr.) Razon, (Span.) &c. &c. The sense of Raison, "Ratio, Proportion," brings us to Ration, "A certain Proportion of Provisions, &c." In the same page of my French Dictionary, where Ration is, we have Ratisser, To Scrape, To Shave; Rat, A Rat, i. e. the Scraper or Scratcher; and Rateler, To Rake; where the sense of the portion Rat,

pervading

pervading these words, is unequivocal. In the same column with RAISON we have RAIS, the Spoke of a Wheel, belonging to RADius and RADO, and "RAIS, pied, terre, Even or Level with the Ground," which means to RAZE, &c., where the original idea is equally manifest. I find too Raire, To Shave; where we have the form of the Element 'R doubled, in order to express the idea more strongly, as in ^R-EAR, (Eng.) To Stir up; ^R^-UHRen, (Germ.) To Stir, move, wag, &c. &c. We shall now understand, that the English RATE, the certain portion, meant originally the certain Track—or ROAD, passed over in a certain time, 'He travels at a ' great—a certain RATE,' &c. &c. We shall likewise see, that RATE, Objurgare, is the verb belonging to the action, of which RATE, the Track, is the substantive; and that its original sense was that of Routing up the Track-Road. The action of Scratching over or up a surface, supplies the most familiar metaphor for the idea expressed by 'Objurgare,' as in the Latin Perstringere, &c. I shall shew, that the explanatory 'Ob-Jurgare, or Jur-g-ium,' which R. Ainsworth explains in one sense by Jar, belongs to Far, Scar, Score, and finally to Scra-tch, &c. Junius has placed RATE in the senses of Objurgare, - Irritare, and "Statuere " pretium rectæ rei venalis æstimationi respondens," in three separate articles. Let us mark the explanatory term Ir-RITare, belonging to our Element ART, or RT, under the same metaphor. In Spanish, RATO not only signifies "Space of time," as my Lexicographer explains it, but likewise a "He-Mouse;" where let us note how a certain Space is applied to Time. opening of my Spanish Dictionary is RATEO, "Distribution made "at a certain RATE, or in a certain proportion;" RATEAR, "To "distribute or divide proportionally.—To trail along the Ground;" where we actually see the union of ideas, which I suppose, in the same word; RAUTA, a "Road, Way, ROUTE;"-RASTRO, "Track, " a mark left on the Ground," &c. &c. &c. In the same opening

6 м

is RAZON, REASON. In Saxon, Reswian or Resian is To Reason: Cogitare, opinari, &c., the succeeding word to which in Lye's Dictionary is RET, A RAT.

The Etymologists suppose RATio to be so called, "quia à Ratu, " (supino verbi Reor,) proprie ex analogià fuerit actio Rendi." In Reor or 'A-EoR we have the form 'R doubled, in order to express the idea more strongly. We shall not wonder, that Reor, To Suppose, is derived from Drawing Traces—Tracks—Furrows, &c. on a surface, when we remember, that Duco, which signifies To Draw Furrows or Hollows on the Ground, Ducere fossam, &c. &c., means likewise "To Esteem, Reckon," "Tu nunc tibi "id laudi Ducis," &c. &c. Let us mark the explanatory word RECKON, which belongs to our Element under the same train of ideas of RAKing up the Ground, whatever may be the precise notion in this train, to which it more immediately belongs. R. Ainsworth is among the few Etymologists who have referred Latin words to the Dialects of the Celtic; and he accordingly observes, under RATIO, "A Reor, Ratus, vel pot. à Celt. Ræson." Lhuyd, under RATIO, produces the Welsh Rhesum, the Armoric Reiz, and the Irish Reasun. In the same column of Mr. Richards' Dictionary, where RHESWM, REASON, occurs, we have RHES, RHESTEY, A Row, or Rank; and in the preceding column we have RHEID, "A Ray, branch;" and the succeeding word is RHEIDR, A Knight; where we are brought to the RIDER, and the ROAD. Let us mark the term RHES, and the English Row, which belong to the same idea of the Line or Furrow.

We cannot but perceive, that RAISIN and RAISON bear a similar form; and we should be hence led to believe, that they conveyed the same fundamental idea. If RAISIN originally denoted the Dried Grape, we should imagine, that it was so called from its Shrivelled—cor-Rugated appearance. Yet as there are other words, belonging to our Element, relating to the Grape, we may

doubt,

doubt, whether this is the precise idea annexed to the term. The Etymologists refer Raisin to the Latin Racemus; and the Latin -word has been derived from the Greek RAX, RAGOS, (Pak, Payos, Acinus,) which certainly belongs to the idea conveyed by RACHis, Regnuo, (Pazu, Spina dorsi, Pηγνυω, Frango,) the Rough—Hard substance. If these words all belong to each other, they conveyed originally the same idea. On this point however I have no evidence to decide.—In RESIN, RESINE, (Fr.) RESINA, and RETINE, (Pyring,) we have the same form as RAISIN; and these words mean, I imagine, the Rough substance. In German, RESIN is Harz, "Hard Rosin," as my Lexicographer explains it; where the Harz and Hard belong to each other. If RAISIN therefore refers to the Hard-Stony, Rough substance, we shall understand, that Reason and Raisin relate to different portions of the same fundamental idea, as the former signifies the certain Course—ROUT—RUT, ROUTINE; and the latter belongs to the idea of the Rough substance, as derived from the surface Broken into Ruts, Ridges, &c.

One of the great difficulties, which occur in a work of this nature, is that of arrangement; as the writer is perpetually obliged to pass through different portions of the same train of ideas, and desert in some measure those particular veins of discussion, which he had destined for separate divisions of his argument. I purposed in the present article to examine those words, which more immediately belonged to the action of Ridding away Dirt—Rubbish; and I shall now again proceed to consider those terms, in which this idea appears more particularly prominent. The term Riddle, relating to the action of the Sieve, we shall instantly refer to Rid; and here we are presented with a cluster of ideas, which is singularly applicable to the confirmation of my hypothesis. We have seen, that Rutteln means in German "To shake, wag, or Riddle a Measure;" and how it seemed directly

directly to connect itself with Russeln, the Roottling of the Ground, by the Snout of Hogs. This connexion is strong and striking; yet we know, that RIDDLE itself actually relates to the ROOTLING or Shaking about of Dirt. We cannot help, I think, seeing likewise the idea of Noise, as annexed to this action; and thus RIDDLE will connect itself with RATTLE. We know moreover, that the purpose of the RIDDLE is to Separate or RID away one part from another; and thus we perceive, how it is attached to Rid. We see then, that 'To Riddle' means 'To Roottle 'about Dirt with a RATTLING noise, in order to RID one part 'from another.' We shall surely not doubt, that RIDDLE, the Ænigma, means the Confused, jumbled, RIDDLED or ROOTTLEDtogether stuff, which required to be un-RIDDLED, or, as we express it by the same term, to be RIDDLED or to be RIDDED and Sifted out. In old English we have the combination RIDDLE my RIDDLE; where we have at once the verb and the substantive, which still remains in the mouths of our children, with an addition, RIDDLE my RIDDLE, my Ree. In Scotch they have the simpler form RED my Riddle; and in this Language, REE means a Riddle. The parallel terms to RIDDLE, the Ænigma, in other Languages, as produced by the Etymologists, are Rædels, (Sax.) Ratzel, (Germ.) Raedsel, (Belg.) which they have referred to Rede, &c. Consilium; and Rædan, (Sax.) 'Per conjecturam aliquid indagare, " Aradan, Divinare." From the form of the German and Belgic words we might think, that the Zel and Sel were additions derived from the construction of the Language,—that RAT was another distinct part, and that the word signified the obscure sentence, &c. which required REDE, &c. Counsel, Sense, &c. to make it out. Yet in the Saxon REDELS, and in the English RIDDLE, we see nothing of such a compound; and therefore we shall acquiesce, I imagine, in the plain and obvious origin, which I at first proposed. Dr. Jamieson explains the Scotch REE, as "A small Riddle, "larger

" larger than the Sieve." "Gl. Sibb. Belg. REDE. Id. REE E. is "used as a v. to sift, to RIDDLE."

The preceding word to this is REE, "Half drunk, Tipsy.— "Crazy, Delirious," which, we see, is a kindred term, denoting Commotion, Agitation, applied to another purpose. In the next page of Dr. Jamieson's Dictionary we have REEZIE, "Tipsy;" where we have the true form, but which he considers as the diminutive of Ree. In the same opening of Dr. Jamieson's Dictionary I see "Reid Etin, The name of a giant or monster, used "by nurses to frighten children;" and REID Wod, "In a violent "Rage, maddened with anger;" where REID is used in its more violent sense. Let us mark the explanatory word RAGE, another term of the same kind. I find likewise REID, as denoting "A Calf Reid, the fourth stomach of a calf, used for Runnet or "earning;" where REID is still used in its sense of Commotion, referring to the operation of Curdling. We shall not wonder to see a term, relating to the action of Curdling, connected with words, expressing the utmost state of Commotion, when we remember, that the feeling of Horror is frequently attached by metaphor to this action, as in the phrase "My blood Curdles with " Horror;" and that in Greek, Oppos means Serum, and Opposeu, Timeo, Formido, which belongs to Horreo, Horror.

The Etymologists produce the parallel terms to RIDDLE, Cribrum, as the Saxon Hriddle, the Swedish Rissel, the Welsh Rhidyl, the German Rider, or, as it is now written, Reuter, the Belgic Rede, &c. Skinner and Lye understand, that these words belong to Hreddan, Liberare, Rid, &c.; though Junius refers them to Pulpov, Fluentum; "quicquid enim cribro incernitur, ex ipso "incerniculo veluti effluere videtur." In Welsh, Rhyddau, as we have seen, signifies "To set at liberty, to free, to set free; to. "deliver or release; to Rid out of; to acquit; also to loose, "undo, or untye," says Mr. Richards; to which he adds, "Q. wh: "the

"the Eng. Rid be hence derived." I have produced the word in this place, that it may be compared with RHIDDIO, another Welsh term, to "Repell, to drive back," which means, as I imagine, to RID, and with the adjacent terms RHIDYLLIO, "To sift or sierse;" RHIDYLL, "A kind of Sieve or RIDDLE, a coarse sieve," produced by the Etymologists. Again in Welsh, Rhuchio is "To sift or "sierce;" and Rhuwch is "A Ranging Sieve or bolter." Mr. Shaw, in his Galic and Irish Dictionary, under RIDDLE, gives us the words Ruidal, Rillean, in which latter word the second consonant D of the Radical RD is lost. In Lhuyd, under Cribrum, we have the Armoric RIDAR. In Persian, RAZ ji is "A Secret, a mystery;" and "A Maker of Mortar, a plaisterer " of walls." In German, REUTer signifies "A Rudder, RIDDLE, "cribble, winnow, fan, range;" and Reutern, "To winnow, fan, "sift, or range your corn, pass through a Rudder."

In Mr. Shaw's Galic Dictionary we have RIDUL, "A Sieve, " a coarse sieve;" and in the succeeding column we have Rillean, "A Riddle, coarse sieve;" and Rilleam, "To sift with a Riddle." It is impossible to doubt, that these words belong to each other. I shall leave the Celtic Scholars to consider, whether Reil, "Clear, manifest," and "Lawful, Rightful," as Mr. Shaw explains it in two articles, does not belong to the metaphor in RILLeam, of Clearing away dirt. But Reil likewise signifies a Star; and what is Clear-Shining; and thus we see, how the name of a Star may belong to the Removing away of Dirt. I shall shew, that the explanatory word Clear belongs to Clay; and that it means 'To 'Clay off,' as it were; as we talk of Mudding out a pond. In the same opening of Mr. Shaw's Dictionary, where Rillean occurs, we have "Reult, Reulag, A Star;" "Reultiasg, A Fish with shin-"ing teeth;" and "Reuladh, A Declaration." From the other side of the page of Mr. Shaw's Dictionary we may gather full evidence respecting the truth of my hypothesis on the words Rip

and READY.—We there find Reidham, "To Prepare, provide, "agree; Reidh, Plain, open; Reidhteach, A plain, level;" and in the preceding column we have Reidh, "A plain, Level;" and Reidh, "Ready, Prepared," from which we unequivocally learn, that here the idea of Ready is connected with the action of Ridding or Clearing out a Surface. I find likewise adjacent to these words Reighdam, "To Judge."

Junius and Lye refer the old term READ, Consilium, to RID, Expedire, Extricare; Aradan, Eruere, Expedire, decernere, definire, judicare; so that READ signifies that, which is able to RID. out or Rout out any hidden or obscure matter. Eruo has itself a similar meaning, when it signifies "To search or find out; to "bring forth," as R. Ainsworth explains it, "Aliquid indagare, "ex tenebris Eruere. Cic." &c. Thus we see, that READ is the Faculty or Action, by which 'Aliquod e-Rurum est.' Many of the terms denoting Enquiry and Investigation have been derived from the action of Routing or Scratching up the Dirt. We know, that Rour in colloquial Language is thus applied: We know likewise, that Scrutor belongs to Scruta; and we talk of Delving into a subject—Routing into any matter, &c. I shall shew, that Search and Scruta belong to Scratch, and in-Dago, to Dig. READ, Consilium, belong our Saxon names Rod-Ulph, Consilio adjuvans; Ethel-RED, Clarus in consilio; Wiht-RED, Agilis in Consilio, &c. The Etymologists justly refer READ, Consilium, to the Saxon Ræth, the German Rath, the Danish Raad, the Belgic Raed, the Swedish Rad, the Runic Rad, &c.; and READ, Legere, they refer to Rædan, (Sax.) Reden, Loqui, (Germ. and Belg.) &c. &c.

To READ is To Speak, Reden, Loqui; and it means nothing but To Rid or Rout up or out—aRædan, Eruere, verba Eruere, &c. The term Read appears with its original idea in our familiar phrase, "To Read Out," i. e. To Rid out, Cast out, or,

as we express by an appropriate term belonging to Out,— To " Utter.' The metaphor of Bringing Forth or Out, as applied to Speech, is perpetually visible; as Effari, Eloqui, Edere, Emittere, Enunciare, Proloqui, Proferre, Pronunciare; and the philosophers have distinguished Man from other animals by having that species of Reason, which Brings Forth, (Λογος Προφορικος,) or which Utters, or has the gift of Utterance or Speech, while other animals have only the Aoyos endiaderos. It is curious to observe, how constant and faithful the dictates of the mind are in those impressions, which relate to Language. We perceive, that Man still recurs to the same vein of metaphor, whether in his more barbarous state he invents Language, or whether in his more polished condition he describes its operations. I shall shew, that Ereo, (Eew, Quæro, Interrogo, Dicam,) in its double sense of Enquiring and Speaking, has precisely the same idea as Enuo, and that it belongs to Oro, Airo, Aroo, (Oeu, Excito, Aieu, Sursum tollo, Aeou, Aro,) 'To Stir up the Era,' (Equ, Terra.) In Rêo, (Pew, Loquor,) the breathing before the Elementary consonant is lost; but in Resis, RETOR, (PHOU, PHOUP,) RHETOR and RHETORIC, &c., we again see the form RS, RT, &c. whether we consider the existence of the second consonant, as arising from the analogy of the Greek Language, or from the organical Elementary process, by which the forms AR and RT are connected with each other. However that be, we must not consider, I imagine, RETOT, (PATUR,) REDE, &c. to be directly connected with each other. I shall shew in another Volume, that the Latin Dico, and its parallels Digo, (Spanish,) &c. belong to Dig for the same reason; and hence we shall understand, that Dico and Duco, (Ducere fossam,) are only different forms of each other. In German, REDE refers to the strongest and most perfect effort of Bringing forth or Out words, when it denotes what the Latins and English express by the same metaphor, Elocution or Eloquence. I have shewn, how RID connects it in the sense with

with such terms, as Libero, Livrer, (Lat. Fr.) &c., To Clear a a surface, as of Bark, &c.; and hence, by the same metaphor, we talk of a person who has a good Delivery, who Delivers himself well, or, as it might have been, according to the radical idea, who Rids himself well. Such, I imagine, to be the precise notion, by which Rede, &c. is connected with terms, conveying the sense of Rid. The German Scholars will now understand, why Redich signifies "Honest, ingenuous, Frank, Free, Open," &c., as my Lexicographer explains it; where we directly come to the idea of what is Ridded out—Cleared off, &c. &c. The adjacent word to this term in my German Dictionary is Reede, A Road for a Ship; where the idea of the Road brings us directly to the Spot, supposed in these discussions.

That my hypothesis is well founded respecting the origin of the English Rid, &c., and its connexion with terms denoting Order—Preparation, as READY, &c. &c., will be unequivocal, from considering the senses of the Scotch words, conveying these ideas, as they are explained by Dr. Jamieson in separate articles.— "To Red, To loose, to disentangle, to unravel.—Fools ravel, and "wise men REDD;" where we see, how it passes into its metaphorical sense of Order, &c. from the idea of Embarrassment-"To RED, REDD, REDE, RID, To clear, to make "Way, To put in Order.—' To RED thare renk, and rowmes thaym "'the way.' Doug. i.e. To clear their course; or, as we still "say, To Red the way-To Red or Red up a House, to put it in "Order, to remove any thing out of the way, which might be "a blemish or incumbrance."—"To RED up also signifies to put "one's person in order, to dress." This agrees with the sense of the Italian Arredare, "To equip, adorn," &c. Again, "RED, "REDD, 1. Clearance, removal of obstructions. — 2. Order.— " g. Rubbish V. Out-REDD." -- " RED, REDD, 1. Put in order, "cleared.—2. Often put in the same sense as READY.—3. Distinct;

"as opposed to confusion, either in composition or delivery of a discourse. One who delivers an accurate and distinct discourse, is said to be Red of his tale." This, we see, brings us to the sense of Rede, Talk; and let us mark the word Delivery, which is taken from the same metaphor of being Freed from an incumbrance.

I shall shew, that Livrer and Liber, relating to Freedom or Liberty, belong to the Liber, the Bark-Liberare, quasi Corticem detrahere, as some have understood; but they have not seen, that Liber belongs to Limus, the Dirt. Hence it is, that Liberare means in the Latin of the Middle age, 'To equip, furnish, or to Rip • out or Furnish a person with necessaries for his maintenance, as 'cloaths,'&c.; and hence Livery, the dress of Servants, is derived. Menage says, that Livrée signified in old Language, "ce qu'on " bailloit à quelqu'un pour son entretien et pour sa dépense." All admit, that Livery means what was Delivered out, which brings us to the same point. Livery-Stables are places in which horses are Furnished with necessaries. In old English, Delievretie means Activity, or Readiness of motion, from the same idea of a Free—unincumbered state. (Rowley's Poems, Tournament, v. 44.) Thus we see, how the same metaphor leads to terms of the same meaning. This sense of Rid, Red, &c. To dress, furnish, equip, &c. brings us to Array, Rig, (To Rig out, the Rigging of a Ship,) Raiment, &c.; and I have before shewn, that WRIGAN, Saxon, "To Rig, Tegere," &c. belongs to the same fundamental idea of 'To Cast, throw, draw, turn up, out, away, aside, over, about, ' as the Dirt of the EARTH,' &c., whatever may be the precise notion, which we should select as directly connected with this peculiar word. When ideas are so intangled with each other, it is in vain for us to separate and distinguish. Again in Scotch, as Dr. Jamieson tells us, RED means "To disencumber, the If same with English Rid,—To save, to rescue from destruc-

and Reds=Man, "One who clears away Rubbish, "a term particularly applied to those, who are thus employed "in coal-pits." Here we are brought to the very idea and action, which I suppose in my hypothesis. Dr. Jamieson produces adjacent to these words, "RED, To overpower, master, "subdue;" RED, "Afraid;" REDDour, "Fear, Dread;" RED, "apparently Fierce, Furious," &c.; where we have the sense of RIDDING or ROUTING, under the notion of Destruction, and not of Preservation. In Scotch, as in other Dialects of the Teutonic, REDE, &c. relates to the Voice-Discourse-Counsel-Judgement, &c., "To Red, To Counsel;" "To Rede, To discourse, speak at "large," &c.: "REDE, To Judge, to determine one's fate," The next word to this in Dr. Jamieson's Dictionary is RED, REDE, READ, "To explain, to unfold; especially " used with respect to an ænigmatical saying. RED my RIDDLE " is a phrase, which occurs in old S. Songs. In an English copy of Lord Thomas, we find "Come RIDDLE my RIDDLE, dear "Mother, he said." I shall not attempt to produce the various forms, under which terms containing this train of ideas, occur in old English and the Teutonic Dialects; as the Reader will from hence understand the turn of meaning annexed to them, as RECKON, RECK, RECKless, READ-leas, (Sax.) Consilii expers, &c.

Dr. Jamieson, under Reddour, observes, that Ruddiman has mistaken its sense, who explains it by "Violence, vehemency, "stubbornness;" and his reason is, that Virgil has adopted the word Metus, in the passage translated by G. Douglas. I imagine however, that Ruddiman is right in his explanation; and that G. Douglas does not mean to translate the word, but to give the general sense of the passage. Skinner in one of his Vocabularies explains "Reddour, But truly no force of thy Reddour, Vires "tuas et Vehementiam parvi æstimo;" and he refers it to the French Redeur for Roiden, Vehementia, from Roide, Violen-

tus, &c. It appears to be used with this sense in the Poems attributed to Rowley. 'Never,' says Ælla to Bertha on the day of his marriage,

" Dydd I fele joie wyth syke REDDOUR as nowe." (#. 30.)

The idea of Fear, however, naturally belongs to this race of words, denoting actions of Violence, as an effect of a cause; and Dr. Jamieson accordingly explains REEDE, REDE, by "To fear, "to apprehend;" and RAD, "Afraid;" RADDOUR, and RADness, "Fear, Timidity." In the same column, where these words are, we have "RADDOWRE, Rigour, severity. Chaucer. REDDOUR, Vio-"lence;" where, in the explanatory term Violence, we see the sense of the word, as in Rowley. The succeeding term to REED, To fear, in Dr. Jamieson, is REED, the conjunction, "Lest," which, as he says, "is most probably the imperat. of the v. REED." In English we use 'For fear' in the same manner as the conjunction Lest; as 'Remind me, For fear I should forget, i. e. "Lest I should forget." Why Dr. Jamieson should fix on the Imperative mood, to the disparagement of all other moods, as the source of a Conjunction, it is not easy to conceive. Such terms are formed from impressions of the general sense, conveyed by the word, without any predilection in the mind of the inventor for a particular mood, to which it should be referred.

In Scotch, Reds is "the name of some Being apparently of "the Fairy kind," says Dr. Jamieson; where I must leave the Scotch Mythologists to decide, from the qualities of the being, to which of the various turns of meaning annexed to our Element, as Red, &c. the name should be referred, whether the Reds should be regarded as the Sprightly—the Wise—the Preserving or the Destroying Being. Dr. Jamieson refers the word to the Islandic Rad, "a general name given to the Genii, supposed to preside "over certain places, as Skogs-Rad, the Genius of the wood; "Bergs-Rad, of the mountain, from Rada, Imperare." The

RADA, Imperare, might bear the same idea as Rep, To overpower, master, &c.; yet there is a class of words signifying To Rule; as REX, REGis, &c., which are attached to another notion, as I have already shewn. In Scotch, another name for a Spirit is WRACHIS, WRAITH, &c., which Dr. Jamieson explains by "Properly, an ap-" parition in the exact likeness of a person, supposed by the vulgar to " be seen before or soon after death." If this word simply means Form, it must belong to Rethos, (Pelos,) Rhode, &c., before explained, or it may be referred to REDE, RAD, &c. &c. and its The term is sometimes used, "but improperly, to de-"note a spirit supposed to preside over the Waters;" and hence the designation Water-WRAIGHT, says Dr. Jamieson. It is not easy to conceive, how a term familiarly used for any thing can be said to be used improperly. In the Poems attributed to Rowley we have "Waterre-Wytches, crownede wythe Reytes;" where Chatterton explains REYTES by "Water-flags," and Dr. Milles by "Wreaths of aquatic plants." It is true, that Reeds would not be an improper covering for the head of these Water Spirits; yet I suspect, that there is some mistake, and that Withe=Reytes has been a corruption for WRAITHS. The names of Spirits are commonly taken from their Destructive qualities, and such probably is the origin of WRACHIS, WRAIGHT, &c. In the same opening of Dr. Jamieson's Dictionary we have terms belonging to the same race of words, denoting Violence—Destruction— ROUTING, &c. &c., as WRACK, WRAK, &c., or REKE, "whatever "is thrown out of the sea, as broken pieces of wood, sea-weed," &c., which belongs to our word WRECK, signifying to RAKE-ROUT up or about, so as to Break to pieces.—"WRAIK, WRAK, "Revenge, Vengeance. - Anger, Wrath, - Destruction," which belongs to our word WREEK Vengeance; - WRATH, &c. &c. The consideration of these terms will perhaps decide the Scotch Etymologist on the peculiar idea annexed to WRAITH, which RuddiRuddiman has understood, when he refers it to the A.S. Wræth-an, Infestare.

There is another word in the same opening of Dr. Jamieson's Dictionary, WRAITH, which some conceive to mean Waste; but our Lexicographer imagines, that it may signify "Provision, "Food." This sense is certainly annexed to the race of words now before us, though the notion appears very remote from the train of ideas, which I am now unfolding. Nothing however is more easy and natural. In German, Vor-RATH means "A Store, "stock, Provision," &c., which belongs to RATH, Counsel, Thought, &c., and means Fore-Counselled or Thought of, just as Provision means Fore-Seen. The term GeRATH likewise means "Goods, stuff, tackling, moveables;" and Ge-RATHen, "To suc-"ceed, prosper, strive." We see here how we are again brought to the more general idea belonging to this race of words, signifying to Prepare, &c. In Scotch we have terms under the same form, bearing a similar meaning. Dr. Jamieson justly explains Graith by "Furniture, apparatus of whatever kind or work, for "travelling," &c.; and in another sense, as he observes, "it is "used apparently as equivalent to substance, riches." Thus, then, "The corn and WRAITH of labouring men," in the quotation produced by our author, may mean "the Corn and all their " Apparatus, &c. of property belonging to them." Dr. Jamieson has justly referred Graith to the German Ge-RATH, &c., yet I am not quite certain, that he understands the connexion of that word with the two preceding terms in his Dictionary, GRAITH, " READY, Prompt—Straight, Direct, &c., and GRAITH, To Make "READY, to Prepare, to Dress, to put on military accourrements;" yet he justly refers these terms to Ge-RAEDian, (Sax.) REDa, (Su. G.) Expedire; ge-RAD, (Sax.) Paratus, &c. &c. The Scotch GRAITH, in the sense of Direct, straight, agrees precisely with the sense of the German Ge-RAD, "Right, even, Di-Rect;" and

let us mark, how Rad agrees with the explanatory terms Right, di-Rect. We unequivocally see from hence, that the radical form in g-Raith is Raith, and that the G has been derived from the particle Ge: if this had not been so, we should have imagined that Graith belongs to Geer, and that the Radical form was GR. In the Poems attributed to Rowley, Gratch is used for Dress or Apparel; and it seems particularly applied to military Accountements, as in the explanation of Dr. Jamieson, "Yn Warriour's Gratch and gear," (Metamorph. v. 68, and again v. 80.) I have before observed, that Rig, 'To Rig out,' is to be referred to this race of words. Skinner has seen, that Rig has some relation to Rihtan and Riht, Rectus, and Right; and Dr. Jamieson, under a term of similar meaning in Scotch, 'To Reik out or forth,' has observed, that it belongs to the German Richten, Ordinare.

The race of words, which I have unfolded, REDE, RATH, &c. &c., signifying Counsel—Judgement, &c. &c., will direct us to the origin of the Greek RADA-Manth-us, which I conceive to be a Teutonic combination, and to signify the REDE=Man, the man, who Redes, Rids—Sifts out Judicial matters, or any one engaged in an employment relating to such affairs, as Advocate, Yudge, Officer of a Court, &c. &c. In the various Dialects of the Teutonic, Rede, RATH, &c. relates peculiarly to Judicial transactions, as in German, RATH, RICHTER, &c. &c.—" Der RATH einer Stadt, "The Senator of a Town-Einer Hof RATH, An Aulic Coun-" sellor-RATHS=Herr, A Senator, &c. &c. Richter in German is a Judge; and the verb RICHTen, as we have seen, means "To fit, adjust, adapt, or accommodate yourself to, dress, frame, " di-Rect," &c., as my Lexicographer explains it; and I have shewn, that such words as RICHTen, To di-RECT, RIGHT, &c. &c. cannot be separated from Rid, 'To clear out-off-away, so 'as to make any surface or thing RIGHT-Straight-Proper-Fit-· Pre· Prepared for any purpose,' &c. — Dr. Jamieson has produced the judicial sense of these words in Rede, "To Judge, to deter-" mine one's fate," which he has justly referred to the Saxon Raedan, Decernere, Statuere; Raede, Lex, Decretum, &c. &c. &c. But in the Teutonic Dialects the very combination exists, which I suppose in RADA-MAN-th-us; as in the Scotch RADD=MAN, "A Counsellor, a term formerly used in the Orkney Islands," says Dr. Jamieson. The RADD=MAN is in fact the same combination as REDS-MAN, "One who clears away Rubbish," used metaphorically. Dr. Jamieson has likewise two articles, RAGMAN, RAGMENT, and RAGMAN'S Row or Roll, where we have terms relating to Judicial Proceedings, which signify, as I imagine, matters belonging to the RADD=MAN. Dr. Jamieson explains RAGMAN by "A long piece of writing, sometimes used to denote "a Legal instrument, bond, or agreement.—An account, especially " one given in order to a Judicial determination;" but in another sense we are brought to the Person, when our author observes, " It would appear, that the term RAGEMAN anciently signified " some office allied to that of a Herald, or rather of a Recorder."

I shall not attempt to produce the various derivations, which Dr. Jamieson has given of the words in these two articles, between which he sees no connexion. Dr. Jamieson is aware, that RAGEMAN is a term used in our English Law, which, as he tells us, according to Spelman, is "A statute concerning Justices, ap-" pointed by Edward I. and his council, to make a circuit through "England, and to hear and determine all complaints of injuries," &c. This Statute of RAGEMAN is, we see, the Statute relating to the appointment of Justices, or Judges.

There is another turn of meaning annexed to the word RAGMAN, where we are brought, I fear, too apparently to the idle and unmeaning Language of the Declamatory Pleader. It denotes, as Dr. Jamieson tells us, "A discourse resembling a "rhapsody,"

"rhapsody, a loose declamation, a collection full of variety." From the violent railing language sometimes used by the Pleader in matters of accusation, RAGEMAN has been applied by Pierce Plowman to the Devil; where we unequivocally see the Person. Dr. Jamieson has produced this application of the word, which he has referred to various terms attached to our Element, signifying to Accuse, as Wregan, (Sax.) Rugen, (Germ.) &c. &c., because the Devil is called "the accuser of the brethren." These terms, with the parallel English word Arraign, belong to the general sense of the Element, and signify to Rout-Disturb-Plague, &c. The German Rugen is explained by my Lexicographer, "To Denounce, divulge, make or render known, Er wollte " sie nicht Rugen, he would not make her a public example (or put "her to shame.) Eine vergessene sache wieder Rugen, To Stir "the Mire, to RAISE the remembrance of a thing forgotten;" where we are at once brought to the idea of Routing up any thing; and our author, we see, has brought us to the original action in the phrase "Stir the Mire." Let us mark the explanatory word RAISE, which means nothing but to Rout or Stir up. From this sense of Swelling—Declamatory language, annexed to the RAGE=MAN, RADDMAN, &c. might perhaps have been taken the name in Romance, Rodomonte, from which our word Rodomontade is more immediately derived. I produce however in another place a different origin for this word. The combination, which I have supposed, appears in various Languages, both in a bad and With the RAGEMAN, as applied to the Devil, we have a corresponding term in German RAZMAN, which is adopted by Schiller, as a name for one of the Banditti in his Robbers. The word in its bad sense may perhaps recur to its more original sense of the REDSMAN, the Scavenger. Our English name RAYMUND is, I imagine, this combination in a good sense; and our name RICHMOND is either a compound of the same kind, or

matter *.

^{*} As there are some curious combinations, altogether unknown, of the Element LC, LG, &c., denoting the Judicial Personage; I cannot forbear introducing, under the form of a Note, a few observations on this point. The preceding term in Dr. Jamieson's Dictionary to Lag-Raet-Man is Lag-Man, the simpler form, which means the Law-Man, or Lawyer-Man. Dr. Jamieson explains it by "The President in the supreme court formerly held in the Orkney Islands." From the Lag=Man, the Judge, or Law-Man, who decides the Fate of a criminal, we pass directly to the office of the Executioner, another

has

another Judicial character, or Low-Man, who inflicts it; and hence we have Lock-Man, Lok= Man, &c. a Scotch term for "The Public Executioner." Dr. Jamieson derives Lok=Man from the German Locken, To Lock up, or Imprison; but as if he were inclined, without knowing it, to the origin which I have supposed, he refers us to the term Dempster, a Judge; and under this article we learn, that the office of Executioner and Judge were sometimes united in the same person. We here find the form of a petition, in which a person having been appointed "Executioner and Lock=Man," prays to be appointed Dempster, or, as it might have been, from the meaning of the terms, Lag= Man. To this combination of the LAG=MEN, as denoting persons dispensing and enforcing the Laws of a Country, we have the Tuscan term of Dignity, Lucu=Mones. Servius observes on this word, "Tuscia duodecim Lucumones habuit, id est, Reges," and Bochart adds to this observation, "Alii Prafectos et Auragras, et Hysporas, explicant, id est, "Punice Suffeter." (Geograph. Sac. p. 584.) In Dr. Jamieson, the LAG=MAN is called the "President," or Prefectus. The Suffetes, with whom Bochart compares the Lucu-MONES, are described by him as Judices, and compared to the Hebrew Judges, who governed Israel, under the same name, Sophetim.

We all know, that the name for Princely Power is perpetually connected with that of the Judge, or the Dispensers of Laws and of Justice; and hence we have such terms as Dunarados, Outnowned.

Δικασπολοι, οιτι θιμιστας Προς Διος ειφασται. (Il. A. 7. 238, &C.)

The remark, which the Commentators on Homer produce from Dionysius of Halicarnassus on the above passage, is peculiarly adapted to illustrate this train of ideas, who tells us, that Greece was anciently governed by Kings; not ruling as in barbarous nations, with despotic power, but according to the Laws and Customs of the Country; and that he was considered as the best King, who administered Justice best, or who was the most impartial, and most conversant with the Laws; and that from hence, Homer has applied to Kings, a term, which denotes 'Persons who are conversant in matters of Junior-' Justices-Judges'-or, if I may so express it, Lawyers or LAG=MEN. Kar' acxas un yac απασα πολις Ελλας εδασιλιυετο" πλην ουχ, ασπες τα βαέδαςα εθνη, δισποτικας αλλα κατα νομούς το κάι ιθισμους πατειους. Και κρατιστος την βασιλευς, ο δικαιοτατος και νομιμωτατος διλοι δι και Ομπρος Δικαστολούς το, καλών τους ΒΑΣΙΛΕΙΣ, και ΘΕΜΙΣΠΟΛΟΥΣ. I ought not to omit, that RHADA=Manthus, the RADD=Man, or Judge, is likewise a King, who was so celebrated for his impartial administration of Justice, that he was made Judge of the Dead. We shall not wonder, that RADD=Man, the Judge, has been derived from the term RID—relating, as I conceive, originally to the Clearing away of Dirt; when we observe, that these very terms Δικασωολος and Θιμισπολος, (Δικασπολος, Judex, qui jus tractat;---Rex, Osmorolos, Qui circa leges et reddenda jura versatur, Judex, ex Aixa, Jus et Θυμίς, Lex, et Πολίω, Verto, Verso, Versor, Aro,) are derived from a word, which is acknowledged to signify the Turning up of the Ground by Ploughing.

Festus gives us another sense of the word LUCUMONES, which he defines to be "Quidam homines ab insaniam dicti, quod loca ad quæ venissent, infesta redderent." I shall not attempt to give the various opinions on this word; yet I shall venture to propose one idea, which will perhaps decide on the question. The Reader

1028 'R. R.'.-C, D, G, J, K, Q, S, T, X, Z.

has seen, that Ragman, which I imagine to signify the Counsellor, &c., means in one sense "A discourse, resembling a Rhapsody, a loose Declamation," &c. Now I imagine, that Lucumones in its sense of Wildness, Madness, &c., means the Wild Rhapsodist or Declaimer. If the Reader should be already inclined to this idea, his conviction perhaps will be secured, when he learns, that the term, according to the explanation of Scaliger, is actually connected with Acuteness in Speaking or uttering a Rhapsody of verses. The passage of Ausonius, in which the term occurs, contains difficulties, which I shall not attempt to adjust; yet we still directly see the combination of the Lucumonis acumen; and I shall read it as Scaliger does, for the sake of his interpretation.

"Scillite decies si cor purgaris aceto
"Anticipesque tuum Samii Lucumonis acimen."

Scaliger explains the spirit of the passage thus; "Non poteris corum enigmatum " nodos solvere, etiamsi cor purges scillite aceto, quod antidoti vice sepe anticipere oles; neque etiansi, si te eo præmuniveris, quod est tibi acumen ad versus facien-"dos, qui es Lucumo et insanus." This explanation is extremely curious; and we shall not wonder, that the name of the Lawyer should be connected with the Rhapsodist of Verses, when we remember, that the Laws were sometimes written in Verse; and hence it is, as many have supposed, that Nopos, Lex, Cantilena, &c. means at once a Law and a Song. I must observe, before I take my leave of this word, that the original name of Tarquinius Priscus, a Tuscan, who may be considered as laying the foundation of Roman Polity, was Lucu=Mon, which denoted, as I imagine, the LAG=MAN, either as peculiar to his own office, or as a common name in his To the same combination we must refer our surnames Luck=MAN. LOCK MAN, with their parallel terms in the Teutonic Dialects. The Fables of Vecches Sarma, published by Mr. Wilkins under the name of Hestopades, have been called likewise the Fables of Pilpay or Bidpay, and Lock-Man. Though I have not the means of tracing out the history of these names, yet I shall venture to conjecture, that LOCK=MAN denotes the LAG=MAN, the Counsellor, &c., and that this appellation was obtained from some Teutonic Dialect, through which the work passed in the process of its numerous translations into various Languages. Whether Serma in the name Veeshou Sarma means a Judge or Counsellor, I know not; yet I cannot but observe, that m Sanscrit Dherms is the Goddess of Justice. The term Derms belongs to the Greek Themis, (Ounce) the English Deem, To Judge, think, -the Scotch Dem-ster, and a great race of parallel words in various Languages.

RC, RD, &c.

Terms relating to the idea of Scratches — Marks — Lines — Traces—Tracks—Courses, &c. connected with the action of Raking up or over the surface of the Ground, so as to form Rasures, Ruts, &c.

RADO, RASI, RASER, RASE, e-RASE, RASIREN, RAYEREN, &c. &c. &c. (Lat. Fr. Eng. Germ. Belg.)

Rut. (Eng.)

Reige. (Germ.) A line, Furrow, &c.

RADius, RAY, &c. &c. (Latin, Fr. &c.)

Rayon. (Fr.) A Furrow in a field, a Ray.

Radio, &c. (Latin,) To shine or be

Radiant. (Eng.) &c. &c.

Reksh. (Pers.) A Ray.

ROSHEN, ROXANA. (Pers. Gr. &c.) The Radiant Beauty.

Rop—Rudis—Rood, &c. (Eng. Lat. and Eng.) The Line—or Long Stick;—A certain Length or measure of Land.

ROAD—ROUTE, &c. (English, Fr. &c.)

RIDE, &c. (Eng. &c.) To pass on the Road.

RACE. (Eng.) A Course.

RACK. (Old Eng.) The Course of the Clouds in motion.

RCH. (Heb.) Air in Motion.

RKB. (Heb.) To Ride.

RKM. (Ar.) To Ride.

RESUM. (Ar.) Travelling, — Leaving Traces on the Ground.

RZM. (Heb.) Ploughing.

&c. &c. &c.

I such L consider in this article those terms, which relate more especially to the sense of Scratches — Marks — Lines — Traces—

Tracks, &c., connected with the notion of Raking up or over—

Saratching up or over the surface of the Ground, so as to form

Rasures, Ruts, &c. &c., without the idea of Violence and Commotion,

motion, annexed to that action. The terms, which express Violence and Commotion have been fully explained in the former parts of my Work; and when therefore, it is necessary for me to examine words, in which the idea of Violence is connected with the simple action, I shall enlarge only on that portion of the sense, which relates to the subject of the present arti-The difficulty of arrangement still occurs to us; and I shall be obliged to produce many words, which I have before exhibited. The first term which presents itself is the explanatory word above adopted, RASURE, belonging, as we know, to RADO RASI, and to a great race of words, to be found in various Languages, which I have before frequently produced, RASE, ERASE, RAZOR, &c. (Engl.) Raser, Rasoir, Rayer, (Fr.) Rasare, (Ital.) Rasiren, Rayeren, (Germ.) &c. &c. Though in some senses of these words we see the idea of the most violent action, To Raze out, &c., as in Root up, &c., Rout, &c.; yet in others we see simply the notion of Scratch-Mark-Line or RASURE. R. Ainsworth, as we have seen, explains RADO by "To Shave.—To Scrape, Scratch up. — To Rub against; To "Grate." In Radius we see the idea of the Stratch-Line-Streak; and unequivocal as the relation of RADius and RADO appears, yet some have not acknowledged this relation, and even those, who have suggested it, do not seem to understand the nature of the general affinity between these words. derive Radius from Rabdos, (Paccos, Virga); and others, who refer it to RADO, consider only its particular sense of "A strike or " stricklace, which they use in measuring corn," as being the instrument, "quo mensuræ Raduntur." The original sense of Rapius is that of "a Scratch-Streak-Stroke, or Line;" and hence it means "A Beam of the Sun-A RAY-the Rapius of a Circle-"the Spoke of a wheel—a Rod or Staff," an object of a Line-like kind, if I may so say. Let us mark the terms Strike and Strick-

lace,

the

lace, which belong to Streak and Stroke for the same reason. I shall shew, that Streak, Stroke, Strike, &c. belong to the Element STRK, SRK, TRK, &c., as denoting Tracks, Traces, Trickings, Scratches upon the Dirt. In German, Reige signifies "Linea, "Sulcus linearum," &c., as Wachter explains it; where in Sulcus we have the original idea.

We perceive, that in some of the parallel words to Radius, the second consonant of the Radical is lost, as in Ray, Rayon, (Fr.) Rayo, (Span.) though the record of it is preserved in the Υ ; in others it is retained, as in the French Rais, the Italian Raggio, &c. From the Ray or Rapius of Light, comes, as we know, RADio, To be RADiant; and thus we see, how a term for an idea so remote, as it should seem, from Scratches upon the Ground, is derived from that source. A Raie of Gold, "Bracteola "metalli fulgentis ac subità luce hominum oculos Irradiantis," belongs to Radius, Rayon, &c., as the Etymologists agree. The original idea annexed to Rapius is accurately expressed by the French RAIE, which I shall interpret in the words of my Lexicographer M. Deletanville; though I shall begin with what he has placed as his last sense, and shall thus proceed in the contrary order, "A Furrow. A Streak. A Stripe. A Dash upon writing. "A Line." His first sense of this word is a Thorn-back, which is so called from the Rough - Furrows upon its back. Under the form RAIE in English we have the name of a plant called Cockleweed, which in German is RADen. This term RADen is adjacent in my German Vocabulary to RADiren, "To RAZE, ERASE, Scrape or Scratch out." These words, we see, unequivocally belong to each other; and probably the Rapen is the noxious weed, which ought to be RAZED or Torn up. Lye refers these terms for the Weed to Rader, Citatus, or Pades, Facilis, "nihil "enim facilius, festinantiusque succrescit." Lye records likewise the Belgic Harick, Hederick, which belongs to the form of

the Element 'RK with the breathing before the 'R. We now see from what source the name *Hederic*, known to our Schoolboys, as the writer of a Greek Vocabulary, is derived. The French Rayon, belonging to Rarius, "A Ray or Beam," is brought to its original sense when it denotes "A Furrow in "a ploughed field," as my Lexicographer explains it.

In Shakspeare, RAZED or RACED means RADIATED or Streaked. "Would not this, Sir, and a forest of feathers, (if the rest of my "fortunes turn Turk with me,) with two provincial roses on my "RAZED shoes, get me a fellowship in a cry of players, Sir?" (Hamlet.) A RAZE or RACE of Ginger, seems to have meant originally a Root, as the Commentators on Shakspeare understand. (First Part of Henry IV. A. II. S. 1.) The relation of RADix to RADO, brings us to the Spot, from which they are both derived, as I have before observed. In the Dialect of the North, RAITCH is "A snip of white in a horse's face," as Mr. Grose explains it; and RATCHED means Spotted. These terms signify Streaks—Lines. The preceding term to Ratched, in Mr. Grose's Glossary, is RATCH, "To Tear in pieces;" and in the same page I find RAUK, "To Scratch. A RAUK with a pin; a Scratch or "RAKE with a pen,"-" RAKE, A RUT, Crack, or Crevice;" and "To RAKE a Fire;" "RATTEN, A RAT," which means the Scratcher. I find likewise RASH, Corn, which Mr. Grose explains by "Corn so dry in the straw, that it falls out with handling." RASH belongs to RATCH, "To tear to pieces;" To separate into parts and pieces; and RASH Corn means Corn, which is Broken to pieces, or Separated from the stalk, in Handling—Crumbly Corn, as we might express it, or Corn easily Crumbled to pieces; where the term Crumble relates to Dirt in its Broken state.

In Persian, Rekhsh نخش signifies "Lighting. A Ray or "reflection of Light—A Face marked with moles." In the succeeding column of Mr. Richardson's Dictionary we have Rekhne

Ţ

A fracture, a notch (in a sword, knife, &c.) ; رخنه دار Rekhné Dar, "Broken, notched, cracked, dissolved, pierced;" where we have the n, an organical addition to the K; as in Regnuo, (Pyyruw, Frango.) Mr. Richardson in his English Dictionary, under "Score, (Line drawn,)" gives us, as the corresponding Persian word, REKHNE. Thus we see, how RADius and REGNUO, (Pyyvuw, Frango,) belong to the same train of ideas. The succeeding words to رخش Rekhsh, are رخشا REKHSHAN, رخش REKHSHAN, Shining; Flashing; and the preceding terms are رخساره Rukhsaré, "The air, mien, cheek, face;" семы Rukhsar, "The Cheek, especially large and round.—The Face." We here plainly see, that the name for the Face or Cheek has been derived from the idea of what is Rapiant or Brilliant. the same column of Mr. Richardson's Dictionary we have REKH, "A Groan.—A Disease, distress.—The sound of "a musical instrument.—Rukh, A Cheek;" اف از رخ Afraz, Rukh, "The protuberant part of the Cheek. Rukh, The Rook or "Tower at chess.—A Hero." Here we have the Cheek, as belonging to the idea conveyed by Rapiant, Radius, and the Noise and Annoyance, as belonging to that conveyed by RADO, which relates to the action of Scratching or Grating upon a Surface. In the sense of the Rook or Tower, and the Tall Hero, we have the RAISED-up, RIDGE-like object. The Persian Scholars will now understand, that the name for Day, روز Ruz, and روشن Rushen, "Light, splendid, luminous, bright," &с.; Rushena, "Light, splendor," belong to REKHSHAN, RADiant, &c.; REKHSH, the RAY. Mr. Richardson has justly observed, that ROSHEN or ROSHENA, was "the name of one of the queens of " Alexander the Great, called by the Greeks, ROXANA." Thus we see, what I imagine we little supposed, that Roxana belongs to Radius, under the idea of the RADIANT Beauty. Persian. روى Ruy, which is quasi Ruj, means at once "A jour"ney, a progress;" and "The Face, air, mien," &c.; where we see the two senses of the Road, &c. marked out, Radendo terram, and the Radiant object. In the following curious passage some of the words, which I have above produced, are assembled, and are introduced, as if they were attached to each other, according to my hypothesis. I must be seech the Reader to believe, that my quotation is in existence, and is faithful.

بياض روي تو روشنتر از رخ روز

Byaz Ruy tu Rushter az Rekh Ruz, "The Brightness of thy "face is more splendid than the cheek of Day." (Jones' Persian Gram. p. 27.) Here Ruy, Rushnter, Rekh and Ruz denote the Face—More Splendid—Cheek and Day.

ROAD directly brings us to the Spot, supposed in my hypothesis; and it denotes the Track-Line-Course, Path, &c., which is made by the action of RAKING up—ROUTING up or Scratching up any surface; as the Ground, &c. I think, that we may perceive in the word ROAD this peculiar idea. In Rout, Iter, via, we have this sense more strongly exhibited. Hence "La Route "d'un Vaisseau" is the Track or Course of a Ship. Rout is the intermediate term, by which ROAD and RUT are connected. ROAD and RUT differ in nothing from each other but in this point, that ROAD relates rather to the Path or Track formed by the Routing up of the Ground by the Feet in travelling. Skinner derives Rode, Via equestris, from Ride. To Ride, as we perceive, is to pass or Travel on the ROAD. The Etymologists produce the parallel terms to RIDE; as Ridan, Rad, (Sax.) Ryda, (Isl.) Ride, (Dan.) Reiten, Reisen, (Germ.) Rüden, Ritter, Reuter, (Belg.) &c. &c. The Etymologists justly remind us of the Latin RHEDA, which belongs to this race of words. Junius has two articles for Rode, in one of which we find, "Rode into the " Enemies' Countrie. Incursio in agrum hostilem;" which he refers to Roder, (Fr.) Roden, Rotteyen, (Belgic,) Concursare; the Greek

Greek Rothein, Polew, which Hesychius explains by Ophan, Treyew, and the Welsh Rhodio, Ambulare. The phrase Rode into the enemies' countrie, Incursio, is the making of an In-Road, as we express it; where we see the idea of Violence, annexed to this race of words. In another article he has 'Rode for ships,' which Skinner likewise places separately, and which they refer to the Belgic Reede, Ree, the French Rade, and the Danish Rei, &c. In Persian, of or o, Rauh, Ruh, means "A Way, a Road, " a path;" راه اب RAUH Ab is "An aqueduct, a canal, conduit;" where we are brought to the idea of the Rut or Hollow. these words the second consonant of the Radical is lost. Dialects of the Celtic I find in Lhuyd, among the terms for Via, the Armoric Rut, the Irish Rod, Ruis. In Mr. Shaw's Galic and Irish Dictionary I find RAD or ROD, "A Way, ROAD;" and Ruis, "A Way, ROAD." The succeeding word to Rod is Roc, "A "Plain, a field;" and in the same column I find Rodadh, "Lancing, Scarifying," which brings us to the idea of Cutting Furrows, Ruts, &c. Mr. Shaw explains RAITH by "He went." In Welsh, RHEIDR is a Knight, corresponding with Ritter, (Germ.) and Rider, says Mr. Richards. Rhodio is to Walk, which the Lexicographers in that Language have compared with the Hebrew Radaph, To follow, to pursue. This Hebrew word means, as Mr. Parkhurst explains it, in one sense, to "Follow, pursue, Chase; "as an enemy does;" which belongs to the terms of annoyance.

The succeeding word to RADE, in the French Dictionaries, is RADEAU, "A Raft, a float made of Timber," which the Etymologists have justly referred to the Latin RATIS; and we shall now understand, that both these words signify the object, which makes ROUTES, RUTS, Tracks or Furrows upon the Water. The idea of Sailing is perpetually, we know, connected with that of making Furrows on the Ground, as To Plough the ocean, Arare Equor—Sulcare Mare, &c. Some of the Latin Etymologists have conjectured,

jectured, that RATIS has been so called; "quod RADAT Aquam," which has the same meaning. The succeeding terms in the Dictionary of Menage to. Radeau are Radier, Radiwagon, Radoter. In old French the expression "Un beau Radier de feu" occurs, which Le Duchat explains by "Un feu clair;" and he derives Radier from Radius. Radiwagon in old French signifies a sort of Carriage, which they have referred to Wagen, (Germ.) corresponding with our word Waggon, and RAD, (Germ.) Une Roue. The RAD in this, word—the Latin RHEDA, the Greek REDE, (Pedy,) &c. the German RAD, a Wheel; the Latin ROTA, the French Roue; where the second letter of the Radical is lost, all denote the object, quod RADIT Terram, &c. RADoter, "To talk madly "or idly," may belong to the race of words attached to our Element, denoting Agitation-Commotion-Confusion, To Rout about, &c.; but whatever be its origin, it is certainly not derived from Herodote or Herodotus, as some imagine. It may however belong to the English Dote, as others suppose. What is now expressed by Rudoteur was formerly written Redoubté; from whence we might conjecture, that it belongs to the word succeeding Radoter in the Dictionary of Menage, Radouber, which - signifies 'To Repair a Ship.' Redouber is used for Etouper; and to that word it is supposed to belong. If this be the case, the Redoubté will the Etoupé, the old man, whose faculties are Stuffed up-Clogged, &c. With this idea the passages quoted by Le Duchat perfectly accord, "Veillars Repoublez et Pesans," and "REDOUTÉ et Hébété en vieillesse." While I am examining These French words RADE, &c. I cast my eyes on the terms belonging to Radius, Ray, RADO, &c. &c., as RADieux, RADiant. Raire, To Shave; as likewise on Rais, the Spoke of a Wheel: RAIZ or REZ, RAIZ Pied, Terre, "Even or Level with the "Ground;" where we are directly brought to the Spot supposed in my hypothesis.

RACE, Cursus, again brings us at once to the spot, supposed in my hypothesis; and we unequivocally see the idea of the Course— ROUTE—ROAD, &c. The Etymologists derive it from Rannen, Rennen, (Belg.) "q. d. Rance, Rence, eliso propter Euphoniam n." Run, Rennen, &c. belong to our Element RK, RnK, where the n was originally only an organical addition to the K. RACE, Genus, Stirps, with its parallel terms, Race, (Fr.) Razza, (Ital.) Raza, the Etymologists have considered as directly belonging to Radix, which appears on the first view to be an indubitable conjecture; yet I must observe, that these words seem rather to be connected with the metaphorical application of the sense conveyed by RADO, than of that conveyed by Radix. They seem to have the same metaphor as Line, 'Sprung from the same Line,-The Line of ' Descendants,' as denoting a 'Continued-Regular Course of De-'scendants, succeeding each other.' Thus, then, RACE, signifying Motion and a Family, will exhibit the same idea of a Course. In Spanish, RAZA means "Race, generation, branch of a family.— " Quality of Cloth and other things. — Ray, a beam of light;" where we perceive, that the same word denotes at once a RACE or Family, and a RAY, RADius, or Line,

From the idea of a Certain Race or Family, we have the sense of Kind, Sort; hence we have Race, Racy, as applied to the Soil, to Wines, &c. when they retain the original flavour peculiar to their Sort or Kind, &c. Junius has adopted a similar metaphor respecting the origin of Race, which I have exhibited. After giving the ordinary derivation from Radix he adds, "Nisi forte malis esse ex A. S. Racan, Porrigere, Extendere, quod, familiæ propago se in longam Lineam extendat unde quoque Progenies Gallis Lignée, et Lignage. H. Legnaggio dicitur." He adds, moreover, that to this idea perhaps belongs the term Haracium, which Spelman explains by "Vivarium Equinum, i." equorum equarumque greges generandi causâ septis inclusi "q.d.

1038 ^R. B. ^.—C, D, G, J, K, Q, S, T, X, Z.

"q. d. A Race of Horses. G. Haras. H. Razza." The French Haras, and the Italian Haracium must be referred, I imagine, to Herd, &c. I ought perhaps to suggest, that possibly the original idea annexed to Radix might be that of the Radius, the Line, or Lengthened-out Rod or Stem of the Plant; and yet we see, that Radix may be considered as the substantive of the term of Violence, aRadere, To eradicate, To Root or Rout up. When kindred ideas are so involved with each other, it is in vain to attempt their separation. From Radix is directly taken the English word Radish, with its parallel words Radic, (Sax.) Retig, (Germ.) Radiiss, (Dan.) Radiis, (Belg.) the Greek Radix, (Padis,) which, according to Varro, says Skinner, signified the same as Rhaphanus. The Greek Radix, as denoting the Branch, (Padis, Ramus,) I consider on another occasion.

The Element RS in Spanish, most fully exhibits the sense, which I have unfolded in RAKE, RASE, RASER, RADO, &c. we have RASAR, "To measure corn with a strickle.—To Touch "another lightly.—Rasion, The act of Shaving or taking off " Hair with a RAZOR.—Reduction of any hard body to Powder.— "RASCAR, To Scratch, to Scrape; RASCUNAR, To Scar, to " Scratch, to Scrape; RASGAR, To Tear asunder, to Rent, to Claw, to Lacerate; Rasgo, Dash, Stroke, &c.; Rasgunar, To Scratch. " to Scrape; RASPar, To Scrape, to Pare off; RASPa, Beard of "an ear of corn.—Rasp, A course file," which will shew us, that our term RASP, belonging to this Spanish word, is attached to the action of Scratching on the Ground, as I suggest in another place; and let us mark the sense of the "Beard of an Ear of corn,". which will confirm my former conjecture, that EAR and its parallels, with the Latin Arista, belongs to Ear, (Eng.). To Plough, Ano, &c.; HARROW, &c., HERSE, &c. &c., as denoting the quality of Scratching, derived from the action of Scratching up the ERA, (Esa,) EARTH. I do not mean to say, that EAR, &c. and RASPA

RASPA directly belong to each other, but to shew, that they are both attached to the same idea. They each of them belong more directly to their several forms 'R, 'RSp; though we know, that these forms ultimately belong to each other. We have likewise in Spanish RASTRAR, or ARRASTRAR, To Drag or Carry along; and RASTRA, "Sled or Sledge, a carriage without wheels, the act of Dragging "along;—A track or mark left on the Ground.—RAKE," which will shew us, that HEARSE, the Carriage, probably belongs to the HERSE, the Harrow, as I conjecture in another place; RASTRAR, To Trace, &c.; RASTRO, "Track, a mark left on the "Ground; RASTILLAR, RASTRILLAR, To Hackle or Dress Flax; "RASTRILLO, Hackle, RAKE.— RASTRALLAR, To Clack with "a Whip;" where we have the idea of Noise annexed to this race of words.

I find likewise in the same column with RASTRO the term RATINA, "Ratteen, a kind of Woollen cloth, woven like Serge.— "Musk-Mouse;" which corresponds with the French RATINE and the English Ratteen, before explained. In the next column of my Spanish Dictionary we have RAUTA, "A ROAD, way, ROUT;" RAUDO, "Rapid, Precipitate;" where we have the idea of Violence, which we have seen belonging to these terms, RAYAR. "To form Strokes, to draw lines; RAYO, Ray, beam of light; "RADius, the semi-diameter of a Circle; RAZago, Coarse Cloth, "made of Tow;" where we have the idea of Rough, RAZA. " Race, Generation, Branch of a family, Quality of Cloth and "other things; RAY, a Beam of light," before produced. In Italian, RAZZA signifies "A Race, Generation;" and RAZZare, "To Shine forth, and To Stamp, as horses; RAZZO, A Beam, " or Ray; RAZZO, A Squib; RAZZENte, Tart, Sharp; RAZZimato, "Decked, Attired; Razzuolo, A Spoke; Ruis de Roue; Razzolare. "To Scrape,-To Search into;" where, however different the senses of these words may appear, we have still the fundamental idea

idea of Scratching upon or Stirring up a surface. In the Squib we have the notion of Excitement; and in the explanatory word Attire, which belongs to Tirer, To Draw Lines, we see, how the sense of Decked is derived. If the interpretation had been Tricked up, we should have had precisely the same metaphor. To Trick is To Trace out—To make ornamental Lines or Delineations, as we express it. To Draw, we know, bears the same metaphor, and it is applied likewise to Ornamental Delineations, as Trick is.

To Route, the Course, belongs Routine, as I have before observed, which we have adopted in our Language to denote the ordinary Course in which things move. My Lexicographer explains Routine by Rote; from whence we might suppose, that ROTE has the same origin as Routine, and that it means the ROUTE, usually marked out. Thus, 'To Get a thing by ROTE, as. a Parrot, would mean To get a thing by a sort of ROUTINE, or 'To get a thing by the Constant Habit of Going over it again 'and again, as a person Goes over the same established Route or 'ROAD.' Skinner expresses Rote by Wrote, as if from Write; and he imagines, that 'To Get a thing, or Speak by ROTE,' means " Præter vel citra Scriptum recitare." I have shewn, that WRITE belongs to the form of our Element 'RT, under the idea of Stirring up or Scratching the EARTH into Tracks-Traces-Lines, &c., for the same reason that Exaro, To Plough up the Ground, signifies 'To WRITE.' I have shewn, that RATIO, RATIONIS, (Lat.) REASON, (Eng.) RAISON, RATION, &c. (Fr.) RATE, (Eng.) &c. &c. have the same fundamental idea as ROUTE, ROUTINE, &c.—The certain Way—Track or ROAD. R. Ainsworth explains RATio in one of its senses by Way. The French Roture, "An "estate, which is not noble.—The Commoners in any country." ROTurier, &c. belongs to Rout, for a similar reason, that Racaille, Rabble, trash, &c. belongs to Racler, To RAKE, &c. &c. French

French Etymologists bring us to a similar action, when they derive the word from Ruptura, Culture de terre. The Etymologists have justly reminded us of Rout, a Confused Company, or Heap of people, and its parallel terms, which I have referred to the verb Rout up, To Rout up the dirt in a confused state; as Turba, the crowd, belongs to Turbo, To Disturb.

Rod belongs to Radius, under the idea of the Line or Length. Skinner places Rod or RAD, "Mensura 16 pedum cum dimidio," and Rod in separate articles. The former Rod or RAD he refers to the Belgic Roede, Roedstock, which he derives from the Latin Radius, or the English Rod, Virga; as from Virga has been formed the barbarous word in Latin Virgata, which means a Measure of Land. Rop, Virga, he refers to the Belgic Roede, Roeye, Roedstock, the German Ruthe, which he thinks may be derived from the Latin Rudis. Minshew refers Rod, as Skinner tells us, to the Latin Rabdos, (Paccos,) "et hoc vel παρα το ραον βαδίζειν vel "partices." We perceive, that Rod, RAD, or Rood, the Measure of Land, brings us at once to the Spot, supposed in my hypothesis; and that it means a certain Strip of Land, as we express it, a certain Length or Measure. Rudis should probably be referred to Rop, though the Etymologists have supposed with some probability, that Rudis, Virga, belongs to the adjective Rudis, as the "Virga, nativa, impolita, ut est à stirpe revulsa." In modern Greek, says Martinius, RAUDE, (Paudy,) is a Rod; and hence we might conjecture, that the b in Rabbos, (Paccos,) may have arisen from the vowel breathing U having been converted into the consonant of the same organ b; and therefore, that Rabnos, (Pachoc,) should be referred to the Race of words now before us.

In the same opening of my French Dictionary, in which the term Routure is found, I perceive likewise Rouage, Rouet, and Roue, a Wheel;—"Rotir, To Roast Meat; Ruade, A horse's kick-" ing, spurning or wincing; Rude, Rough, Rugged, Rue, A Street,

"Lane; Ruer, To throw, to fling, to kick, to spurn, to wince "or winch, as a Horse, &c.; Rugine, a Surgeon's Rasp; Rugir, "To Roar; Ruine, Ruin, &c.; Ruisseau, A kennel, A street "kennel;—A Rivulet, a brook; Ruse, Ruse, artifice, stratagem; "Rustaud, Clownish;" to which we may add "Rustre, Aclown, " &c.; Rut, Rut, Copulation; Rutoir, Standing water, in which "Flax or Hemp is steeped," which must all be referred to the same train of ideas, however different the senses of these words may appear from each other. "ROTIR, To ROAST Meat.-To "burn, to parch, to toast bread," is derived from the CorRugated Surface, or the Surface Shrivelled or Parched up into Rugze-ROUTES, (Fr.) RUTS—Furrows, &c. &c. The French Etymologists derive Rotir or Rostir from the German Rost, a Gridiron. This German word is the derivative from Rosten, To Roast, and not the original. Rosten signifies moreover in German to Rust, which is derived from the same train of ideas. The French Etymologists inform us likewise on the authority of Buxhornius, that RHOST is an ancient British word of the same meaning. which is evident from the name of the Armoric King DremRost, " Ab Ustis oculis, vel Usto vultu." Lhuyd, under Torreo, gives us the Armoric "Rosta, To Roast," and the Irish Rosdam; and under 'Tostus' we have the Cornish Rostias, and the Irish Rosta. The Latin Torridus, which signifies "Parched, burnt, scorched, "torrid," means likewise "Shrivelled." I shall shew, that the explanatory word Scorched belongs to Scratched.

The French Ruer, To Throw, to Fling, is derived from the Latin Ruo, which signifies likewise "To throw, or tumble;" or, as it might have been explained, To Rout about here and there. In Ruitum and Rutum, the form RT appears. Ruo in one sense signifies "To Rush, to run headlong," &c.; and so does Ruer, "Se Ruer sur—To fall or Rush upon;" where, in Rush, we see another of our terms. Ruer in the sense of 'To Kick,' &c.,

means 'To Rout about with the feet;' and hence we have RUADE, where the form RT appears. In Ruina, Ruin, Ruine, (Fr.) from Ruo, we have another form: Rude, (Fr. Eng.) means Rough Dirt -the Rupera, &c. Rugine, the Surgeon's RASP, belongs to the idea of Scraping. In Rugir, Rugio, we have the Rough Noise, which we find attached to this race of words. Ruisseau, A Kennel, A Rivulet, &c. means the Water Rur, if I may so express it, the Water Course, &c. Ruse, "Ruse, Artifice," &c., means nothing but the RUT—the ROAD, ROUTE, (Fr.) the Course, under the idea of the various Ways or Courses of wily conduct. Lexicographer explains Ruser by "To dodge or play shifty "tricks," which means to adopt various Ways-Courses, &c. Let us mark the English word Trick, which belongs to Trace-Track, &c. for a similar reason. Menage derives Ruse from Usus; and Le Duchat seems not averse to this idea. The latter however adds, that Ruse may perhaps come from Ruptus, as he imagines Routier to do; so that "Vieux Rusé" signifies the same as "Vieux " Routier." Here we see, that Ruse is directly brought in conjunction with the ROUTE. He explains moreover in an old French translation of Ecclesiasticus (c. i. v. 6.), "A qui est " descouverte la racine de sapience? Et qui a cognu les Ruses "d'icelle?" Here we see, that Rusz is taken in a good sense, and means the Intricate Ways or Paths of Wisdom. Le Duchat has properly explained the passage by "Les Ruses, c'est-à-dire, " les Routes, les detours. Au vers. 7. il est parlé des Voies de la "Sapience." Ruse in this sense signifies Way-Course or Route, "Via, Iter;" but it sometimes appears to mean what Rour, the verb, does, 'To scatter or disperse here and there.' In an old work quoted by Le Duchat, we have "Sans qu'il pust si tost trover "à les Ruser. Et aussi descendent-ils ailleurs sans estre "RUSEZ." Where Le Duchat observes, "La Ruser c'est proprement Rompre." Hence it is, that the Lexicographers, feeling somesomething of this sense, explain Ruser in terms, which express Agitation or unsteady motion, as "To Dodge, to play Shifty "tricks." Ruser should perhaps be explained by 'To Rout about here and there. —To take various Routs—Tracks or Courses—To adopt various Ways—Tricks—Artifices, &c. &c.

RUSTAUd, RUSTRE, belong to Rus, the Country, Ground, &c., as some Etymologists perceive; where we are at once brought to the Spot, supposed in my hypothesis. The succeding word to RUSTAUD, in Menage, is RUSTELLE, which in an ancient version of the Psalms signifies Locusta. "Je suis troublé comme "RUSTELLES." The comparison will shew us, that the name RUSTELLE is taken from the idea of Agitation. Menage derives Rustelle from Locusta. The translation in old French might have been 'Je suis Rusé, comme Rustelle.' 'Rut, Rut, Copula-"tion," I have referred in another place to the idea of Excitement-Stirring up-Routing up, or to the Noise made by that action, as in Rugir, &c. The term Rue, "The Street, Path, "Lane," means the ROAD; and this term the French Etymologists derive from Puw or Puw, or Ruga. They record likewise the old word Ru, which means Ruisseau. Wachter has discovered the true vein; and has seen, that Rue belongs to such words as REIGE, Linea, Sulcus literarum; RAIE, (Fr.) RHYGN, (ancient British,) Incisura, &c. "Inde Latino-Barbaris Ruga, Platea, "Vicus." The barbarous Latin word, and the ancient Latin word Ruga, convey the same meaning of the Rut, Furrow, &c., as denoting either simply the ROAD, Path, &c., or the ROUGH, RUGGED Path, Tract, Line, &c.

The French Rutoir, "Standing Water, in which flax or "hemp is steeped," must belong to one of the senses, attached to our Element, though I have no evidence, by which I can decide on the precise sense annexed to the word. It may either relate to the Channel of water, in which the flax is put; or it may belong

.

to the sense of Routing, Subduing, &c., as relating to the effects of Macerating a substance. We know, that Subigo expresses once the action of Stirring up the Ground, or Routing about Ground, and that of Macerating a substance, "Ante Jovem li Subigebant arva coloni; — Subigere mortario farinam." ose in his Glossary has "Rait, To Rait timber, hemp, k, to put it into a pond or ditch, to water or season it. This word Rait might be originally applied to the stening, and afterwards to that of Hardening by water. page of Mr. Grose's Vocabulary we have the North brash, "An idle, Ragged person." Brash in this o Burst, Break, &c. We have moreover Ragrowtering, at romps—Exm." Rag and Rowter have the same

meaning, and are placed together to increase the force of the signification, as expressed by such terms as Rout; Riot, &c. &c. The English 'To Ragea person' is only the metaphor of the Rag conveying the idea of what is Worn-Rent, &c. In Hebrew, הת RUH, which I consider to be quasi RucH, means "To be wet, " soaked, saturated or drenched," as Mr. Parkhurst explains it; and the term preceding in the Lexicon of this writer is by RHT, which signifies #A Gutter or Trough for the conveyance of water," which may lead us to think, that the idea of Soaking, expressed by this Hebrew word, is taken from the Channel, in which the Water is. In Hebrew, DRS likewise signifies "To moisten, "Temper with moisture," which may be derived from a similar idea; yet I must observe, that in the same column of Mr. Parkhurst's Lexicon, where this word occurs, I find r RG, "To Break, "Break in pieces, rend, destroy," which coincides with the sense which I have annexed to RAIT and RUTOIR. I must add too, that in the same column of Mr. Parkhurst's Lexicon, where mn RUH, occurs, I find הזה RZH, "To Waste, attenuate, make lean, " famish," which belongs to the terms of violence, attached to our Element,

Element, signifying 'To Break to pieces—Destroy, &c. I must again observe, that the terms, which denote Tempering—Moistening, &c. have been commonly derived from the idea of Breaking to pieces—Mashing, &c. I shall shew, that Moisten, Macero, Masso, (Marrow, Pinso,) and Mash belong to each other, and to Mud. I shall produce in the next article a Race of words denoting Water, which I derive from the action of Agitation—Commotion, as annexed to the same train of ideas, and in such cases it is impossible oftentimes to distinguish one notion from another.

We have seen, that RACE, the Course, RIDE, ROAD, and ROUTE, belong to each other. In our old writers, RACK is only another form of these words RACE, ROAD, ROUTE, as denoting the Track—Path—Course, when it is applied to the Track or Course of Clouds, which are commonly in motion, or passing along in a certain Track or Course. We perpetually find, what we should naturally expect, that terms are derived from observing the common or familiar state, in which things appear, and that such terms are still retained, when a different state presents itself. Thus RACK is sometimes applied to a Body of Clouds above us in general, whether they are in motion or at rest. In the following passage, RACK is applied to the state of the Clouds, when they are at Rest, as to a strange condition of these Moving objects, which is portentous of some extraordinary or violent operation of Nature.

"But as we often see, against some storm, ...

Mr. Malone has observed on the passage of the Tempest, "Leave not a RACK behind," that RACK "is generally used by our ancient writers for a body of Clouds sailing along, or "rather for the Course of Clouds when in motion. So in Antony "and Cleopatra:

[&]quot; A silence in the Heavens, the RACK stand still." (Hamlet, A. II. S. 2.)

[&]quot;That which is now a horse, even with a thought

[&]quot;The RACK dislimns."

Mr. Malone however does not think, that RACK is the true word in the passage of the Tempest, "as no instance has yet been pro-"duced, where it is used to signify a single fleeting cloud, in "which sense alone it can be figuratively," as he observes, "ap-"plied here." The Author of a work, intitled "A Specimen of a "Commentary on Shakspeare," has shewn (p. 197,) that RACK, as denoting Moving Clouds, is the true reading in the passage of the Tempest. He has observed, that the mind of the Poet is strongly impressed with the idea of the Pageant; and that the RACK, denoting the Clouds in Motion, was sometimes represented in these "Here the upper part of the Scene, which was all of "Clouds, and made artificially to swell and Ride like the RACK, "began to open," &c. We here see, that RACK is brought to its original idea of the Course of Clouds in motion, and connected likewise with its kindred term RIDE. Shakspeare himself has made the same combination:

- " Anon permit the basest Clouds to RIDE
- "With ugly RACK on his celestial face." (Sonnet XXXIII.)

RACKING is adopted in Shakspeare as a participle, in a similar sense to that of Riding, (as used in the last passage,) or Racing, i. e. Passing or Fleeting along.

- "Three glorious suns, each one a perfect sun,
- " Not separated with the RACKING clouds."

(Third Part of King Henry VI. A. I. S. 2.)

Here Mr. Malone justly explains "RACKING Clouds" by "The "Clouds which Fleet with a quick motion." In the passage of the Tempest, the Poet means, that the greatest or most solid objects of Nature and of Art shall vanish away, like the most unsubstantial of all unsubstantial objects—the fleeting clouds of empty air, which pass before our eyes in the empty visions

of a Pageant. The great globe and all its massy monuments shall be utterly dissolved, and shall not leave behind them the most inconsiderable portion of their original substance;—not a particle so minute, as the most empty and evanescent portion of an object—itself visionary and evanescent.

Sir Thomas Hanmer reads in the passage of the Tempest, "Leave not a Tract behind," which, as we now see, is, in fact, the sense of RACK—the Path, Course, Track or Tract of a moving. Body. The original and abstract idea, annexed to the word RAOK, as denoting a Tract—Track or Course, was still present to the mind of the Poet, though he alludes either directly or indirectly to its secondary application of a Tract or Course of Clouds, often exhibited in the Spectacle of a Pageant. Under one point of view the Poet may be considered as simply meaning, that the Globe shall dissolve and vanish away as a Pageant, without leaving behind it a Trace of its existence. Mr. Grose has justly conceived the true idea, which is annexed to this word, when he explains "The RACK of the Weather" by the "Track, in which "Clouds move. North." The same Glossarist explains RAKE, as a term in the North, for "A Rut, crack, or crevice;" and in Ray's South and East-Country Words, we have the following article; "A Cart-RAKE. Ess. A Cart-Track, in some counties called "a Cart-Rut." I produce in another place the Scotch term RAIK, RAYK, RAKE; which means, as Dr. Jamieson explains it, "The extent of a Course, walk, or journey."—"A Sheep RAIK."— "A swift pace," as in the expression applied to a Horse, that he has "A great RAIK of the Road." Again, in Scotch, RAISS, RACE, &c., mean "A strong Current in the sea;" where in the latter word we are brought to the form of our word RACE, a Course. In Scotch, the term Carry is applied to the motion of the Clouds, in a similar manner to RACK and RIDE. Dr. Jamieson informs

us, under Carry, that the Clouds "are said to have a great Carry," when they move with velocity before the wind *,"

*We find a series of words in Hebrew relating to the Air, Vapour, &c., which are attached to our Element RC, &c.; but whether they should be considered as belonging directly to Rack, it is not easy to decide. As the following discussion will chiefly relate to Hebrew terms, which may not interest the general Reader, it will be inserted in a Note. Mr. Parkhurst derives RACK-To RACK, "To Stream as Clouds before the wind," as also REEK and REEKY, from the Hebrew 17 RCh, which denotes primarily, as he tells us, "The action or breathing of the Air in motion, . As a N.—Air in motion, a breeze, "breath, wind," &c. Though the Hebrew term cannot be said to belong directly to the English RACK, yet it must be referred to a similar idea of Commotion; as the English word is derived from the idea of Motion, as in a Course-Path. Thus we see, how nearly they approach to each other in their original notion. The Hebrew word is employed in the opening of the Book of Genesis: "And the Spirit," הוח RUCh, "of God moved," חודת החפת m-RChP-4, "upon the face of the waters." Let us mark the word corresponding with Moved, the Hebrew RChP, which Mr. Parkhurst explains by "To Shake, move tremu-"lously," where the 77 RCh in both these terms has the same fundamental notion. There is however one sense annexed to the Hebrew 77 RCh, in which the idea of Commotion has disappeared, and where we are brought nearer to the sense of the words, which I am now unfolding. It signifies "Space, distance, interstice;" where we appear to have the idea of a Course-Path-Way; or, as we have before seen, a term belonging to this family of words explained, "The Extent of a Course;" from which interpretation we pass to the idea of Extent or Breadth in general. Mr. Parkhurst supposes, that this sense of Space, &c. is derived from the notion, that wherever there is Air, there is Space; and others from that of a "Spacious, Airy Place." In Hebrew, רחב RChB means "To " be dilated, made broad or wide." We see, how the explanatory term Space connects itself with the terms of motion, Spatzieren, (Germ.) &c. To Pace or Walk about here and there; and thus we again see, how the Hebrew RCh, the Space, may connect itself with the RACK-the Course, &c. In Arabic, the acknowledged parallel terms to this Hebrew word are _____ Reven, "Smelling, discovering by the smell _Rvn, Wind, ___ "Odour, smell, exhalation," and _______ RAWH, "A Pleasant refreshing wind _____Blowing, " (Day.)-Rutt, The Soul, incorporeal spirit."

Mr. Parkhurst explains the Hebrew word in one sense by "The Exhalation, REBK," or steam of water; "which would lead us to conclude, that the Hebrew term, and the English REEK, REEKY, were directly connected. If this should be the fact, the sense of REEK, the Vapour, was immediately taken from that of the Wind: yet when we remember the explanatory term Exhalation from Exhalo, which R. Ainsworth explains by "To cast or send forth a fume or vapour," we shall see, that the sense of REEK might be derived from the idea of RAKING out or up, Casting up or out. I shall shew, that the Latin Halo belongs to the English Hale—the German Holen, To Cast or Draw out any thing,—Dirt,

1056

&c., as from the Hole-Hollow, &c. The Reader perhaps will be more inclined to admit my idea respecting the relation of REEK to RAKE, when he learns, that in the same column of Lye's Saxon Dictionary, where Racu, "Pluvia, procella, unda, Humor," occids, we have likewise under a similar form RACian, To RAKE. The term REEK will be more particularly considered in a future page.

The Hebrew מרחפת M-RChP-T, 'To Move tremulously,' is applied, as we perceive, to the indescribable Motion of the Divine Spirit on the Waters in the process of Creation, Hence, possibly, the Greek Mystics have derived their illustrious personage, the eRICAPaias, (Egixamaios,) about which term so many conjectures have been formed. He is described by Orpheus, as the Air-Wandering Deity-as adorned with golden Wings, and as Whirling about the World by the flapping of his Wings:

> Πεωτογοίοι καλιω διφυή, μιγαι, ΑΙΘΕΡΟΠΑΛΙΚΤΟΝ, Ωογετη, ΧΡΥΣΕΑΙΣΙΝ ΑΓΑΛΛΟΜΕΝΟΝ ΤΙΤΕΡΥΓΕΣΣΙΝ, Taugoboar, yereor paragur brotur t'artguaur Οστι πολυμιτηστον, πολυοργίου, ΗΡΙΚΑΠΑΙΟΝ, Αργητοι, κουφιοι, εοιζητοςα, παμφαις εξιος. Οσσων ος σκοτοισσαν απημαυζωσας ομιχλην, MANTH ΔΙΝΗΕΙΣ ΠΤΕΡΥΓΏΝ ΡΙΠΑΙΣ ΚΑΤΑ ΚΟΣΜΟΝ. (Huma V.)

The Reader, who wishes to know the difficulties of the Critics on this celebrated name, must consult the Commentators on Orpheus. I shall not trouble myself with the various properties ascribed by the Mystics to this Deity, but shall be contented with having suggested an origin, from which the fable may perhaps have arisen. I cannot however but note the observation of some Critics, who imagine, that Ericapaios, (Heimaraios,) is a compound of He, Ver, and Kanos, Hortus, quasi "Hortorum Vernus quidam Praises, et "numen, auctor fertilitatis omnis, idem alias Priapus," &c. It is not improbable, that a word might exist in Greek under this form, signifying "Hortorum Cultor;" and if 80, the Eri=Capaios, would be the term Kep-Our-os, Kep-Orros, (KnwOTPos,) in a contrary order, Hortorum custos, Hortulanus, ex Κηπος, et Ουρος, Custos, Κηπωρο:, Hortulanus, ex Κηπο:, et Ωεα, Cura, Κηπουειω, Hortum Colo.) If such a term really existed in Greek, and became confounded with the Hebrew word, we may well imagine, that the Hebrew word would be accommodated to the Greek form. The Ouros, (Ougo:,) in Kep-Ouros, (Knaovgos,) belongs indeed, as the Lexicographers suppose, to Ouros, (Ougo, Custos,) as they are both to be referred to Ora, Oreo, (nea, Cura, new, Curo.) Let us mark Oreo, (new, Curo,) under the form of our Element 'R, which means nothing but 'To take Care of, or 'S Cultivate the ERA,' (Ec2); and we see, that in the compound before us, Kep-Oure, (Knaovew, Hortum colo,) 'To Cultivate a Ganden,' the word is brought to its original Spot and genuine idea.

I shall produce in this place some Hebrew and Arabic words, under the form RKB, &c., where the sense of our Element is fully exhibited. In this Language, RKB signifies to RIDE; and in the mode of applying it we unequivocally see the idea of Agitation—Commotion, &c. The term seems to be peculiarly applied in its full force, when it relates to Jehovah Riding upon the Heavens—upon Clouds, &c. (Psalm lxviii. 5. 18. 84. Isa. xix. 1, &c. &c.)—In Job, "To Ride upon the Wind," says Taylor, "is to be tossed about in it like a straw." "Thou liftest me up to the Wind." רוח) RUK,) RUK,) "Thou causest me to RIDE upon it." Here 337 RKB is connected with 777 RUK, as we have seen its kindred term 577 RChP to be. In Isaiah xix. 1. "Behold " the Lord Rideth upon a swift Cloud." Here TO RKB is connected with By HB, the Cloud, which might lead us to suppose, that 257 RKB, denoting Motion, &c., and particularly applied to Air, is a compound of Ruk and HB, signifying Air, Vapour. The Hebrew my HP likewise means to "Vibrate, move with Vibratory or tremulous motion, "to flutter." The RK however is probably only significant, and the B is organical. In Arabic, | RAKOM signifies "Writing, a Writer," which I imagine to be derived from the idea of RAKing or Scratching on the Ground. An adjacent word is RAKIB, "Riding, A Rider." Again, in Arabic, رسوم RESUM, means "Travelling "day and night, leaving Traces in the Ground (a camel.)—Rusum, Inscriptions, written "laws, canons, custom." We here see, that the original sense of RESUM is that of a Trace-Mark, Ruz, Road, &c. upon the Ground, and that the idea of Travelling is taken from these Ruts, Roads, &c. I find likewise the Arabic RESM, "A law, " precept, canon, rule, regulation.—A model, design, drawing, description, writing.— The Trace or vestige of a house, &cc. on the ground." Again, [] RASIM means "Sealing, marking, delineating, writing." The primitive idea of these terms again "Ploughing." رضم

We shall now understand the origin of the term RHYTHM, RUTHM-a, which, we see, has precisely the same sense as the Arabic RESM, and relates to the idea of what is Marked or Traced in regular lines, form, or order, (Polyos, Rhythmus, Concinnitas, -Numerus seu Modulus certà dimensione et proportione constans." The Lexicographers have explained Ruthm-izo, Ρυθμίζε, by "Tempero, Formo, Compono, et Effingo," which might have been, Formo et Effingo, quasi justa lineamentorum Descriptione, Rite formam Describe; where we should have had the same metaphor. The word Scribe and Grafe, (resp.,) and Graw, belong to a similar action of Graving or Grubbing up the Dirt. In the same column of my Greek Vocabulary, where Ruthmizo, (Prθμίζε,) is found, we have Rugchas, (Purxos.) Rostrum, which I have shewn to belong to Rout—The Router up of the Ground, and which expresses a similar idea, applied to a different purpose. They have the same relation to each other, as Grub has to de-Scribo, Scribo, Grafo, (Tempus) and Grave. Let us mark the explanatory word, which I have adopted, RITE, which belongs to the idea of the Trace-RUT or ROAD, as I shew in another place. R. Ainsworth explains Ritus by "Rite, &c. A Course or order :- A Way;" where, in Course and Way we have still the same metaphor. Ruth Mos, (Publics,) appears under another form in Rus Mos, (Ρυσμος,) which has been explained by Ειχων, ιδια, σχημα. The Greek ARITH Mos, (Aerdus, Numerus,) to which, we know, belongs ARITHM-etic, is still only another form of *RUTH MOS, (Pullus,) where our Element appears in its full form *RT. The Etymologists who derive RUTHmos, (Pυθμος,) from Ruo, Puw, fluo, "ut sit tenor aquæ, quæ lineam Cursus " sui tenet," have exhibited the true metaphor, and have even hit upon one of the words belonging to this race The terms Ruo and Reo, To Flow, (Puw, Paw, Pawow,) belong to the form AR, but we see the form RS in REUSO, ROOS, RUISKomai, (Pevan, Poos, Fluentum, Poissopai, Plud, &c. 2

We now see the origin of the Hebrew Total RKM, which denotes Variety of "coleur or figure; to be variegated, diversified.—To be variegated or worked as cloth, with " various colours and figures; either with the shuttle or the needle, to be brocaded, or em-"broidered." This word belongs to the idea of making Traces, Marks, Beratches upon the Ground, &c. Mr. Parkhurst has justly referred to this Hebrew word the Latin of the middle ages Recamare, the Italian Ricamare, the Spanish Recamar, and the French Recamer, "all signifying to Embroider." In Hebrew, Ty RGM means "To be vio-" lently moved, disturbed, for troubled;" where we have the strongest sense of this race of words, when it denotes Agitation—Commotion, &c. Mr. Parkhurst refers this word to Production, "To whirl round," conceiving, that the y Gnain corresponds with a vowel breathing; and that the form of the Hebrew word is RM. The y Gnain should here be considered as representing the G. Some words with the y Gnain after the 7 R have a similar idea of Commution and Violence, as YTO RGZ, "To Crush, to break by Crush-66 off, Break in pieces," &c., which belong to such words as Rasso, Regnue, (Pagou, Collido, Payrow, Franco,) Rout, &c. &c. Che preceding word to y7 RG, in Mr. Parkhurst's Lexicon, is 707, " A Bridle;" which denotes, I imagine, the Breaker, or Subduer.

The Hebrew and RGM, signifies "To Whelm, heap together, accumulate." This contains a similar idea to Rout, a confused Heap of any thing. I do not mean to say, that Rour and RGM belong directly to each other, but that the Hebrew word contains the sense of the Element such as we find it in the English term. In Hebrew, דצף RZP, signifies "To Strow, or Spread;" where we have likewise the idea of ROUTING over a Surface, under a different turn of meaning. The term DT RZM, "To be contracted, " scowl, as the eyes of a person in anger," belongs to the words RESUM, &c., signifying Marks-Traces, Ruts, &c., and applies to the idea of Scowling, as connected with the Traces—RUTS or RUGE, or CORRUGATIONS made on the Countenance by anger, &c. The Hebrew DT7 RChM, which signifies "The Womb, Pity," I conceive to belong to the Element RM. The true form is in the Arabic RhM brew 17 Ch becomes 77 by a slight variation in form, and the becomes by adding a dot to the top of it. Taylor explains the Chaldee DUT RSM, as used in Daniel, by "Exarare, Consignare;" where we mark in the explanatory term Exarare, belonging to the Plough, the original idea of the word. Mr. Parkhurst explains the word by "To make or impress a mark, to mark, sign, designate." In Hebrew, RTM, means, according to Mr. Parkhurst, "To bind, tie, fasten by binding;" and hence "the Genista or Spanish broom, so called from the toughness or tenacity of its twigs." This word signifies "To. Bind, as I imagine, for the same reason, that Stringe does, which, we know, actually relates to the idea of Scratching upon a surface: Castel, among the interpretations of this word, gives us "Strepitus, Tumultus, Fragor;" where we see the idea of Commotion—Confusion, &c. The corresponding Syriac word he explains by "Balbuties, blæsitas, hæsitantia Linguæ. Nutus oculorum, Nictatio," which refers to Confused Speech or Motion; and the first Arabic word, which he produces as parallel, he explains by "Confregit, Comminuit;" where we see the idea of Breaking any surface, substance, &c. This Arabic word is RETH; and the first sense which Mr. Richardson gives of the term is Breaking, Bruising, (the Nose," &c.); where we are brought to the very idea. Other senses of the word are "Rolling a thread round" the finger to remember any thing.—RETEM, Furze or broom." We have here the senses of Binding, and the Furze or Broom, as in the Hebrew word. I must leave the Eastern Scholars to decide, how these senses are to be reconciled with each other, and with the original idea, whatever it may be. I cannot however be very remote from the primitive notion. The Furze or Broom may be the Prickly substance Breaking or Scratching or Rasing the Skin, "Carnem Exarans, Perstringens," &c.

In the same opening of Mr. Richardson's Dictionary we have Rejm, "Ston"ing to Death;" where we see the action of Violence. In some other senses it means
"Strowing a grave with Stones. Putting up a sepulchral monument.—Repulse, de"testation, reproach, execoration.—A tomb, a grave, a monument.—A well, a pit, a ditch,
"or trench." The succeeding word is Rejmet, "1. A Sepulchre. 2. The den
"of a hyena, (which is often a tomb.) 3. Death by Stoning. 4. A Tumulus of stones
"over a grave, a monument. 5. A Sign, a mark." Perhaps the original sense of these
words might be the Sign or Mark, and afterwards a Tomb or Memorial made by throwing
stones, &c. &c. This will shew us, that the Stone Jerkin of Paris is the Heap of Stones,
which would be thrown over his grave, if he had been put to death, for the bad,
which he committed, with an allusion perhaps to his deserving to be Stoned to Death.

Αλλα μαλα Τζωις δειδημοτις Ητε πιτ πότι Λαιτοι εσσο χιτωτα, πακωτ ετιχ' οσσ' εοργάς. (Γ. 56-7.)

In Hebrew, JORKB, signifies "To Rot, become Rotten, or putrid," which brings us to the Dirt of the Earth, whatever may be the precise idea, by which it is connected with it. Perhaps it means to be in a Broken state. In the same opening of Mr. Parkhurst's Lexicon, I see 757 "To Strow or Spread, Sternere, as a coverlet or the like;" where we are again brought to the same spot, under the idea of ROUTING or Scattering about. It signifies, as a noun, "Live coals or embers spread out," says Mr. Parkhurst. The Hebrew 727 RSP, signifies, as Taylor explains it, "Pruna, Scintilla. A very quick, "rapid, brandishing, and penetrating motion; as that of an arrow shot from a strong bow.—That of the vehement heat or flame of raging fevers and calentures," &c. &c.

I shall now consider some Hebrew and Arabic terms, belonging to the form RGL. The Hebrew The means the Foot, which we should at once refer to our Element RG, as denoting the Ground. But it belongs particularly to the idea of making Marks—or Impressions or Rasmes—Ruts, &c. on the Ground by Treading, and therefore must be referred to the race of words, now under discussion. Mr. Parkhurst explains TRGL, by "To Smite, strike, Impress;" and "as a N.—The Foot, which by continually Striking "against, or Treading upon, some solid obstacle, supports, and moves the animal forward." We here see the genuine idea, though the mode of reasoning on this idea is foreign to the purpose.—As a Noun TRGLI, means "A man on foot, a foot soldier," which will lead us to understand the origin of the Arabic Regul, A Man, which is derived from his strong powers of Walking. Mr. Richardson gives us, as the first sense

of this word, "A Man, A Man of intrepidity; potent in venery;" where we see nothing: of the original idea. The next sense is REJL, An Army, which means, I imagine, the Foot-Soldiery; but in some of the other senses of the word we are directly brought to the Foot in Mr. Richardson's interpretation, as "Binding the Foot - Hanging up a Sheep by "the Feet.-Bringing forth a child with the Feet first.-Standing on Foot.-Having " a large Foot.—A Horse with the forehead or one Foot white." I must leave the adeptsin the Arabic Language to reconcile the other senses of the word with this idea. In the same column of Mr. Richardson we have the term رحلة Resilet, which this Lexicographer interprets by "1. Firmness of Tread in walking. 2. Purslain. S. Flowing "waters, aqueducts. 4. Being on Foot. 5. Virility. 6 Manly." In the same column we have () REJLAN, "Infantry. Two Feet." This will be sufficient to decide on the original idea of the word.

The Critics in Biblical Learning by considering the Hebrew 727 RGL, in the confined sense of the Feet, without a knowledge of its original idea, have been led on many occasions to forced interpretations of the word. The Hebrew 717 RGL, denotes, 29 I conceive, the Feet, the Treading Member from the ROAD-ROUTE, RUT, &c., Trace, Track, Path, made by the Feet in Walking, just 23 Tread belongs to Track, Trace, &c. A very difficult passage occurs in Deuteronomy, which has much divided the Commentators. "For the land whither thou goest in to possess it, is not as the land of Egypt, " from whence ye came out, where thou sowedst thy seed, and wateredst it with thy "Foot," (בנל) "as a garden of herbs: But the land whither ye go to possess it, is a land of hills and valleys, and drinketh water of the rain of heaven." (Chap. xi. ver. 10, 11.) Dr. Shaw explains it thus, as quoted by Mr. Parkhurst, "When their various 66 sorts of pulse, safranon, (or carthamus,) musa, melons, sugar-canes, &c., (all which are " commonly planted in Rills,) require to be refreshed, they strike out the plugs that are " fixed in the bottoms of the cisterns (wherein they preserve the water of the Nile); and "then the water gushing out is conducted from one Rill to another by the gardener, who is " always ready, as occasion requires, to stop and divert the torrent, by turning the Earth against it with his Foot; and opening, at the same time, with his mattock, a new trench "to receive it." Mr. Parkhurst objects to this interpretation, since the process alludes to "Seed in general, plainly including, if not principally intending, corn;" and he agrees with Niebuhr, who imagines it to refer to a Machine for conveying water, worked by the Foot. — The Hebrew 717 RGL, does not mean the Foot, but is used in the more original sense for the Track-Trace, Course, ROAD, ROUT-RUT, &c., the Furrow, Channel, &c., made for conveying water. I shall shew, that the English word Rill is quasi RIGL; and this very form we actually find in Welsh, for the same object, as RHIGOL, "A little Ditch or trench, a furrow." Nothing can be more probable than this conjecture respecting the sense of the Hebrew word, which becomes certain, when we consider the parallel Arabic term REJILE, which not only relates to the Foot, but means likewise "Flowing Waters, Aqueducts." Castel gives us some parallel Syriac term to this Hebrew word, where we find the interpretations, "Foramen, Hiatus " spelunca.-Torrens, vadum, flumen;" where we have the idea of the Hollow, and the Hollow, as connected with Water.

Another sense of the word Times and the Latin Vices, which Mr. Parkhurst explains by "Several distinct Serokes or Impressions on "the senses, and may be rendered Times." This idea relates rather, I believe, to the regular Paths-or Traces made in walking, or the Regular Channels or Furrows, if we suppose, that it belongs to its more original sense. The Persian Pa, ... "A Foot.— "A Footstep, track, trace, mark, vestige," has a similar meaning, پيي در پي Pei der Pei, "One after another successively." This is taken from the action of one Foot following another in walking. The Hebrew 737 RGL, signifies, says Taylor, "The "Movements, Affections, Inclinations, Dispositions of the mind." Job xxxi. 5. Prov.vi. 18. Eccles. v. 1. Isai. Iii. 7.; and likewise "Common conversation or business, 1 Sam. xxiii. 22. 46 His Haunt, where he commonly converseth." The word often signifies nothing but Ways - Courses, &c., the familiar Ways and Courses, which a person takes. Rontine has a similar meaning from the ROUTE, or ROAD. "Go, I pray you, prepare yet, and know " and see his place where his Hount," (רגל RGL,) "is." As a verb, this Hebrew term signifies "To Investigate, search or spy out," says Mr. Parkhurst; "That is, either To follow by the Foot, as it were, or rather, q.d. To Foot round a country or city in order to "Spy." This sense of Spying may either belong to the same metaphor as Investigate, from Vestigium, To Trace or Track out, or that of Footing or Padding about a Country, as Mr. Parkhurst observes. The latter is probably the true idea. The same Hebrew word means "To slander, calumniate," which Mr. Parkhurst imagines to be derived from the idea of Smiting with the tongue. Taylor thinks, that the sense of Slandering and Defaming belongs to the idea of acting "the Spy in common life in a bad sense." This sense is derived from the metaphor of making Tracks - Traces - Marks - Scratches, RASures upon the Ground. If RAIL and its parallel terms do not directly belong to it, the Hebrew word must be considered as having a similar metaphor. Taylor explains the Hebrew word in this sense by the Latin Obtrecto; which is attached to the Element TRC, under the same metaphor, as it belongs, we know, to Tracto, Traho, Tractus, "A Trace, Mark or Streak," as R. Ainsworth explains it.

; We shall now understand the origin of the familiar Arabic word رسول RESUL, an Apostle or Prophet, which belongs to the Hebrew רגל RGL, and the Arabic رجل REJUL; and signifies the Traveller—the Foster, the Walker on the ROAD. Mr. Richardson justly explains the Arabic رسول Resut, by "An Ambassador, a Missionary, " Apostle, Prophet.—A Messenger, Courier." An adjacent Persian word is Residen, To Arrive; where we have still the idea of a journey on the ROAD. Another meaning of the Persian term is "To Hum, (as flies);" where we have the sense of Noise, annexed to this race of words. In the preceding column of Mr. Richardson's Lexicon we have رسل RESL, A gentle Pace —RUSUL, Prophets. The succeeding word to RKB רכב To Ride, in Mr. Parkhurst's Dictionary 'is רכב RKL, " To trade, " traffic, merchandise," as our author explains it; which is derived, as I imagine, from the idea of Travelling. We cannot but note, how the explanatory term Trade connects itself with Tread; and we all know, that Traffic is applied to the Road, 'There is great Traffic on this Road. The succeeding terms to this in Mr. Parkhurst's Lexicon

"To earn, acquire by labour, or industry." We have seen how the sense of Binding connects itself with that of Scratching upon a surface in the Latin Stringo; and in an explanation of one of the senses of the Hebrew word, Mr. Parkhurst has adopted the terms Rough and Rugged, where we are directly brought to the Elementary idea. Castel however brings us to the true idea, when he explains the verb by " Elevavit, Liga-"vit, constrinxit," and the substantive, belonging to it, by "Excelsa, Salebrosa," i.e. the RAISED, RIDGED, ROUGH places; and moreover, when he gives us, as the sense of the parallel Chaldee term, "Triturare, contundere." The sense of 'To Earn,' &c. may be taken from the metaphor of RAKing dirt together, cor RADendi; and hence it is, that the parallel Æthiopic term, produced by Castel, means "Immundus, abominabilis, "Pollutus," the Foul object; and that in Syriac the parallel term means A Horse, i. e. the RAKER up of the Ground. I ought to add, that the senses of the Arabic terms, produced by Castel, as parallel to RKL, the Traveller, bring us to the Feet and the Ground, 28 " Percussit Pede. Pedam impegit .- Via; Latus jumenti, pars ea, quam fodi-" cat eques; " or, as he might have added, Pedibus—" Ungulis jumenti calcata Terra."

It is marvellous to observe the powerful effects, which Language has produced on the operations of the mind, and how veins of imagery and even modes of action have been formed from the impression of words, which continue at once to exhibit the primitive and the derivative idea. If from this union of the Missionary-the Preacher or the Prophet with the Foot of the Traveller, that the peculiar imagery has arisen in the following passage, which is alike remarkable in its original and secondary application: "How beautiful are the Feet of them that Preach the gospel of peace, and bring glad "tidings of good things." (Rom. x. 15.) The word adopted by Isaiah in the passage, to which St. Paul alludes, is 527 RGL, the Foot, which has been just examined. Hence it is likewise, that when the Apostles are sent forth to Preach the glad tidings of the Kingdom of Heaven, they are enjoined 'To shake the Dust from off their Feet,' as a solemn act of denunciation against a perverse people, who should reject the blessings of so great a Mission.

A name for an Astronomer in Arabic is RASSAD, which is derived from the the idea of the ROAD. These notions may seem on the first view very remote from each other; but the interpretation of the Lexicographer will prove the truth of my hypothesis. Mr. Richardson explains this word by "1. Ah observer (of the stars, Roads, &c.) "2. One who lies in wait (an assasin, robber, informen, &c.) 2. The Lion. RASSAD, An "Astronomer. 4. A mathematician. 5. An observatory." This word may shew us, how impossible it would be in many cases to discover the leading idea, by which such different senses are connected, unless the Lexicographer, who is supposed to be an adept in his Language, either by chance or by design, had supplied us with the original notion. If in this case we had only seen, that RASSAD meant an Assasin-A Lion and an Astronomer, it would have been impossible for us to have discovered the idea, by which these senses were connected, unless by the most intimate knowledge of the Language. RASSAD, in the sense of a Robber, "One who lies in wait" on the ROAD, corresponds with our phrase "An High-Way Man." In Arabic likewise , Reship, is "One " of the attributes of God: A Director, conductor, guide, sagacious, intelligent," which belongs belongs, we see, to RASSAD, and means the person, who points out the ROAD to another. Hence is derived, as Mr. Richardson justly observes, the name of Haron Al RASHID, (Alabas, contemporary with Charlemagne." In the same column of Mr. Richardson's Dictionary we have RESSAD (1. A Patrole. 2. A Collector of toll. 3. An "astronomer." We little imagined, that the name of Haron Al RASHID, with which we are so familiar, was derived from the idea of the ROAD-Man. In the next column of Mr. Richardson's Dictionary to that, in which RASSAD (1) is, I find (1) RAKYB, "1. An Observer. 2. A Rival;" which belongs to the idea of Watching on the ROAD. The Rival is the jealous person who Watches the actions of another. Again, we have Expecting. "Contemplating, observing (the stars.)—Waiting, "Expecting." Having obtained the original idea, I must leave the adepts in the Arabic Language to discover the origin of the other senses, as connected with this leading notion.

RC, RD, &c. &c.

Words denoting Water—Moist or other Exhalations — Vapours, &c. &c. &c. connected with the action of Routing, Raking up or about the Ground, under the various ideas, of Stirring up or about — Cutting up, Scattering about, with different degrees of Violence—Noise—Commotion, or so as to make Ruts—Roads—Routes, &c., Furrows—Channels, &c. &c.

Rothas, Rochthas, Roizas, &c. (Gr.) Noise, Commotion, as of Water, &c.

RITH, REITHron, RAIDar, &c. &c. (Sax. Gr. Welsh, &c.) a River, Channel, &c.

Ruisseau. (French,) A Kennel, a Rivulet.

RAD. (Germ.) A river running impetuously—the course of a River.

RADen. (Germ.) To Run, to be carried forward impetuously, to Rout up the Ground.

RHUD. (Pers.) A River.

RHT. (Hebrew, Syr. Chald.)
A Gutter, Trough, To Run
down.

HREGG, REGG, REGEN, RIGO, Raino, Rain, &c. (Run. Germ. Lat. Gr. Eng. &c.) To Dash or Sprinkle with Water.

RAZO — RATHA - Miggs, (Gr.) Splashings of Water, Dirt, &c.

Ros—Eerse—Arroser, (Latin Gr. Fr.) Dew—To Sprinkle, &c., To Cast or Scatter about Water.

REEK, RECan, RAUCHEN, &c. (Eng. Sax. Germ.) To Cast or Emit a Watery or Foul Exhalation.

RACU, RAK, RAWK, &c. &c. (Sax. Scotch, &c. &c.) Rain, Mist, Fog, &c. &c.

&c. &c. &c.

1 HAVE had perpetual occasion to observe, that the order of arrangement presents to the writer one of the greatest difficulties in works of this nature. I shall in this article consider a Race of words, belonging to our Element, which relate to Water-Moist or other Exhalations, Vapour, &c., though I do not attempt to prove, that all these words are to be regarded as directly belonging to each Many are probably derived from different portions of the same fundamental train of ideas; though some of them may certainly be considered, as more immediately belonging to the same series of terms. I have supposed, in my general hypothesis, that the Radical RC, RD, &c. expresses the action of Routing-RAKING up—about—along, &c. the Ground, so as 'To Stir up— Cast it up—Scatter it about, with various degrees of Violence— Noise—Commotion—Agitation, or so as to make Ruts—Roads— ROUTES—Furrows—Hollows—Channels, &c. If we take into consideration these various circumstances, we shall see the origin of the Race of words, under the Radical RC, RD, &c. denoting Water—Exhalations—Vapour, &c. under the various accidents, attached to such objects, of Noise—Agitation—Dashing—Splashing— Sprinkling-Spouting up-forth - out - of Running in Channels, &c. &c. We shall oftentimes be enabled to perceive, which of these turns of meaning is most prominent in the sense of a certain word; though frequently some or all of these ideas will be combined and inseparably blended with each other.

Among the terms, denoting Noise connected with Water, we have the following; as the Greek Rothos, (Pobos, Undarum strepitus, Remorum;—Strepitus, Tumultus, Impetus); Rochthos, and Rochthes, (Poxlos, Flustuum Strepitus, Fluctus, Poxlow, Strepitum seu Stridorem edo); Roizos, Roizo, (Poilos, Stridor, Sibilus, Impetus, Poilo, Voluto equum in Flumine vel lacu ad abluendas sordes.) Among such words we must class Reithron, (Pobos, Alveus;—Flumen, Fluvius; Rith, (Sax.) Rivus; the Welsh Raidar, a Cata-

ract; and Rhedeg, "To Run, to flow or stream as a River." The Welsh Lexicographers have referred us, under Rhedeg, to the Hebrew און Rahat, און Rutz, Currere; און Rhedaph, Sequi, insequi; the Chaldee מון, Reten, Cursor; און Reda, Iter facere; and the Greek Pau, Rheo, fluo.

The preceding word to this Welsh term in Mr. Richards' Dictionary relates to Noise in general. RHECHain signifies Pedere, and "To make a Noise." In the column adjoining to that, where these words are found, we have RHAWD, "a Troop, a company;" on which Mr. Richards observes, "Q. wh. the English Rout be "hence derived; and Q. wh. Rhodio come from hence, aw being "turned into o, as usual." The Welsh Rhopio signifies 'To 'Walk;' and in the same column of Mr. Richards' Dictionary, where this word occurs, we have Rhochan, "A Grunting," belonging to Rhôch, "A groaning or grunting, a roaring;" Rhodl, RHODOL, "An oar to Row with;" RHODOL, "A Paddle, Staff;" RHODWYN, "The river Rhone in France;" RHOD, "A Wheel. " So in Arm. Cor. Roz." belonging to the Latin Rota, from the ROUTE, ROAD, or RUT made on the Ground. The succeeding word to Rhod is Rhodawg, a Shield, which is perhaps taken from the round form of the Wheel. In the succeeding column we have Rhuo, To Roar; Rhuad, A Roaning; and Rhuadwr, A Roarer. The preceding term to Rhoch, "A Groaning or grunting, a roaring," is RHOCCAS, "A Young Lad," which probably belongs to the idea of the Roaring or Noisy Boy. The Celtic Rhoccas directly brings us to the Italian RAGAZZO, the Boy, &c. In the same column of my Italian Vocabulary, where this word is, I find Raggio, a Ray, Beam; and RAGGHIO, the braying of an ass." I have shewn, that RAY, RADius, &c. denote the Lines, which are made by Scratching upon a Surface, and that the sense of Noise, attached to our Element, is derived from this action. In the same column of Mr. Richards' Dictionary, where Rhodwyn, &c. is found, we have RHODres,

RHODres, "Pomp, ostentation, or shew, vain-glory, glorying, "bragging, boasting;" and RHODDI, To give, bestow. The Celtic Scholars will consider, whether these words may not relate to the Noisy—Swelling Braggart, and to an ostentatious—Bragging mode of conferring favours.

The French Roder, "To rove or ramble about," may justly be considered as belonging directly to the Celtic Rhodio. French Etymologists, under Roper, justly produce these Hebrew and Chaldee terms RATS, RAHAT, together with the Greek ROTHein, (Pober); and they add likewise the Syriac RDO, "Marcher, voyager, "cheminer;" the German Raden, Courir, se Hater; the Welsh Rhedeg, and the Bas-Bretagne terms Rhedec, Rheden, Courir, which we see all belong to the sense of our Element. The Hebrew 77 RZ signifies, says Mr. Parkhurst, "To Run, Move or "Ride swiftly, to Run, to cause to Run, to Drive or Force one "thing against another, to Dash, crush.—As a N. with a forma-"tive ж" A, "ארץ" ARZ, "The EARTH, or Earthy Matter." &c. &c. Hence he adds "German Ende, Saxon Eorthe, and " Eng. EARTH, and perhaps Greek Eou, the same." The succeeding term in Mr. Parkhurst's Lexicon is ארן RZZ, "To Run "here and there, or with swiftness and violence.—To Dash, "break or Bruise by collision." He adds, as Derivatives, "Gr. " Paσσω, To Dash; Pησσω, To Break, to Rush. Qu.? Compare "under wy . German Risch, Quickly; Sax. Raus, and Eng. Also Risk. Qu.?" " Race.

In the same opening of my French Dictionary, where Roden occurs, we have Rosser, "To bang, to lick, to thrash, to maul;" as my Lexicographer explains it; where we have the full sense belonging to these terms of Commotion and Violence, Rour, &c. &c. Le Duchat observes, that the French Rouer is sometimes put for Roder. My French Lexicographer explains Rouer by "To break a man on the Wheel.—To Jade, to tire, to Harrass.—Rouer de Coups.

"Coups, to bang soundly, to maul unmercifully." We see, that Rouer, 'To break on a Wheel,' belongs to Roue, a Wheel, quasi ROTA; but the sense of to Harass, &c. is attached to the more general idea of the Element. Let us mark the explanatory word HARASS, which I have shewn to be derived from HARROW, HERSER, To Stir up the EARTH. The preceding term to Roder in the Dictionary of Menage is Rodomontade, belonging to Rodomont, which I have conjectured in one place to signify 'The Rover 'about the Mountains,' as in Passamonte, &c.; and perhaps the Reader in seeing these terms for motion might be inclined to this idea; I have however proposed a different origin of the word in another place. I have before produced the German Rapen and its parallels, which will unequivocally unfold to us, that the name for a River, &c. is derived from the idea which I have proposed. Wachter has placed RAD in various articles with the following different significations; "RAD, Cite, celeriter; -- ROTA, Currus, " Fluvius impetuose currens-Raden, Currere, Properare, et cum " impetu ferri; and Ranen, Exstirpare," bearing the same meaning, says Wachter, as Rotten, or aus-Rotten, "Extirpare, sive id " fiat destructionis, sive culture causa." Here we unequivocally perceive, that the River—the RAD is derived from or connected with the idea of ROUTING up the Ground.

ROTHER, in old British, is a name applied to Rivers, as Baxter observes; who derives it from Tr Odr, Limes. He imagines, that Rother-Hithe is "Ripa Limitis;" and Rotter-Dam, Agger Limitis; and Lye supposes, that Rother-Hithe may be derived from Rethra, Nauta, and mean "Nautarum Portus." (Sazon Dict. sub Rethra-Hythe.) Rother means here, I conceive, A Water or River. Junius has an article, under the term Rei, which, as he says, "olim Anglis Flumen denotabat. G. Ru, Ry. H. et H. Rie. "B. Ruye. Sunt à Pier, Pen, Correre, de aquâ: unde et Pies, Pen, "fluxus,

44 fluxus, fluentum. A Saxonibus quoque RITH est Rivus. Al. RITHA "est Torrens. Gr. Pableor, Fluentum;" and Lye adds, "Cur non " αμιστως derives à C. B. Rhe, Fluere, Currere?" In Persian, Δ Rup is "A River, a torrent, flowing water." An adjacent word is Rukh (Pers.) The Intestines; and Day Rude, "An In-"testine;—The string of an Instrument." Run means a River, from the Hollow or Channel or Rut, in which it runs; and hence it signifies the Intestines, the Hollow vessels; and in a secondary sense "The string of a musical instrument," from the idea of the Intestines, of which Strings were originally made. Rud likewise means "Song, Cheerfulness, jovial conversation, convivial mirth," from the string of a Musical instrument. The preceding Arabic word to Rud is J. Rawd, "Moveable, Moving. Rud, A Slow, easy Pace." Here we have the idea of RACE on motion in a ROAD; and thus RUD, the River, is the ROUTE or Course of the River. In the same column of Mr. Richardson's Dictionary we have Rupbar, "A River in a valley, A Channel formed by the a Torrent, &c.; and Runkhané, The bed of a River." In the same opening of Mr. Richardson's Dictionary I find Rut, A. In the Greek Reo and Ruo, (Punt Pun,) we have the form "R; but the form RS appears in REUSO, (Procu,) and in the Derivatives Roos, Rous, Reustos, Roikos, &c. (Poos, Pous, Fluentum, Fluxus, Peweros, Pomos, Fluidus.) The Reo, (Pew, Loquor,) To Speak, might be derived from the idea of Noise; but we shall find, I imagine, that it belongs to the sense conveyed by Erue, (Epun Traho,) or the Latin Eruo, i. d. Proferre verba. The term 2007. RHT, signifies in the Hebrew "A Gutter, or Trough;" and in Chaldee and Syriac "To Run down," as Mr. Parkhurst explains. An adjacent word in the Lexicon of this writer is my RZH, "To waste, attenuate, make lean, famish," which must be referred to terms of Violence, as RADO, RASE, &c. The succeeding word is fifth Ruch, "To cry out or shout, for grief or joy;" where we have

have the idea of Noise, as in Rusio, &c. &c. The next word is DT RZM, "To be contracted, scowl, as the eyes of a person in "anger," which belongs to the notion of a Face contracted into Ruts, Ruge, &c., as I have before observed. The next word is TRZN, which, as some imagine, relates to the idea of Weighing, Balancing, &c., though Mr. Parkhurst observes, that "it "seems better to refer this word to the root, TT" RZH, which means, as we have seen, "To Waste, Attenuate," &c. The next word is TRCh, Air in motion—REEK, &c., which I have before fully discussed.

We have seen, that the German Regen signifies, as my Lexicographer explains it, "To Stir, move, agitate, excite something," which accurately expresses the sense of the Element, as it has been unfolded in these discussions. The succeeding word in my German Dictionary is Regen, the Rain, which we now see belongs to the idea of Agitation, Commotion, &c. In the English Rain, and in some of its parallel terms, the Radical consonant G is lost, and the N, which is only an organical addition to the G, remains. Etymologists refer us, under Rain, to the parallel terms in other Languages; as the Saxon Hregn, Ragn, Ren, the Gothic Rign, the German Regen or Regnen, the Belgic Reghen, the Danish and Islandic Regen, the Swedish Ragn, the Runic Hregg, Regg, the Greek Raino, (Passu, Aspergo, Irroro); and they remind us, moreover, of the Latin Rigo, and the Greek Regnuo, Regnumi, (Pyynu, Pηγουμι, Frango,) and the phrase in Pausanias, "RAGDaios Uetos, "(Paydauos vetos Pluvia impetuosa et cum quâdam vehementiâ pro-"rumpens.") These terms may be conceived as belonging to each other, under the general idea of Commotion, Agitation, but in some we are directly brought to the original action of Scratching upon a Surface.

In Italian, Riga means "A Line, a Dash;" and Rigare, To Water, Sprinkle; and Rigagno, Rigagnolo, a Rivulet; to which

my Lexicographer puts, as a parallel term, the French Ruisseau. The Etymologists derive RIGO from Pryu, Algeo,—from Peos, and Ayur &c. &c. They record likewise Raino, (Pagu, Aspergo, Irroro,) quasi Rajno, a term which I have already illustrated by producing the race of words, with which it is accompanied in the order of a Vocabulary, as Raio, Raiso, Razo, Rathamigx, &c. (Paus, Pausu, Profligo, &c., Paζω, Perfundo, aspergo, a Panu, vel Ρησσω, Frango, Ραθαμιγέ, Gutta.) Here we see, that these terms, denoting the Sprinkling or Dashing with Water, are connected with words expressing actions of Commotion, as of Routing up or about, or Breaking up. have seen, that RATHA=Migx, (Pαθαμιγξ, Gutta,) relates to the Splashing up of Dirt by Horses in running, KONIHY PAGAMITTEZ εδαλλον. (Il. ψ. 502.) Perhaps the Migx-Miggs in RATHA-Migx, Migg-os, may belong to such terms as Mignuo, (Migrou,) and its parallels Misceo, Mix, &c., words, under the Element MG, denoting 'Agitation,' &c., which I shall shew to belong to the idea of Stirring up the Mud. Let us mark the explanatory term Ir-Roro, which will bring us to the Latin Ros, Ror-is, from whence we pass to the French Ar-Roser. The Latin Ros has been referred by Martinius to the Greek Erse, (Econ,) to the Chaldee רם RS, Stillare; to the Arabic בים RS, Aspergere; to the Hebrew רסים RSIS, Stilla, Gutta, which belongs to א RS, To Moisten, before produced. Mr. Richardson, under Sprinkle, gives us, as a corresponding term, the Persian ريويدن Reezedun, which signifies "To dissolve, To Break in pieces, to pour, to diffuse, to " scatter: To be scattered, bruised, melted. Rizidé, Dispersed, "Flowing," which unquestionably belongs to such words as REGnuo, (Pyyvuu, Frango,) Rout, &c. &c. Lye produces the term RAGG, which he explains by "Substillum, Pluvia Roscidula;" and which he refers to Racu, (Sax.) Rækia, (Isl.) Pluvia; the Runic. Rigg,-Hrigg, from Roka, "Unda sursum ventis dispersa," and the same Lexicographer refers to these terms the Scotch words

used by Gawin Douglas RAK, ROIK, REEK, "quæ idem signifi" cant;" where we are brought to the English term REEK.

The English REEK has been referred by the Etymologists to the Saxon Rec, Recan, the German Rauch, Rauchen, Riecken, the Belgic Reuck, &c., the Islandic Ruika, the Danish Roger, &c., who inform us, that Martinius derives the German Rauch from the Hebrew non Ruch. Lye however observes, "Dispice interim annon "A.S. Rec magis videri possit abscissum ex Parelos, quod Hesy-" chio exp. Σκληρος, Durus, Asper; vel ex Ρασιερος, quod eidem " doctissimo Grammatico exp. χαλεπος, Difficilis: atque adeò huo " pertinent quæ Regum sapientissimus habet Prov. x. 26. de mo-" lestia fumi." The Greek RAKelos, (Paxshos,) and RAIKeros, (Paskepos,) belong to the sense of our Element when it denotes Annoyance—Disturbance, as 'To RAKE up the feelings,' &c. RAKELOS has the same form as the French RACLER, "Scrape, shave or RAZE In the same opening of Lye's Dictionary, where REC, Fumus, is found, we have Reced, "Domus, aula, palatium, basi-"lica;" on which Lye observes, "Domus, autem ideo forsan " Reced dicebantur, quod focos habentes in centro Fumo plenæ, " (Fumosæ,) esse solebant." We shall perhaps approach nearer to this idea in the Saxon Reesn, parallel to the Gothic RAZN, Domus, as the Saxon term signifies a Roof, Rafter, "Asser;-Lacunar, " Laquear."

We shall now understand how the sense of Reek is involved in the train of ideas, which I am at present unfolding, and how impossible it is to select a peculiar notion, to which it may be said more directly to belong. We plainly perceive in the term Reek.—To Reek, &c. the idea of a Vapour or Exhalation—particularly a moist vapour, Cast forth—Emitted—Rising or—Raised up, as if connected with the idea of Dirt Raked or Routed up, in a state of some commotion and annoyance. The fundamental idea of Reek, 'To Reek,' is that of Rising up—being Raised or Raked

RAKED up, and this is the familiar notion annexed to objects of this nature. Hence we say 'The REEK RISES-The Vapour begins to Rise; and from this metaphor, as we know, the term Exhalation is derived; -Exhalo, "To Exhale, or breathe Out, " to evaporate, to steam, to Cast or Send forth a fume, or "vapour;" where, in the explanatory terms "Cast or Send forth," and in the use of the prepositions Ex, E, and Out, we see the fundamental idea. We cannot separate likewise from the sense of this word REEK, as it is sometimes applied, the idea of Commotion, and we often perceive annexed to it the sense of an Annoying or Disturbing Commotion, if I may so say, or Foul species of Commotion; which brings us more directly to the original idea. We shall find too, that REEK particularly refers to a Watery Exhalation; and thus we see, how it connects itself with RAKU, REKIA, &c. &c. Pluvia. Let us mark the explanatory term Disturbing, expressing at once Annoyance and Commotion, and belonging, as we know, to Turbo, Turbidus, which latter word R. Ainsworth actually explains by "Muddy, Thick, Foggy." I shall shew, that Turbo is derived from the idea of 'Stirring up the Foul or Turpid (Turpis,) Dirt of the Ground or Turf.'

It was not necessary that Lye should have had recourse to a Greek word denoting Asper, for the origin of Rec, &c. Smoke, as the Teutonic word Rough, &c. would have at once supplied him with the same idea; and in German the senses of Rough and Rec are actually represented by the same term, or by terms under the same form, Rauch, Rough; and Rauch, Smoke. These ideas are so involved with each other, that it is oftentimes impossible to mark the shades of difference, by which they are distinguished. I have shewn, that Rough is derived from the idea of Routing, Raking—Casting up or Breaking up a surface into Ridges; and thus we see, how it agrees with Reek in its fundamental idea. In English, Reek signifies at once the Rough Ridge

RIDGE or Protuberance, as we might explain it, and an Exhala-Nathan Bailey explains "To REEK" by "To Cast a steam " or smoke," in one article; and in another, "REEK, A Mow, or "Heap of corn." We shall now understand, that the one may be considered as the passive participle of the other;—To Reek means 'To Cast out-RAKE or RAISE up or out;' and the other signifies 'The Cast out—the RAKED or RAISED up—the RIDGE—Protuberance.' &c. Our author has another article "To Reek or wear away, His Sickness REEKS him; i. e. wastes or wears him away, where REAK has the metaphorical sense, annexed to the action of Casting up-RAKing or Scratching up, about, &c.-Tearing, Vellicating, Fretting, &c. In Scotch, Reik means Smoke; and it means likewise "Metaph. A Disturbance; A tumult," as Dr. Jamieson explains it. This sense of Disturbance, &c. unequivocally shews us, how the idea of Smoke is connected with that of Routing or RAKING up the Dirt; and accordingly the Latins say equally 'Pulverem' vel 'Fumum Excitare.' In Scotch, Reik means 'To " Reach,' and " To Reik out—foorth," corresponding with our term RIG. To fit out, &c., as Dr. Jamieson explains them in separate articles. I have shewn, that To REACH means 'To RAKE or Draw out-along, &c.-Stretch out,' &c., and that Reik out or forth means to RID or RAKE out a surface; and thus we see, how all these terms belong to the same fundamental idea. We cannot but perceive, how the words Out and Forth, annexed to Reik, bring us to the true notion, and are alike applied to Reik, the Exhalation, which REEKS Out—to REIK, the Tract, which REACHES or Stretches Out; and to REIK, the term of preparation, what Rids Out. Dr. Jamieson refers us, under Reik, to other forms of the same word, RAK, RAWK, &c. "A thick mist or fog, "a vapour;" and here he has collated various words signifying Moist-Humid, &c., as Rak-ur, Rek-ia, (Island.) Humidus, Irrigare, &c. &c. I have already produced the terms under our Element,

Element, relating to the Sprinkling of Water; and I have shewn, that they alike belong to the idea of Agitation, Commotion, in ROUTING up the Ground.

Dr. Jamieson, under RAK, produces the English RACK, before explained, with a disquisition, which it is not necessary to record, Our Lexicographer has justly referred the Islandic Rok-r, the Twilight, and Rokv=a, Vesperascere, to the race of words, denoting a Vapour—Fog, &c.; and he has properly reminded his readers of the Scotch phrase, A ROOKY day, "when the air is thick, and "the light of consequence feeble." Hence it is, I imagine, that RATO, in Gipsey, means the Night; and that in Gothic we have Riwis, Riwiz, Tenebræ; Riwizan, Caligare, obscurus fieri; and in Irish, REAG, Night; REAGdhall, Purblind. In the succeeding column of Mr. Shaw's Dictionary to that in which these Irish words are found, is Reall, Realt, A Star; and I must leave the Celtic Scholars to consider, whether Reall may not be quasi Reagll, that which is seen in the Night. I have offered however a different conjecture in another place. In the Hindostanee Dialects, RAUT is Night; and RAUK, Ashes; where we are at once brought to the idea of Dirt. The terms Dusk—Dusky and Dust, &c. &c. have a similar relation to each other.

The English word REECHY, as 'REECHY Bacon,' is nothing but REEKY, as the Commentators on Shakspeare understand; though it does not always mean Smoky, as Mr. Steevens interprets it. A REECHY surface is that from which there arises a Foul Exhalation, or rather Exsudation, or on which some Foul matter is collected, like a foul Exsudation. In the first and more original idea it is used by Shakspeare, where he talks of "REECHY Kisses," (Haml.); and the "REECHY neck of the Kitchen Malkin," (Coriol.); and in the second sense, when he talks of a 'REECHY Painting,' (M. Ado, &c.) I cannot help adding, that Shakspeare has used REEK with the

the due metaphor of "Drawing or Casting up—forth," according to my hypothesis, in the following passage;

"For there the sun shall greet them,
"And Draw their REEKING honours up to heaven."

Whenever the terms Reek, &c. relate to the Foul or Dirty Vapour Exhaled or Cast out, we are brought more directly to the original idea of 'Dirt Cast out.'

We perceive, how these words REEKY, RECHY, &c. connect themselves with terms signifying a Foul—Filthy or Corrupt state of things, as Rust, Rusty, Resty Bacon, Euros, (Eugos, Situs, mucor); Roccia, (Ital.) Rot, Rotten, &c.; and they differ only in this respect, that these latter words seem to relate to Dirt simply, without including the idea of 'Dirt, as Cast or Thrown 'up.' Yet this is a minuteness of distinction, which it is scarcely necessary to propose. In another form of the word Euros, (Evens,)—the term Eurus, (Evens,) we pass into the idea of what is Cast or Thrown out; as I have before shewn, that it means the RIDDED-out way, so as to be Spacious and Broad for any purpose; and in the adjective Europes, (Eugwong, Putris, situ obsitus;—tenebricosus, obscurus; Amplus, latus,) we have both ideas combined. Let us note likewise, how this word relates to what is Dark from the idea of Dirt, as we have just seen. I may here remark, that Rot is derived from Dirt in a Rough—Broken— ROUTED up state; and that ROTTen in German at once actually signifies 'To Rot,' and 'To Rout up the Ground;'-"Rotten "et composite Ver-Rotten, Putrescere; — Rotten, Rumpere " terram, sive id fiat Aratro, aut Fodiendi instrumento, quod " faciunt coloni, sive Rostro, quod faciunt sues." (Wachter. sub woce.) So allied are the ideas annexed to REEK and ROTTEN, that these words are combined by Shakspeare.

[&]quot;You common cry of curs! whose breath I hate,

[&]quot;As REER o' the ROTTEN fens."

The succeeding articles in Dr. Jamieson's Dictionary to Rak, "the thick mist," are Rak, Rawk, "The rheum which distils "from the eyes during sleep, or when they are in any degree "inflamed;" and "The greenish scum, which covers water in "a state of stagnation." Dr. Jamieson has understood, that these words belong to each other; and he cannot help seeing, that one of them at least has some relation to the idea of Casting or Throwing out. This Lexicographer observes under the word Rak, The rheum, that it may "be allied to Isl. Hrak, rejectaneum quid, from Hrek-ia, Reka, pellere; Reka, ut Ejicere; hence Rek, "Su. G. Wrak, Whatever is Thrown out by the sea on the "shore."

The succeeding word to RAK, the Scum, is RAK, "A Stroak " or blow," as Ruddiman explains it; where we have the action of Violence, which we have so often seen annexed to this race of words. Dr. Jamieson has seen, that "it may be referred to "the Islandic Reka, Propellere." The succeeding terms are RAK-Sauch, RAKE, RAKE, a swift pace; RAKYNG, RAKKET, RAKless, Careless. Dr. Jamieson observes, that RAK-Sauch is " a reproachful term" from RACK, To Stretch; and Sauch, the Willow, "the twig of willow, the instrument of execution, " anciently used." Under this idea the term corresponds with our expression Crack-Rope. RAKE is so used in one passage; 'Torn tow RAKE,' that Dr. Jamieson conceives it to be an error for "Torn to WRAKE, i. e. Turn or bring thee to WRECK or "ruin." We have seen the same idea under both forms, as in REGnuo, (Payrou, Frango,) &c. &c. In RAIK, the swift pace, and in RAKYNG, which our author explains by Wandering, we see the genuine idea of RAKING about. Some consider RAKKET as denoting "Blow, box on the ear;" where we have an action of Violence; but Dr. Jamieson imagines, that the word may either relate to RACKET, the term of Hurry, or it may express the idea

1072 ^R.R. ^.—C, D, G, J, K, Q, S, T, X, Z.

of something Vile, and belong to the French Raque, Filth, Ordure, and the Teutonic Racken, Purgare latrinas; where we are directly brought to the idea of Dirt, and of Raking away Dirt. Rakless is Reckless, which I have explained on another occasion. These observations, which I have made on the terms denoting Water, belonging to our Radical, will be sufficient to elucidate the nature of the subject; nor will it be necessary to enlarge the catalogue of this race of words, as they will be all found to be impregnated with the train of ideas, which I have endeavoured to unfold with all possible diligence—fidelity and precision.

RL belonging to the form RCL, RTL, &c. &c.

Terms relating to the action of making Hollows — TRACKS, &c. in the Ground — of Scratching upon — Grating upon a surface, &c. &c.

RACLER. (Fr.) To Rake.

RGL. (Heb.) A Track, Course,
&c. &c. for Water.

RIGAGNOLO. (Ital.) A

RILL, &c. (Eng.)

RAIL. (Old Eng.) Fluere.

RHIGOLI. (Welsh,) To Hollow
into Furrows, Trenches.

AmaRyllis. (Lat. Name.) The
Rill.

RHIGOL. (Old Eng.) A crown,

an enclosure, from the idea of the enclosing Hollow.

RAGULED. (Heraldic term,) A. surface Notched or jagged.

RALLAR. (Spanish,) To Grate upon a surface.

RALER. (Fr.) To RATTLE.

eRAILLER. (Fr.) To Scratch.

RAIL—RAILLer, RAILLery, (Eng. Fr. Eng.) To utter Harsh—Grating Language, Perstringere.

RAILS—RAILINGS. (Eng.) Pales in the *Grate*-like form.

RAILLON. (French,) A Plough-share.

ROLL—ROLLER, &c. (Eng.) To Grate upon a surface.

Roith, Roithlein. (Celtic,) A. Wheel.

I SHALL consider in this article a Race of words, under the form RL, which I conceive to be originally derived from the form RCl, RTl, RcL, RtL, &c. &c. We have seen various words under the form RCL, RTL, &c., as RACLer, ROOTLE, RATTLE, RUSTLE, &c.; and we have seen too, what we should readily understand, how the Radical Consonant C, T, &c. has been lost, and

the added Consonant l, L, has remained, as in 'Regula,' Regula, 'Regula,' 'Rule,' &c. &c. I have before shewn, that the English term Rill is quasi RIGL; and in the Italian RIGagnolo, we see the l added to the Elementary form RG. Lye refers Rill to the Belgic Rioole,—to the form used by Gawin Douglas, Ralis, the term in Chaucer Rayled, and the Islandic Ryll. Lye likewise produces in another place Rail, as the term used by Spenser and Chaucer for "Fluere, Decurrere;" which he refers to Rill. I have which relates رجلة produced in a former page the Arabic Rejilet at once to the Foot, and means likewise "Flowing waters, Aque-"ducts;" and I have conjectured moreover, that the Hebrew RGL, which is acknowledged to signify a Foot, denotes also 'A Track, Course, Rut, Rill,' &c. In Welsh, Rhill is "An " order, a Rank, a Row," which I conceive to be quasi RHIGI, and to be derived from the regular Furrows or RIDGES made in Ploughing up the Ground. But however this may be, the adjacent Welsh words Rhigol, "A little ditch or trench, a furrow;" RHIGOLI, "To Hollow into trenches or Furrows," directly coincide with my general hypothesis, and will place my conjecture respecting Rill almost beyond doubt. Here we have simply the Channel or Furrow, without the Noise. The name Amaryllis is supposed to be derived from Amara, (Auaga, Aquæ ductus, Sulcus in prato, per quem Aqua ducitur Irrigandæ terræ caussâ.) The Ryllis in Amaryllis is the RILL, the RHIgoL, a word of a similar meaning to Amara, (Auaga.) We see how Rigo is brought to the spot, supposed in my hypothesis, by the interpretation above adopted; " Sulcus in prato, per quem Aqua ducitur Irriganda terra "caussâ." Every one acknowledges Water as the source of names, as Mr. Water, Fountain, Brook, Rivers, &c. &c.

RIGOL occurs in Shakspeare, and signifies, as the Commentators observe, A Crown. Its original sense I conceive to be that

" the

of a Channel or Hollow; from whence it denotes in general that, which Contains—Encloses—Infolds, &c. The word occurs in Henry IV. Second Part.

"This is a sleep;

"That from this golden RIGOL bath divorc'd

"So many English Kings."

(Act IV. S. 4.)

Mr. Steevens observes on this passage, "RIGOL means a circle." I know not, that it is used by any author but Shakspeare, who "introduces it likewise in his Rape of Lucrece:

" About the mourning and congealed face

"Of that black blood, a Wat'ry Rigor goes."

Here RIGOL seems to mean little more than a Channel—Furrow—Course; and we may perceive, I think, more strongly in the epithet Wat'ry—"A Wat'ry RIGOL," the original sense of the term. I must here observe, as I have perpetually had occasion to do, that words have a marvellous propensity to retain their original meaning.

In Heraldry, Raguled, as Skinner observes, is the same as Ragged, and means "Crenis seu Incisuris exasperatum;" where Ragul conveys a similar idea to that, which I affix to Rhigol, the Rut or Hollow. We here see, how Ragged connects itself with Rough and Rugged. The preceding word to the Heraldic term Ragguled in Nathan Bailey, is "Raggouled or Couped," a term applied to a Branch that is sawed from the tree, or to a stock so separated from the Root." Here we see the word simply signifies Cut, and to this idea we should probably refer the term Ridgle, for a Horse, which has been partly Cut or Castrated. In Scotch, the term is Riglan, or Rigland; where the Lan or Land originally denoted perhaps the very Spot, the Land; or it belongs to the English Ling, as in Ridgling, &c., &c., for In the same column of, Nathan Bailey's Dictionary, where the words above produced from this writer are found, we have Rag,

Menage derives Erailler from Radere, "Rado, Rasi, noon. 14 Rasum, Rasicum, Rasiculum, Rasiculare, Raculare, Railler, Exracu-"lare, ERAILLER." Menage having seen that Erailler belongs to. Rado, might have saved all this labour by adopting as the medium of his process the RACLER, To Scrape, &c., Raler, RAILLER. The eRailler is nothing but another form of Racl-er. The succeeding word to RAILLER in Menage is Raillon, which, in old French, means a Dart; that is, the Scratcher, quod Cutem RADIT. Menage informs us, that Raillon likewise signifies A Ploughshare; and that Railhe in Provence, and Reille in Languedoc, means a Plough. Hence it is, as he observes, that the Family of Reillanette have a Plough in their arms. The name of Relhan is derived from this source. In the sense of the Plough we are brought to the Spot supposed in my hypothesis. Menage deduces Raillon from Radius and Radillus: "De Radillone, ablatif de " Radillo, dit pour Radillus, on a fait Raillon: lequel mot a aussi "été dit du fer d'un dard: ces fers ressemblant à un Rayon." I am surprised, that the term Raillon, a Plough; did not remind the French Etymologists of the Latin Ralla or Rallum, signifying " The Staff wherewith the ploughman in tilling putteth the Earth "from his share;" which we now understand to denote either that, which belongs to the Plough or RAILLON, or else the Scraping Instrument.

The term Rails or Railings, the sharp-pointed Stakes of wood fixed in the Ground for the purpose of Defence, seem to mean the Instruments, which are capable of Grating—Scratching or Tearing the Flesh, the 'Valli cutem Radentes. That they are derived from the action of Grating upon a surface, is most certain; and I only express a doubt, because there is another idea annexed to this action, from which they may be taken. Rails and Railings may have the same form as the Iron Grate, which seems to mean the figure composed of Lines or Bars, like the

Lines

Lines made by Grating upon the Ground. The Latin Crates means for a similar reason "A bundle of rods wattled together.-"A Drag or Harrow to break clods.—A Grate of brass or wood." I have shewn, that RACK,—the RACK of Hay, belongs to a similar notion of RAKing or Scratching upon the Ground. it is evident, that the terms RAIL; RAILINGS, are attached to a race of words, which signify 'To Grate or Scratch upon;' and I shall leave the Reader to decide on the peculiar notion, from which they are taken. It is impossible perhaps to divide a fundamental notion into two different modes of conceiving it, when the object expressed admits both. In Scotch, RALIS means Nets, which Dr. Jamieson refers to Rails, as denoting the Enclosure. They probably however belong to each other, as denoting the Grate-like form. In the same column of our author's Dictionary we have To RALE, "To spring, or gush forth, to flow," which he justly refers to RAYLED, as used by Chaucer in the same sense, and to RILL. We have likewise RALLION, Noise, Clattering; where we have the same idea, which we have seen in other words of this The French Grille, the Grate, is supposed to be derived from Craticula, which may be so; yet the g or ge might be a Teutonic addition; and the RILLE might belong to the words before us. We now see, that RAIL, the verb and the substantive, contain the same fundamental of Grate, 'To Grate-The Graters 'or the Grated.' The Etymologists produce under Rail, the parallel terms, as Riegel, a Door Bolt; the French Verrouil, and the Belgic Wervel. In the German Riegel we have the more familiar The French Etymologists have derived the word Verrouil from Veruculus, a diminutive from Veru, which may perhaps be the fact. The Ver in Veroquil, is certainly taken from Veru, but the Rouil may belong to the race of words now before us. the quotation produced by Menage from Rabelais, under Raillon, we find Virolets among the terms for weapons.

1 5 to 15 to

The

1080 R , $^{$

The Land-RAIL is so called, quod RADAT Terram Volando. Skinner imagines, that it takes its name from Rail; a Woman's Dress, which I have before explained. The preceding word to RAIL, Tignum, in Skinner, is a term before produced, RAGULed, "Vox Fæcialium, idem quod Ragged, (i. e.) Crenis seu-"Incisuris exasperatum." Here, as we see, is the true idea. In Scotch, To RAGGLE means 'To Ruffle, to tear the skin,—In-" architecture, to jagg, to make a groove in one stone for receiving "another," says Dr. Jamieson, who adds, "Most probably of the " same family with E. RAGGED, a term applied to stones that are "indented or jagged." The preceding term to this, is To RAG, "To Rally; also to Rate, to reproach," &c. &c.; where we are referred to Bulli-RAG. In RAG and RATE we see the simpler forms. of RAGGle and Rally; and the succeeding term is "Raghmereisle, "In a state of confusion, higgledy-piggledy; a term used in " some parts of Fife. But it seems merely local, and is now " almost obsolete," says our author. Here RAGH and REISLE have the same Radical idea, as in the words 'To Rour-Root and 'ROOTLE about.' The Rig in Righmeroll has the same meaning; and the Roll belongs to the idea of Rolling or tumbling about. The Me or Mer in these words is probably derived from an impression of the use of Me or Mer in Mire, MurMur, Marr, &c. &c. The Bully in Bulli-RAG belongs to terms of 'Commo-'tion,' under the form BL, as Bully-Bellow-Bullio, &c., which I shall shew to be derived from the idea of Stirring up the Bolos, Pelos, (Bulos, gleba, ITylos, Limus.) Dirt, Mud, &c. In the North, RADDLE is "To Banter," says Mr. Grose in his Provincial Glossary, where we have the true form RD. The succeeding word to RADDLE is Radlings, Windings of the wall. North. Called "Watlings." Nathan Bailey explains Wattles by "Spliced Grates " or Hurdles." Here we see Roil has the same sense as the Spanish Ralar, "To disturb by harsh Grating conduct, To vex, " molest."

"molest," &c. Mr. Grose explains Roll or Royle by "A hig, "ungainly slammakin, and great awkward blowze or Hoyden. "To Rolly upon one; To traduce his character. In Yorkshire, "To Roll is used to signify the tricks of a Rude, playful boy." Nathan Bailey explains To Roll by, 'To Range;' which I refer to the Welsh Rill, "An order, Rank, Row; Rhigol, A little "ditch, trench or Furrow. Mr. Grose explains Rolle or Royle in another place by "To perplex or fatigue, North."

The English ROLL, with its parallels Role, (Fr.) Ruolo, (Ital.). Rollen, (Germ.) &c. &c., is acknowledged to belong to ROTULA The Rowel of a Spur, with Rouelle, (Fr.) &c., is and Rota. likewise acknowledged to have the same origin. The Etymologists produce the Welsh Ruol; and in Lhuyd, under Volvo, we have the Armoric Rulla, &c., and the Irish Rolam. In the preceding column of my Armoric Vocabulary to that, in which, Ruilla is, we have Roll, A Rawle; and likewise Rodella, To turn or wind about; and Roy, A Wheel; where we have the true form. In the preceding and succeeding columns of Mr. Shaw's Dictionary to that, in which Rozaim, To Rell, is, we find ROITH, A Wheel; Roithleagan, A Circle, Wheel; and Roth, A Wheel, ROTHLein, "A Whirl." The form RTL brings us to RATTLE, RUTTLE, &c. To Roll belongs REEL. In the Poems attributed to Rowley, Rele is used; and it seems to be applied both to the Rolling surface of the Sea, and the Rolling — Disturbed state of the Sky, as the Clouds. In the Englysh Metamorphosis, a ship is said to appear "Soft boundeynge over Swelling azure Reles," (v. 11.) where it surely denotes the Rolling Sea; and in Ælla the same expression is used, accompanied with the Lightening and the Thunder, (529,) where it probably means the Sky. Godwin, the Queen is told by the pious King to go in, and "View "the azure Rele," as supposing, that she has no mind to pray.

Here

1082 ^R.R.^.--C, D, G, J, K, Q, S, T, X, Z.

Here probably the Heavens are understood; though the sense of it is not very manifest. In the second Eclogue, Rele is used as a verb, in a manner corresponding to REEL or ROLL. In Scotch, Role is "To Row, to ply the oar;" where it refers to the Agitation of the Water. The succeeding words in Dr. Jamieson's Dictionary are Rolk, A Rock; Rollyd, Enrolled; and Rollochin queen, "A lively young woman," &c., which he justly refers, to ROLLACK, To Romp; where we have the term of Agitation. In our vulgar combination Rolly Poley, the same idea is likewise manifest. Dr. Jamieson appears to see no connection between these words. He has however produced, under Rollochin, the Islandic RUGLA, Effutire; where we have the true form. The Rolk may belong to the simple form Rock, the Rough Crag, or it may belong to Roll, as denoting the Swelling-out object. It is not necessary to produce any more terms under the form RL; as the Reader will from hence be enabled to understand the source, from which they are derived, and the mode by which they may be referred to that source. Certain terms with the breathing before the 'R, and the organical addition l, L, will be considered on a future occasion.

R. GG, &c. RnG, RNG, RN, &c.

To Rout, Root, Stir, Turn up, about, &c. &c. - Agitation-Commotion - Noise - what is Rough, &c.

Rugchos or Runchos. (Greek,) Ris, Rin, Rostrum. (Latin,) The Snout, Beak, Nose, the Router up of the Ground.

RICTUS, RINGO. (Latin,) The Mouth, To gape, &c.

REGKO, ROGKOS, RONCHUS, &c. (Gr. Lat.) Snoring.

RUKANE — RUNCINA. (Gr. Lat.) A Saw.

Runco, Roncare, &c. (Latin, Ital.) To Root out.

aveRRunco, aRoint. (Latin, English,) To

Root out—Drive out—away,

Ronchiose. (Ital.)

Rugged-Rough.

Ronzare. (Ital.) To Buzz, Hum; | To Dig-To Polish. To Ramble, Roam.

RUNT (Scotch.) The Trunk of a Tree, originally the Root. RUNT - RIND, (Eng. Scotch, Germ.) The Stumpy animal the little Cow.

WREATH, WRITHE, WREST, WRIGGLE, WRESTLE. (Eng.) WRONG, WRINKLE, WRANGLE, WRING, WRENCH, &c. (Eng.) RING. (Eng.) To Wring or Turn about, Round, &c.

REIN. (Germ.) Clean, &c.

Rinse, &c. (Eng.) To clean æ bottle by Wrinsing or Turning it round.

Reinein. (Gr.) To File, To File off, Polish.

Rendiden. (Pers.) To clear away . Mud with a shovel or Rake-

. &c. &c. &c. .

I SHALL

I SHALL in this article consider the words under the form RnG, RNG, or RN, which have not been discussed in other parts of my Work. In the words which I shall examine, I conceive that the n was generally an organical addition to the G; and thus they may justly enough be considered as belonging to the Element RC, RD, RG, &c. We find that the organical n sometimes precedes and sometimes follows the G. In REGRUO, (Progress, Frango,) the n follows; and in some of the parallel terms to Rain in other Languages, as the Gothic RiGn, the Saxon RaGn, the German ReGen, &c., the n follows. In this latter word however, it is difficult to decide, whether the * be an organical addition to the G, or the record of the Infinitive mood. The union of the sounds represented by N and G is perpetual. We know, that in French it is peculiarly apparent, as in oN, pronounced oNG, &c.; and that in Greek the sound of n before G is expressed by G doubled; as TegGo, (Teyyo, Tingo.) In Latin, as we know, the n is adopted, as in TinGo; though we sometimes find, that the Radical form is likewise preserved. Hence we have FreGi belonging to FranGo or FragGo; TetiGi to TanGo, or TagGo, &c. In Greek, this union of sounds is applied to some of the consonants Cognate to G; and hence we have among the Grammarians, "Γ ante Γ, K, X sonat N," as TagGo, (Teγγω,) becomes TinGo, Ag Kura, (Ayruea,) Anchora, and Eg Chos, (Eyxos,) En Sis. I ought likewise to remark on the formation of this Race of words with the N after the A, that it is not always necessary to suppose the previous form of RG, as the N, that is in fact, the GG, may at once be organically attached to the R, by the same process, that the G itself is.. Thus we see, that Ronnuo and Roo, (Pannua, Confirmo, Roboro, Pow, Roboro,) may be considered as directly belonging to each other. We cannot but note, how Rome, (Paun, Robur,) is attached to these words; and we cannot but observe likewise, how Robur belongs to the same series. Thus we see, that

the R[^] might be regarded as the Radical Consonant, and that Roo, Ronnuo, Rome, Robur, are kindred terms, with the organical additions of n, m, b. I must observe however, that when these forms R₃n, more, &c. are once formed, they may be considered under one point of view, as totally distinct Radicals.

I have before produced the terms Ruccuos or Runchos, (Purxos, Rostrum, Rictus,) and REGKO, ROGKOS, (Perma, Sterto, Parxos.) or Renko, Ronchos, where we perceive, how the form RG passes into the form RN. Hence we have, as it is acknowledged, Runco, aveRRunco, Runcina, Ronchus, Ronchissa, &c. &c. In Rukane, (Punary, Runcina,) we have the form RK, with the organical addition n to the K. In Rictus and Ringo, and in Ris, Rin, (Pic, Piv, Pivos,) we have both forms RS, RN. I have before shewn, that all these words for the Nose or Snout, Rugobas, Ris, Rostrum, &c. belong ultimately to each other, and that they mean the ROUTER or ROOTER up of the Ground. In Italian, Romare is 'To Weed;' and the adjacent word is Ronchioso, Ruggen, Rough, where in the explanatory words we have the true form. I find likewise in the same column of my Italian Dictionary Ronzare, "To Buzz, "Hum," and "To Ramble, Rove;" where we have at once the idea of Noise and of an Agitated Motion. In Mr. Shaw's Galic and Irish Dictionary we have Roncam, To Snore. I shall not attempt to produce the various words under this form relating to Noise, Agitation, &c., as the Spanish Roncar, &c. &c., which are acknowledged to belong to this source. The term of superstition Averruneo or auRunco, is referred by the Etymologists to Runco; and hence we have our old English word Arount or Roint applied on a similar occasion.

As Root, under the form RT, is the substantive of the verb "To Root up," &c., so under the form RN we have Runt, as a substantive, belonging to Aroint, Runco, &c., In Scotch, Runt

RUNT means "The Trunk of a tree.—The hardened Stem or Stalk " of a plant," as Dr. Jamieson explains it; who observes on this word, "Sibb. derives it, without any probability, from Root. It is " perhaps radically the same with the German Rinde, bark; also "crust; for what is a Runt, S. but the stalk hardened into a sort "of bark?" The term Rinde or Rind will be considered in a future page. Runt meant, I imagine, originally the Root of the Tree; and then the Roor-like substantial part, and it belongs to Runcino, &c., just as Roor the substantive belongs to the verb 'To Roor out.' The explanatory word Stem means, we know, the Stalk and the Stock or Stump of a Tree. The succeeding word to Runt in Dr. Jamieson's Dictionary is a word under the same form Runt, "An old Cow," and in English "An Ox or Cow of "a small size," as this Lexicographer explains it; who justly refers the word in these senses to the Belgic Rund, a Bullock; and the German Rind, An Ox or Cow. Dr. Jamieson imagines, that the English and Scotch senses of the word are "evidently " quite different;" yet the Reader will now understand, that they both contain the same fundamental idea of the 'little Stumpy 'animal,' either as referring to its original diminutive size, or as denoting 'what is worn down to the Stump,' as we express it. Dr. Jamieson does not seem to understand, that Runt, "the Trunk " of a tree;" and RUNT, "An old cow," have any relation to each other, though he gives us, as a secondary meaning of both words, the sense of "An old Woman."

The term Rine, (Para, Lima,) A File—the Scratcher upon a surface, belongs to Rin, (Para, Nasus,) just as Runcina, A Saw or Plane, belongs to Runco. The Greek Rion, (Para, Montis cacumen, promontorium,) the Projecting Promontory, is derived from a metaphorical application of Rin, (Para,) the Nose, which projects from the face. This metaphor is perpetual. Rinos, (Paras, ou, Pellis, cutis, corium;—Clypeus, scutum,) might originally denote the Shield.

Shield, and be derived from the idea of that, which was Projected. before the person for its defence; and in that case the Skin or Hide, as denoting the usual materials, of which the Shield was made, would be its secondary sense. We shall find however another idea, from which the term may be derived. In Welsh, RHÝN signifies "A Mountain, a hill, a cape, a promontory," says Mr. Richards; who proceeds thus: "In the Highlands of "Scotland, it is Run, as our Din or Dinas is their Dun. RHŶN, " perhaps signified anciently a Nose, as the Greek Pin, Rhin. To " this Rhyn answers the old English Ness, as in Sheerness in the "Isle of Shepey, Cathness in Scotland, &c. And a promontory is " called by the same word, as Nose, in other Languages. Hence, the " compound Penrhyn, our most common word for a Promontory." I have shewn in a former part of my Work, that WREATH, WRITHE, WREST, WRESTle, are derived from the action of Stirring up the EARTH (p. 609.) I have supposed, that WRENCH, Wring, with their parallels, are quasi Wriggt, Wrigg. I have imagined, that Ring, the Circle, is that, which is Wrung or Turned round, just as WREATH, in its gentler sense, belongs to WRITHE, the term of Violence. The verb 'To RING, (Pulsare, 'Tinnire'); Hringan, Ringan, (Sax.) &c. &c. is the Noise made in the violent action of WRINGING. I have shewn, that WRINKLE, with its parallels Wrincle, (Sax.) Runtzel, (Germ.) &c. relates to the Surface made Rough or Corrugated, by WRINGing or Furning up that Surface; just as Rugosus or corRugated denotes the Surface made Rough by throwing it up into Rugze or Furrows, i.e. Ruts What is Wrong is that, which is Wrung—Turned aside, or Perverted from its true course; and hence we have the word produced by Junius WRENCHES, "Deceitful Tricks, frauds." In Saxon, WRING, sc. Eagas, is "Ictus oculi;" which means the "WRINGing or Turning about of the eyes," The WREN, Regulus. Trochilus, belongs to Wring, To Twist or Turn about, for the same

same reason as it is called *Trochilus*; and from the name of the Bird, the Saxon *Wræne*, Libidinosus, is derived. Wrangle is a term of *Agitation*, denoting Strife, &c., belonging to the same idea of *Twisting—Turning* or *Stirring* about, as in the action of Contention. The Etymologists, under Wrench and Wring, justly refer us, among other words, to the German Ringen, which my German Lexicographer explains by "To strive, struggle, "*Wrestle*, fight, contend." In the explanatory term Wrestle we see again the sense annexed to the action of Wresting—*Turning* or *Twisting* about.

Wachter explains Ringen in various articles by "Flectere, " torquere, stringere. Anglo-Saxones dicunt Wringan, Belgæ "Wringen, Angli, To Wring; -Luctari; -Pugnare, certare, Vin-"cere; Lucrari;" where we have the same fundamental idea. In 'Lucrari' we still see the sense of 'Wringing something from 'a person.' In German, Ring, or ge-Ring, signifies "Mean, sorry, " pitiful," &c.; which belongs to Ringen, and denotes the person in a 'Wrung, Reduced state,' and need not be referred to Pyrow, Rumpo, as Wachter conjectures. This Lexicographer explains Ring in one sense by "Annulus, Concilium procerum, consessus " judicum. Solent enim, qui rei publicæ causâ conveniunt, Circulum " facere considendo. Gloss. R. Mauri: proceres Hringa." To this idea he has justly referred the Italian Rengare, Arengare, Aringare, the French Haranguer, to which belongs, as we know, the English Harangue. In HARANGUE we have a breathing before the AR, as in Hringa, Wring. We cannot but note, how the Harang, Hareng, the fish called the Herring, agrees in form with Harangue; and we shall now understand, that the HERRING is denominated from its Pickled state, or Pungent quality, as denoting that, which WRINGS, Pricks or Excites the palate. We know, that Pickle and Pungent belong to a similar metaphor.

In Shakspeare, WRITHLE, and in other ancient writers,
WRIZLE

WRIZLE, occurs for Wrinkle, "This Weak and WRITHLED Shrimp," (First Part of Henry VI. A. II. S. 3.) In Scotch, WRINGLE is well explained in Dr. Jamieson, by "A WRITHING motion," to which he adds, "either allied to E. WRIGGLE, or to the follow-"ing word." This word is WRINK, WRYNK, which he again properly explains by "A Turning, Winding .- A Trick, a fraud, " subterfuge;" and justly refers to the old English word Wrenche, the Saxon Wrenc, fraus, dolus; and the German "Rancken, " Rencken, To Bend, Turn." The adjective WRINKLIT, "Intri-"cate, having many turnings," the succeeding word in Dr. Jamieson's Dictionary, is applied by Gawin Douglas to the Labyrinth* of Crete. It is curious to observe, how by a just impression the mind is directed to the original idea conveyed by a word, and how precisely the imagery of the Poet unfolds and confirms the conjecture of the Etymologist. In the following passage, the origin of the term Wrong is most accurately define&,

^{*} I suspect, that the word Labyrinth itself is of Teutonic origin. We might conceive it to be compounded of Laube, (Germ.) the Leafy Spot-the Arbour, &c. &c., and of RINTH, RING, &c. &c. Winding. In the Teutonic Dialects, Loub means a Leaf, and Laube, &c. signifies any Place covered with Leaves-An Arbour-Wood, &c. 'Umbraculum, pergula frondibus cooperta; -- Casa, tugurium, ex frondibus et ramis arborum contextum.—Silva, &c. &c., as Wachter explains it. Various compounds of this word Loube are familiar in the Teutonic Dialects, as 'Loub=Hutte, A Tent,' &c. It is curious, that the German term for a Labyrinth is a combination, precisely coinciding in sense with that, which I have imagined, as Irr=Garten, the Err=Garden, the Garden in which persons Riv or Wander. I must add likewise, that in a Teutonic mind the idea of some Leafy-Rural-like Spot, as of a Bower-Arbour-Garden, &c. is certainly connected with our conceptions of a Labyrinth. Perhaps we might conjecture, that the YRIN in Lab. Trinth, belonged directly to ERREN, and then the compound would be LAUBE=ERREN. I must leave this point to be adjusted by the adepts in the more ancient forms of the Teutonic Dialects; yet I persuade myself, that I am not very remote from the source of this word, and that a combination will be discovered, which will confirm my ideas on this subject.

fined, as denoting what is WRESTED or Perverted from its proper state, or its due and right course:

"And I beseech you,
"WREST once the law to your authority
"To do a great right, do a little WRONG."

The English Round, and its parallels, as produced by the Etymologists, Rond, (Fr.) the Teutonic Rundt, Ronda, (Ital. and Span.) Tonda, (Ital.) Raund, Clypeus; Run, Rond, Umbo, &c., are supposed to belong to the Latin Rotundus. If that should be the fact, they ought not to be considered as directly connected with the race of words before us. They might however be attached to such terms as RAND, the Bounding RINGE, or to RING that which is RINGED up, or WRENCHED up, if I might so say, Turned up-about-over, or Round, so as to en-Ring, or sur-ROUND. The RIND of any thing seems to signify, that which The Etymologists have referred us to the Saxon sur-Rounds. Rind, the German and Belgic Rinde; and they have produced likewise the Greek Rinos, (Piros, Pellis,) and Ren, (Pnr, Ovis, q. d. Pellis Ovina,) and the Saxon Reon, Stragulum. These words may all belong to each other, under the same idea of that, which sur-Rounds. We ought to remember, that Rinos, (Pivos, Pellis, Clypeus,) means likewise a Shield; which sense appears to connect the Greek term directly with the Danish Raund, Clypeus. If this should be the true relation of the above words, RINOS, (Pavos, Clypeus,) is not directly derived from Rin, (Pav, Nasus,) as denoting the Projecting object, but the one should be referred to the other, as containing the same fundamental idea; namely, that of Turning up-over-about, or Round about here and there, or Routing up, and that of Turning Round about or sur-Rounding. In the Celtic Dialects the term for the RIND appears under the form RS, &c. In Welsh, Ruise and Ruisel signify the Rind or Bark;

Burk; and in Cornish and Armoric, Risk and Ruisken have the same meaning. In Mr. Shaw's Galic and Irish Dictionary we have Ruiscam, To Strip, peel, undress; and the terms succeeding this are Ruiscam, "To smite, strike, pelt;" and Ruisam, "To "tear in pieces;" where we perceive, that the action of Peeling off the bark is attended with terms of violence, just as Rend is attached to Rind. In the same column of Mr. Shaw's Dicationary I find Ruisc, Ruscan, "A Vessel made of the Bark of "trees;" and so in Welsh, Riscen is "A sort of deep Dish." This may remind us of the Greek Riskos, (Pionoc, Riscus, Cista pelle inducta.)

The sense of Cleaning or Clearing has been perpetually derived from the idea of Clearing off the unnecessary or encumbering Dirt, &c. upon a Surface by the action of Turning or Stirring it about. Hence we have the term RINSE, and its parallels, produced by the Etymologists, as the French Rinser, the German and Belgic Rein, the Armoric Rincal, the Islandic Hreinsa, and the Gothic Hraingan, Mundare, &c. &c. In the phrase 'RINSE a 6 Bottle,' sometimes called 'RENCH or WRENCH a Bottle,' we see the peculiar sense of the word; as the term, we know, directly means 'To Clean a bottle by the process of Wringing or Turning it 'about.' In the phrase 'To WRING wet cleaths,' we have the same process, though in a stronger sense, of WRINGing—Turning or Twisting them about, in order to Clear away or Remove the unnecessary water. Junius, under RINSE, produces the Greek Rainein, (Pawer, Aspergere,) and Ransis, (Pawers, Aspersio.) this Greek word does not convey the precise idea attached to Rinse, it must however be referred to the same action of Stirring up or about, so as to Bespatter-Sprinkle, &c. preceding article to RINSE, in the Etymologicon of Junius, is RINK, Homo, produced by Lye, which he refers to the Saxon

Rinc, "Strenuus, miles; - Vir, Homo," and to the Islandic Reckur, a term of the same meaning. These words denote probably the wRencher—the Strong, powerful personage; or under the form RC, RT, &c. the ROUTER. In the preceding column of Lye's Dictionary we have RIKGan, (Goth.) RASTRO, " colligere, congerere;" which brings us to the genuine idea of ROUTING about. As RINSE connects itself more directly with the idea conveyed by Wrench or Rench, so RACK, in the phrase 'To RACK off wine,' might seem to be more immediately attached to a term under the same form, RACK, in its more strong sense of 'To Twist or Torture,' as it were. Thus it would appear, as if 'To RACK off wine,' was intended to express the diligence, with which the Wine was endeavoured to be Extracted or Forced from the Dregs-'Vinum quasi Torquendo fæcibus Exprimere.' We see however, how 'To RACK off wine from the Dregs,' brings us to the original idea, 'To RAKE off or away Dirt.'

My German Lexicographer explains Rein by "Clean, pure, "neat, free from Filth; and Reinigen, To clear, cleanse, purify; "Erzte Metallen Reinigen, To try or refine metals, clear them from dross;" where in the phrase of Clearing Erz, Metal or Earth, the word is brought to the original spot, supposed in my hypothesis. Wachter, in the sense which Rein bears of Callidus, produces the Greek Rinein, (Pana, Polire,) which is indeed a kindred term, where we have the very idea of Scratching upon a surface. In another article of Wachter we have Reinein, denoting Tangere, where we still see an action performed on a Surface, though of a different kind. In a passage produced by Wachter, this term expresses the most violent action of Touching or Striking on a Surface; as it is applied to a Hatchet, Destroying whom it Strikes. Reinen, in a different article signifies Castrare, which

which Wachter refers to Runcinus, "Equus Spado, sen Canthe"rius." I have supposed in another place, that these terms for
a 'Horse,' as Runcinus, Rouncy, Roxinanis, &c. &c. are attached
to a different idea; yet some of them may perhaps belong to the
notion supposed by Wachter; and we cannot but note, how the
form Runcinus connects itself with that of Runcino, To Eradicate/
where we are brought to the Spot, supposed in my hypothesis.
I conceive, that the Runcine Reinen conveys precisely the same
idea as the Runc in Runcino.

Let us mark the explanatory word Castrare, which I shall shew in another Volume to belong to such terms as Cast, &c., and that it originally signified / To Cast put-up or away, as 'Dirt,' &c. Hence we see that Castrum is mothing but the substantive to the verb Castro, and that it means the Cast out Dirt, as denoting the Ditch or Mound, made for a fence or guard: Hence too, we have Castus, Chaste, which signified originally that, from which the Dirt is Cast out or Removed, what is Cleansed; Purified, Pure. Thus, then, Chaste and Castrare have the same relation to each other, which we see in the two senses of Reimen, Castrare; and Rein, Purus, mundus, a sordibus purgatus. The word is brought to its original idea in the expression. To Cast 'a Pond;' i.e. To clear it of Mud: One sense of the word Castrare, as given by Robert Ainsworth, is To Retrench, where in Trench, which I conceive to be the meaning of the substantive Castrum, we see the original idea. It is curious, that the word Intrenchment in English is applied to a Camp; and in French, Retrancher means at once "To Retrench, To cut off, to pare "away;" and "To Intrench a Camp," as the Lexicographer, now before me, Deletanville, explains it. So uniform are the operations of the Human mind in deriving the same object from the same train of ideas. The coincidence of the Persian Language with

with the German has been perpetually observed; and we shall find in the Persian form of Speech a term, which directly connects itself with REINEN and RINSE of the Teutonic Dialects, and which will unequivocally point out to us the source, from whence they are derived. This term is נטענין Rendiden, which Mr. Richardson explains by "To polish, to smooth, to chip or "hew with a hatchet;—To Clear away Mud with a Shovel or "Rake;—To plaster or smooth with a trowel, to Rasp, to Grate, "to Saw, to Dig, to carve, to engrave." I could not have devised a term which so fully unfolds and confirms my hypothesis, respecting the original sense, which I have conceived to be annexed to this race of words. Mr. Richardson has likewise here adopted two terms, RASP and RAKE, which belong to our Element under the form RS, &c. We see, how the sense of RENDiden, To Rasp and to Polish, agrees with that of the Greek Rineo, (Press, Lima polio, Limo.) Let us mark the explanatory terms Lima and Limo, which belong to Limus from the same idea of Clearing away the Dirt. Inevitable as this relation should seem, it appears not to be acknowledged by the Etymologists. Some derive Lima from Pany; and others from Limus, Crooked, &c., "quod obliquis aciebus secat." Hence we have Limpidus, Clear, Limpid, &c.; and the Greek Lampo, (Auumo, Luceo,) Lampas, (Λαμπας,) the Lamp, &c. &c. In the same column of Mr. Richardson's Dictionary, where the Persian Rendiden, 'To polish, to 'smooth, to chip or Hew with a hatchet,' &c. occurs, we have the familiar word in that Language, Colour: Renk or Rung, Colour: which we shall now understand to be derived from the idea of Shape - Form - Appearance, &c., as produced by the action of Polishing a surface, just as Hew or Hue, Colour, belongs to the explanatory word Hew-To Hew with a Hatchet. In the same column. column we have "Renjiden," To be sad, to be melan"choly.—To be angry, enraged, to be filled with indignation;"
which is only a metaphorical application of the idea annexed to
the action of Rasping or Grating upon a surface. The succeeding
term to this is the Persian Renjin, A Ploughshare,
which brings us to the very Spot and operation supposed in my
hypothesis. Wherever we turn our eyes, the same strong confirmations still present themselves of that universal action, to which
Languages owe all their peculiarity of force and meaning.

The second of th

RN, denoting the Balk, RIDGE, RIG or Furrow, &c.—a Row, REIGE, (Eng. Germ.) Order, as derived from Recurring— Regular RIDGES, &c.

REIN, &c. (German,) A Balk or RIDGE between two Furrows.—The boundary of a field; i. e. the Boundary of the Balk.

Ringe. (Norfolk,) A Row, as relating to the

Ridges or Furrows of a field, &c.

RINNE. (German,) A Channel, Kennel.

Run, Rennen. (Eng. German,)
The Course or Motion of

Water, &c. in the Rinne or Channel.

RANK, ARRANGE, RANG, &c. (Eng. Germ.) What belongs to the recurring Ringes, or Rows, &c.; and hence Order, &c.

RHANN—RHENG. (Welsh, Arm.)

A division of Lands, Rank,
a Streak.

RHINT—RHEWIN. (Welsh,) A Notch, a little gutter, where water runs.

Ruine—Ruinn. (Gal.) A Streak, Division.

RANC, RAINNaim, (Gal.) Rank, To divide.

RION—RIONaigham. (Gal.) A Road; To carve, engrave.

In one article of Wachter we have Rein, Rain, Rainung, "Margo Agri, Agrum claudens, et limitans, et liberam transeuntibus semitam relinquens," as our author explains it; where we are unequivocally brought to the Spot, supposed in my hypothesis, whatever may be the precise meaning annexed to the word. The Ran however appears to have denoted originally the Separation, made by the Excavated Furrow, or its attendant Ridge; and it seems particularly to refer to this latter idea. In the Norfolk Dialect.

Dialect, RINGE means the Row, either as relating to the Hollow. or the raised RIDGE. Mr. Grose explains RINGES by "Rows of "Hay, quick, &c. Norf.;" and in the same page of his Glossary we have Riggen, "The Ringe of a house. North.;" where the n is an organical addition after the G, as it is in Ringe before it. The preceding terms to Ringe, in Mr. Grose, are "RINE, TO RINE; to touch or feel. North.;" where we have the sense of the German Reinen, Tangere, before explained, and Rin, "Brine. Norf.;" which means probably what makes a person Feel from its Pungency-What Vellicates; where we come nearer to the original idea conveyed by this race of words of Stirring up—Exciting, &c. Mr. Grose has another article, REAN, which he explains by "A dale or Rig in a field. North." My German Lexicographer explains RAIN or REIN by "A Balk or RIDGE "between two Furrows or Plough Fields;" where we are brought to the genuine idea. Let us mark the term Balk, which refers, as we know, to a Beam likewise. This will explain to us, why "RANNel Tree means, as Mr. Grose explains it, a "Cross-"Beam in a chimney on which the crook hangs; sometimes called "RANNE=Bauk. North." The terms directly adjacent to this word in Mr. Grose, under the form RN, are RANDY, "Riotous, "obstreperous, disorderly. North.;" where we have a term of Violence, as in Rend, and likewise "RANISH, Ravenous, Exm.;" and "RANNY, The little field-mouse. Norf.;" where we come to the original idea of Scratching-Fretting, &c. In the same column we have RATTEN, A RAT; where the n is an organical addition after the Radical. The idea, from which RATTEN, the RAT, is derived, will be manifest from the succeeding term "RAUK, A RAUK with a pin; a Scratch or RAKE " To Scratch. "with a pin;" where the original notion is unequivocally exhibited.

The primitive meaning of the German Rein, &c., with its 6 z parallels,

parallels, and the connexion of such words with the form RG, will be likewise illustrated by considering a term which occurs in the same opening of Wachter's Glossary. This term is Reige, which is explained by "Linea, Sulcus literarum, vel numerorum, "Gallis Raie, Italis et Latino-Barbaris Riga. Proprie est linea "Incisa, vel ex Incisione facta;" where we see in Sulcus the true idea. Wachter adds, moreover, the Celtic terms Rhygn, Incisura; Rhygnbren, "lignum oblongum, in quo inciduntur numeri, Rygnu, "Serrare;" and he justly compares them with the Greek Rege and Regnue, (Payrow, Rumpo.) In these terms with the organical n after the G, &c. we see how the form RG has passed into that of RgN or RN, or how such terms as RaygN, &c. may become RHYN. In the same column of Wachter we have Reihe, Reyke, and Reise, which he justly refers to each other, and explains by "Quatenus Lineam notat, eleganter transfertur ad "Seriem et ordinem rerum quarumcunque." To these words belongs our term Row, which our Glossarist should have produced. Wachter has justly observed, that Luther applies Reige to the Strigæ Agrorum—that in Welsh, RHYCH means Sulcus, in Barbarous Latin Riga, in French RAIE de charrue; and that from hence we have the Barbarous Latin words Riga, Plica; Ruga; Platea, Vicus; and the French Rue. He exhibits likewise the Saxon combination, "Stæf-Ræwe, Alphabetum, ordo litera-"rum." The same Etymologist produces next to Reige the term Reiger, "Ardea, avis Diomedia;" where he supposes, that the Latin Ardea is so called "ab Arduo volatu;" and that the German word is derived from Reige, "ab Ordine volandi," The Ardea might belong to Ordo for the same reason.

Wachter might have produced as parallel terms to Rein, &c. the German Rinne, "A Channel, or Kennel;" where we have the original idea of the Excavation, Furrow, &c., and Rand or Ranft, which signifies, as my Lexicographer explains it, "The Rand, "utmost

"utmost part, extremity, margin, edge, side, brink or brim of a thing." Let us mark the term Rand, as an English word, which Lye explains by "Crepido, Margo," &c., and refers us to Belgic and Islandic words under the same form. The Etymologists understand, that our English word Run, with its parallels Rennen, (Germ.) Render, (Dan.) &c. &c., and this German term Rinne, belong to each other; though Wachter considers the verb, as supplying the original idea. These words, denoting the Excavation, and the motion performed in it, belong to each other, just as Rut, Road, Race, &c. are terms attached to the same series, under the form RT, &c.

We have seen, under the form RG, as REIGE, &c. to which Row belongs, how the idea of a certain Series or Order is connected with that of Recurring Lines, Furrows, &c.; and we shall now be prepared to understand, that our term RANK belongs to the same idea, under the form RN. We shall see, that the words denoting RANK or Order, RANGE, ARRANGE, &c., under the form RN, belong for the same reason to such terms as REIN, RINGE, the Balk or Row, &c. The Etymologists refer RANK, Ordo, to the Belgic Rancke, Ordo; Rencken, Flectere; the French and Swedish Rang, the Spanish Renglera, and the Welsh Rheng, Menage derives Rang from the German Ring, Annulus; and we see that they belong to each other, under the idea of that which is Stirred up or over-Turned up or over, as the Regular RINGE, Furrow, Balk, &c.; and of that which Turns over or Environs, as the RING. In my German Dictionary the succeeding word to Rand and Ranft is RANG, the RANK, Place, &c. adjacent term is RANZen, "A foot-traveller's pack, serip, budget sor satchel;" which means either what Encloses or Rises up. In Welsh, RHANN is "A part, or portion, a share," says Mr. Richards. "So in Arm. A division of Lands into shares among brothers." In the same column we have RHANDWY, "A Part or portion;" and

in the succeeding page we have RHENG and RHENGC, A RANK, a Row, Streak; where in Streak we see the true idea. In Welsh too, RHINT is a Notch; and Rhewin, "A little gutter, wherein "water Runs." The preceding term is Rhewiniaw, "To Ruin;" which must be referred to the terms of Violence, Rend, &c. Let us mark the word Ruin, derived from the Latin Ruina, which should be considered probably as directly attached to Ruo, from the analogies of the Language. Again, in Welsh, Rhill is "An "order, a Rank, Row;" which belongs to our Radical RG, and is quasi RGL. This however is not a mere conjecture. The preceding terms are RHIGWM, A long Row; and RHIGoli, 'To "Hollow into trenches or Furrows;" Rigol, "A little ditch or "trench, a Furrow," as my author explains them. These words I have examined on a former occasion, and referred to them the term Rill, &c. In Mr. Shaw's Galic and Irish Dictionary we have RAINN, a Division; and the preceding word is Rainnesidhe, Ranges, Ranks. In the succeeding column of Mr. Shaw's Dictionary we have Ranc, Rank, Order; Rainnaim, To divide, share; and Rann, "A part, division, song, genealogy;" and in another article, "A verse, stanza, section, a song, poem." Here it should seem, as if the notion of a Song-Poem was taken from that of Division into its various parts, as Stanzas, &c.; yet I shall produce on a future occasion a race of words belonging to the form RN, which denote Noise; and to this idea the sense of a Poem, &c. might belong. In the same column we have Rannan, "The "Lowing of a Deer;" and Raona, "Breaking, Tearing;" where we have the idea of Noise and of Violence, such as we shall see in REND. &c. To Stir up.

In the same column I find likewise RAON, A Field, Plain or Green;—RAONADH, A Way, Road, haunt; and RANG, RANGAN, A WRINKle; where we are brought to the Spot, and train of ideas, supposed in my hypothesis. The same terms RANG, RANGAN,

RANGan, mean too "The bank of a River," either as signifying Winding-Turning or Wrinkled, if I may so say, in their direction; or they may denote those objects, which serve to keep the River Separated or Parted off from the adjacent land, as within its due RANKS or Bounds. I have here, as I imagine, unfolded to the Celtic Scholar the true sense of the Element RN, and he will be no doubt able to unravel the original meaning of various words, which appear under the same form. I must add moreover, that I find in the same Dictionary of Mr. Shaw the terms "Ruine, "A Streak; Ruinn, A Division; Ruinnecc, Grass," succeeding each other, in which we see my idea confirmed respecting the relation between the Streak or Line and the Division; and we are moreover brought to the very spot, supposed in my hypothesis. Again, in Mr. Shaw's Dictionary, we have Rionaigham, "To Carve, Engrave;" and Rion, A way, Road," I find in the same column of Mr. Shaw's Dictionary, where Ruinn is, terms belonging to the form of our Element RT, coinciding with the sense attributed to that Element, as Ruitham, To Run; Ruith. Running; and likewise "An army, Troop;" which corresponds with the words Ruta, "A Herd; Rout, a Ram, and a tribe of "people;" where we see, that the word Rour has been properly adopted. The terms preceding these two latter words are Rustan, "A lump, Hillock; Rustach, A Boor, Clown, Churl; and "Rustaca, Rude, Rustic."

These observations will unfold to the Spanish Scholar the origin of various words, which appear in that Language, under the form RN. Rincon means a "Corner, an angle formed by "the meeting of two walls.—Place of privacy or retirement.—"House, Dwelling;" which means simply, as I imagine, 'The Spot Separated and Divided from other parts.' In the same column of my Spanish Dictionary we have Ringlera, Row, File;

where

1109 ^R. R.^.—Ç, D, G, J, K, Q, S, T, X, Z.

where we perceive the idea of the Line connected with Order and RANK. The succeeding word is RINGORANGO, "Flourished, formed "with a pen.—Extravagant nicety in point of dress;" where we have still the idea of Lines nicely formed or RANGED with Order and exactness. The terms are doubled, RINGO—RANGO, in order to make the idea more forcible. In the same column I find RINA, "Quarrel, Scuffle, Dispute;" which belongs to the race of words, denoting Commotion—Violence, &c., as in the German Ringen, To Strive, struggle, Wrestle, &c. &c. In the next column of my Dictionary, we have RISTRA, "A Row, file; a series of things "following one after another;" where we have the genuine form RS, and likewise "RIXA, Scuffle, dispute, disturbance;" where again we have the true form.

We have seen, that RHENG means in Welsh "A RANK, Row; " a Streak;" where in Streak, as I have observed, we are brought to the genuine idea of the Trace or Line. Mr. Richards adds to this word the Armoric Rhengen, "A Rhein;" where let us note the word Rein, which we shall now see signifies simply the Line. In the old French term Resne, the second letter of the Radical is preserved, and we there see likewise the organical addition of the n. In the modern term Rêne it is lost, as in the English Rein; though the I remains as a record of the lost consonant J. In Italian we have Reding; and all these words the French Etymologists derive from Retina, and that from Retineo. The Latin Retina, "The " coats or tunicles of the Eye, like a Net," is justly derived from RETE, which means nothing but 'The Line-formed object—that which is made up of RADII -Lines or Strings lying in a certain order.' The French Etymologists, under Resne, have produced moreover the Greek Ruter, Ruta, or Reteina, (Puthe, Puta, Petena.) The word Ruter, (Purge, Retinacula, Habena;—Custos, Defensor,) occurs in Homer, as the Lexicographers understand, Ex & Purseon τανυσθεν : Trano.) The adjacent word Rustano, (Puralo, Trano.) To Draw or Dray, brings us again to the same idea of Drawing Lines or Traces upon the Ground. Ruter, (Puralo) perhaps means rather the Drawer, than the Line Drawn, or Line in general. The adjacent word to these Greek terms is Rutis, (Puralo) Rusa, the Line or Furrow. The Lexicographers derive Rustano, (Puralo) from Ruo, (Puw, fluo); where, as in Eruo, (Equa.) we have the form AR, RA.

The observations which I have above produced on the various applications of the Ringe—the Balk, Ridge or Rig, under the forms of Rein, Rand, &c. &c. will illustrate to the Scotch Antiquarians the origin of a combination familiar to their Language, the Run=Rig. In this compound we have both forms RN, and RG, referring to the same object, and conveying the same fundamental idea, whatever may be the precise turn of meaning annexed to Run, as relating to its kindred term the Rig. " said to lie Run=Rig," as the Scotch Lawyers inform us, "when "the alternate RIDGES of a field belong to different proprietors." (Erskine's Institut. &c.) Dr. Jamieson, who has produced this passage, observes, that "the name seems evidently derived from "the circumstance of these lands or Ridges Running parallel to "each other." This explanation is curious; as it will shew us how the mind may be entangled in the toils of Language, and how a just impression of the original meaning annexed to words, may direct us to what is right, through the medium of what, on the first view, is manifestly and palpably wrong. The sense which Dr. Jamieson has annexed to the substantive Run, does not, as it should appear, at all exist in the verb of motion To Run, any more than it does in other verbs of motion, but in the term Parallel. which our Etymologist has been pleased to add, in order to express the very point intended to be enforced. Yet I have shewn, that Run is itself attached to this race of words, and that it belongs to

the idea of the Hollow Channels, or Parallel Furrows, from which the Rings or Rigs or formed. Thus it is, that Run recurs to its primitive idea in the phrase "To Run Parallel;" and hence it was, that this combination originally existed.—If Run in Run=Rig relates to Parallelism, we must refer it to the Rings or Rig, under the sense of Rank. Yet this is surely not the precise idea annexed to it in this case, as Parallelism is a general property of Recurring Rings, and does not describe the peculiar circumstance belonging to this tenure. Run probably means the Rein, &c. the Boundary or Bounding Rings; and thus the Run-Rig is that disposition of Lands, where every Rig is a Run or Boundary, or has a Bounding Rings or Rid; that is, where every Rig is, as it were, its own Boundary, or has its own Boundary.

The terms, which precede and follow Run in Dr. Jamieson's Dictionary, are Runches, Rund, or Roon, Rundge, Rung, Runk, Runkle, Runt, which all convey the same fundamental idea, and belong to the terms already unfolded, however various the application of that idea may be: The term RUNGHES denotes Wild Mustard, as applied both to the "Sinapis Arvensis et Raphanus Raphanistrum;" and Runt means the Trunk of a Tree. I have shewn, that Runt, signifies the Root, and belongs to Runco, &c., just as Root belongs to the verb 'To Root or Rout up.' Runch is only another form of RUNT, denoting the Root: In the quotation, produced by Dr. Jamieson, we have "On Ruits and Runches in the field." shew, that Raphanus belongs to Rapio, Rip, &c. &c. To pluck up for a similar reason. The Raphanistrum is called by my Botanical Guide, "Bastard Radish, or white or yellow-flowered Charlock;" where the term Radish belongs, as we know, to Radix, the Root. Another Scotch term, corresponding to Runches, is Skelloch, which Dr. Jamieson has justly referred to the Irish Sgeallagach; and he has moreover seen, that the English Charlock, (Cerlice, Sax.) has "some resemblance" to it. The Skelloch is derived from

from a similar idea of Plucking up, Routing up, &c. In the same column of Mr. Shaw's Celtic Dictionary, in which "SGEALLAgach, "Wild Mustard," occurs, we have SGEALp-am, "To tear, rend, " split, to Pluck, snatch." The next article to Skelloch in Dr. Jamieson's Dictionary is a word under the same form, which he explains by "To Cry with a shrill voice;" and to which he has justly referred the English Squeal, Squawl, &c. The verb Skelloch is nothing but the Noise made by Scratching up, Tearing up a surface; and thus 'To Skelloch' belongs to Skelloch, the substantive, just as Ronchus, Ronchisso, Ronzo, &c. To make a Noise, belong to Runco, Runcina, &c., (as I have before shewn,) and consequently to Runch, Runt, &c. &c. I shall prove in a future Volume, that Squeal, Squawl, &c. &c. belong to Skail, (Scotch,) "To Skail "a Ric;" Scale, (Eng.) To Scratch up a Surface, &c., and ultimately to Skallo, (Σκαλλω, Fodio, Sarculo circumcirca Sarrio); and thus we see, that, wherever we turn our eyes, every part of Language is uniform and consistent.

Rund or Roon means "The Border of a Web, the salvage of "broad cloth;" which Dr. Jamieson has justly referred to the German Rand, the Islandic Rond, Raund, "Margo, extremitas;" which I have before explained, and which is the very sense, annexed, as I imagine, to Run in Run=Rig. The word Rundge has been explained by "To Range and gather;" though Dr. Jamieson justly doubts of this interpretation; and he explains it by "To Gnaw, to consume," as belonging to Rounge, Ronged, "Gnawed, Fretted, worn away, Fr. Rongé, id." Here we have the very idea of Scratching or Fretting upon a surface. In the quotation, produced by Dr. Jamieson under Rundge, are described persons who heap "Up to themselves grit store, By Rundging" and spunging" the poor. Thus, then, Rundge and Rounge are the verbs, metaphorically applied, of which Runche is the substantive, just as 'To Root up, Rout, To Tear up, to pull to

pieces, &c. belong to Root, the substantive. Rung means "Any long piece of wood; but most commonly a coarse, heavy "staff," says Dr. Jamieson. This seems on the first view very remote from the train of ideas, which I am now unfolding; yet we shall at once understand its relation to the race of words, now before us. Our author has well inserted in his explanation Long—Coarse and Heavy, as applied to the piece of wood specified; and he produces a passage in which we read about "Quhen "Rungs wes laid on Riggis;" where, as Dr. Jamieson observes, the word "evidently signifies any rough poles or pretty gross "pieces of wood, as the cross spars of barns." I have already shewn, that RANNE=Bauk means "A cross Beam in a Chimney;" and this is the sense of Runo. The Ranne and Rung belong to the RINGE, or Balk, just as Balk, or, as it is here written, Bauk, means at once the Balk in the Field, and a Beam. The term Riggis itself means the Ridge or Top of the Building, as derived from the Ridge, Rig of the Field; and thus we see, how similar terms Rungs and Riggis are again brought in contact with each other, as in Run=Rig. It is marvellous to observe, how congenial words are associated with each other. "To Runk means," says Dr. Jamieson, "To deprive one of what he was formerly in " possession of, whether by fair or foul means; as, in play, to take "all one's money." Our author refers this word to the Islandic Reinki, Crafty, &c.; and I have before shewn, that those terms under the form 'RNK, RNK, &c., which express a Crafty, Wily conduct, such as WRONG, WRENCHES, Tricks, Frauds, are taken from the idea of WRENCHING up, Turning or Twisting up or about. Yet Runk probably belongs to a similar idea which we find in RUNDGE, To Rout or Tear up, lay Waste, Spoil, Plunder, &c. The succeeding words in Dr. Jamieson's Dictionary, are RUNK. Wrinkled; To RUNKLE, v.a. RUNKLE, A Wrinkle; where in RUNKLE we see the form of the English WRINKLE, and in RUNK we have the the simpler form. These words unequivocally bring us to the idea, supposed in my hypothesis, as in Runk we manifestly recognise the RINGE, with the same relation to each other, as RUGA means at once the Wrinkle, and the RIDGE or RIG. Furrow, &c.

I have supposed, that RANK, ARRANGE, as relating to Order, belong to the Stirred-up-Raised-up RINGE. Under this application of the word, we seem only to perceive that portion of the idea, which relates to the Regular Rows of the RINGES—Furrows, &c. Yet sometimes another portion of the idea presents itself; as RANK expresses the Higher order, or the Raised-up condition, "A Man of RANK," &c.; and thus it is in RANGE; as in old English, when the term is applied to Buildings, we can scarcely distinguish, whether Altitude or Order be the prevailing idea annexed to the word. In Antony and Cleopatra, we have

" Let Rome in Tyber melt, and the wide arch

"Of the RANG'D empire fall."

The use of the word RANG'D has appeared so extraordinary to some of the Editors, that Rais'd has been substituted for it. Others however have seen, that the original reading is the true one; and Mr. Steevens has remarked, that "the term RANGE " seems to have been applied in a peculiar sense to Mason-work. "in our author's time." In a passage produced from Spenser we have "RAUNGES Rear'd along the wall."

In the sense of RANGE, as referring to motion, 'To RANGE here and there—up and down, we have the idea of Excitement, or of being Stirred up, as applied in a different manner. Yet even here we seem, I think, on many occasions, to have the idea of something Regular—Recurring, &c. &c. Hence we have 'To Range up and down,' &c.; 'The Range of a ball, the · Certain Line or distance, through which a ball moves, shot from 'the mouth of a gun;' and in 'The RANGER'S Walk in a Forest'

we have the idea of the Certain Spot, and the Recurring Operation. N. Bailey explains RANGE by "A Row or RANK, a Ramble, or "Jaum; also a Beam which is between two horses in a coach." In the sense of a Beam, we are brought to the use of these words in the Provincial term RANGE, "Bauk, the Cross Beam of a "Chimney;" and the Scotch Rung, which I have shewn to be directly connected with the RINGE or Balk. RANGE in the sense of "Vagari, Errare," has been compared by the Etymologists with the Belgic Rannen, Currere, vel Ranghen, 'Movere, quassare, &c. &c.; and to this latter word they have referred the term RANGE "To sift through a sieve, To RANGE meal;" where we have unequivocally the idea of Stirring up or about, and as applied moreover to Stirring up a substance of a Dirt or Dust kind. But here too we seem to retain the notion of Order, since this operation of Stirring up is performed, that the Meal may be ARRANGED, if I may so express it, or that one part may be Separated from the other. In Welsh this idea of Sifting is expressed by terms under the form RC, &c. Mr. Richards explains the Welsh RHUWCH by "A Ranging Sieve or bolter," as likewise Ruchio by "To Sift or Sierce;" and Ruchion by "Bran, gurgeons;" where we are brought to the form RC, RD, as in RID, RID-DLE, &c.

RN, what is Stirred up—Raised up or Rises up above its ordinary size or surface, as if in Ringes, What is Ringey to the feelings, or what Ringes the feelings, or is Rough, Rugged, Harsh, Grating to any of the senses.

RANK—RANGID, RANCIDUS, &c. (Eng. Lat. &c.)
RANCOUR, RANKLE, &c. (Eng.)
RGN. (Heb.) To Murmur, To be Rancid or Rusty.

The Harsh or Grating Noise.

RANCO, RANA. (Lat.) RING. (Eng.) RANT. (Eng.) RANE. (Old Eng.) A verse.

RN. (Heb.) To vibrate to and fro, to Shout.

RGN. (Heb.) To Break, To make a loud Noise.

Round or Rown in the ear. (Old Eng.)

Runian, Run, &c. (Sax. &c. &c.) A Muttering sound, Incantation, &c.

Runic. Belonging to Incantations.

Terms of Commotion—Violence, &c.—Stirring up, Routing up, &c.

REND—RENT, RAN-dom, RAN-sack, &c. &c.

Skinner has divided Rank into four different articles, as applied to 'A Field too Luxuriant'—to 'Order'—to the 'Taste'—and to a 'Rank Rogue;' all which he refers to different sources. Rank, as an adjective and a substantive, belongs to the same fundamental notion, however remote their senses may appear; and as an adjective we shall at once understand, that its different meanings must be only different applications of the same sense. As a substantive, Rank, denoting Order, refers, as I have shewn,

to the RINGES considered only, as Regularly recurring; and as an adjective, RANK means 'What RINGES up, or is RINGY,' if I may so express it, 'What is Stirred up, Raised up, as in RINGES,' under the 'idea of the Rough—Rugged surface; and from hence it is applied 'in general to what is ROUGH—RUGGED, or RINGEY to the feel-'ings, or what Ringes the feelings,' &c., if I may so say, 'What is ' Harsh—Grating—Disagreeable or Annoying to any of the senses.' I have shewn, that ROUGH, RUGGED belongs to the RIDGE or RIG, under the form RG. We shall find, that in the sense of the adjective RANK, the original idea of Rising or RINGING up beyond the ordinary size or surface, is often visible. Hence RANK is applied in its more primitive meaning, when it expresses the Luxuriant vegetation of plants Rising up or Growing beyond their ordinary size. Nathan Bailey has justly explained it in this sense by "That Shoots forth too many branches or leaves;" and he has likewise in another article, "RANK, full; as a River RANK, "i. e. full. Sh." In this application too, we have the original idea. In King John the following passage occurs:

- " And like a bated and retired flood,
- " Leaving our RANKNESS and irregular course,
- "Stoop low within those bounds we have o'erlook'd."

Mr. Malone has produced on this occasion a passage from Venus and Adonis:

- "Rain added to a River that is RANK,
- _" Perforce will force it overflow the bank."

It is marvellous to observe, with what felicity the mind of the Poet conceives the original sense of the word, and how precisely it exhibits that sense, by the combination of terms, which are impregnated with the same train of ideas. The following passage of Shakspeare is singularly adapted to illustrate this position, where the attendants of Lear are described as "Breaking forth

"in RANK, and not to be endured Riots." We here see the term RANK connected with the very idea of 'Rising up' or "Breaking forth;" and combined likewise as an epithet with Riot, which is one of the strongest terms of Excitement, and belongs, as I have shewn, to the idea of Routing up the Ground. In the North, Rowty means, as Mr. Grose explains it, "Over "Rank or strong; spoken of corn or grass." Here we have the very form of Riot, Rout, &c.

From this idea, annexed to RANK, of "Shooting forth-.. "Branches," we have the German RANKE, "A Branch.—Wein-"RANKEN, the Vine-Branches, or Tendrils." Wachter has explained RANK by "Ramus et Cornu Ramosum. A Ragen, pro-" minere, inde Latinis RANGifer, Cervus Lapponicus." To Rangifer belong the French Rangier, Renne, the English Rein-Deer, the German Reen or Renn-Thier, the Saxon Hranas, &c. &c. Some have supposed, that the Rein-Deer belongs to Rennen, To Run. The succeeding words in Wachter are Rank, Flexus, and Ranke Palmes, which he has referred to Renken, Flectere, Torquere, These words all belong to each other; and it is a vain attempt to adjust, whether in the same fundamental sense of 'To Stir up-Turn up, Ringe or Ring up, the sense of Up prevails, or that of Turning or Twisting, that is, whether the Vine-Tendrils are Shooters up, or Twiners. In the same column we have RAN, "Gracilis, tenuis, subtilis," as explained by Wachter, who derives it from Renken, "quasi Tornatilis, agilis, volubilis." Here perhaps a similar doubt might occur, whether the Thin, Tall figure is the Shooting-up object, or the easily Turning or Twisting-about object. Next to RANK, Palmes, in Wachter, we find RANZE, Bulga viatoris, &c.; where we have either the idea of Rising or Enclosing. I find in the same column of Wachter's Glossary, RANZEN, Salire, Coire, and RANGE, Scrofa; which our Etymologist refers to

Rennen,

Rennen, Coire. In the Glossary of Sherzius we have adjacent to Ranken, Se movere, both Ranse, Rostrum, and Rang, Scrofa. In Ranse and Range we unequivocally see the idea of Ringeing,—Ringing, if I may so say, or Routing up a Surface; and this will remind us of Rugchos, (Puyxos, Rostrum,) or Runchos, and Runco, &c. &c. In Ranzen and Rennen, Salire, Coire, &c. we have terms of Excitement, signifying 'To Break out into actions of a 'Rank—Riotous nature.' We know, that Rank is an appropriate term to such matters.

In RANCOUR and RANKLE, which belong to RANK, we likewise mark most strongly the original idea of Scratching up-Fretting up or upon a surface. When we talk of a wound RANKLING we unequivocally perceive this notion of Exasperated Excitement, or of Stirring up—Fretting on or upon a surface. Shakspear we have RANCOR, applied as RANK is, to the idea of Breaking forth, as belonging to a Swelling or Rising-up object; and it refers moreover to the sense of RANKLE, as it seems to allude to the Breaking of a Festering Sore; - The Broken RANCOUR of your high-swoln hearts.' I shall shew, that Ulcus. Ulcer, and Elkos, (Eluos, Vulnus,) belong to the Aulax, (Aulas,) the s-Ulcus. The verb Elko, (Elko, Traho,) from which, according to the Lexicographers, Elkos, (Elxos,) is derived, ("quia humores " ad partem sauciatam Trahuntur,") expresses the action of Drawing the Aulax, (Aulaz,) or Furrow. There is no metaphor so common as that of the Wounds, which the Earth suffers by the operations of the Plough,—'Terra saucia vometibus.' The term RANCOUR connects itself with RANCEO, RANCIDUS, (Lat.) RANCID; and the parallel terms in modern Languages, Rance, Rancune, (Fr.) Rancore, &c. &c. In Rancid or Rank to the taste, we have another application of the idea annexed to what is Harsh or Grating to any of the senses. In Latin, Ranco refers to what is Grating

Grating to the ear. In a line quoted by Martinius it is justly combined with Rugio, where we have the more usual form for the Rough Noise.

"Tigrides indomitæ RANCANT, RUGIUNTQUE leones."

The adjacent word to Ranco in our Latin Dictionaries is Rana, which means the animal, 'quod Rancat, vel quod Raucum est,' the animal which makes a Rough Noise. The Etymologists derive Rana from Ra Ra, or from the Hebrew 77 RN, "quod est "exclamare vehementer." The preceding article to Rana in Martinius is "RAN, indeclinabile, ira vel locus ira, unde etiam " evenit, quod efficitur rabiosus homo. Cathol. et inde deducit "Rabies, item Rancor, item Rana, quasi Iracunda. Suspecta vox " est, quales multi sunt in eâ rapsodia errores. Finxisse videntur " ex prima syllaba vocis Rancor, tanquam sit ira cordis." In Hebrew, רגן RGN, signifies, says Taylor, "Murmurare, To be "RANCID or RUSTY, as bad butter or bacon." Hence it is applied "to a mind RANKLED or Exulcerated with discontent, envy, " or malevolence; and which uttereth itself in words suitable to "such bad dispositions. Thus Schultens (upon Prov. xviii. 8.) " from the Arabic giveth the sense of this word." Let us mark the word Rusty, under the form RS, which denotes what Frets or Corrodes a surface. In the Hebrew RGN we perceive the form RG with the organical N; where we again mark, how the forms RG, RgN, and RN pass into each other. That such terms as RANCID, &c. are connected with the action of Scratching up. Tearing up or Routing up a surface, 'à Runcando,' will be unequivocally manifest by considering the parallel Spanish terms. In the same column of my Spanish Vocabulary, where ARRANGAR, "To Pull up by the Roots," is found, we have ARRANciarse, "To grow RANCID;" and it is impossible to doubt, that these Spanish words belong to each other. The same term, ARRANCar, means likewise, "To force up phlegm, bile," &c., which will 7 B

shew us, that my conjecture is right respecting Ructo, Exucto, &c., which I have supposed to belong to the idea of Routing or Rooting up the Ground.

We have seen, how Row and RANK, in the sense of Order, belong to each other; and we find likewise Row, as applied to the Spawn of Fish, which appears too under the form RN, as Roan, (Eng.) Raun, (Dan.) though in other Languages we have the regular form RG, as in the Belgic Roghe, the German Rogen, and the Saxon Hrogn, where in the two latter terms we see the organical n annexed to the G. Skinner derives Roan from the Latin Renes, but Wachter confesses his ignorance of its origin, "Quâ notione non liquet;" though he adds, "Forte est ab Oppar, "Turgere." These words might belong to the idea of the substance disposed in regular Rows, or they might refer to the ROUGH, RIDGY substance; yet I have suggested in another place, that the Roghe, &c. may belong to the idea conveyed by such words as REATCH, RUCTO, &c. from the sense of Casting up, Voiding, &c., just as Spawn is connected with Spuo, Spit, &c. &c. Let us mark the explanatory word Ren, which belongs surely to the French Rognon, where we have the true form RG, with the organical n. The Rognon is directly attached to Rogne, "Mange, scab;" Rogner, "To cut, pare, clip," &c. &c.; where we unequivocally see the idea of Scratching upon a surface. To Rogne, &c. belong the English Roine, as used in Chaucer, &c.—Roynish, Ronyion, as used in Shakspeare, &c. ("The Roynish Clown—The Rump-fed "Ronyon,") as I have before shewn, where I have suggested, that RENARD, the Fox, denotes the Roynish animal, and that Ard means Nature, as in 'Drunk-Ard,' &c. In Regnard. Reginard, the proper names, from which Menage has derived Renard, we have the true form RG. In Rongee, the Radical G of Rogner is lost before the N, and inserted after it. In another French word, Rognonner, "To grumble, mutter," we have the

Tearing or Corroling a surface, as I have before explained it. I have here again inserted the words before produced, under the form RN, as unequivocally connected with RGN, that the Reader may be perfectly familiar with this species of mutation. Under the form RN we have Roan, the colour; Rouen, (Fr.) which may belong to Ravus, 'Ravanus, color,' as the Etymologists suppose.

We shall find a race of words, under the form RN, which relate to Noise, as in RANCO, RANA, &c., denoting what is Harsh or Grating to the ear. I have shewn through the whole of this discussion, that the idea of Noise is perpetually connected with the action of Grating upon a Surface. The term RING, Tinnire, Personare, directly connects itself, as we have seen, with RING, Annulus, which is attached to WRING, and WRENCH, &c., just as Torquis belongs to Torqueo; and we hence see, how RING, Tinnire, is associated with WRING, expressing the action of Stirring up or about, as it might be in RINGES. The term RANT must be classed among these words denoting Noise, as connected with the idea of Commotion. Lye explains RANT by "Bacchari, "Furere;" and he refers us to an article in Junius, "Frisiis "Wrantig est litigiosus, querulus, morosus." Lye has another article, to which RANT or RAUNT should have been likewise referred, as RANE, To Rane, "Carmen cantare. Nescio an sint "ab Hib. Rann, Versus, carmen. Scoticum proverbium. You're " like the gowk, (the Cuckow,) you have not a RAIN but one. "Editori videtur vel factum ex Rame, Vociferari, M in N mutato. " vel derivatum ab Isl. Hryn, Exclamatio. Hrina quoque signi-" ficat Grunnire. Concinunt cum Hebr. ה," RN, "Cantio. רנה," RNH, "Cantus, clamor. à אָרָן," RUN, "Cecinit, Cantavit."

We shall now be enabled to understand the force of an original Reading in Pericles, Prince of Tyre, which the Commen-

tators

1116 A R. R. A .—C, D, G, J, K, Q, S, T, X, Z.

tators have rejected for a modern term, which does not express the sense of the passage.

"The sum of this,

- "Brought hither to Pentapolis,
- " Y-Ravished the regions round,
- "And every one with claps 'gan sound," &c. (A. III. S. 1.)

Y-Ravished is the emendation of Mr. Steevens. The first edition reads Iranished; which, as we shall now understand, is Y-Ranished, and means, that the account brought to Pentapolis, Rung round, or was Noised around the Country. Ranished, we see, belongs to these words denoting Noise. Another copy from this Iranished has formed Ironyshed, which we may call perhaps a corruption. The Commentators have frequently noted the corruptions of Pericles, and have endeavoured to supply that evil by emendation. There are certainly some corruptions to be found in this play, such perhaps as we have in Ironyshed, but they are commonly imaginary faults such as we see in Iranished.

The Hebrew RN, exhibits in the strongest manner the idea of Agitation—Commotion, &c. conveyed by this race of words. Mr. Parkhurst explains this term by "To vibrate freely, move to "and fro, with quickness and freedom.—To move to and fro, or "leap for joy, to exult.—To cause a brisk vibration in the Air "by sound, to shout, cry aloud, in order to make others hear;" and with another n added, In RNN, it is used in a more intensive sense, "To shout aloud or intensely, to cry or proclaim aloud." Under this latter word Mr. Parkhurst produces, as derivatives, "Rant, Run, the old English Rane, a Song, and To Rane, Sing. "also the Rein-Deer from his swiftness." The term RN, "An Ark or Chest," Mr. Parkhurst has supposed to be so called from "its reverberation of sound, or hollow sounding," and to belong to RN. The Hebrew ARN belongs to the English Urn.

Urn, the Latin Urna, the Saxon Ærn, "Locus secretior, habitacu-"lum, domus, casa." The ARN is nothing but the Hollow made by the action of Excitement, just as Rinne, the Channel, belongs to Run, as we have before seen. Let not the Reader conceive, that this idea is the suggestion of hypothesis. The succeeding word to the Saxon Ærn, is Ærnan, Currere; and hence it is, that Urna particularly relates to the Hollow for holding Water, as originally denoting the Hollow or Channel, in which Water Runs. In Arabic, i Renem, means "Sounding, Singing, modulating— "Twanging as a bow-string;" and ייבעט Renin signifies "Twanging (as a bow-string.)—Groaning.—Vociferating, crying "out, making any sound with the voice." In the same column of Mr. Richardson's Dictionary we have likewise رنب, Renen, "A Frog;" which brings us to the Latin RANA. The succeeding term to ארובת RN in Mr. Parkhurst's Lexicon is ארובת RNB, or ארובת ARNBT, the Hare, which may belong to the above word, denoting Quickness of Motion. An adjacent word is RGn or RnG, "To Break, Break in pieces, Rend, Destroy; To Break "the order of the air by a loud sound, clangere, vociferari, to "cause to resound, to make a loud sound, as with the voice, to "Shout;" where the sense of the Radical fully appears, as in ROUT, REGNUO, (Pnyrow, Frango.) Let us mark the explanatory word REND, which belongs to the form RN.

The Hebrew y Gnain, which is sometimes considered as having the sound of G with that of n preceding or following that sound; as RG, RGn, RnG, will shew us, how the Hebrew yn RGn, and RnG, may coincide at once with Regnuo, (Pryvio) in Greek, and Rend in English. Mr. Parkhurst acknowledges, under this word, that though the Hebrew Gnain had anciently the power of a vowel, yet that "it had also frequently somewhat of a Nasal or Guttural "sound, like the French On, an obscure n or ng, being included in it." Under yyn RGG, where the Gnain is doubled, he produces,

duces, as derivatives, "Ring, Wrong, Wrangle, Wring, Wrench, " Range, Rend, Rent, old English Ran, seize. Also Rough, Ruf-" fle, Rugged, Rogue. Qu.? Welsh Rhwygo, To Rend, Eng. Rag, "Ragged;" all which words, except Ruffle, may be considered as ultimately belonging to each other. I shall here introduce all the Hebrew words, belonging to ד, or to R, and the Hebrew Gnain, y. The succeeding term געB, means "To Hunger, "be hungry;" to which Mr. Parkhurst refers Rabies. Whatever we may think of the relation between Rabies, and this Hebrew word, which cannot be discussed on the present occasion; we shall agree, I imagine, that this Hebrew word connects itself with the term in the same Language, just produced; and that it signifies, as we might say, "Fame, Fractus, Confectus," &c. רעד RGD, means "To Tremble, Shake," &c.; רעה RGH, To Feed, which, on another occasion, I have shewn to belong to the idea of Commotion-Agitation, and to be derived from the action of Cattle Straggling here and there in feeding. The succeeding word is העל RGL, RnGL, "To be violently Agitated, or Shaken." To this word Mr. Parkhurst has referred Roll, Reel, Rill, Wriggle, and Hurl, Whirl, which indeed, under one point of view, may be considered as ultimately belonging to each other, though he has added other terms; as Troll, Twirl, which are attached to a different order of words. The succeeding term is FGM, or RnGM, which denotes, says Mr. Parkhurst, "Violent Commotion, "or Concussion." He refers to it the Greek Psyco, To whirl round; a relation, if it exists, which cannot be explained in this place. The next word is רענן or RGN or RaGNN, To thrive, flourish. Terms conveying this idea have been sometimes connected with words denoting Agitation, as Blow, To Flourish or Flower, belongs to Blow, the Wind, and the Stroke. The next word is רעה RGF, "To Distill, Drop, or let fall in drops," which Mr. Parkhurst refers to Rivus. This union of the R with the labial labial will be fully considered in another place. The words following the Hebrew term just produced, are you RGZ, "To Crush, "Break by Crushing;" and won RGS, "To Tremble, shake, "quake, as the Earth.". Mr. Parkhurst produces, as derivatives from this latter word, "To Rush, Rash. Also a Rush, from its "moving motion," which are discussed in their due places.

I have conjectured on a former occasion, that ROUND, the adjective, is connected with RING, &c. which I have supposed to be derived from the idea of WRINGing, WRENCHING or Turning a surface, as the Ground, up, over, about, or Round about, so as to make RINGES, RANDS, &c.; and I have supposed too, that terms for Noise are derived from the Noise made in this action; and that Ring, Tinnire, is attached to Ring, Circulus, for that reason. Hence we shall understand, why a verb, under the same form, as Round, signifies 'To make a Noise,' as 'To Round or 'Rown in the ear.' The Etymologists have justly produced the parallel terms to Round in this sense, as the Saxon Runian, Mussitare; the Belgic Roenen, the German Raunen, the Welsh Regain, Susurrare; the Saxon Run, Rune, Geryne, Mysterium; the Gothic and Runic Runa, Mysterium Magica incantatio. The original idea annexed to these words is that of Sound, 'To Ring in the 'ear,' &c.; and as Magical incantations and the Mysteries of Religion, &c. were delivered in obscure—Muttering sounds—in "Hideous Hum," hence the word was applied to Magical Incantations and Mysteries in general, whether they were delivered by speech or by writing. We know, that the explanatory word Incantation belongs to the same idea of Sound—to Canto. Lye in his Saxon Dictionary explains Runian and Runigean, by "Susur-" rare, mussitare, in aurem sive mystice loqui." We observe in the G of this latter word a record of the original Elementary form RG. The Saxon Run Lye has explained by "Litera, character. Cimbr. "Run: unde Lingua Cimbrica appellatur etiam Runica, sc. à ve-" tustis.

"tustis illis literis, quas patrio sermone Runer, Runas, vocabant.—
"Run etiam specialius apud Cimbros significabat Characterem, sive
"literam, Magicum." The word likewise means "Concilium, Col"loquium;" and hence Runymede, as Lye observes, is derived,
"Rune-med, i. e. Concilii pratum, in agro Surriensi, ad ripam
"Thamesis, ubi augustissimum illud Anglicanarum libertatum
diploma, quod Magna Charta dicitur, conditum est et sanci"tum."

In Welsh, Rhegain, which Junius has produced, signifies "To "Whisper, to Mutter, to Murmur;" and RHEGEN means likewise The preceding term, in Mr. Richards' Dictionary, is Rhegu, "To curse or ban, to wish mischief to one;" which may be derived from the same source. In RHEGAIN we have the true form RG. Hence is derived perhaps the name of REGAN, as denoting the Railer, the daughter of the Celtic Prince Lear. The name Cordelia, or Creirddylad, is likewise significant, and alludes, as Mr. Davies thinks, (Mythology of the Druids, 206,) to a portion of Mystical History, which it is not the business of this discussion The Welsh terms, which Junius should have produced, as parallel to Run, &c. are Rhin, "A Secret, a Mystery, and "Rhinie, to whisper, to speak in secret." The succeeding word is Rhinge, "A Noise, Crashing or Creaking noise." In the succeeding column of Mr. Richards' Dictionary is Rhint, A Notch, before produced, where we are brought to the genuine idea, from which these terms for Noise are derived, that of Scratching upon or making Scars-Notches, &c. upon a surface. In Mr. Shaw's Galic Dictionary we have Run, "A secret, secrecy, mystery."

In the same column of Lye's Saxon and Gothic Dictionary, where Runian occurs, we have the Gothic Runs, Cursus; and in the succeeding column we have Ryne, Cursus; Ryn, Fremitus; Rugitus; and Rynan, Rugire. We here again see, how Run and its parallel terms belong to this race of words, expressing Noise,

and likewise to words denoting a Channel or Course, as the Danish Runa, Alveus, Sulcus, &c. &c., which I have before produced, and which, as we see, is parallel in sense to the Welsh Rhint, &c. While I examine the word Run, I observe Runnagate; which is derived from Run and Gate, Iter, as some Etymologists suppose, and not from Renegado, à Renegando Religionem. The succeeding word to Rin, Cursus, in Lye's Saxon Dictionary, is Rinan, To Rain, which appears under the form RG, Regen, (Germ.); and to the Gothic and Saxon Rinnan, Currere, we find annexed the Gothic Rinno, Torrens. To Rin, &c. Lye has justly referred Rhenus, Fluvius, the Rhine. The Rhone is derived from the same idea; but in Rhodanus, the true form RD is preserved. In Welsh, Rhodwyn is the Rhone, Rhosne, (Fr.) &c. In the name of the river Eridanus we have the full form with the breathing before the ARD. In these words we cannot separate the sense of Noise-Commotion, &c. from that of the Course or Channel.

Among the terms denoting Actions of Violence—Commotion, &c. under the form RN, we must class REND, RENT, RANsack, RANsom, RANdom, &c. The Etymologists have produced as parallel terms to REND and RENT, the Saxon Hrendan, Lacerare; Rendan, Scindere; and they have referred us likewise to the Greek Regnuo, (Pyyvuw, Frango); where we may observe, that this Greek word shews us, how the Radical RG has passed into the form RN. Lye has another article, Render, which, as he says, "Anglis Septen-"trionalibus est Dissipare, Dissociare. Omnino pete ab Isl. "Rinda, Pellere, propellere." The succeeding word in the Lexicon of Junius by Lye is Rennet or Runnet, which belong to these terms of Separation, and signifies that, which Disperses-Scatters or Separates one part of the milk from the other, or makes one part to be Separated from the other. If we refer these words directly to Run, the term of Commotion or Excitement, the same meaning exists, as it relates to the substance of the Milk

Running here and there-or Separated by the Commotion of its particles. The Etymologists refer us, under Runnet, to the Saxon Rynning, Coagulum; the Belgic Rensel, &c., the Saxon Gerunnen, Coagulum; and the Gothic Garinnan, Concurrere, "quod partes "ejusdem generis in unum coalescunt." This is only another mode of conceiving the same action; as certain particles of a similar kind Run together, because particles of a different kind Run here and there or Separate. RACE is a Northern word for Runnet; where we have the form RC, belonging to Race, Cursus, as Runnet belongs to Run; and Lye considers it under the same The preceding term to Runnet, in Lye's Edition point of view. of Junius is Runnel, "Sylva cædua, sive arbor cædua;" which is taken, as Lye observes, from the Islandic Runnul, Dumus; and Runne, Saltus. The RUNNEL, the Sylva Cædua, the Wood used to be Cut or Lopped, belongs perhaps to Rend, &c. To tear, break In Persian, راندن Randen, means "To Draw, lead, Ex-"pel, Drive, Banish;" where we plainly see the sense of the words above produced, Rinda, Pellere, &c.

The English term Rent, and its parallels Rente, (Fr.) Rendita, (Ital.) Rente, (Dan. and Belg.) Renta, (Span.) &c., are supposed to be derived from the Latin Reditus, or Redditus, "quantum, sc. pecuniæ Reddunt fundi, vel Redit è fundis, hinc A Rental pro "Redituum catalogo;" and Render, with its parallels Rendre, (Fr.) Rendere, (Ital.) is supposed to be taken from Reddere, "per epenthesin " tou n." Though this is indeed probable, yet still such doubts exist, which may perhaps incline us to a contrary opinion. We cannot, I think, help perceiving how Render seems to connect itself with the term of Violence, Rend, in such expressions as 'To Render 'a thing malleable;' and when it is employed as a term of submission, 'To Render up myself into a person's hands,' &c. Thus, then, Render would agree with the primitive idea supposed in my hypothesis, as signifying To Rout, Turn, Cast up, about, down,

down, &c. to be Rooted, Cast up, down, &c., with various degrees of Force and Violence; and hence RENDER and RENT would belong to each other, as referring to more Violent or Weak actions. RENDER means both to Reduce and Produce. Now there actually exists a term under the very form RENDER, which directly refers to an action of Violence, as in REND, &c., and which has certainly nothing to do with the Latin Reddo; as in the article before produced. "RENDER, Anglis Septentrionalibus est Dissipare, Dissociare. "Omnino pete ab Isl. Rinda, Pellere, propellere;" and Mr. Grose in his Provincial Glossary explains Render by "To Separate, "Disperse. Also to Melt down-To Render suet. North." In Spanish too, we see the genuine idea of these words. Lexicographer explains RENDIR by "To Subject, Subdue, to Re-"duce to submission.—To Yield, to Deliver up. —To Return, "to Restore. — To vomit or throw up from the stomach;— " RENDIMIENTO, Rendition, the delivery of a thing into the hands " of another.—Weariness, faintness.—Humiliation, submission.— "RENT, income, the yearly produce." The preceding term to this latter word, in my Spanish Dictionary, is RENDIJA, "Crevice, "crack, cleft;" where we have the RENT or Hollow, which is made, according as my hypothesis supposes, by Routing or RENDing up a surface. In the same column of my Spanish Dictionary Lind Renglon, "A line written from one margin to another;" where we unequivocally see the idea of Scratches or Marks upon a surface; and what is curious, the same word signifies " Part of "one's Revenue or Income." The succeeding word in Mr. Richards' Welsh Dictionary to "Rhengcio, To Rank or put in "order;" and "RHENG, RHENGC, A RANK, a Row, a Streak," is "RHENT, Rent, Houses or Lands."

RANsack Skinner considers to be quasi Reinsaccare, "à Re. Neg. "In et Saccus, hoc est, Saccos expilare, excutere." Junius however understands, that the RAN belongs to such words, as the Runic

Runic and Danish Ran, Spolia, Rapinæ, Deprædatio; the Islandic Raan, spolium; the Saxon "Ran wyrcan" Rapere; the French Randonner, the Swedo-Gothic Ransaka, Rem furtivam in aliena domo perquirere; which he derives from Ran, (Sax.) and Secan, (Sax.) Quærere. 'To Sack,' we know, is 'To Plunder;' and to this the Sack in RanSack belongs. In Mr. Shaw's Galic and Irish Dictionary I find RANSUIGham, "To Search, Rummage." The succeeding word to Ransack, in Junius, is Ransome, which he has referred to the French Rancon, the Italian Ransone, the Belgic Ransolen, and the Swedish Ransun. The RAN in these words must be referred to the terms of Violence before us, as some have Junius records the derivation of Loccenius from Ran, bearing the same meaning as in RAN=Sack, and Sona or Suna, Placare. The n in On, is, I believe, only an organical addi-My French Lexicographer explains Ranconner in the first sense by 'To Ransom;" and in another sense by "To Extort "money from, to Exact more than is due;" where we see the genuine idea of an act of Rapine and Violence. In Rabelais, the term Rancon is brought likewise to its original idea, when it denotes a species of Spear, i. e. the instrument, which RENDS and Tears the flesh. (Menage, sub voce.) The French Etymologists will now understand, that Ranconner and Rancune, denoting Rancour, are only different forms of each other, applied with the same fundamental idea to different purposes. In the same column with Ransom, in the Lexicon of Junius, Lye has produced the phrase, "Rap and RAN, Whatever a man can Rap and RAN;" and he observes likewise, "Skinnerus pro Ran scribit Rend, alii "Run for. Utrumque falsum." He supposes, that the phrase means "Quicquid vincire et auferre possis;" and he derives Rap from the Saxon Rapan, Vincire; and Ran from the Islandic Ran. Rapere, &c. The RAP belongs to the terms of Violence, Rapio, Rob, Rip, &c.; and even Ræpan, Vincire, to which our term Rope

most fully and unequivocally in a future page. The English REND, and the Islandic RANA, are, as we have seen, parallel terms.

The Etymologists refer Random to the French Randon, "Rapidus "cursus fluvii, fluvii rapiditas, torrentis impetus à Rentdun, Tor-"rens, cataracta, catadupa quod verbale est à Rennan et Dun, "Fluere deorsum. Hinc Aller à grand RANDON, Instar rapidi " torrentis cum festinatione et impetu currere, præcipiti cursu " ferri. Hinc nostrum To Run at RANDOM. Hæc Hickesius "p. 233, Gram. A Saxonicæ." (Lye ad Junii Lex. sub voce.) Skinner produces the Italian Randello, as the term from which. Random is derived. Randello signifies a Cudgel; and Randellare, To Cudgel, Bang; and Randagio, a Vagabond. Randione means A Gerfalcon; where we have the name of the bird of Violence the RENDER or Tearer. In the same column of my Italian Dictionary, where these words are found, we have likewise Rangoloso, Diligent, eager, i. e. the Runner or Bustler about; Ranno, Rannata, Lie, Soap Suds, that which Rinses or Cleans; Ranto, Rantolo, Rattling in the throat; Rantoloso, Hoarse; and Rannochio, the Frog. I have already shewn, that Rana, the Frog, is the animal with the Harsh Noise.

In a portion of the succeeding Chapter the form RN will again fall under our discussion, when considered as having arisen from the form 'R, with the breathing before the R, by the organical addition of the n. This however is only a modus concipiendi, which is but little concerned with the force and spirit of the argument. If we should suppose the organical addition to the 'R, with or without a breathing before it, to be represented by the Hebrew V Gnain, nGn, in which these kindred sounds of G and N are supposed to be combined, we shall at once understand, how indissolubly the forms RG and RN are connected with each other.

other. I must again and again press on the mind of my Reader, that all these forms and changes are effected without error or confusion, and that the fundamental affinity is distinctly and unequivocally visible through this great Family of Words without disturbing the particular relation, which exists between the various branches, into which that Family is divided. This metaphor, as I have before observed, is singularly adapted for the illustration of our argument. The resemblance, which might be doubtful or obscure, when the kindred objects were distant from each other, may become strong and impressive, when they are presented to the attention under the same group, and exhibited together under the same view, with all the benefit of contrast and comparison. The Theory of Cognate Consonants is the great and the only Talisman, by which the World of Words is brought under our sway;—by the force of which the different Races, of which it is composed, may be made to pass before our view, in distinct and separate classes, according to their various degrees of affinity and resemblance to each other. By the operation of this potent principle 'the numerous Tribes and Families of Words are at once ar-' ranged without difficulty or disorder—all marshalled in their due * places, and all discharging their various and corresponding func-' tions, with the most perfect uniformity, precision, and regularity.'

CHAP. V.

'R, R', the EAR-th, or ERA, (Equ.)

Terms for the Ground—Land or EAR-th, &c., as ERA, (Eq.)—
Terms expressing the operations, which are performed in the action of Stirring it up, as EAR, HARROW, (Eng.) To Plough; ARO, (Lat.) &c. &c. Terms, relating to the Rise—Source—First beginning—the Extremity of any thing, &c. &c., as Orior, (Lat.) &c. &c.—Terms denoting Agitation—Commotion—actions of Violence, &c., which are connected with words, expressing the action of Stirring up the Ground, as HARRIE—HURRY, &c. &c. Under this race are comprehended Terms, which denote the Possessor by Force and Violence—the Master, &c., as HERUS, &c. Terms of mental Irritation, as IRA, (Lat.) &c. &c. &c.—Words, under the forms ARn, ARl, expressing likewise Agitation—Commotion, as Qrino, (Oqua, ab Oqu, Concito,)—Hurl, &c. &c. &c.

[^]R, R[^], the ERA, (Ερα, Terra,) or EAR-th.

Terms expressing the Ground, Land or EAR-th, under the form ^R, and the operations attached to it.

Era, Ar-Oura, (Ερα, Αρουρα, Terra.)

RHEA. (Gr.) The Goddess of the Earth.

UR, UIR, IRE, ER, HERRI, &c. &c. (Celtic,) the *Earth*, Land, &c.

Aroo, Aro. (Latin, Greek,) To Plough.

AR, ARat, AR=AR, YR=IAR, &c. (Celtic,) Terms relating to Ploughing.

EAR, Arian, Erian, or Erigan, Erren, Ar, Are. (English, Gothic, Sax, Germ. Scotch, &c. &c.)

HARROW, HARRE, HARAU, HERSE, HARCKE, HERGIAN, &c. &c. (Eng. Dan. Corn. Fr. Germ. Sax. &c.)

&c. &c.

The difficulty of arrangement may be considered as one of the most important and frequent sources of embarrassment, which a writer has to encounter in a work of this nature. Whatever diligence and deliberation he may have employed in forming the original plan of his discussions, nothing but the actual operation itself can fully unfold to him all the bearings of the question, or prescribe to him the precise mode, by which his enquiries would be most properly and efficiently conducted. Various circumstances may likewise arise in the progress of the work, that are placed out of the control of the writer, which must either necessarily or almost inevitably disturb the original plan in certain portions of his Volume; and when this has once happened, the future arrangements must likewise be changed, and be accommodated to

the modifications, which have before arisen. It is not to be understood, that these deviations from the original conception, with respect to arrangement, have operated with any considerable force on the general effect of the work, which perhaps, considered under all its parts, may have remained nearly the same. I had originally intended to have first presented to the Public an enquiry into those Terms, which appear under the form AC, AD, &c., and when the sound of r is not heard, AC, AD, &c.; and I purposed to discuss at a future period, in another Volume, the terms under the form AR. I found however, as I proceeded in my Work, that it was necessary perpetually to recur to the form of the Element AR; and the circumstances, which accompanied the preparation of the Volume, rendered this appeal more frequent and minute.

During the long continuance of my Work in the Press, the materials naturally and almost necessarily increased in my hands, as I considered it a bounden and indispensable duty to improve the original stock by all the means, which chance or meditation had presented to my view, sometimes by the addition of new topics of discussion, and sometimes by the production of collateral evidence from terms under the kindred form 'R, which might have been reserved for another Volume. By these additions the Work insensibly swelled beyond its destined bulk, and I at last began to perceive, that I had already comprehended within my discussions the great leading features, which belong to the whole compass of the Enquiry; and that having proceeded so far, it was necessary for me to advance still further, and to consider the subject through all its divisions, under one view, in the same publication. I perceived likewise, that the additional materials might be detailed according to a plan of greater brevity than that, which I had adopted in the former parts of the Volume, as the various processes, by which words are connected with certain trains of ideas, had before been

most fully and minutely discussed. In this part of the Work, therefore, nothing more appeared to be necessary, than to arrange the terms, in their due classes, under the train of ideas, to which they more immediately belonged, with a brief explanation in less obvious cases of the precise mode, by which any term was to be referred to its particular class. The Elementary form 'R will be first examined, which is so intimately connected with that of the Elementary form 'RS, 'RT, &c., that they cannot in a great variety of cases be separated from each other. I must however observe, that though it is just and proper to consider them on many occasions under one point of view, yet that they ought to be treated separately, as I have before done, because the Elementary form 'RS, when once existing, may be said to generate a Race of words by its own powers. Both modes of considering the subject are to be adopted in their due places, that the Reader may at once understand their difference and their coincidence. In this part of my Work I shall likewise contrast the terms belonging to both. forms with each other, though here I shall commence with the form ^R, and proceed to that of ^RC, &c., as if first beginning from the simpler form, and advancing to that, which is more complicated. I have before suggested, (p. 529, N.) that this is rather a modus concipiendi, formed perhaps on a contracted view of the subject, than a legitimate principle, which is necessary to be adopted for the basis of our reasoning. Yet I can have no objection to consider the subject under this point of view, if it should be found to supply to the conception of the Reader a more easy and intelligible mode of considering the question.

In the first part of my Work I considered the terms under the forms RL, RN, as directly connected with those of Rol, Ron, when no vowel breathing is to be found before the R. here consider the words under the same forms 'RL, 'RN, when a vowel breathing precedes the R; and the Reader will hence

see, that some terms under the forms RN, RL, when the breathing before the R does not appear, may be conceived to have arisen from the forms 'RL, 'RN, without the medium of RGl, RGn. When the terms under all these forms Rc, &c. RL, RN, in which the different Consonants, as c with its cognates, and L, N, are annexed to the Elementary R, shall have been considered, we shall at once see, that the only remaining form, where R appears as the first Radical Consonant of words, which has not been examined, is that, in which the Labials B, F, M, V, w are annexed to R, with or without a preceding vowel breathing, as in ARyum, ARpazo, (Αρπαζω,) RAPio, (Lat.) RAVish, (Eng.) &c. &c. I shall therefore in another Chapter arrange, after the briefest manner, the terms under this form RB, RF, &c.; and thus I shall have examined in the same Work, under one view, in a variety of Languages, all the Radical words, in which the Elementary 'R is to be found. Though we shall frequently perceive, that the form ARB, &c. directly connects itself with the other forms in the same series of words; yet we may in general consider the form 'RB, or RB, &c. as more particularly distinct, and separated from the We shall immediately understand, however, how readily the Labials become attached to the Elementary Consonant AR, or how the form 'RB, RB, &c. has arisen; when it is recollected, that we have only to conceive the mouth to be shut or the lips closed during the enunciation of the 'R; and when this simple process takes place, the sound of RB, &c. is at once necessarily produced. The Reader will perhaps be still more readily inclined to imagine from this further view of the question, that the form 'R ought to be considered as the more original and Elementary form, and that the other forms should be regarded as derivative or dependent. Under this view of the subject, the whole arrangement might have been thus adjusted; AR, R, The ERa, (Eqa.) R, R, C, D, &c., B, F, &c. The EAR=Th, &c. AR=V-um, ^C, ^D, &c. Estia, (Εστια,) &c. 1:.. I must

I must again repeat, that I can have no objection to this mode of considering the question, if it should be conceived by my Readers, as a convenient or a simple method of stating the argument of the Work. This mode of resolving Language into its original Elements might be carried much further, and perhaps, under one point of view, with some advantage to our conceptions on the subject. But this is merely a modus concipiendi, which at present would profit us nothing, but which might perhaps be aptly introduced at the close of our Discussions on Language, when all the Facts, which we are capable of learning, have been fully unfolded. It is the discovery of Facts only, as far as they are describable or intelligible, about which I am sollicitous in the prosecution of my Work; and I am unwilling to entangle myself or my Reader with unnecessary refinements in the mode of arranging or conceiving the original Elements, from which the objects of discussion have been formed. On a careful review of the whole Work, I do not conceive, that under any other arrangement such Facts would have been more profitably or faithfully exhibited.

I shall first produce the various terms under the Element A, which express the Ground, as ERa, (Eqa,) &c., as likewise those words, which directly relate to an action performed upon its surface, by Ploughing, &c., as Aro, (Lat.) &c.; and I shall then consider the Element A, under two general divisions, according to the arrangement of the form AT, either as conveying ideas, which might seem to relate to the ERa, (Eqa, Terra,) in a state of Rest, or which belong to the same Spot, regarded in a state of Commotion or Agitation when it is Stirred up—Agitated by the various accidents and operations, belonging to its surface, as by the labours of agriculture, in Ploughing, Harrowing, &c. &c. I produce this division because it is necessary, that some division should be made, and that words should be arranged to a certain degree according to their apparent and ordinary meanings. Yet

all the terms belonging to this Race of Words are so involved with the idea of Agitation, that perhaps we might consider this as the original notion, from which they were all derived, or at least this idea ought to be prominent in our explanation. In the first division I shall produce the terms, which denote the Rise-Source-Origin—the First Beginning—Extremity of any thing—the Back and the Front-Behind and Before-the Bottom or the Base and the Top—the Edge, Point:—A Boundary or Border:—What is Prior—First—Before, as relating to Time. These words might belong to the ERA, (Epa, Terra,) simply, as the Ground or Base—the Yet I have adopted the word Rise, which belongs to the notion of Stirring or Raising up; and we shall see from hence, that the idea of the Base might be derived from that of Agitation, as denoting the Spot, from or on which things are Raised or Erected, as we express it. We cannot but perceive too, that the term Source belongs to Surgo, whence we have the same Yet we find, that whatever may have been the original. idea of the words in this class, the sense of Agitation has commonly disappeared; and those terms, which have been derived from words in their secondary sense, may be justly said to belong to that idea alone. I have had frequent occasions of expressing this embarrassment, (825, &c.) if the Reader should so conceive it: though he may perhaps imagine, that when we have brought our terms to the Spot, from which they must be derived, distinctions like these are idly and unnecessarily minute. I have only to add, that the Reader will see all the words before him, with all their bearings and relations, and he must be contented to take upon himself a share in the difficulties of such decisions. In the second Division I shall produce those terms, which generally relate to the idea of Agitation-Commotion-Violence, and which I conceive to be derived from or inseparably connected with the ERA, (Eea,) Stirred up-Agitated, or HARROWED by the accidents and

and operations, belonging to it, as HARRY—HURRY, &c. &c. Under this division we shall see the idea of Agitation, applied to a great variety of purposes. — We shall find Terms denoting the Possessor of any thing by Force and Violence, and afterwards the Master in general, the Powerful or Superior Personage, as Herús, (Lat.); and hence have arisen Pronominal Parts of Speech—Intensive Particles, &c. &c.—Terms expressing Mental Irritation, as Ira, (Lat.) &c.—Names of Savage animals, Ur, (Germ.) Bos ferus;—Words expressing the Wind, &c., as Air, (Eng.) &c. Disorderly motions, as Err, (Eng.) &c. with various other applications, which will best be understood when they are detailed in their due places. I shall finally produce some terms, under the forms 'Rn, 'Rl, with the breathing preceding the 'R, where the same idea of Commotion or Agitation is apparent.

Among the words, which under the Element 'R, denote the Earth—Ground—Land—Soil, &c., and the operations of Ploughing, &c. performed upon it, are the following: The Greek ERA, (Ερα, Terra); AR-OURA, (Αρουρα, Arvum, Arata Terra, Ager, Terra, Tellus,) where in the latter word we have the Element doubled, quasi Era=Era, RHEA, (Pea,) AROO, (Acow.) OR-usso, (Oevoow, Fodio,) the Latin Aro, Aratrum, Area, Arena, the Irish UR, UIR, "Mould, Earth, Dust;" IRE, "Ground, Land;" AR, "Ploughing, Husbandry;" ARaim, "To Plough;"—the Welsh Enw, "An acre of Land; also Land, estate, inheritance;" ER, "Fallow Land;" AR, "Plowed Land; also Ploughing;"-Aredig, "To Plow;" Arddu, "To Plow;" Aradr, A Plough;" YR-IAR, "A Plough;" the Cornish Aor, Terra; HARau, Occa; Araz, Aro; the Armoric Ar=Ar, Aradr, A Plough; Arat, To Plough; Arer, A Ploughman, &c., the Cantabrian or Biscay, HERRI, Terra; EAR, (Eng.) To Plough, with its parallel terms-Arian, (Goth.) Erian, Erigan, (Sax.) Erren, (Germ.) Arer, (Fr.) Arare, Arar, (Ital. Span.) Aeren, (Belg.) Erier, (Dan.) Metere, Metere, &c. &c. &c. produced by the Etymologists, Harrow, (Eng.) with its parallels Herse, Harcke, Hergian, &c. (Fr. Germ. Sax. &c.) Harre, (Dan.) &c. Ar, Are, Ere, (Scotch,) "To "Ear, to plough, to till."

Beside the sense which the Irish UR, UIR, bears of "Mould, "Earth," Mr. Shaw has placed the term Un in various other articles, under the following meanings; "A beginning. - A "brink, border.—Very.—Generous, noble hearted.—Evil, mis-"chief, hurt. — Slaughter. — Fire. — Fresh, new. — A Moist "place;" and Un-ach, "Earth, a beginning." We shall certainly, I think, all agree, that UR is the same word, as we are accustomed to express it, and that all these senses are only different meanings of the same fundamental notion, whatever it may be. We shall likewise, I conceive, all agree, that the sense of UR, as "Mould, Earth," supplies us with an object, which we should naturally consider as expressing that fundamental notion. In Scotch, Ar not only means "To Plough," but it signifies likewise, as Dr. Jamieson explains it, placed in another article, "Formerly; also Early;" where he refers us to Air. Under Air, divided into six articles, he has given us the following senses: "Before, formerly, Early."—"Early."— "Expl. Hair, used for a thing of no value."—"An OAR."— "An HEIR."—"An itinerant court of justice, E. Eyre." We shall here, I think, not doubt, that AR, and AIR, in these several senses, have the same fundamental idea. Dr. Jamieson has told us, that some derive AIR, the Oar, from the Swedish ARa, To Plow; and he himself sees, that AIR, the Heir, has some relation to the Ground, though he obtains this idea from the ancient Swedish word Arf, which "primarily signifies Arv-um; and he appears totally unconscious, that the Scotch word Air, An Heir, has any relation to AR, To Plough, That AIR and HER-es, &c. belong to each other, and that they refer to such words as AR.

To Ear, Era, (Equ.,) &c. is most certain; yet it is not easy to adjust the precise idea, by which they are connected. I have supposed (p. 93.) that they mean simply the Possessor of the Earth, or Land; yet we cannot but see, how Hæres is connected with Herus, Herr, (Germ. Lat.)&c., which seem to attach themselves to words signifying 'To, HARROW up-Spoil-Rout-'Plunder—To possess by force and violence;' though all these terms denoted in a secondary sense, 'To Possess in general.' When it is proved, beyond all controversy, as I should hope, that all these words belong to each other, as referred to the same Spot; perhaps the Reader may consider, that such distinctions are minute and unnecessary. Dr. Jamieson has produced a race of words signifying the Heir, as parallel to Air; in which the Labial sound succeeds the 'R, as Arbi, (Mæs. Goth.) Arf, (Su. G.) Erbe, Yrf, (Germ. Sax.); and it is not possible to doubt, that all these words directly belong to each. Thus we see, how the forms 'AR and 'ARB are immediately connected; and the same fact will likewise be unequivocally visible in various other instances.

Terms belonging to 'R, 'Rt, &c., the ERA, (Eqa.) Earth, as denoting the Rise—Source—Origin—the First beginning the Extremity of any thing, &c. &c.—Behind and Before;
—What is First—Before, as relating to Time.

UR. (Celt.) Earth, Beginning, a brink, border.

Unach. (Celtic,) Earth, Beginning.

OR-IOR-ORIGO, ORdior.

Ordo. (Lat.)

Arche, Archos. (Gr.) Fundamentum, &c.

EARS, ARSCH, &c. &c. (Sax. Germ.) Podex.

OURA. (Gr.) Cauda.

ORos. (Gr.) Terminus.

ORA. (Lat.) The Extremity, edge, brim, &c.

Onis, Os, (Lat.) The Mouth, entrance into any thing.

EAR—EAR. (Gal.) Head—End, conclusion, tail, &c.

Oir. (Gal.) A Hem, border, &c. Or, Ord, &c. (Cimb.) Initium, Origo.

R-EAR. (Eng.) The Prior or Behind part, from which things may be said to Rise—To Raise up.

ARR-IERRE, ARR-EARS, &c. (Fr. Eng. &c.)

Ere, Erst, Arist, Arise, Rise. (Eng.)

HERI—HIER, (Lat. Fr.) y-Ore. (Eng.)

&c. &c. &c.

I SHALL now produce the terms under the forms 'R, 'Rt, which denote the Rise—Source—Origin—the First Beginning—the Extremity of any thing—the Back and the Front—Before and Behind—the Bottom or the Base, and the Top—the Edge or Point—A Boundary or Border—What is First, Before, as relating to Time. I conceive, that these terms are all to be referred to the ERA,

(Epa, Terra,) either as denoting simply the Base-Bottom, &c., or as referred to the EAR'd or Raised up ERA, (Eqa,) under the idea of the Rise, if I may so say, the Part, from which things Rise, as their Origin. Among this Race of words we must class the following: UR, (Gal.) "Mould, Earth. - Beginning. - A Brink. "Border," as it is explained by Mr. Shaw in different articles; Urach, (Gal.) "Earth, Beginning; Or-Ior, Origo, Ordior, To "begin; Ondo, A beginning, series, tenor and succession of "times and things, An Order or law of nature," as R. Ainsworth has justly explained it; except that he has placed the sense of a Beginning as a secondary idea.—Ordino, Ordain, &c. &c., Arche, (Apxn, Principium, Exordium, Initium, Fundamentum, Principatus, &c. Caussa, Origo,) Anchos, (Aexoc, Princeps, Dux, intestinum rectum,) Ears, Arsch, &c. &c. (Sax. Germ.) Podex, to which our vulgar word for the same part belongs; Orros, (Oeeoc, pars subjecta testiculis); Oura, (Ouea, Cauda); and hence Oureo, Ouron, (Ouean, Ouçov,) Urina, Urine, Urethra, Ureter, &c.; (Ουρηθρα, Urinæ meatus, Ουρητηρ, Meatus urinarius.)—Ουκα, (Ουρα, Limites, termini,) Oκος, (Oρος, ου, Terminus, limes, &c., Oρος, εος, mons collis,) πηπ HRH, "To protuberate, swell, be tumid, or elevated, to Rise in height." It occurs not as a verb simply in this sense; but hence, as a noun, "A Mountain, a protuberance, Rising or Elevation of the "EARth," as Mr. Parkhurst explains it; where my hypothesis is precisely explained.—OR, (Welsh,) "A Border or coast, the edge, "brim or margin of a thing;" ORA, (Lat.) "The Extremity. "edge, brim, margin, hem, or border of any thing; " Os, Onis, " The Head, or Fountain-The mouth, passage or entrance into " any thing," as Robert Ainsworth explains it in some of its senses; where we see the same Radical idea, as in Ora. The Latin One, To pray, might directly belong to Os, Onis, as it is imagined; yet it seems to belong to some Celtic terms bearing the same meaning. +On, (Gal.) A border, coast; which means likewise

likewise A Voice, Sound, and Gold, as Mr. Shaw explains it in various articles; and we have likewise in the same column of his Dictionary Oracuil, An Oracle; Oraim, To Pray; Oran, A Song, &c.; Oraid., An Oration; Oradh, Gilding; Oragan, The Herb Organy; Oraise, An Orange. I shall shew, that the sense of OR, AURum, Gold, is derived from the idea of Routing or Scratching up the Surface in the search of Metals; and the sense of Sound, which these words bear, might be attached, as it commonly is, to this action, just as Scriech belongs to Scratch. We see, that the OR in the Herb Oragan, Organy, Operyavor, Origanon, and in Oraise, the Orange, belongs to the Gold colour.—EAR, (Gal.) A Head; EARR, (Gal.) "End, conclusion, tail, limit, boun-"dary;—a Champion; noble, grand," as Mr. Shaw explains it in different articles. ERR, EARR, An end, tail, sin.; EIR, EARR, (Gal.) End; EIRRsce, A trunk, stump; EIRsam, To Arise; EIRgham, To Arise, &c.; -EIRigh, A Viceroy, chief, governor; EIRghe, Eirigh, A Rising, Mutiny. Eirr signifies too 'a Shield,' and 'Snow, Ice,' the former of which it denotes probably, as meaning the End or Extreme covering of the person; and the latter it probably denotes, as referring to the idea of Rising—Commotion, &c.—the Stormy, Snowy weather.—IRR, (Gal.) 'An end, conclu-'sion; a fish's tail.' In the same column of Mr. Shaw's Dictionary we have IRE, Ground, land; IRionn, A Field, land, ground; IR, Anger; IR, A satire, Lampoon; IR-IRE, A curse, malediction, blame, anger; Inis, Brass; Inis, An Æra, epoch, &c. &c.—IAR, S-IAR, Back, Backward, the West; from whence we should conjecture, that in Celtic the Element 'R denotes the West, as signifying the End or Extremity of the Sun's course. Hence we have IAR-thar, the West, West country, &c.—OIR, (Gal.) A Hem, border.-"OR, ORd. Cimb. AR, ARd, Initium, Principium. ORigo, "Auctor." (Lye sub Or.) Ond, (Sax.) Initium, Onigo, &c.— Andis, (Aedic, Cuspis,) Anden, (Aedin, Funditus.) Un, (Germ.) Un=Sprung.

Un=Sprung, (Germ.) The Onigin; and hence the intensive particle, which is sometimes applied negatively in different Languages, under the form 'R.-" UR, quod alias scribitur AR, ER, IR, in " veteri Linguâ Francicâ, perinde ac A et Ge in compositione " usitatur, et simplicem vocem facit cum effectu significare." (Lye sub voce Or=Deal.) It has this intensive signification, because it signifies First - Chief, both as applied to objects of Reverence and Detestation, as Arch, Erz, (Germ.) &c., in Arch-Bishop, Arch-Fiend; Erz-Bischof, Erz bosewicht, a great knave, &c.; "Ur, " adv. Ordinis, significans Principatum in existendo et operando;— " significans Ortum et initium rei.—idem significans quod vor," v-OR, "coram;" ER, "Particula Francis et Alam. propria; et per omnes vocales Ar, Er, Ir, Or, Ur audita, variæ et latissimæ sig-" nificationis in compositis. Interdum utuntur anastrophe, dicentes "Re et Ri pro Er et Ir. Olim erat prepositio significans Ex-" Super-Enheben, Effere se,-Adverb Ondinis, significans initium "rei; Enbauen, Extruere e fundamento.—Ondinis, significans " ultimum terminum rei. Huc referri debent Erstechen, Erschlagen, "ita percutere atque ita fodere, ut mors inde sequatur: et qua-"dam mentis actiones, cujusmodi sunt, Ergrunden, Perscrutari; " Erschopfen, Exhaurire cogitando. Er, Adverb. Aperiendi, ejusd. " qualitatis ut auf. Hinc promiscue dicimus Enbrechen, et Auf-" brechen, Effringere, aperire rumpendo." (Wacht. Prol. Sect. 5.) No interpretation can be more pointed to illustrate my hypothesis. Here En bears the precise idea of Routing or Breaking up a surface, as in the explanatory term h-Aurio, the Latin Eruo, the Greek ERUO, (Epuw, Traho.) Wachter has moreover seen, that ER in its intensive signification, resembles the Greek Art. (Apt.) "Adv. "intendendi, sensum reddens fortiorem, ut Ap apud Græcos." I shall produce the Intensive Particles, when I have laid before the Reader some of the terms, which relate to Violent actions, to the HARRier, or HARRower, the Router; and we see, how the

ER, as denoting the Base, when considered as the Rise part, if I may so say, connects itself with the Violent or Intensive action, which it sometimes expresses, and which we may represent by 'To Raise up' or 'To Rout up.'

Among the terms, which relate to the Back-Behind, the Prior—and the Former Time, are the following: 'R-EAR, (Eng.) which conveys at once the idea annexed to Rise or Raise, 'To ' 'R-'EAR,' or Raise up; and the Prior—Former part or Extremity left Behind us, from which, under one idea, the object may be said to Rise or Spring;—ARR-IERRE, (Fr.) ARR-EARS, (Eng.) d'-Err-Ierre, d'-Ern-Ier, (Fr.) Atras, (Span.) d'-Etras, di-Etro, (Ital. Span.) ARR-EdRo, (Span.) Backwards; RE, RE-tRo, R-URsum; (Lat.); where the t, d, s, have been introduced with the kindred ^R:—Air, (Goth.) Prius; Ær, (Sax.) Prius, Mane; Æs, Æris; where we have a Saxon term signifying at once Before—the Morning and Brass; all which senses will be reconciled if we suppose, that these words are taken from the idea of EARing or. of Raising or Stirring up, as the ERA, (Epa,) from which action metals are brought forth.— ERE, ERSt, (Eng.) ERSt, ÆRista, (Sax.) Primus; Arist, (old Eng.) Arise, ^Rise; f-Irst, Early; Ehe, or Eher, (Germ.) Heri, (Lat.) Die vel nocte præterità; HIER, (Fr.) JERI, IERI, (Ital.) AYER, (Span.) Yesterday, lately; Hesternus, quasi Hersternus, g-Estern, (Germ.) with its parallels produced by Wachter, "Anglo-Saxonibus g-Itra, g-YRsta, et in " compositis Gistrondæg, Gyrstandæg, Francis Gestre, Belgis Gisteren, "Anglis Yesterday. Gloss. Pez. Perendie Engestre." It is impossible not to see, that the ^IR in Yrsta, as in ERst, is the connecting point between Heri and these words, which are all acknowledged to belong to each other. The initial g in these words, and the English y in Y-Esterday are derived from the Teutonic prefix Ge, and the h in the Latin h-Eri, h-Esternus, has arisen from the same source. The Latin Hesternus is undoubtedly taken

from the form Gistron, &c.—Yestreen, (Scotch,) Yesternight; Here=Yestreen, Here=Yesterday, (Scotch,) The night and day before Yesterday. Wachter thinks, that Crastinus belongs to these words, and so I imagine:—Y-Ore is acknowledged to be a compound of Ge and Ere, &c. Before; Former,—Y-Ear is a similar compound, Gear, (Sax.) &c., Aar, (Dan.); where we have the simpler form. Air, Ayr, Ar, Are, (Scotch,) Before, formerly.—Æra, (Lat.) with its parallels in various Languages, which means the Time, from which things may be conceived to take their Rise or Origin, 'Tempus, ex quo res Oriuntur' In the Spanish corresponding term we are brought to the Spot, from which it is taken. My Lexicographer explains the Spanish Era by "Era, Era, a certain "computation of years from any particular date or epoch. Age, or long space of time. Spot of Ground, paved and Raised above "the level for threshing corn," &c.

Thus we see, that the English Eng, Prius, is only another form of EAR, To Plough, To Stir or Raise up the Ground; and it means the EAR or Rise Time, if I may so say. In ERE, ERST, ARIST, ARISE, RISE, we see the process, by which the forms AR, ^RS, RS, pass into each other. It is impossible not to perceive, how Erst and f=Irst, are connected with each other; and we shall hence understand, how the p, f^- R and $^{\Lambda}$ R are likewise connected with each other in Ere, $p-R\alpha$, p-Rior, p-Rimus, (Lat.) p-Roi, (News, Mane, Mature,) f-Ore, f-Or, (Eng.) with their parallels v-OR, f-UR, (Germ.) &c. &c. The sense of ÆR, Prius, and Mane, brings us to EAR, EER, (Eap, Ver, sanguis, pinguedo, Hp, Ver, Diluculum,) v-Er, Aur-Ora, the Sanscrit Aur-Ooren, relating to the Ere, the Rise, if I may so say, or the Early time of the year or the day. In Galic, EARach is "The Spring," which is adjacent to EARRaidham, "To Spring;" where we have the verb signifying 'To Rise or Raise up.' In Scotch, v-{ErR, ER, OR, w}AIR, Ene, is Spring. It is impossible for the Teutonic Scholar not to

see in the representation Vor, the familiar term Vor, "For, be-" Fore;" and when the Germans call Spring, Frühling, we see in Fruh, or $f^{-}Ruh$, EARly, which is applied both to the Morning, f-Ruh Morgens, and to the Spring, a kindred term. Even in the French Printemps we have the PR, or p-^R, bearing the same office. In Persian, Jan Behar, or b-EHAR is the Spring. In the sense, which the Lexicographers give of EAR, (Eap, Sanguis, Pinguedo,) Blood and Fat, we see the Foul gory, and Slimy Matter of the ERA, (Eqa,) EARth, Dirt, Mud, &c. Perhaps the Greek Ariston, and Aristos, (Aριστον, Prandium, Αριστος, Optimus, Præstantissimus,) which I have examined on a former occasion, (599,) may be directly taken from the Saxon ÆRISTA, and mean only the First or Early Meal, and the First Personage. We see in the explanatory term Præstantissimus, that the p-Ræ bears a similar The Aristeros, (Apiotegos, Sinister, infaustus,) must surely belong to Aristos, (Aριστος,) as originally relating to some opinion, in which the Left was the Preferable situation. (Ap, Valde, vehementer,) we have the Intensive particle—in Anes, (Apys, Mars,) we have the more violent sense of the Raiser—the Raser, if I may so say, or the Router; and in Aris, (Apic, Instrumentum fabrile,) we actually see the Raser or Scratcher upon a surface. Thus we perceive, how under all these senses the fundamental idea still remains, and how my hypothesis solves all the difficulties. The French word Raser actually contains the two different senses of Scratching upon a surface, and of Routing, such as I conceive to exist in Aris and Ares, (Apic, Apric.)

^R, R^, *Rt, &c.

Terms, which relate to Actions of Violence—Commotion—Agitation, &c. in various degrees and manners; and which signify To Stir up—Rout up—HARROW up, or HARRY about—To Devastate—Plunder—Annoy—Vex—Irritate—Disturb—Terrify, &c. &c., all ultimately connected with the action of HARROWING up, or Earing the Era, (Equ.) or Earth.

EAR, ARO, AROO, &c. (Eng. Lat. Gr. &c. &c.)

HARROW — HERSe, &c. &c. HERgian, (Sax.) To Harrow, To Rout, Tear, vastare, spoliare, prædas agere.

HARRY. (Old English,) To Harrow, or Pull up—about —away—Drive away, about, &c.

HARier, Ahurir, (French,) To Harry, Vex, &c.

HURRY.—HARE, the Animal.

To HARE, To fright,—HARIN, the Dog, (Eng.)

HERRY, HERY, &c. (Scotch,)
To Rob, Pillage, &c.

HERE, HER, &c. (Germ. Sax.) &c.) An army, host, i. e. the Plunderers, Ravagers.

HERde, HERd, &c. (Sax. Eng.)
A Troop, of men or animals,
the Plunderers, and the Plundered.

HERR, &c., HERUS, HEIR, HERES, (Germ. Lat. Eng. Lat.) The Possessor by Force and Violence, the Harrier, afterwards a Master or Possessor in general.

Old HARRY. (Eng.) The Devil.

The HARROWING of Hell, Name
of one of the Mysteries.

w=ER, v-IR, &c. (Sax. Lat.)
The Violent or Powerful Personage: Hence the illustrious
Personage.

w=EARY, w-ORRY. (English,) &c. &c.

IRE, IRA, ERRE, ERis, &c. &c. | IRRE. (German,) Turbare, con-(English, Latin, Saxon, Gr. &c. &c.) Ana. (Greek;) A Curse. ^Ruo, Ruina; &c. (Lat.) HYRE, &c. (Saxon.) Ruin. R^=EAR, &c. (English,) To Excite or Raise up. Enn, &c. &c. (Eng.) Desultory motion.

fundere, Irritare; Errare. OAR-ORE, &c. (Engi) What Rars up or Ploughs upp the Wateria what is obtained by Earing or Digging up the Ground. Horres Horror, &c. (Latin,

English.)

&c. &c. &c.

I SHALL now consider the Race of words belonging to the Element AR, which generally relate to the notion of Agitation—Commotion-Violence, &c., and which I conceive to derive all their force from the action annexed to the ERA; (Eea, Terra,) when it is Stirred up-Agitated, &c. by the various accidents and operations belonging to it. This Race of words relates to Actions of Violence - Commotion - Agitation in various degrees, and manners: — They signify 'To Stir up—Rout up—To HARROW up, or HARRY about To Devastate -Plunder -Annoy Vex-Irritate—Disturb—Terrify, &c. &c. We have seen the terms in various Languages, which express the action of Stirring up the Era, (Eqa,) by Ploughing, &c., as Ear, (Eng.) Harrow, Aro, (Lat.) Aroo, (Apou.,) &c. &c.; and we may well imagine the extensive influence of such important terms in the Languages, to which they belong. I conceive, that these words denoting Agitation, &c. have derived all their force from the terms, which express this important species of action, and that they may justly be considered as metaphorical applications of such significant and operative terms. I have already discussed some of the words annexed to the form *R, (page 566,) under a train of reasoning, which

which the Reader should well consider; and I must again contrast the terms with each other, which are attached to both forms, as I before did, that he may fully perceive, under every view of the question, their indissoluble union at those points where they become connected. I shall divide this Race of words into separate articles, because they are too numerous to be at once considered, and because they exhibit on many occasions turns of meaning sufficiently distinct from each other. Yet it will be at once seen, that these divisions do not always contain terms, which are marked by any material difference of meaning. The Reader is not to suppose, as may be well imagined, that in detailing a series of words I attempt to adjust the precise degree of affinity, which such words bear to each other. All, which I in general attempt, is to exhibit together those words, which bear the same fundamental idea from the same original source, with a turn of meaning as nearly similar to each other, as such collections may be supposed to admit.

Among the words, which express actions of Agitation—Commotion-Force and Violence, as To Waste-Plunder-Annoy-Terrify-Vex, &c. The Plunderers—The Possessors by force, and afterwards Possessars in general,—A Troop of Plunderers, or the Plundered; and then a Troop in general, we may class the following: HARROW, HER-g-iqn, (Sax.) To Harrow, Vastare, spoliare, prædas agere; HERge, (Sax.) Turma, Prædatores; HARRY, (Eng.) To Harrow, Rout, tear, pull, drive out, about, away, &c.; HARier, (Fr.) HARear, (Span.) Torquere, affligere, fugare, as Junius explains it; -Ahurir, (Fr.). "To surprize, to astonish, to maze, to tease;" HERRY, HERY, HIRRIE, HARRIE, (Scotch,) To Rob, to spoil, to pillage, under which Dr. Jamieson produces HAER-ia, (Su. G.) Bello aliquem infestare, deprædari; HERen, (Germ.) HERia, (Isl.) HERian, a name of Odin, "The Mars of the Northern nations "borrowed from his warlike devastations." HARass, HARasser, (Fr.) HURRY Scurry, HIRY HARY, ORF-ERE, (Scotch,) Avaunt; Eir,

EIR, (Scotch,) Fear, dread; ERY, EIRY, (Scotch,) Affrighted; HARier, (Eng.) the Hunting Dog; HARE, AUROI, (Αυροι, οι λαγωοι,) the Haried animal, or the animal which flies with a Hurried step; 'To HARE,' "Perterrefacere, percellere, metu consternare;" HIER. (Fr.) To drive with a beatle; HERE, HER, HEER, &c. &c. (Germ. Sax. &c. &c.) through a great variety of Languages; 'An army,' 'host, plunderers,' &c. &c.; Hende, (Sax.) Hend, Grex,—(Cœtus Exercitus,) the Plunderers, and the Plundered; and hence a company in general of Animals, as HERD of Cows, &c.; and hence the Keeper of those animals, the Shep-Herro. It afterwards means 'To Keep or Treasure, as in a heap,' as To Hoard, &c. &c. (See page 87, &c.) In the 'HORDE of Barbarians' we at once see the Company and the Plunderers; -HERR, HERR, HERUS, &c. (Germ. Belg. Lat. &c.) through various Languages, which originally denoted, as I imagine, the HARRowers, the Plunderers, the Possessors by force and violence; and afterwards the terms denoted 'A Lord, 'Master,' in general. HEIR, (Eng.) HERes, &c. &c. (Lat. apud antiquos pro Domino ponebatur,) the Lord, Master, (see page 93); HERRin, (Germ.) Domina; to which Wachter has justly referred the idea conveyed by HERA, (Lat.) EERA, (Hea, Juno); - HER, HERE, (Scotch,) "A Lord, a person of distinguished rank, a Leader, "a Master.—Loss, injury, damage;" HERIE, HEARY, (Scotch, "A "compellation, still used by some old women in addressing their "husbands, and sometimes vice versa."—The name HARRY, which appears to have only an accidental connexion with Henry, Henricus, &c.—Blind HARRY, (Scotch,) "Blind man's buff," that is, The person blind-folded, whose business it is to HARRIE, seize, or catch the others.—Old HARRY, — Auld HARRIE, (Scotch.) the Devil: that is, the Harrower or Devastator. From this name for the Devil, the term HARROW may perhaps have been peculiarly attached to the same spot in the expression, 'The HARROWING of "Hell,' (see page 569.) In the Scotch combination Puck HARY. " The

"The designation anciently given to some sprite or hobgoblin," says Dr. Jamieson, we again see the same sense of the Davil. In Pierce Ploughman, Hell-Powke occurs; and in Swedo-Gothic, In Scotch, HARI-galds or HARI-Cles. is Puke is 'Satanas.' "The heart, liver, and lights of an animal, the Pluck;" which means what is HARRIED or Plucked from an animal. term is used, says our author, "metaphorically and ludicrously, " although improperly; being applied to the tearing of one's hair, "a rough handling." This is the true idea of the word, and the Commentators on Shakespeare have rightly seen, that HARRIED means " Pulled and Lugged about," (p. 567.) Dr. Jamieson observes, that this word "has probably received its name from the Fr. "Haricot, a dish of boiled livers; this forming part of what is in S. " called a Head and Harigals." The HARicot, the Ragout, is the part HARRIED or Pulled to pieces; just as we talk of a dish called a! Pulled. 'Fowl;" and it is applied to Kidney beans; either as commonly making a part of this dish, or as meaning the Plucked Vegetable, just as Karpos, (Kapros, Fructus, Carpus,) means at once the Cropped and the Cropper—the Fruit and the Hand. The Galds, in Hari-GALDS, seems to be significant, and to mean that, which is Plucked from the parts adjacent to the Goule, (Scotch,) "The "throat, the jaws," or Gullet, as we call it.

The following terms under the form w, v, $^{\Lambda}R$, must be referred to the same original idea of the Harrier, To Harry, &c.; as w-Er, (Sax.) Vir, Homo, Mas, with its parallels v-Ir, (Lat.) g-Ur, f-Ear, (Celt.) &c. w-Er, (Sax.) "Capitis æstimatio," i. e. Viri æstimatio; w-Ear, w-Eary, w-Irry, (Chauc.) Perdere; w-Orry, &c. (Eng.) w-Erian, (Sax.) Conterere; w-Ar, (Eng.) with its parallels g-Uerre, &c. &c., w-Irr, the Noise; w-Ergan, Arcere, Defendere; w-Ehran, (Germ.) To Keep off, defend yourself, &c. &c.; and hence we have terms, denoting Defence, Security, Caution, &c. from the action of Driving off, as explained in

page 623, &c., as aw-ARE, w-ARY, w-IER, w-ARRen, w-ARRant, w-Arn off, &c., w-Ard off, g-Uard, y-Ard, &c. &c., w-Ahnen. (Germ.) To be made Strong and Secure, so as to last, hold, &c.; w-AHR, v-ERus, (Germ. Lat.) What is Sure, True; to which belong the terms, Arceo, Erkos, (Long, Septum, Eruko, (Ewiko, Inhibeo,) &c. &c.; of all which words the true sense appears in the German w-Eren, "Arcere, prohibere, Defendere," &c., as Wachter explains it in different articles. -v-Eer, v-Iret; (Effg.) Fr.) w-'RIE, &c. To Stir or Turn up, round, aside, away, &c.; v-Erto, w-Ard, as in To-Ward, Turned to any place; h-Orsum, v-Ersum, &c. &c. v-Erro, v-Ires, v-Ireo, which latter word means in its first sense "To be Lusty and Strong," and afterwards tobe Green; v-Enetrum, v-Enu, v-Ennes, v-Envex, the Router; v-Erruca, (Lat.) the Raised-up object; w-Art, w-Ard; (Scotch,) "A Tumulus or mound thrown up," &c.; vi-v-ERRA, the f-Erret or animal, which f-ARets or Scratches; v-Er=b-Er, the Stroke, Stripe, &c. &c.

Names for the Illustrious, Powerful Personage, either as referring to the Plunderer, HARRier, the Raser, if I may so say, or Router, or the Person, who is Raised or Rises above others; who Precedes others, as their Rise or origin, if I may so say; -- HERUS, HERR, &c., VIR, &c., before produced, AIRE, (Gal.) "A name "given to the different ranks of nobility;" and this word means. likewise "A fishing Weir;" where we have the idea of what Seizes-Catches, &c.-UR, (Gal.) Noble, generous; and it means likewise Earth, the Beginning, Slaughter-evil, mischief, Very; ER, (Gal.) "Great, noble;" to which the succeeding words are ERA, A denial, refusal; -- AIRE-ach, (Gal.) "Noble, a noble per-"sonage; -Airigh, (Gal.) Chief, Sovereign; -Airg, A Prince;" and in the same page of Mr. Shaw's Dictionary, where these two last words occur, we have Aingim, "To Plunder, spoil, drive "away," and Airiom, Ploughing; and while I examine these words,

words, I see likewise AIRRI, A Tyrant:—HER-Kolle, (Isl.) Dux; HER-Cules, Ares, (Apps.) Mars; EEROS, (Hous.) HEROS, (Lat.) Ar-Wr, (W.) HEROS; which the Welsh derive from Ar, the article, and g-wr, Man; and in Welsh we have likewise HERW, "Flying away, also pillaging, plundering; "Er-Yr, An Eagle.—Er, (Germ.) Pronom. temporis et ordinis, Ante, prius, Dominus," says Wachter; from whom we learn, that some understand its connexion with Herr, Herus, and likewise with HERilis, (Lat.) EARI, (Eng.) EORI, (Saxon,) IARI, (Welsh, &c. &c.)

To these terms, denoting the Superior Being or object, must be referred the terms for Being, under the Element 'R; and the Particles bearing originally an intensive sense, or signifying Above, Over, &c. though afterwards they become on some occasions what are called Expletives. The term RE-AR, 'To ' Rear—the Rear,' might be adopted to shew the original notion, by which all these words are connected, if we suppose them all originally to mean 'The REAR Personage or object,' if I may so say, i.e. The Personage, who Rears, Harries or Routs up, about, &c.; or in a gentler sense, the Personage or object, which is Reared up, Elevated, &c., or from which—on which other persons and things are Reared or Arise. In this race of words we must class the following; -Terms used as Articular parts of Speech, or as Pronouns, &c. &c., which I have before produced in page 342, as YR, AR, &c. (Welsh, Armoric); and in Welsh we have likewise ER, which Mr. Richards has placed in four different articles, as denoting "Though, although, since, ago, for; -An assevera-"tion in S. W. for Ys.—Truly, used in N. W.—A particle used " in composition, which enhances the sense, as the Gr. Ep., Eri.— "En, Fallow ground."—The terminations in 'R, which exist through a wide compass of Human Speech, originally denoting Agents—Beings, &c., or Intensive of the signification, whether as relating to praise or blame, as in Sing-ER, (Eng.) Cantat-OR, (Lat.)

(Lat.) Sot-ER, (Zwrye, Salvator,) &c. &c., and in the degrees of Comparison, through various Languages, as Wis-En, Sofot-Enos, (Σοφωτερος,) Sapient-Ion, &c. &c. The Pronoun Hen, with its parallels HIER, IHR, (Sax. Germ.) Your and Our, (Eng.) Eower, EUER, IHR. (Sax. Germ.) Of you, you.—URE, AR, Hon, (Sax. Gal. and Ir. Arm.) Of us; HIRA, HEORA, (Sax.) Of them: IHR. (Germ.) Their, &c.; En, (Germ.) He; d=En, w=In, w=En, (Germ.) The, We, Who, &c. &c. Among the terms for Being we must class the English ARE,—The Particles ERI, ARI, ARA, AR. RA, (Ep, particula, augens significationem vocum, cum quibus componitur, Api, particula inseparabilis, quæ vocabulis præfixa significationem eorum auget, Aea, Utique nempe, An utrum, Ae' apud Poetas pro Apa, Pa, Certe, omnino,) Rhy, (Welsh,) "Too "much, over much, excessively," which likewise means "Did, "made;" and Rhwy, Rhwf, "Too much, over much, &c., Ro, " (Gal.) Very, Very much, over much.—For Roimh, first, before. " For Do, sign of the past tense.—To go to, reach;" where we have the idea of Excitement or Motion, as in IRE; &c.—RI, RIS, (Gal.) "To, Against.—An interjection of surprize;" and the same word R1, Riogh, means "A King, sovereign, prince;"-RAE, (Gal.) "Much, plenty;" and the same word means likewise "A Battle, Salmon, a Field, plain;" where we are brought to the original spot. In the same column we have RAI, Motion; RAI. Ad RAI, He Arose;—RE, (Gal.) "For Le, With; For Ri, Ris, at, "to, by, of, against;" and it means likewise "The Moon. "Time, duration, life, existence;—RE, Ad RE, He Arose;—Sign "of the future participle To," to which the Latin Future in 'Rus is attached, as Amat-Unus, &c.—Ain, (Gal.) Upon; which likewise means "Slaughter.—Anise—Number thou—Destroyed;" OIR, AIR, (Gal.) " Upon, over, above; A Hem, border.-IAR, " (Gal.) For Air, At, upon;" and it likewise means "West-"Dark, black-A Bird-After."-IAR-Sear, "Back, backwards: " the

"the west;" where, different as these senses may appear, they are all reconciled by my hypothesis. The Bird is the animal, which flies or mounts Up; and with respect to the sense of the West, it seems to denote the Back or Afternoon-part of the day; and from the West quarter we directly pass to the signification of "Dark, black."—AR, (Welsh,) Upon; and the same term likewise means "Plowed Land; also Ploughing;" which unequivocally decides on the origin of these terms. The sense of Upon or Up, and Rise or Arise, which we perceive to prevail in this Race of words, conveys, as I conceive, the original idea.

Among the terms, relating to Animals, which HARRIE, &c. in various degrees and manners, are the following: Anies, Ennous, (Epwor; Aper,) HARA, (Lat.) A Pig-Stye; which means the place, in which the Harrying or Routing animal is kept;--- ארה ARH, To "pluck, to tear, or pull in pieces, in order to eat or devour,—a "Lion," as Taylor explains it; and hence has been derived Aniel, the Lion of God; -- Aur, Ur, bos ferus, "Latinis Urus, Bos syl-"vestris; AR-Werno, Aper; -WERn, antiqua Francorum lingua est Verres, ut demonstravi in voce Warnio Verres." (Wachter. sub voce Aur.) The term Wannio is adjacent in the Glossary of this celebrated Etymologist to the word WARnen, Defendere, caverestate, belonging to our word WARN, which is derived from the idea of a violent action, as 'To WARN off; i. e. To Drive off, or 'away.' We cannot but note here likewise, how the form 'R passes into that of v-R, as in UR, AuR, and v-Erres. Hence we obtain the form VR, BR, for the name of a Fierce animal, and afterwards for the Animal in general, as a Per, Farr, (Germ.) Boar, Brawn, Farrow, (Eng.) Feer, (one,) Fera, Ferus, (Lat.) Bear, &c. &c., of which Wachter has made a valuable, though still imperfect collection under Bar. In IERax, (Ispat, Accipiter,) we have the Bird of Prey, the Render—Tearer; and in Unax, (Tea). Sorex, Mus,) we have the Stratching animal. The term IERAX, (Ispa E,) (Ispace,) brings us to Iereuo, (Ispace, Sacrifico, Ispace, Victima, hostia, Ispace, Sacer,) which originally signified, as I imagine, 'To destroy—Kill, or Sacrifice the Victim;' from whence we obtain the idea of what is Sacred in general. In the Latin, Haruga, the Har, has the same force *.

Among the terms, which belong to the idea conveyed by Harrow, Harrie, &c. &c., as relating to the sense of Strife—Contention, &c. &c. are the following; Ire, (Eng.) Irra, Erre, Irsian, Irsung, (Sax.) signifying Ira, Iratus, Irascor, Iracundus; which are all kindred terms. The succeeding words to Irsung in my Saxon Dictionary are Irth-ling, or Yrth-ling, Agricola,—wRath, ^Rage, (Eng.) Eretho, Erizo, Eris, Erethizo, Erescheleo, (Eosdw, Lacesso, Eosa, Contendo, Eosa, Contentio, Eosalea, Cavillor,) which are terms adjacent to Eresso, (Eosaa, Remigo,) To Row; where we are again brought to Row, under the sense of 'To kick up a Row,' as we express it.—Heyrd, Heyrt.

It is impossible not to perceive, that s-Onex and Unax, (reak,) are directly connected, and thus how the forms 'R and s-R pass into each other. Dr. Jamieson will now understand, that the 'Eyre Falcons' may not be a mistake for the 'Gyre Falcons,' and that the name of these animals may alike appear under the forms of Eyre and g. Yre. Under the form GR we have a great race of words conveying the same idea. Our author observes, that the Gyre in 'Gyre-Carlin,' the queen of the Fairies, may either belong to Geir or Gyre, the Vulture, and other terms conveying the idea of Voracity; as Gerra, (Su. G.) "To eat voraciously," or to "Geira, the name of one of the VALKYRIAR or "Fates of the Gothic nation, whose peculiar province seems to have been to decide the "fate of battle." It will now be understood, that the Gyrr in 'Gyre-Carline,' Geirothe Kyr in Kyr-iar, and Gyre, or Geir, the Vulture, have the same-meaning; and moreover, that the Fal in Falcon has the same force as the Val in Val-Kyriar, so that Gyre-Fal has precisely the same fundamental meaning, as Val-Kyr, in a different order. The Fal or Val belongs to such words, as Vello, Vellico, Pull, Pluck, &c. Dr. Jamieson will now, I trust, perceive and acknowledge, that to the Kyr in Kyriar, belongs the Keer in the Greek Keer-os, (Knees, Sors, Fatum, Knees, Parcæ); and that all these forms Gyre-Kyr-Gaer-a, &c. &c. &c. belong to such terms as Keir-o, (Kuqu, Tondeo, scindo, abscindo, populor, vasto, diripio, insatiabili voracitate voro,) Kor-ee, (Kore, "Satio, "Saturo;" i. e. avide voro usque ad satietatem,) Sheer, (Eng.) &c. &c.

HEYRt, (Scotch,) "To gang or gae HEYRd, To storm, to fume, "to be in a violent Rage," as Dr. Jamieson explains it; who produces the following parallel words; HYRA, HIRA, Vertigine agi, To become giddy; AER-ast, Furere; AEIR, (Isl.) Furiosus; YRA, (Su. G.) Cum impetu ferri, To be Hurried away; Yr, Furiosus; Hyr, Fire; Hyra, Heat; Ur, (Al.) Ferus, Iratus; Ora, Orra, HURRA, (Goth.) Se movere; ERRE, (Belg.) Iratus, with the Saxon terms before produced, Erre, Yrre. We see, how h-YR, Fire, brings us to f-IRE, p-UR, (Mus,) to the Hebrew TH AUR, Light, Fire, To Curse; AR=^R, To curse greatly;—Uno, (Lat.) To burn, &c. "To grieve, tease, or vex." The same Hebrew word nr AR, means likewise 'To Flow-A Stream,' &c. &c.-HAIR, (Fr.) To Hate; Hyrwian, Exprobare; Ir, (Gal.) Anger, a satire, lampoon; In=Inz, (Gal.) "A Curse, malediction, blame, "anger;" and in the same column of Mr. Shaw's Dictionary, where these words occur, are IRE, Ground; and IRionn, "A Field, "ground, land,"—Aoir, (Gal.) A Curse, a satire, railing.—Aoire, (Gal.) A Satirist; the succeeding word to which, in Mr. Shaw's Dictionary, is Aoirain, A Ploughman; which coincidence of forms would alone prove from what source the idea of Cursing is derived. We know, that 'To Plough' is 'Terram Emagitare,' and 'To Curse' is Exagitare; as in "Dî Exagitent me, si quicquam, formula ju-"randi ap-Hor," says R. Ainsworth.— ARA, (Apa, Preces, diræ, imprecatio: --- noxæ, damnum, Aenquan, Precor, imprecor, maledico.)

We cannot but see, that Araomai, (Apaopuu,) connects itself in form with Aroo, (Apo, Aro,) To Plough.—The Latin Ara may either mean the Spot, where Prayers were offered, or the Prepared or Appointed Area, or Era, (Epa,) on which Religious Rites were performed. The term Area does not seem to mean the Ground simply, but the Ground, with some process performed upon it, quasi 'Locus Aratus,' The Cleared-out Place; as when Aro means "To dig up Ground, to dress or order it," as R. Ainsworth explains

explains it. In Arabic, Le Ara means "A court-yard, Area, "Piazza," as Mr. Richardson explains it. In Armoric, Enres, means "A flat, even plot of Ground, the floor of an house." Adjacent to the Latin Area we have Areo, Arena, where we see the sense of Dirt in a Dry-Scattered state; as in the Greek Anaios, (Apauoc,) and the Latin ^RA= ^Rus, where the ^R is doubled. curious to observe, how the terms, which seem to mean simply the Ground, are connected with an operation performed upon it, as Ploughing-Reaping, &c.; and it is marvellous likewise to observe with what felicity the writer, who fully feels the force of his own Language, applies words under their original idea by the influence of a strong and predominating impression. In the " Proprio conditur Horreo Quicquid de Libycis Verritur Areis," we see three words, ultimately related to each other, applied in their genuine and original sense, v-Erro, Area, and h-Orreum; and we likewise understand, that the h-Okreum is nothing but the Crop Depositary, the place, in which that, which is EAR'd from the ERA, (Eea,) or quod v-Erritur de Area, is deposited. The term EAR relates to the getting in of the Crop-"To EAR "into the barn;" and N. Bailey explains "EARing Time" by Harvest. Let us mark, that the HAR in HARvest has the same meaning; and so has the 'R in 'R-eap. The Latin Aro signifies in one sense "To Reap or gather." The adjacent word to the Armoric Erres, before produced, in my Armoric Vocabulary, is Eno, Envo, Enven, "A Ridge, or high furrow." We see, how Enven brings us to Anvum. Adjacent to these Armoric terms, in the same Vocabulary, are Enesi, To Hate; and Ens. A band or tye; Eren, To tye. The terms for Tying-Binding, bring us to Eiro, (Eigu, Necto,) and Eiros, Eirion, (Eigos, Eigiov, Lana.) The idea of Tying-or Winding about is connected with the action of a Surface Stirred-Turned-Rolled up or about, as in Volvo, Voluto, which relate, we know, to the action of Wallowing in the Dirt.

Dirt. The Latin Area means likewise "An ulcer or scald, which "causes baldness;" which probably belongs to the idea of the Fretted Surface. We know, that the explanatory word Ulcer belongs to Elkos and Elko, (Edrog, Ulcus, Edrog, Traho); and we see, how these words connect themselves with Aulax, Alox, (Audag, Sulcus, Adog, Sulcus, Vulnus,) in which latter word we directly see the combination of the Wound and the Furrowed surface. Hence we have belonging to our Element 'R, the Scotch Arred, Scarred; Arr, A Scar; which Dr. Jamieson has justly referred to its corresponding terms in other Languages; Aerr, (Su. G.) Aer, Or, (Isl.) Arr, (A. Bor.)

The adjacent words to this term in Dr. Jamieson's Dictionary are Arrace, Aras, "To snatch, or pluck away by force;" where the full sense of the Element is visible,—Arrondelle, "the swal-"low, a bird," belonging to the HIRundo. I have supposed on a former occasion, (p. 640,) that the HIR in HIRundo, belongs to the idea of Noise, attached to this Element; and I have observed in the same place, that Hinudo, "the Horse-leach, a blood sucker," means the Pricker. I have shewn likewise, that Anundo, the Reed, is derived from a similar idea of the Bristly object. term Hinundo must be comprehended within the sphere of the Element, and the only difficulty is to discover the peculiar sense, to which it is more directly attached. The Swallow is noted for its Swift flight; and to this idea the ARR, HIR, &c. might be referred, as denoting the animal with the HURRied, HARRied motion. In the very passage quoted by Dr. Jamieson we have "The Arroadelle so swift of flight." The adjacent words to these in our author's Lexicon are the following: ARRan=Ake, the Speckled diver, Mergus stellatus; which belongs to ARR, the Scar. or Mark-AR-nut-Earth-nut, or Pig-nut, i. e. the Nut ARRed or Scratched out of the Ground,—Arns, the Beards of corn, i. e. the Prickers, from which form Awns is directly taken; and the AR belongs

belongs to the EAR of Corn, the Arista, &c. &c., the Arrer, or Earer, the Pricker,—Arr, Are, the third person pl.; Arlich, Sore, Fretted, painful; where Dr. Jamieson sees, that Ar may belong to Aerr, Cicatrix, Arly, Early, explained on a former occasion, and Arr, the Alder tree, with its parallels in other Languages; Uern, g-Uernen, (Welsh,) v-Ern, gu-Ern, (Arm.) f-Earnn, (Gal.) Erlen-baum, (Germ.) Aulne, (Fr.) Alnus, (Lat.) What portion of the Elementary sense the Ar, Er, &c. bears in these words I do not know. We perceive however, that the terms for this tree, when the L is the first consonant, are quasi Arl, as in Erlen. In the West of Scotland, the tree is called Eller and Aar; in which latter word we have the simplest form.

Among the terms, which signify what is Stirred up, Raised up, either simply, or in various degrees of Commotion-Violence-Agitation, To be in a HARRIED—HURRied State, &c. &c. are the following: Ruo, (Lat.) Hyre, (Sax.) Ruina; ^Roo, (Ρωω, Roboro, sed pro eo usurpatur, Parruu, vel Parrua, Paopa, Agitor, et med. Ruo, Irruo, Festino); from which form of terms, denoting Strong or Violent Agitation are derived words relating to what is Strong in general, as 'Rome, (Pwun,) 'Robur, &c. In the celebrated passage of the Iliad, a word of this Race is used in the sense of Violent Agitation, Αμβροσιαι δ' αρα χαιται ΕΠΕΡΡΩΣΑΝΤΟ ανακτος Κρατος απ' αθανατοιο. -- ^Ro= ^Ros, (Ρωρος, σφοδρος, Vehemens,) ^Ra-^Ros, (Pagos, Robustus, venter,) ^R=EAR, (Eng.) To Raise up; ^R-OAR, (Eng.) ^Ruh-^Ren, (Germ.) To Touch a thing, to Stir, move; 'Roh, (Germ.) 'RAW, (Eng.) 'RAUH, (Germ.) "What is Rough, Rugged, scabrous, uneven," &c.; i.e. What is in a Stirred-up, in a Ridgey state, &c. Hence R-ERE Eggs, Raw Eggs; HR=ERE, (Sax.) I shew in another place, that the ^R-EAR part, is the part, from which, as it were, things take their Rise; and the R=ERE Mouse, the Bat, either signifies the animal, which has a Flitting-Agitated motion, or which appears in the Rear

of the Day; -R^=EAR-acht, A Rising, Rearing up-R^=EARidh, (Gal.) "A Senior, elder;" where we see, how the idea of the Illustrious Personage belongs to that of Raising AR-WYRE, (Welsh,) To Arise or spring, as a fountain. cent to Roh, in my German Lexicon, is 'Roh='R, a Reed, or Cane, which belongs to the idea of the REARED-up, Sticking-up, Rough, Bristly object; and from the Hollow Reed we have the Hollow in general, as Rohr, a Gun, and Rohre, a Channel, unless we suppose, that the sense of the Hollow belongs to the idea of the Furrow. The former however is, I believe, the true notion. The preceding term to 'R=UHRen is 'R=UHR, "a lash, "flux or looseness with wringing of the bowels," says my Lexicographer; where we have the strongest idea of Commotion—Agitation, &c. connected likewise with that of foul matter.—Oro, OR-ORO, OR-ino, (Oen, Oeneu, Oenu, Concito,) AIREO, (Aieeu, Deturbo, everto, corripio, capio,) Aira, (Apa, Malleus, securis,) Airo, (Aen, Sursum tollo, attollo, tollo de medio, erigo, porto, gesto,) Aioreo, (Ainem, Sursum, tollo, elevo, suspendo.) Here we have the idea of Bearing—Carrying — Supporting; and thus the sense of Suspension—Hanging is attached to the idea of Raising up, as in the following terms likewise; Arretho, Arrtazo, Artao, Aenden, (Asodu, Tollo, suspendo, Asoraco, Asoraco, Tollo, attollo, elevo, aufero, Agraw, Suspendo, appendo, Anospo, Portando sublate,) where we unequivocally see, how the forms 'R, and 'RT are attached to each other; —Aor, Aorter, (Aop, Ensis, Aortep, Lorum, seu funis,) the Sword, or Hanger, as we call it, and the String, by which any thing Hangs; — Aorte, Arteria, (Aorty, Arteria magna, Artypia, · Arteria,) what is Raised up; and thus we see, how we are brought to Artuo, Artios, Artos, (Aeruw, Apparo, Aeruos, Par, paratus ad aliquod faciendum, Aeros, Panis,) which I suppose to be derived from a similar idea of being Stirred up or Worked up—about or together, so as to be made into a due—compact form—state or consistency. consistency.—Oureus, (Oupeus, Mulus,) the Mule, the Lifter up—Bearer or Carrier:—Enion, (How, Monumentum, sepulchrum,) the Tomb—the Raised-up object, as of the Era, (Equ.)

'R means To Drive-Push, &c, as IRai, IERthi, (W.) "Frequently " Hiriai, because of its length; a Goad or staff, to Drive oxen with;" and an adjacent word to this in my Welsh Dictionary, is Iro, "To daub, smear; where we are again brought to the ERa, (Epa,) under another idea. In the same page we have Iwach, "A Roe-"buck," the Driver or Pusher with his horns; to which we must directly refer the Greek Ionchoi, (100x01,) Caprearum genus; and in this page I find likewise Ion, A Lord, Prince; and Inad, Terrible, dreadful. Among the terms, which relate to the idea of Driving, we must record the Latin Auniga, and the French compound Hur=Haut, " A word used by carmen to their horses, when "they have a mind to make them go to the right hand." That the sense of Airo, (Airo, Porto,) To Bear, carry, is connected with the idea annexed to Aro, (Acom, Aro,) of Stirring or Raising up the Ground by Ploughing, &c. will be manifest from the Welsh terms Anwedd, To bear, and Anwydd, a Plough; and from the Galic Ana, a Bier, and An, Ploughing.

Mr. Richards explains Hiriai, the Goad, as supposing, that it belongs to the idea of Length. In Welsh, Hir means "Long, "prolix;" Hirio, "To lengthen, prolong, to delay." The idea of Length I conceive to be derived from the action of Harrowing up or Scratching Traces—Tracks—Lines or Lengths, if I may so say, upon a surface. Under the idea of the Line or Length, we have the Welsh Herwth, "The Long gut, the straight gut;" which does not come from Hy and Rhywth, as the Welsh Lexicographers suppose,—the Latin Hira, a Gut; the Greek Orua, (Orua, Chorda, Intestinum coctum,) &c. In Latin we have Hir, the Hollow of the Hand, belonging, as it is justly supposed, directly to Cheir, (Xuo,) which must be referred to the terms denoting

Action, through a wide compass of Human Speech, as in CHAIR= Woman-GARE, (Scotch,) To effect, cause a thing to be done, The Hebrew ארך ARk, means "To be or grow long," &c. &c. as Mr. Parkhurst explains it; and the preceding term to it in this writer's Lexicon is ARH, which signifies "To go in a Track; "and as a N. a common Road," &c.; where we are brought to the original idea. To this belongs the Hebrew term ירה IRH. "To direct, put straight or even, point forward, guide, aim, or the "like," says Mr. Parkhurst. Here we may observe, that the Latin Duco, Ductus, &c.. as Ducere, "To Lead-To Draw-To " Protract, Prolong," &c., Ducere fossam, Ductus corporis; which I shall prove to belong to Dig, under the Element DC, will sufficiently shew to us the relation of these words under the The Greek ORua, (Opua,) which might be explained Element 'R. by "Ductus Intestinorum," is adjacent to Orusso, (Opioow, Fodio,) To Dig, Ducere fossam, &c, &c.; from whence we may see, that the OR in both these words has the same fundamental meaning.

From the idea of being Stirred up—Raised up, as in a state of Elevation—or Agitation we must refer the following terms, which relate to the Elements Wind-Sky, &c. &c., as AER, (Gr.) AER, (Lat.) with their parallels in various forms of Speech, the modern Languages, Air, (Eng.) and in the Celtic Dialects, Auyr, (Welsh.) Air, Auyr, (Corn.) Ear, (Ar.) Aear, (Ir.) recorded by Lhuyd:-Ouranos, (Oueavos, Coelum,) Ouros, (Oueos, Ventus secundus,) Hurracan, (Eng.) Orage, Ouragan, (Fr.) Huracon, (Span.) EIRW, Eirwf, (Welsh,) a Cataract. The succeeding word to this latter term in the Welsh Dictionaries is EIRY, Snow; which appears in other Dialects of the Celtic, as Er, (Corn.) Erch, (Arm.) produced by Mr. Richards; all which, I imagine, belong to the idea of Commotion—the Storm, &c. Our familiar term to express objects, which belong to the Sky, the Meteor, Met-Eoros, (Meteopos, Sublimis, excelsus, Pendulus, Vagus, &c. Merengos em tur Ougariur, (de rebus cœlestibus,)

Voluto,

Coelestibus,) Supernus, &c.) is acknowledged by some to belong to Aliro, (Augu, Tollo,) before produced. Under the same form as Ours, (Ougos, (Ougos, Alveus, fossa,) the Ditch, Furrow, Channel; where we are brought to the spot, supposed in my hypothesis, the Ground Stirred up or Excavated. Our familiar Greek Vocabularies produce an example, where it is joined to one of the words, which are conceived in my theory to be kindred terms, as Airo, (Aigu, Tollo,) To Stir or Raise up;—Ourous t'Exchath-Airon, (Ougos, Eženabayov,) They Cleared out the Ditches—Furrows, &c.

The action of Routing up the Ground supplies a Race of words, which express Searching after—Enquiring—Desiring to Find or obtain; and hence Desiring or Loving-Finding-Discovering-Seeing-Producing-Bringing out or forth; and hence Uttering-Speaking. We know, that Scrutor belongs to the action expressed by Scruta Eruere: and Rimor is derived from Rima, the Hole or Chink. Among the terms under the Element, which belong to this train of ideas are the following: HAURio, (Lat.) ARuo, ERuo, (Apus, Ex profundis traho, Eque, Traho,) Enuo, (Lat.) where we have a similar term to that, which we see in Erao, in the compound Ex=ERao, (Εξεραω, Evacuo, expromo,) which is acknowledged to be derived from ex and ERA, (Eea, Terra.)—Eurisko, Euron, (Eurora, Invenio investigando, et inquirendo,) Orao, (Oeau, video.) ארד RAH, To see, look:-ERao, ERos, (Epau, Amore Prosequor, East, Amor, quo Prosequimur aliquem,) where in Prosequor we see, how the idea of Love is connected with the Excited action of Searching after, (" Prosequor, To follow after, to pursue, " prosecute.") Erotao, (Epuraw, Interrogo,)—Ereo, (Epu, Quæro, Interrogo, nuncio, quæram, nunciabo,) Einomai, (Epw, Interrogo,) Eiro, (Epu, Dico; i. e. Profero, vel Edo sermones.) I have shewn, that Eiro, (Egu, Necto,) To wind round, Tye, belongs to a similar metaphor of Stirring or Turning up the ERA, (Eqa.) as in Volvo,

Voluto, To Roll about, Wallow. The senses of Eiro, (Εφω, Necto, Dico,) 'To wind round, To Speak,' bear the same relation to each other, that In-Volvo, "To entangle, envelope, to ravel, to entwine, "Involve, bears to E-Volvo, "To unfold, to expound, to declare, "tell, or Utter," as R. Ainsworth explains them! Let us mark in Eiron, (Εφων, Dissimulator in oratione, dissimulata loquens;—Cavillator,) the sharp and secret Searching or Probing of the Ironical Caviller or Disputant. This word was admirably applied to the character of Socrates. In Homer, the terms Ereo, and An-Eiromai, (Εφεω, Ανειφομωι,) are connected with another term of Enquiry, which actually relates to the metaphor of Searching for Metals in the Ground.

Τουτο δε τοι ΕΡΕΩ, ο'μ' ΑΝΕΙΡΕΑΙ ΗΔΗ ΜΕΤΑΛΛΑΣ.

We see, that all these verbs Ereo, Eiro, &c. (Epew, Quæro, Εφω, Interrogo,) may be considered as different forms of the verb Erao, in ex-Erao, (Εξεραω,) Το Era up, (Ερα, Terra,) if I may so The Lexicographers understand, that URRis, URRissos, (Tepis, Sporta, Teerooc, Vas vimineum,) the Wicker-basket, belong to Eiro, (Εφω, Necto); but they do not see, that the preceding word to it, Unon, (Year, Examen,) belongs probably to the same idea of the Wicker-basket or Skip; and hence it means a Swarm of Bees, in general, with their operations, as Union, (Ypion, Favus.) The words next to these in a Greek Vocabulary are Unter, (Yerre, Ollæ operculum,) and Unche, (Yexn, Instrumentum in quo nautæ onera bajulant, Vas fictile, imprimis, cui imponuntur salsamenta. Sed $\Upsilon_{e\chi\eta}$, η_{s} , η_{s} , est porca seu porcus femina, a sono grunnitùs ita dicta,) which related, I imagine, originally to some Wicker Covering, or Implement; but when Unche, with some minute difference in sound, denotes the Sow, we directly see the idea of the Router up of the Ground. In the same column of my Vocabulary is Unax, (Youk, Sorex, Mus,) where we have the Scratcher up in a less intensive sense.

To the action of Routing up the ERA, (Epa,) or EARth, belong the terms for Metals; as ORE, (Eng.) ERz, (Germ.) Minerals; AURum, (Lat.) OR, ORO, &c. (Fr. Ital. &c.) Argentum, (Lat.) Arguros, (Apyueos,) with the parallel Celtic terms, as given by Lhuyd, Ayr, Oyr, Our, Aur, Or, for Aurum, and Ariant, Argan, Anghans, Anghant, Aingid, Aingedd, for Argentum: - Enis, Æs, (Lat.) Brass; Airain, (Fr.), Iron, (Eng.) with its parallels HAIARN, larrun, &c. (Gal.) Iren, Isern, &c. (Sax.) HIERRO. (Span.) f-Errum, (Lat.) &c.; where we see, how the R passes into S, and how the form f^{-} R connects itself with R . The term Harness and its parallels Harnois, (Fr.) &c. belong, I believe, to Iren; but on this point there is some difficulty. The preceding term to IARRun, Iron, in Mr. Shaw's Dictionary, is IARRam, "To "ask, seek, look after;" and we see in these words the same relation, which exists in Μεταλλον, Metallum, and Μεταλλαω, Scrutor. I find in the same column of Mr. Shaw's Dictionary "IAROG, "A weasel," and "Anguish, grief;" where we have the material and metaphorical idea of Scratching up or Soliciting a surface; IARag, or Eirag, A Hen; i.e. the Scratcher; and IARRA=taiche, A Probe; where the original idea is fully manifest.—Under the same sound as ORE we have OAR, Remus; and they have both the same fundamental meaning. The ORE is that, which is found by Routing up the Era, (Eea); and the Oar is that, which Routs up, Ears up, or Ploughs up, the Surface of the Water. The Pirates Menecrates and Menas, says Shakspeare, "Make the sea serve them, "which they EAR and wound With keels of every kind." (Ant. and Cleop.) In the term Wound we see, how ARR, the Scar, before produced, connects itself with EAR. In Galic, Arach is "A Plough share;" and Aracair means Rowing, In Row the breathing before the R is lost; and we cannot but note, that Rem-us connects itself with these words.

The following terms relate to Commotion, Agitation, as more particu-

particularly expressing Hunnied, or Desultory motion, as of Water flowing;—of things Cast or Thrown;—of Persons Wandering or Straying about here and there, from the straight path, sometimes under the idea of the HARRied condition, as Eroso, (Epwen, Eo, fluo, Impetu feror, Impello,) 'Reo, (Peu, Fluo,)-The names of Rivers, under the Element'AR, as AR-ARis, &c. &c., IAR, (Welsh,) A River; which means likewise a Hen, as denoting the Scratcher: YAR-Mouth, &c. - NTI IRA, To cast; -- IRH, To Cast, shoot; the latter of which signifies likewise "To Direct, put straight; "To place, Erect, as a pillar," says Mr. Parkhurst; where, in the explanatory terms Direct and Erect, we still see the original idea of Raising up, as connected with an action of Excitement.—Irr. (Lat.) &c. &c., which commonly means simply to Go; but in IRE, dejectum Monumenta regis, &c., where the effects, arising from the irregular course of a swollen River, are described, we see the more original idea of Violence and Commotion. Erro, (Low, Abeo in malarn rem, facesso in malam crucem, pereo, intereo, pessum eo,) To be in a HARRIED state; and here let us mark the combination of prepositions with the verb of motion, as it might be per-IRE, inter=IRE, where we see the original idea of IRE.—IRRen, (Germ.) Turbare, confundere, irritare: - Errare, vagari, as Wachter explains it; where we perceive the genuine notion, though Wachter appears surprized at this variety of meaning, annexed to the word, and calls it, "Verbum obscurum et difficile explicatu, quia non "unum, sed multiplex."-Erno, (Lat.) with the parallels in modern Languages, Err., (Eng.) &c. &c. "Justices in Eyre;" i. e. Itinerant Justices. - w-ARRY, (Chaucer,) " Errure, To go " astray or wander;" Exend, (Sax.) Nuntius; Exend, Execut, ARRANT Roque, the Vagabone; IROS, (Igos, Irus, mendicus quidam apud Homerum !--Pauper, mendicus quivis.)--اواريدن Awaniden, (Pers.) "To walk, wander, stray, stroll.—To fatigue, or be fa-" tigued.—To bring or cause to bring.—To be lost, to be "ruined."

"ruined."-0,14 AWARE-AWARE Krden, To Harrass. AWARE shuden, "To be oppressed, injured.—An idle, lazy, indolent, " slothful fellow, a vagabond, vagrant, poltroon," as Mr. Richardson explains it.—Earo, (Lat.) "A wanderer, a loiterer, a stroller, " a vagrant, a vagabond, a starter aside, a straggler, a land leaper, " a gadder, a fugitive," as R. Ainsworth explains it.—Her=Wr, (Welsh,) "He that fleeth or is driven out of his country, an out-" law, a fugitive, a vagabond;" which belongs to the adjacent term HERW, "A flying away; also plundering or pillaging," before produced. The sense of the Persian Awariden, "To " bring or cause to bring," will direct the Persian Scholar to the familiar word (!) Awurden, "To bring, bear, carry;" and will shew him from what source it is derived. In the sense, which Awund has of "A battle, conflict, engagement, combat, war," we perceive the more original idea of Violence and Commotion; and in the compound Soll Awun, "A Ravisher of Hearts," we again see the term applied with great force and propriety,-Lab-Yrinth, (Ausbumbos,) is literally the Leaf=Errant, if I may so say; as it is compounded of Laube, (Germ.) "An arbour, " bower, bowering," from Laub, a Leaf, and ERRANT, IRRENDER, (Germ.) Errende, (Island.) &c. &c., and denotes the Leafy Spot or Garden, in which persons are ERRANT, or Wandering. It is called in German, lan-Garten; and it is curious, that Ennor in Latin is the appropriate term to express the mazes of the Lab-Yrinth,—Inobservabilis Erron Labyrinthi, produced in the ordinary Vocabularies. In Vagrant it is understood, that Errant, Errans, &c. is the second part of the composition, quasi Vag-ERRANT. I have before produced this idea for the origin of Lab-Trinth, (p. 1089.) in which I am now confirmed. It is curious, that the compound Laub-Irron actually occurs in German, but it is interpreted by Wachter, Hæretici; and the Land is supposed to belong to g-Lauben, Credere, quasi 'be-Lief-Errants.' I must submit

submit to the consideration of the German Critics, whether this term did not originally mean *Leaf-Errants*, or Wanderers in *Woods* or *Leafy* places.

Among the terms relating to Noise we have HIRRIO, "To "HIRR, snarl, or grin like a dog;" which the Etymologists suppose to be formed by the principle of Onomatopæia, because R is a Canine letter. YRR, (Scotch,) "To snarl, or growl as a dog;" HYRR, HERR, (Welsh,) "A word used by one that puts a dog "forward to fight; also the gnarring or snarling of a Dog;" 'The ' door is off o'HAR,' (Orkney Dial.)—Out of HAR, (Scotch,) which Dr. Jamieson has referred to the term HEARRE, (Sax.) HAERR, HERRE, (Germ.) Cardo, a Hinge; -- 'R=OAR, (Eng.) OORUO, (Ωρυω, Ululo, Rugio, ejulo.) Oniau, (Welsh,) "Cries, from Goriau, the pl. " from Gawr, a cry, a noise," as Mr. Richards observes; in the same column of whose Dictionary we have Onohian, A cry of joy; "Orsin, the hinge of a door or gate. D. According to others the "same as Gorsin." Orug, the same as Gorug, he made, he did. We see, how the form 'R has passed into the form g-'R or GR, in these Welsh words; and we cannot but perceive, I think, how the term h-Irrio, in which the Rough or Guttural sound has already commenced, connects itself with the words for Noise, under the forms gh-^R, j-^R, GR, JR, &c., as g-Arrio, (Lat.) which Martinius gives us as the sense of h-Irrio, j-Ar, c-^Ry, g-R-in, g-R-owl, (Eng.) sc-^R-ietch, &c. &c.

We have various terms, belonging to our Element ^R, which relate to the idea of what is Grating or Rough in sensation or appearance; and which I conceive to be derived from the action of Grating upon a surface, as the Era, (Eqa.) the Ground, or from the appearance of the Ground, in a Rough—Rugged—Grated—Gritty—Foul—Filthy state, either regarded as consisting of Dry or of Wet matter. Among these terms we must rank the following: Horreo, To Set up its bristles, to have the Hair stare, to be "Rough,"

Rough, and look terrible,—To shiver and tremble for fear at,— To shake or quake for cold; -Horresco, "To grow Rough and "Rugged; To wave to and fro," (Et Campum Horrentem fractis invertere glebis.)-HEReo, (Lat.) HARRen, (Germ.) which seem to have related to the Rough or Bristly object, sticking out or up; (HÆRet, lateri lethalis Arundo); where the AR in Arundo has the same idea as the HER in HEReo.—Orrodeo, (Oggadou, Timeo, formido.)—Orros, (Oppos, Serum,) from the Agitated motion in the act of coagulation.—HREO-full, (Sax.) Rue-full, (Eng.) RAW, R-ERE Eggs, (Eng.) before produced.—HAIR, with its parallels HER, (Sax.) HAAR, (Germ.) &c. &c. Hence the words, under the form 'Rr, produced in page 672, HARSh, HIRtus, HIRsutus, &c., and ^R-ough, ^R-ugged, &c. under the form Rg.—HURE, (Fr.) The Head of a wild boar, bear, wolf, &c.—An ill-combed and dirty head.—HAIRE, (Fr.) "A HAIR shirt, worn by some monks, "nuns, &c. by way of mortification."—HAIRE, "A wretched man."— HAIR, (Fr.) To Hate.—HAIReux, (Fr.) "Cold, damp, foggy and " frosty." HAAR, (Scotch,) A Foggy, Sea HARR, a chilly, piercing fog or mist arising from the Sea.—Sea-HARR, Tempestas a mari ingruens, (Skinn.)—Oorie, Ourie, Ourie, (Scotch,) "Chill, cold, " bleak, primarily applied to that, which produces coldness in the "body, as an Oony day.—Having the sensation of cold, shivering.— "Our lach, Shivering with cold.—Having the Hair on end, like a "horse, overcome with cold," says Dr. Jamieson; who refers us to UR, (Isl.) Rain; UR, YR, (Su. G.) Stormy weather.—77 R-^R, "To "Excern, Ooze with, Slaver, Drivle;" to which Mr. Parkhurst refers the English Rear and Raw.—Euros, (Euros,) Situs, mucor, caries.— HAIR, (Scotch,) "A very small portion or quantity, as 'A HAIR of "' Meal,' a few grains;" where we unequivocally see the idea of the Gritty substance; and hence we have Hirse, &c. Millet; ERS, (Fr.) Pulse; Hordeum, ORuza, (Ορυζα,) ORyza, R-ice, &c. produced in page 638.—HAIR, HAR, HARE, (Scotch,) "Cold, nip-" ping,

"ping.-Keen, biting, severe.-Moist, damp. This sense remains " in HAIR-Mould, a name given to that kind of Mouldiness, which "appears on bread, and in HAIR-rym, Hoar-frost.—Heary with "age." Here Mouldiness belongs to Mould, just as I suppose HAIR to belong to ERA, (Epa.) To these words are attached, as we see, the English HOAR, HOARY, which have justly been referred to the Saxon Harung, the Islandic Har, Canus; Hor, Mucor. we have the Vile—Foul—Immoral woman, the WHORE, (Eng.) Hure, (Sax.) Hur, (Germ.) &c. &c.; and Skinner observes, that the Greek Oaroi, (Oagos,) Lusus Venerei, may belong to these words. Such may be the case; yet I ought to observe, that in Galic, And signifies Conference; and that the adjacent terms in Mr. Shaw's Dictionary are AR, "Ploughing, Husbandry;" AR, Slaughter; and Arac, A Conflict. We know, that Oraistus, (Opaserus, Confabulatio, peculiariter maris cum fæmina secretior,) means a Conference, and especially that of a Man with a Woman; and we shall certainly be struck at this union of ideas between the Conflict-Slaughter, and the Conference, in the Celtic terms, when we remember, that Oanistus, (Ouplotos,) refers alike to the idea of a Congress in War, or to a Conflict, and to a Congress in Conversation, or to a Conference, as in the expression Holemon Ompurrus.) We shall not wonder, that the idea of a Conference or Conversation belongs to the action of Ploughing, when we recollect, that the term Con-Versation itself is derived from the same metaphor, from Con and Versor, Verso, Versari Terram. In Poleo and Poleno, (Полец, Verto, Verso, Versor, Полеци, Verso, Versor alicui, habito,) we have the same metaphor.

I shall here produce some terms, which are derived from the ERA, (Equ.,) considered as in a state of Culture; and which will best be understood by observing the senses of the Latin Colo, from which my explanatory word Culture is derived. Colo signifies, according to the interpretation of R. Ainsworth, "To till, or "husband

"husband ground;—To deck, trim, or adorn.—To worship, to " revere.—To exercise, practise, or study.—To follow, and Use." The following words, under the Element 'R, belong to the same action, as signifying originally 'To EAR the Ground,' and for the same reason; —OReo, ORa, ORaizo, (Ωρεα, Curo, Ωρα, Cura, Ωρα, Tempus, certum anni tempus, Apallo, decoro, venusto, venustate concilio, Orno, &c. OpaiCoum, Excolo, seu Exorno me,) signify 'To Dress, Cultivate, Deck, take Care of, to Elaborate, work up, ' bring to a due Temper and consistency;' and hence we have the sense of a due Season or Time, the Hora, (Lat.) &c. with its parallels in modern Languages, as Hour, Heur, Ora, &c. (Eng. Fr. Ital.) and in the Celtic Dialects Aur, Our, Uar, &c. produced by Lhuyd. We know, that Time, Tempus, Temperies, &c. belong to Tempero, To Temper, mix, mingle; which is particularly applied to the amelioration of Soil by working it, as Temperat arva, To Temper mortar. I have shewn, that Tempero belongs to the Element TM, as denoting the Ground. It is curious to observe, how words are attached to the original Spot, from which they are derived. In the Mythology of Orpheus, the Hours are supposed to be the Daughters of Themis, (Oemis,) the Daughter of the Earth; and they are adorned with the various colours and the odours—with the dews—the flowers and the blossoms of the Earth, (Hymn 42.) Hence we have $\Omega_{\rho\eta\phi\rho\rho\rho\varsigma}$, as an epithet to Ceres, in Homer's Hymn to that Goddess, (ver. 54.)—Aro, (Apa, Apto, adapto, Congruo, quadro,) 'To Prepare, compose, or make up things in a due state of 'preparation—consistency and fitness with each other;' and hence we have Aroma, (Apupa, Aroma,) and Artuo, (Aprua, Apparo, Adorno, instruo, Condio,) Antos, (Aeros, Panis,) Ant-ios, (Aeros, Par, integer, perfectus;—Paratus ad aliquid faciendum,) Arti, (Apri, Modo, &c. in compositione notat perfectionem,) 'To make 'up, work up, A Composition, What is of a due consistency—

'Perfect-Compleat,' &c. &c. We cannot but mark, how Par belongs to Paro, for a similar reason.—EHRE, ERE, Honor, cultus; EHRen, or ERen, To Honor; and here Wachter explains Eren by "Colere terram, Arare," &c. and "Honorari, venerari;" and he cannot help seeing, that this word may have some relation to ORein, (Ωρεω, Curare,) "quomodo etiam Latinis Colere primo est "Curare Terram, mox etiam Curare parentes, amicos, Deos," &c.-AR, (Sax.) Honor; which likewise signifies 'Æs, Æris, Nuntius, 'Substantia, opes, &c. Remus, Usus, Primo; Arian, (Sax.) Parcere, Honorificare; HERE, (Sax.) Fama; HERian, Laudare; Herian, Hergan, Laudare; which words seem directly to connect themselves with Here, Exércitus, Turma; Herge, Turma, Prædatores; Hengian, To HARROW. Vastare, spoliare, prædas agere; from whence perhaps we should imagine, that the idea of Praise—Fame is rather attached to Military glory.—ORE, (Junius,) Laudare.— Orno, (Lat.) which probably directly belongs to the Teutonic Eren. To Orno we should perhaps refer Honor; where the Elementary R is lost.—URE, en-URE, which agree with the sense of the Latin Colo, "To Exercise — Practise — Use." — The former of these terms, URE, N. Bailey explains by "Use, Custom;" where in Use, UTor, (Lat.) which we shall surely refer to URE, we see, how the forms 'R and 'S pass into each other: Dr. Jamieson has placed URE in eight different articles, as if it consisted of eight different words, under the senses of "Chance, fortune-Practice, " Toil.—The point of a weapon.—ORE, in relation to metals.— "A denomination of Land in Orkney and Shetland, -- Colour, "tinge.—URE, Soil.—Sweat, perspiration." In the sense of Soil, or the Earth, we see the Radical idea, which conducts us to the other senses. We cannot doubt, I think, that Adventure, and its parallels, Aventure, (Fr.) Aventura, Ventura, (Ital. and Span.) &c., belong to the German Abentheur, which has justly been derived

by some from Abend, the Evening, and URE, the Hour; or rather it should be referred to URE in its sense of Accident, Chance, Fortune, &c. The succeeding word to URE, in Dr. Jamieson's Dictionary, is URisum, "Troublesome, vexatious;" i.e. full of URE, Toil, trouble. Even this relation Dr. Jamieson has not seen. The various senses attached to the same word URE, denoting, among other things, the ERA, (Epa,) will tend to confirm the principles of my hypothesis.

The English HIRE, HIREling, &c. with their parallels HYRE, HYRan, HYRling, (Sax.) seem to signify Use, To Use, or to have the Use or URE of any thing or person. Lye explains the Saxon substantive Hyre by "Conductio it. Usura, To Hyre, Ad " Usuram." The succeeding term to this, in Lye's Dictionary, is Hyre-Man, Parochianus, cliens, fiduciarius; which he derives from Hyran, To Hear. Audire, auscultare, obedire, &c., and Man, Homo; and to which he refers the Barbarous Latin word Erimannus, and another Saxon term Hyn=Man, "Auditor, obediens, "subditus.—Item i. q. Hinling, sc. Mercenarius." We cannot but note the term HEAR, which according to its position in this place seems to have had originally the sense of Listening to, or being Obedient to another, as his HIREling. I have given the word a different turn of meaning-in another place (p. 795) and have supposed, that h=EAR, and EAR, denoting Attention, are nothing but EAR, To Plough, or Stir up the Ground, just as Solicitus means "Earnest," according to R. Ainsworth's interpretation, or, as he might have said, 'Attentive,' from Solicito, "To Stir or Dig "up the Ground," as he observes. I suppose, that HIRE or URE meant originally to EAR; and thus under both ideas we have HEAR ultimately belonging to the same spot, though by different processes.—The evidence on both sides is before the Reader, and I must leave him to form his own judgment on the question. He will consider likewise whether EAR is derived from h-EAR, or whether

whether it belongs to the EAR of corn, the Pricker, that which EARS, Pierces or Pricks, as denoting the object, which Pricks up, according to our familiar phraseology—'Prick up your EARS, 'Arrige Aures.' He must decide too, whether Aures is in the same series of terms with HEAR, and whether HEARK and HEARKen are directly attached to it. Nothing is more embarrassing than to separate words, conveying the same idea, which may be perhaps derived from different sources. All that can be performed by the writer, is to collect the evidence, which can be obtained on the subject, and to leave the Reader to his own decision.

Words under the form RN,

ARN, signifying Agitation—
Commotion—HARRying, Routing into, about, &c.—Driving
away, &c. &c.—Terms, which
relate to the action of Earing
a surface for the purpose of
Reaping—Gathering.

ORo, Orino, Ornumi. (Gr.) To Stir up, Excite.

EREINO, EREUNAO. (Gr.) To Rout into, Search, &c.

HERIAN. (Teuton.) The God of War.

ORION, ERYNNUS, &c. (Gr. &c.)
The Harryer.
w-Arnio. (Germ.) A Boar.
w-Arn off. (Eng.) To Drive off,

EAR, Eren, ERDen, ERNden, ARNen, &c. (Eng. Germ. &c.)
To Reap, Gather.

&c. &c.

EARN, &c. (Eng.) To Gather, get, obtain, &c.

EARNEST—EARNEST-Money.
(Eng.) Diligent in Earning—
the first Earnings in a bargain.

&c. &c. &c.

I SHALL now consider the terms under the form Rr, or ARN, with the breathing before the 'R. I have before discussed the words, which appear under the same form with no breathing before the R, and which I have conceived on many occasions to be derived from the form RGn, or RgN. This is often the process. from which the form RN is derived; yet we may well imagine, that it has arisen from the form 'RN, with the breathing before the R. We see in Oro, Oring, Ornumi, Ereeino, (Ogu, Oonu, Oprupa, Excito, Epsensa, Interrogo, ab Essa, Interrogo,) how the forms 'A, and 'An pass into each other. I suppose, that all these terms are derived from Routing up the surface of the ERA, (Epa); and in Ereunao, (Eeuvaa, Indago, investigo de canibus, Scrutor,) another of these words, we are brought to this spot and action in its gentler operation. While I am examining some of these words I cast my eyes on Eranos, Eranizo, (Escres, Collatitia coena, Eparala, Peto ab amicis collationem, atque adeo obtineo Corrogo,) which latter word means precisely what the Latin Carradere, To Rake and Scrape together, does; which is indeed the exact sense of the explanatory term Corrogo. I have shewn, that the Latin ARANea, the Spider, with its parallels, is derived from the same idea of Scratching about the ARENA or Dirt; and that in Spanish. ARANA is a Spider, and ARANar means "To Scratch, to Scrape, to "gather by trifling or penurious diligence." Though the term Enanizo, (EpanZu,) appears adjacent to Ena, (Epa, Terra,) in the order of a Greek Dictionary; yet the Lexicographers see no connexion between the two words. The English word EARN, if it does not directly belong to this Greek verb, is derived from a similar action performed on the same spot. The Onnis of the Greeks, (Oans, Avis,) belongs to the idea of Excitement, conveyed by ORNumi, (Oprum, Excito,) and in Qion-os, (Owver,) the Radical R before the n is lost. The Oanus, the Ash, seems to be taken from the idea of Agitation, "Nec veteres Agitantur ORNI." Thus it

will coincide with the fundamental sense of Orno, which I have shewn to be that of Stirring up. We have seen, that the terms of Security, under the form 'RN, WARN, WARREN, &c. are derived from the notion of *Driving away*, as in the expression to WARN off. We have seen the German WARNER, Defendere, cavere, in Wachter's Glossary, adjacent to AR-WERNO, Aper, and likewise that WERN and WARNio mean Verres; where we see in the AR, p-ER, v-ER, and w{ER, AR, the simpler form. The Greek Anneomai, and Annumi, (Apreomai, Nego, Aproma, Capio,) must be referred to the same idea of Driving or Taking away; of which words we see the simpler form in Airo, Aro, (Aipu, Apu, Tollo e medio, &c.) Dr. Jamieson has justly referred HERIAN, a name of Odin, the Mars of the Northern nations, to the term HERRY, To Rob, to Spoil, to pillage; which corresponds, as we have seen, with the English HARRIE, To Harrow, Rout, Vex, Tease, &c. The simpler form of Herian appears in Area; (Apps, Appa.) form HERIAN, as denoting the HARRIEr, Router, &c. belong the following terms Orion, the Giant, Hunter; Arren, Arenein, (Appyr, Mas, Fortis, virilis, Appyren, Rixari, conviciis sævire,) EERANOS, (Ηρανος, Rex.) OREANES, (Ωρεανης, Vir, teste Plut, Suicer.) OURAN-Outang; ERINNUS, (Equivos, Furia,) which the Lexicographers have supposed to belong to an ancient word Erio, (Epia, Cio,) To Stir up, &c.—The name Horn in the combination ChildHorn, the Knight or Champion Honn, which has afforded the title to a well-known Romance:—Horn, the part, with which animals Push, Drive, &c.; which brings us to the c-Onnu, where we see, how we pass into the form c-^RN,—Hornet, the Stinging animal; URN, (Scotch,) To pain, to torture; HURON, (Span.) A Ferret; HURONear, To Ferret, To hunt with a Ferret; where in the h=UR we see, how we pass into the f, v ER of Ferret and vi-Verra. The Spanish scholars will see, that the Hur in Huronear preserves the same fundamental meaning of an action or object, which

which HARRIES, in HURano, Disdainful; HURA, Furuncle, an angry pustule, a wild boar's head; HURAcan, a Hurricane; HURgar, To Stir, to move with a stick or iron, to Stir, up disturbances, &c.; HURgon, a Poker; HURtar, To Steal, to Rob; and we see in the Spanish HUR, how we pass into the Latin f-UR-or, f-URt-um, To Steal, and f-URo, To be Mad, in a Rage; and the f-UR in FURunculus, the Angry Pustule.

The Greek EIRENE, (E19717, Pax, Quies,) bearing the form of these words, seems very remote from their sense; yet still I imagine, that they all convey the same fundamental idea. The original sense of EIRENE, (E197177,) I conceive to be that of Routing and Subduing your enemy, so that he is reduced into a state of Peace. I fear, that the history of mankind will place this derivation among the most probable of my conjectures. I shall shew, that the Latin Paco belongs likewise to terms of Violence, such as Pash—Push—Poke, &c. &c.; and R. Ainsworth has accordingly rightly explained this Latin word in the first sense by "To Sub-"due, to bring into subjection." Adjacent to ERINNUS, (Epiprus,) in my Greek Vocabulary, is Ernos, (Egros, Planta, germen, ramus,) which still belongs to the same idea of Excitement. If I had explained the Elementary sense by 'To Stir up—Cast up—Shoot up for out,' we should have seen in the term Shoot, which I have ventured to adopt, because it is sometimes used as an active verb in a sense similar to Cast, we should have been brought to the idea of the Shoot or Plant. We cannot help seeing the resemblance between Ramus and Remus, which has arisen from the same common idea of an Excited action. The Latin Hernia may belong to Ernos, (Egros,) from the idea of Shooting out or Bursting out, as the Etymologists suppose; just as Ramex, bearing the same meaning, belongs to Ramus. Probable as this conjecture is, I shall suggest another origin.

We have a race of words, denoting the Swelling—Rising-up object,

object, which seem directly to belong to the terms for the Ridge or Furrow, as we have it in the Armoric Ero, Erve, Erven, before produced. Among these words we have the Welsh Aren, The Kidneys or Reins, which, in Armoric, is ERE, as Mr. Richards observes;—Eirin, "A Plum, a Prune, or damson, a sloe, or bullace. "So in Armoric. Also a man's stones:"-The Galic Aran, "the "Kidney, and AIRNE, Sloe, Plumb.—Kidney;" which Mr. Shaw has divided into two articles. HERNIA might be the disorder belonging to the parts adjacent to the AIRNE, &c. We must surely think, that the Latin Ren, with its derivative Reins, belongs to the Celtic AREN, aREN; and if we should imagine, that the French Ragnan is directly attached to these words, then we may consider the g as an organical addition to the n, quasi RogNon. I have already produced these terms, (p. 984,) and stated this difficulty. which consists merely in adjusting the precise relation of forms to each other under the same fundamental idea. The Greek Existence. (Equation, Caprificus, arbor, ficus sylvestris,) which is next to Erinnus, (Eprous,) in my Greek Vocabulary, may directly belong to EIRIN, the Plumb, as bearing the fruit of a Swelling or Rising-up form; and thus these words will belong to each other, just as Rise does to Rase or Rout. The term Erinees, (Equito,) is assuredly connected with the idea of Rising-Shooting-Swelling up-out, whatever may be the precise notion annexed to it: We know, that Caprificus is certainly connected with a similar idea of Excitement from its kindred word Caper. The natural history of the tree brings us to the imagery of Rising-Swelling-Bursting-Breaking out or forth; and thus the Etymologist understands it; "Caprifi-" cus appellata, eo quod parietes, quibus innascitur, Cerpit. Rumpit "enim et prodit è latebris, quibus concepta est."—The Welsh Anen succeeds, in the Dictionary of Mr. Richards, the term Aredig, To Plough; and adjacent to Eirin, sing. Eirinen, a Plum, we have Eirionyn; which our author explains in one

sense by " Ridges or borders." In the same column of Mr. Shaw's Dictionary, where Aran, the Kidneys, is, we have Aran, Bread; which probably belongs to the idea of the Loaf form—the Rising I shall shew, that Loaf, Hlaf, (Sax.) &c., under the Element LF, refers to the same idea—to Lofos, (Aopos, quicquid editum est et elatum)—Levo, (Lat.) Lift, &c. &c., to which words belong Lord and Lady; in Saxon and old English, Hlaf-Ord, Lov-Erd, Dominus; Hlæf-Dig, Domina; which mean personages of a Lofty nature. The Ord-Erd signifies Nature, as Ard in Drunk-Ard, &c. &c. The term Aran is explained by Mr. Shaw in another article by "Familiar conversation. ARAN bodaigh air "bothar, a clown's conversation on the highway;" and in Welsh, Aren means "Witty, eloquent, talkative, pert, tattling." We may see, I think, in these senses, that the idea of the word is that of a Swelling-out—Breaking-out species of discourse,—Loud The Latin Caprificus means in one sense, "Vain-glory, "or a foolish ostentation of useless learning," as R. Ainsworth explains it; under which sense he produces the well-known passage of Persius, "Nisi Rupto jecore exierit Caprificus;" where the writer alludes to the Bursting property of the Tree. Under Prunum, in Lhuyd, we have Eirinen, Pêr-Eirinen, (Ar.) Prynen, Eirinen Per, in Welsh, means Ripe, mellow; and it is impossible not to see, that the Armoric Prynex, the Latin Prunum, and the Greek Proune, (Heovy, Prunus, Arbor,) are compounds of Per-Eirinen, or Per-Eirin. From this idea of the Plum-like form, we find attached to Prunum the Latin Pruna, the Live coal, and Pruina, the Hoar Frost; which latter word means the Icy coagulation or concretion. (Neque nive Pruinaque Concresceret.)

EARN, with its parallels EARNian, &c., directly belongs to EAR, in its sense of Demetere, To get in Harvest, as EARing time, just as Aro signifies to Reap or Gather. The German ERNDe, Messis, is the substantive to EARN; and Wachter has rightly

rightly seen, that this German word belongs to Eniden, Annen. Erden, Eren, all signifying Metere. EARNest, Studiosus, serius, with its parallels Eonnest, (Sax.) &c., is activity or Excited action in the great business of EARNing or Reaping, which some have faintly seen, and ERNSt, (Germ.) Certamen singulare, with its parallels Eornest, (Sax.) Duellum; Ornest, (Welsh,) is Excited action of another kind, as Contentiosus means 'Vehement, Earnest,' and likewise 'Contentious, quarrelsome,' as R. Ainsworth explains it. Certo has the same double meaning, 'To be mighty Earnest, and 'To fight.' The preceding term in my Welsh Dictionary to Ornest is ORN, Fear, terror; which the Lexicographers refer to the Hebrew ירא IARE, Timuit; and in the same column we have Orohian, A cry of Joy, and Oriau, Cries. The adjacent word to the Saxon Eornest, in Lye's Dictionary, is Eornan, Decurrere, To Run; which idea appears under the forms YRNan, ARN, ORN. Cucurri; in the same column with which latter word I find ORNest, ORRest, Pugna; ORoth, Spiritus; where we have still the idea of Commotion. We see, how our term Run has arisen from the form AN. In Scotch, EARN signifies "To coagulate," as in the process of making cheese, which Dr. Jamieson has justly enough referred to the Saxon Yrnan. We have seen the simpler form of the word, expressing this idea in Orros, (Oppos, Serum.) Adjacent to the Saxon EARNian, To EARN, we have EARN, Aquila, the Cropper off, or Sweeper away of another kind; and I find likewise EARRung, signifying EARNing and YEARNing, which means 'An Eager desire to EARN or obtain.' In Scotch, YARNE means "Eagerly, diligently;" and YHARNE, as a verb, signifies, says Dr. Jamieson, "Eagerly to desire;" where he has justly referred us to the Saxon ge-Ornian. In the same column of this writer's Dictionary, with YARNE, we have YARROW, "To Earn. "to gain by industry;" where we see the simpler form. In English we have YARE, which Skinner explains by Avidus; and

he has justly referred us to words, under the form GR, as the German Gierig, &c., where we perceive, how these forms are related to each other. We all know, that YARE occurs often in Shakspeare—"YARE, YARE, good Iras, quick," &c. &c.; i.e. "Make "haste, be nimble, be ready," &c. &c.; where we see the idea of Preparation annexed to Excited motion. The next word to Yare. in Skinner, is YARN, in Saxon Gearn, which may perhaps mean the substance, from the spinning of which women EARN their The preceding word to YARROW, in Dr. Jamieson's Dictionary, is YARRing, "Snarling, captious, troubling;" which Dr. Jamieson refers to YIRR, To snarl, to growl like a dog; where we have the idea of Excitement. Dr. Jamieson explains YARE, YHAR, YORE, by "Ready, alert, in a state of preparation;" and the next word is YARE, A Wear for catching fish. The w=EAR, y-Are, the term for the inclosure for Catching or Defence, I have. already referred to the idea of an Excited action in HARRYing or or Routing, either by Seizing and Catching or Driving off and away.

In the same column of Lye's Dictionary with the Saxon Earnian I find Earne, Casa, which he refers to Ærn, "Locus secretus, ha"bitaculum, domus, casa." We must surely consider these terms as belonging to each other; and if so, the secret and safe Enclosure or Earne, might have originally denoted, the spot, in which those Earnings were deposited; just as I have supposed h-Orreum to be derived from the same idea, under the form 'R. In Hord-Ern, Thesauri domus, we see the true idea; and let me add, that Ern is adjacent to Ernth, Messis, in my Saxon Dictionary. We have various words, denoting an Enclosure in general, under the form 'RN, which may all perhaps be referred to each other.—In Saxon, Hyrn means 'Cornu,—Angulus;' and in the same column of my Saxon Dictionary we have Hyrnet, the Hornet. The Horn and Hornet, I conceive to belong to the metaphorical idea of these

these words, as signifying 'To EARN,' if I may so say, Arare, Fodere, Fodicare, and the Angulus will refer to the same word, under a different idea. As c-Ornu belongs to Hyrn in one sense, so surely must c. Orner in another. In Scotch, Hyrne is a Corner, under which word Dr. Jamieson has produced the old English term Hurne, a Corner: Horn, Hioorne, (Su. G. Dan.) &c. &c.; and has recorded the Saxon terms, above mentioned, which another Etymologist considers as parallel. We shall now understand, whence a combination has been derived, which is familiar to the minds of us all, though we were little aware of its genuine force, even from the days of our childhood, when it first vibrated on our ears, to that ripe and confirmed age, when we are grown into great Critics and profound Etymologists. We have heard with infinite delight, though not without some portion of envy, that "Little Jack Honner sat in a Corner, eating his Christmas "pye;" but we did not understand till this moment, that the name of our hero was a nom de guerre, and purposely applied with an allusion to the spot, in which he was placed.—The name HORNER means the person, who sits in the Horn or Corner; that is, the Chimney-Corner, the place of warmth and comfort; and we may well be assured, that when these lines were first repeated, the original idea was duly understood. The enquirer into the mysteries of our ancient Language must not be ignorant, that an abundant stock of information is to be found within the precincts of the Nursery, where the terms of the tale-the song or the fable are applied with their genuine force and original simplicity.

In German, ge-Hirm means the Brain; that is, perhaps, the Brain Pan, as we call it; yet if Honn belongs to Cranium, as Wachter thinks, it should not perhaps be directly referred to this race of words. Lye, in his edition of Junius, has produced the word Harnes, Cerebrum, with its parallel terms; and the succeeding word to this is Harness, Arma, Armatura. Some have referred

referred these words to each other, as if Harness originally signified the protection for the Head, while others derive it from Inon, which appears the most probable. The parallel terms appear in a great variety of Languages, and have been duly produced by the Etymologists. We cannot help observing, that Arma is attached to our Element AR, and we might conjecture, that these words may possibly belong to each other. If they do, the sense of AR is that of "To Prepare, furnish," &c., as in the Greek Ano, (Aew, Apto.) In Celtic, Anneis, which Mr. Shaw explains by "Cattle, "chattels, moveables, furniture," is the preceding word in this writer's Galic Dictionary to Airmlan, Armoury. The Latin URNA, the URN, denoted perhaps the Enclosure of the Channel; and in its adjacent term URINO, "To Duck under the water, and to er spring up again; to Dive," as it is explained by R. Ainsworth, we cannot but note the terms Duck and Dive: I shall shew, that Duck belongs to Dig; and I have shewn, that Dive, Dip, Dupto, (Δυπτω, aquas subeo, mergo,) relates to the Tafos, (Ταφος, Turnulus,) the Hole or mound of Earth; and such, I imagine, is the relation of Unino to Ano, Arena, Ena, (Equ.) We have seen, how the other adjacent words URINA, and URO, have been referred to the same spot; and I find in my Latin Dictionary adjacent to these words the term Union, vel Unium, "A kind of Earth, which " miners avoid, when they dig for gold;" where we are directly brought to the Ground, or ERA, (Equ.) The Urna might mean the vessel made of Earth. In Hebrew, MRN, or MRN is An Ark, which Mr. Parkhurst supposes to be so called from "its rever-"beration of sound, or hollow sounding." The original idea of this word is "To vibrate freely, move to and fro, or up and down " with quickness and freedom;" where we unequivocally see the sense of Agitation, attached to the Element, whatever may be the precise idea, by which the sense of the Ark is connected with this notion. In Arca, Ark, &c. the Element AR still appears with the addition

addition of the c, &c.; and we perceive, how Arca is connected with Arceo, which, in one sense, we know, relates to an action of Commotion—Violence, &c., and signifies 'To Drive away,' which I conceive to be the original notion. I have stated all the facts, and I have produced all the words, with which these terms, denoting an Enclosure, can be connected; and I must leave the Reader to form his judgment on the precise turn of meaning, by which they are connected with the original notion.

The term EARNEST is applied in a peculiar manner when it denotes what we call EARNEST-Money, the Pledge of a bargain; and it is impossible, I think, to doubt, that it belongs to EARNEST in its other sense, whatever may be the common idea, by which they are united. But the term EARNEST, as referring to the Pledge, seems to connect itself with a race of words to be found in a variety of Languages, of which the simplest form is 'R. The following parallel terms to EARNest have been produced, as ARRes or Erres, (Fr.) Ern, Ernes, (Cym.) Arra, Cap-Arra, Arras, (Ital. Span.) Ennitz, (Dan.) An, Anpenning, (Belg.) IAnlus, (Gal.) Arles, (Scotch,) Arrha, Arrha, Arrhabo, (Latin,) Arrabon, (Appa βar,) Arbun, (Heb. ארבת) &c. We surely must imagine, that the words under these forms, however various, must be considered, as belonging to each other; and that the simple Radical form appears in Ar, Arra, (Belg. Lat. Ital.) If they do belong to each other, we shall at once understand, how readily the Element 'R assumes the form 'R $\{n, s, l, b, &c$. If they are not all to be considered as directly belonging to the same series of words, we must still consider them as allied to the same train of ideas, and as equally within the sphere of the Element 'R, though some of them may receive a peculiar turn of meaning, from the influence of the Language, to which they belong. It would be difficult however to select any one word, as bearing this peculiar sense, unless it were the Hebrew Arbun, which is referred to ארב ARB,

ARB, signifying "To mix, mingle;" and hence "To mix, join, " be joined or interwoven with another in contracts, to be surety, "bondsman or engaged for him.—To Pledge, &c. — As a N. "a Pledge, security." In the sense of To mix, mingle, we see the Radical idea of To Stir up, together, &c. We cannot therefore err much from the truth by considering them all as belonging to each other, under the same train of ideas; and the difficulty is to discover or rather to express the mode, by which that relation may be understood. It is impossible to doubt, that EARNest-money belongs to some idea, conveyed by EARNest, Serius, or EARN; and this will serve to confine my enquiry within narrow limits. We have seen, that the fundamental sense of the Element 'R is that of Stirring up—Casting up—out—off, the materials of a surface in Ploughing, &c.; and that hence it signifies To Take off-get or obtain—EARn, Demetere, &c. &c., just as Aro and EAR means at once "To Plough and to Reap, to gather." Thus, then, the EARNest-money is what a person EARNS—Takes off, quod Tollit, as the first-fruits or profits from his bargain; and thus we see, how the Latin Arrha will directly connect itself with a term in the same Language, with which, from its form, we should naturally suppose it to be connected; namely, with Aro, To Gather or Get. I have adopted the Latin word Tollere, because it belongs to Tellus and to Till, just as these words do to ERA, (Epa,) and to The word Toll, which belongs to Tollo, is not very distant from the idea annexed to the ARRHA, though the purpose is dif-Toll-corn is that, which the miller Tolls or Takes as a part of the whole, 'quod Tollit ex toto acervo,' for grinding the Corn.' The EARNest-money is the EARNed or Obtained money—the Tollmoney of the Bargain Sum, which Toll is considered as the Pledge of the Bargain.—In short, I have shewn, that EARNest, relating to the Bargain, and its parallels, whichever they may be, and whatever may be their precise idea, certainly do belong to the ERA,

1184 $^{\text{R. R.}^{\text{A}}}$.—C, D, G, J, K, Q, S, T, X, Z.

BRA, (Equ.,) and its operation, under the fundamental notion of To EAR, and To EARN, Metere.

^RL.

Commotion — Agitation — Violence, &c. from the action of Stirring or Casting up—about, &c. a surface.

Hurl — Whirl — Hurly-Burly, &c. &c. Hurl. (Scotch,) Rapere, To Drag on the Ground.

Hurler. (Fr.) To Howl.

Harlot. (Eng. &c.) The Violent—boisterous Man, Woman.

Erailler. (Fr.) To Scratch or

&c. &c. &c.

Fret upon a surface.

1 HAVE already considered some terms, which belong to the form RL, when a vowel breathing does not precede the R; and I shall now consider those, under the same form, when a vowel breathing appears. I have supposed, that the terms, under the form RL, without the preceding vowel sound, have been derived from the form RG, and RGl, and that the l is an organical addition to the G. This has, no doubt, frequently happened, though we shall understand, that the same form RL may have often arisen without the intervention of the G, by the loss of the vowel breathing in the form 'RL, originally taken from the form 'R. In the terms HURL, WHIRL, MURLY-BURLY, we see the idea of Commotion with that of Turning round, or, in other words, we see the idea of Stirring about or round about, as we express it. In Skinner, Hurl and Hurly-Burly precede HURRY; where we are brought to the simpler form. In French, Hurler, To Howl, &c., relates to the Commotion of Noise.

Noise. In the terms, which are produced as parallel to WHIRL, we have the labial sound likewise, as an organical addition to the Radical AR, as Whirlpool, Hwyrp-pole, (Sax.) Vorago, Whirl-Wind, Winbel Wind. Under WHIRL, Junius has properly produced the simple forms WIERen, VIRere, &c. to which belongs WRIE, To Turn about, aside, &c. Junius has an article, in which appears the term HARLE, Rapere, trahere. Dr. Jamieson has explained this term in a secondary sense by "To Drag with force, "implying the idea of resistance;" though he has justly seen, that the first and original sense is "To Trail, to Drag along the "Ground;" where we are brought to the spot supposed in my hypothesis. Junius has perceived, that it belongs to HARRie; and the Glossarist of Robert of Gloucester, as Dr. Jamieson informs us, renders it by "HURLED, WHIRLED, HURRIED, HARRASSED, drove, "thrust, cast;" where we have four words, belonging to the same Elementary character 'R, conveying the same fundamental idea. HARLE means, in one sense, "To rough cast a wall with lime;" where we are brought to an action connected with Dirt. The sense of Dragging has imparted to the word, in some cases, the idea of a slow motion. Hence we find, that 'To 'HARLE' means "To move onward with difficulty, implying "the idea of feebleness;" from which we have HARLIN Favour, "Some degree of affection,—I had a kind of HARLIN favour for "her;" which corresponds in sense with our expression, 'A sneaking kindness for a girl.' HARLE means too, "The Goosander, a fowl-Avis palmipes Anate major," which is so called from its Harling-Slow way of walking. Dr. Jamieson appears to see no connection between this word and the other terms; but he refers it to a French origin, "L' Harle," which conveys the same idea.

Junius conceives, that HARL'OT, "Meretrin, lupa, scortum," belongs to this word HARLE. The HARLOT is applied both to Men
7 L and

and Women, and denotes, in its original sense, 'A Stout-Sturdy 'personage with some degree of violence and disorderly conduct,' according to the sense of the Element 'R. It is sometimes applied in a good sense, as "A Sturdy HARLOT went him ay behind; He was "a gentle HARLOT and a kind;" and sometimes in a bad one, as "King of Harlots or Ribaudes;" where Harlot is justly explained by Junius, "Improbi nebulones, scurræ vagi," &c. In this bad sense our term HARLOT is applied to a Loose, disorderly woman. The name Arletta, for a female, the mother of William the Conqueror, from which the term Harlot has been supposed to be derived, is itself a word denoting the female Harlot, though with less idea of reproach annexed to it; such as the Romans expressed by Concubina, the Concubine. The only difficulty is to decide, whether Harlot belongs directly to the form Harle, or to the form HAR with Lot, as a significant portion. I am inclined to think, that Lot belongs to Leode, Populus, and its parallels, as Dr. Jamieson imagines; who supposes, that the HAR is attached to the names for an army, as HAER, &c. (Su. G.) before so fully unfolded. This is no improbable conjecture, yet is not, I imagine, the true idea. In Welsh, Herlod and Herlodes simply signify "A boy, a lad," and "A girl, a damsel, a maid," as Mr. Richards explains them; who refers them to the Hebrew ילר ILD, "To procreate or breed young, "to beget or bear;" to which our term Yield belongs, and perhaps the explanatory term Lad, unless Lad be likewise annexed to the familiar name for the people, Leode. This conjecture of the Welsh Lexicographers is very probable; yet surely Herlod and Harlot must either belong to each other, or be formed from Thus the HER in HERlod will belong to a term similar materials. in the same column of Mr. Richards' Dictionary, "HERW, Flying "away: also plundering, pillaging," as in HARRIE, &c. In the Welsh, as in various other Languages, the Element LS, LD, &c. denotes the People, as Lliaws, "A Multitude, a great company

"or number;" in Greek, Laos, Leos, (Aaos, Aeas, Populus,) Liege, Lag, (Eng.) Loge, (Hindostanee Dialect,) used for the plural, &c. &c. In Welsh too, Lydnu signifies "To bring forth;" to which the Lexicographers should have produced, as parallel, the Hebrew To ILD.—In the same column with Herw, Flying away, &c. I find Herod, a messenger or bringer of tidings; where the Elementary sense is visible, as in Errand, &c. &c. Perhaps the name Herod is derived from this source. Dr. Jamieson, under Harlet, produces the barbarous Latin words Harelatus, Harela, Rebellis, Rebellio, which he has justly referred to the French Harelle, Vexatio, and Harier, To vex, or, as he might have said, To Harrow, Harrie, &c.; where we come to the original idea, and simple form. Perhaps the names in our Language, under this form Harrel, Hurrel, &c. &c. may be derived from the same idea; but on this point there is some difficulty.

The terms Harold, Herauld, Fecialis, Caduceator; Herault, Heraud, (Fr.) Araldo, (Ital.) Heraut, (Belg.) have been compared with the Welsh Herod; and if they all belong to each other, then the HER in these words denotes, what relates to Errand; yet on this matter there is much doubt. Some think, that the HAR, &c. in these words belongs to Hare, Haren, clamare; and others suppose, that the HAR, &c. means Exercitus. It seems to be generally agreed, that the Ald means the Illustrious personage; as in the German Held, the English Old, Elder, Alder-Man, &c. &c. The Herald seems to signify the Illustrious personage, belonging to the HAR, Exercitus, the ceremonies of War-Combat, &c., Roy d'armes, Wappen=Konig, &c. I have shewn in a former page, that EARL, EARLY belong to the simple form ERE, denoting Former, First, &c. The preceding word to the Scotch Arly, Early, in Dr. Jamieson's Dictionary, is Arlich, "Sore, fretted, " painful," which our author has justly referred to the simple form Aerr, Cicatrix; where we have the original idea of Scratching

upon a surface. In the French Erailler, Railler — Joues Railles, before produced, we have the same idea of Scratching upon a surface; and we have seen in Raillon, denoting a Plough, that we are brought to the spot supposed in my hypothesis. I cannot quit the form RL, without again recurring to the term Roil, which I have produced on a former occasion (p. 1080-1.) The explanation of Mr. Grose of Roil or Royle, "To perplex or fatigue," which I produced (p. 1081,) should have preceded the remark in page 1080; 'Here we see Roil has the same sense, as "the Spanish Ralar, To disturb by harsh, Grating conduct, to vex, "molest." The original sense of Roil appears in the expression 'See, how you Roil the water; where it is applied to the Stirring up of the Mud.

There are two words in Latin, under the form 'RL, of which the origin is obscure, as the old word Arilator, and Ariolus or HARIOLUS. The term Arilator R. Ainsworth explains by "A ped-"lar, a chapman that giveth Earnest;" and he derives it from Arrha. Some conceive, that ARILator is the same as Cocio, another old word, which seems to signify a Haggler, as we express it, in making a bargain. In this case the term Anilator will refer to the original idea of a Grating—Fretting mode of action in making a bargain, &c., just as the Haggler and the Higgler, are derived from Haggle, To Cut. The ARIOLUS might directly belong to it, as signifying the Haggling - Undecided mode of Prediction, which is commonly adopted by these artists; and hence Hariolation has been applied to the *Uncertainty* of conjecture. We remember, in Shakspeare, the description of the "Juggling Fiends that Palter " with us in a double sense." We cannot help seeing, that Palter belongs to such terms of Agitation, as Pelt, Pello, &c. &c.; and I shall shew, that they are all derived from the Pelos, (II) Acc. Limus,) in a state of Commotion. Some derive Ariolus from Ara, which is no improbable conjecture; while others think, that it

was anciently written FARIOLUS, and they derive it from Fari. If Fariolus be the true mode of representing the word, we might refer it to a Celtic term for a Conjurer, under the same form the Pheryllt, or Feryll, as it is sometimes written. Mr. Davies has justly observed, that the "PHERYLLT are deemed to have " been the first Teachers of all curious arts and sciences, and " more particularly, are thought to have been skilled in every "thing that required the operation of fire." (Mythology of the Druids, p. 215, 546, &c. This origin of Hariolus I propose merely as a conjecture, without having any evidence, by which I can decide on its true derivation. The consideration of the term PHERYLLT would lead us into a wide field of important and curious discussion, which is foreign from the present objects of our Enquiry. The Celtic scholars are furnished with the most abundant materials for illustrating the Tales and Mythology of the Ancient World; yet we do not find, that they have duly profited by the stores, which are placed within their hands. Many appear not to have understood the value of these materials, and others seem to have directed them to a vain and unprofitable purpose.

:", 11

CHAP. VI.

^R, R} m, b, f, p, v, w,

ARv-um, (Lat.) &c. Roim, (Gal.) &c. ultimately connected with ERa, (Eqa, Terra,) the EAR-th.

Terms under the formula R \ M, MB, &c., relating to the Ground, as Roim, (Gal.) Rumb, (Eng.) &c. a Path, &c. &c.—Terms expressing the action of Digging or Routing up the Ground, as Romhar, (Gal.) Digging; Rimor, (Lat.) To make Hollows, Room, &c.—Terms under the formula 'Rm, &c., signifying to HARRie, make Desolate, To Waste, &c. &c., as ERemoo, (Equipou, Vasto, desertum reddo.)—Terms under the form 'R, R \ B, &c., as ARv-um, the Ager AR-atus, the Plowed or EAR'd Field. Terms of Commotion—Agitation—Violence, signifying To Sweep away—Carry off, &c. &c., as ARP-azo, (Aqualu,) Rap-io, (Lat.) connected with the action of the IRp-ex, (Lat.) the HARRow, &c. &c.

I shall now consider the Race of words under the form ^R, R}M, B, F, P, v, w, where the R is the first letter, and one of the Labials M, B, F, P, v, w the second, with or without a vowel breathing before the R. When a vowel breathing precedes the R, we may observe, that a vowel breathing may or may not exist between the R and the Labial, in order to constitute a word; but when there is no vowel breathing before the R, a vowel must exist between the R and the Labial, for the purpose of forming In all cases a vowel may or may not appear after the a word. The R may be considered, if we please, as representing Labial. the original Elementary character, from which the different forms are derived, by the different organical additions of c and its Cognates, as c, p, G, &c., and of the Labials M, B, &c. to the ^R, as I before observed. Thus, then, ^R, R^ would represent the original form, and ^R, R &c, D, G, &c. M, B, F, &c. the derivative form. It would require a detail of some length and obscurity to shew, by what process of the organs these Cognate Consonants c, D, &c. are annexed to the R; and I have even purposely abstained from such discussions, as they may easily lead us astray from the true mode of considering the question, and divert our attention from those facts, by which alone the relation of words, belonging to these Consonants, can be established. I cannot, however, forbear to suggest to the Reader, as I have before done, the simple process, by which he may conceive the Labials to be connected with the R. We have only to suppose the Lips to be closed during the enunciation of R, and the form R{M, B, &c. is at once constituted. The process, by which the sounds c, D, &c. are added to the R, or connected with it, is equally simple and easy, as it relates to the operation of the organs; but it is not equally describable. We cannot advance a step in considering the form 'R, R' c, D, &c., without observ-

ing the direct union of terms under the simple form of 'R, and that of 'R, R c, p, &c., though, I think, we do not perceive such frequent and familiar instances of words under the form ^R, R, and AR. R}M.B. &c. directly connected with each other. union however frequently occurs in the most distinct and unequivocal manner; and it is curious, that to the eye or understanding of our Etymologists this union has been more visible than under the other form ^R, R \ c, \no, &c. We shall perceive; in the course of our discussions, that the Etymologists have frequently referred terms, under the form AR, R{M, B, &c., to the race of words under the simple form 'R. This direct union is indeed in some instances so marked and impressive, that it is impossible not to perceive it; as in ARvum, the Ploughed Field, which every one must acknowledge to belong to ARs. The Etymologists have likewise seen, that the terms HEIR, HERES, HERED-is, belong to the same series of words, as other terms, bearing the same meaning, under the form RB, &c., ERBe, ARBi, ARF, &c. in some of the Teutonic Dialects. We may observe however in general, as I have frequently had occasion to remark, that every form, when once existing, may be considered as a distant form, and as generating by its own powers a race of words peculiar to itself. precise mode, by which the different forms are at once allied and distinct from each other, cannot be described, but can only be understood by a consideration of the examples themselves, as they are detailed and unfolded in these discussions.

The prevailing train of ideas, which is most apparent in the terms, belonging to the form 'R, R, M, B, F, &c. is the same, which we have seen to be annexed to the original Element 'R; namely, that of Stirring up—about, &c.—HARRowing—Devastating—Tearing—Seizing with Violence, &c.—of Commotion—Agitation, &c., such as we find expressed by ERRMOD, (Ephpon, Vasto, desertum reddo,)

reddo,): ARpazo, (Αρπαζω,) Rapio, &c. I shall find here, as I have frequently experienced on other occasions, some difficulty in selecting the best mode of illustrating the facts, which this Race of words exhibits; and I must leave the Reader sometimes to adjust, according to his own conceptions, the precise relation, which the words under the formulæ RM, RB, &c. bear to each other. As lisuppose, that the terms under the form R\m, s, &c. have originally received their force from the words under the more simple Element AR, which I have shewn to be indissolubly connected with operations on the Era, (Eea,) it is not necessary to produce at the commencement of these enquiries the names of the Earth or the Ground, under the form R\M, B, &cc., as if these very Names or Terms were themselves particularly effective in constituting the Race of words, belonging to this form. will now fully understand, that this is not necessarily the process, by which a Race of words expressing operations on the Ground Such terms, which actually express the may be generated. Ground under a certain Elementary form, will, no doubt, be frequently effective in the direct generation of words, which appear under that form; yet it may still happen, that the great body of Words, relating to Operations performed on the Ground, has not actually arisen from those Terms. It is impossible to adjust the precise order, in which a Series of Words, related to each other, has been generated, though that relation may be unequivocally manifest. Thus, as we know, it is not necessary to suppose, that the names for the HARROW, under the form 'RS, as Herse, Harcke, &c., are directly derived from a word, actually expressing the Ground, under the same form as Earth, &c. It is sufficient for us to detail the series of words, which belong to each other; as Harrow, Herse, Harcke, Earth, ERA, (Eqa.,) &c.; and to shew, that they all belong to the same spot, and the operations attached to it.

$^{1}194$ $^{R}.R.^{A}.-C,D,G,J,K,Q,S,T,X,Z.$

I shall follow, however, a similar order to that, which I have before observed, and introduce at the beginning of my discussions on the two formulæ ^R, R M, and R B, &c., those terms, which more directly express the Ground. I have made this division, because the variety of matter, to be produced, required, that some division should be adopted; yet we shall see, that these formulæ are perpetually passing into each other; and I shall consider them under one view, whenever the course of my Enquiries may demand it. I shall begin with the form ^R, R M; and I shall then proceed to the form R B, F, &c. P, V, W; under which latter form I have already noted the Latin AR vum, which every one must acknowledge to belong to ARo. When any of the other Labials follow the M, as MP, &c. in RUMPO, RUPI, we at once see, how the forms RM, RP pass into each other.

R}м.

Words applied to the Ground, &c. and to the action of Stirring up its surface, with terms attached to these.

ROIMH. (Gal.) Earth, Soil.

REM. (Arab.) Earth, Breaking,
Bruising.

RUMB, RUMBO. (Eng. Span.)

A Path or Course.

RUMhram — ROMharam. (Gal.)

To Dig, Mine. Romhar. (Gal.) Digging.

Romhair, (Gal.) Rowing.

REMUS. (Lat.) An Oar.

Rumaicham. (Gal.) To make Room.

Rum. (Gal.) A Floor, Room.

Room. (Eng. &c. &c.)

RAUMen. (Germ.) To Clear out, make Room.

ROMMAGE. (Eng.)

Rimor. Lat.)

Rumpo, Rupi. (Lat.)

RAMPHOS. (Gr.) The Snout of an animal.

Rumple, Rumble, &c. (Eng.)
Ram, Rammeln, (Germ.) To
force or drive piles into the
Ground.

RAM. (Eng.) The Driving Animal.

REMBO, ROMBEO. (Gr.) To Stir, Turn, Roll about, round, &c.

REMH. (Heb.) To Cast, Throw up, out, &c.

&c. &c. &c.

In Galic, Roimh means "Earth, Soil," as Mr. Shaw explains it; who subjoins likewise, as an additional sense, "The burning-place "of any family." In Arabic too, Rem means Earth; and it signifies likewise "Breaking, Bruising," &c. In English, the term Rumbs relate to the points of the Compass; that is, to certain Directions—Courses—Paths, &c. on the Horizon or Ground. My Spanish Lexicographer explains Rumbo, in one sense, by the "Road, Way, "Course, the point on which a ship steers;" and it means in another

another sense, "Pomp, Ostentation, Pageantry:" which belongs to the idea of something Stirred-Raised-Swelling up, as in Rumor. The sense of the Road or Way is connected with the Stirring up of the Ground, in order to prepare or make it a Path or Road. In Galic, likewise, Rumhar is "A Mine;-Rumhram, " To Dig, Mine;—Rumaicham, To make Room;—Rum, A Floor, "a Room, place, or space, Room; RUMPal, A Rump; ROMHar, " Digging;—Romhair, A Rower;—Romharam, To Dig;—RUAMh, " A Spade; -RUAMhar, Delving, Digging; -RUAMharam, To Dig, "Delve." These few words disclose the whole secret of the Element, which is that of Stirring up or Routing up the Ground. We now perceive, that our familiar term Room relates to a Free Space, or some Free, open Spot; and that it obtains this sense through the medium of Routing up or away the Dirt, so as to make a Free Space or Room. In some of the parallel terms to ROOM, in the Teutonic Dialects, as Rum, (Sax.) Ge-Raum, Raum, Raumen, (Teut.) Ruyme, (Belg.) &c. &c. we are brought to the same The verb RAUMen, in German, means "To empty, void, " evacuate a place, make it empty or void." In the Gothic combination, Rums Wigs, Via lata, we are brought to the original Spot. The Etymologists remind us, under Room, of the Greek Rume and Ruma, (Ρυμη, Platea, Ρυμα, Tractus, à Ρυω,) where we come in contact with the simpler form Ruo, (Pvw,) whether we conceive the M to be organical, or to be derived from the analogies of a peculiar Language.

We perceive, that Rump, with its parallels, Rumpe, (Dan.) Rumpff, (Germ.) Rumpal, (Gal.) brings us to the same spot, whatever may be the precise idea, by which they are connected with that spot. The German term will probably be considered as best elucidating this point. Wachter explains Rumpf. by "Truncus, et quicquid mutilo simile; Belgic Romp. Utrumque a Rumpo, "quia Truncus est pars à toto avulsa. Suecis Rumpa est Cauda,"

If Truncus should be the original idea, the RUMP-Stock-Stump or Root, will mean, that which is Routed up, just as Root belongs to the verb 'To Rout or Root up.' The Latin Truncus will belong to Trench—the Cut, Trancher, To Cut up, for the same reason; and we have seen, that Runt is attached to the idea expressed by Runcino, for a similar cause. The succeeding word to RUMPF is the verb, belonging to it, as "Rumpren, "Corrugare frontem, "crispare os vel nasum;" which, we see, refers to the action of Routing up a surface into Rugæ, Ridges, Wrinkles, &c. The next words are Rumplen, impetum facere; Rumplen, Strepitare; which bring us to Rumple, Rumble, Ruffle, as I shew on another oc-Wachter produces, under Rumpfen, the Belgic Rimpeln, Anglis, To Crumple; Krumpen, Contrahere, vel contrahi; which he imagines to be best written Hrumpfen-Hrympelle, (Ang.-Sax.) "unde posteritas fecit Schrumpel præposito S." It is impossible not to see, how the form $c\{RM \text{ appears to connect itself with }$ RM, as in c-Rumple; yet I must observe, that this union, if any such should exist, cannot be well understood, till the form, in which C appears, shall be fully examined.

We shall now understand, that the Latin Remus and the Celtic Romhair are derived from the metaphor of Stirring up the Ground, as I before conjectured, respecting Oar, Eresso, (Ερενσω,) Row, belonging to Era, (Ερα,) Ear, To Plow; Aro, &c. &c. Whether all these words should be considered as attached to the same series, I must leave the Reader to determine. The point, which I mean to prove is, that they all belong to operations on the Ground; and that these forms AR are oftentimes directly connected with each other. A term, under a similar form to Remus, as Ramus, contains the fundamental idea of Stirring up—Raising or Rising up, &c. Ramus is the Rising-up object—the Shoot or Shooting

Shooting up or forth Twig, as we have seen in Rise, bearing a similar meaning. R. Ainsworth explains RAMulus by the Shoot; and in Ramex, A Pectoral vein—Bursteness, Rupture, &c. we see the idea of Rising-Shooting or Swelling up in the strongest manner. In the explanatory word Rupture, Rupi, Rumpo, we unequivocally perceive the original idea; and Wachter, as we have seen, understood, how this term is connected with the Race of words before us. It will now be acknowledged, that the genuine sense of Rumpo appears in such applications, as Rumpere Terram Aratro. It is impossible not to perceive, that the above Celtic terms for Digging or Routing about or into the Ground, bring us to the Latin RIMA, RIMari, RIMari Terram Rastris, and the English ROMMAGE. I have often had occasion to observe, that the action of Routing into or about Dirt has afforded to Language some of the strongest terms for Diligent Search or Enquiry by the Mind. The Latin RIMOR—" To Examine diligently," supplies us with a striking example of this fact, as likewise do the term Scrutor, Scrutiny, quasi Scruta, 'Eruere.' The Etymologists cannot help seeing, that these words have some relation to terms under other forms, in which R appears. Thus they derive Remus from Epermos, and Rimor from Phyma, and Paymy. It is marvellous to observe, how words remain attached to their original spot, though they are not applied precisely in their original sense. We all remember the combination in Shakspeare "The "ROMAGE in the Land," (Ham.); but when we are said "To "ROMAGE every Hole and corner," we perceive the primitive Skinner considers Rummage or Rumegoode, idea as in Rimor. in its Sea sense, "Vox Nautica. Significat autem bona præsertim "in Fundo navis Removere, â Teut. Raumen, Raumen, Vacuare, " evacuare, Purgare, Raum, Spatium." Here the word cleaves to its original idea, by signifying 'To Romage out the Hole or " Bottom "Bottom of a Ship, or the Hold," as they call it. The succeeding article, in Skinner, is RUMNY Wine: which he supposes to be the "Vinum Hispaniense credo, q. d. Romanum," &c. &c.

We have seen, that the German Rumplen, Impetum facere, and Rumplen, Strepitare, bring us to Rumple, Rumble, &c. Among the parallel terms for RUMBLE, Skinner has produced the German Rumpeln, To make a Rattling Noise, &c.; Das Rumpeln eines karn, the Rattling of a Cart; where we are brought to the original idea of Noise made by Stirring up or Grating on the Ground, and RAMMELn, which my Lexicographer explains by "To "RAM, force, drive, thrust piles into the Ground with a RAM-"Block;" where we are again brought to an action on the same spot. We now see, that RAM Aries, the Animal, is derived from RAM, Fistuca adigere, the action on the Ground. I have shewn, that Aries belongs to the form 'R, 'RS, from a similar idea. To the RAM belongs RAMMISH, as Skinner imagines. The French RAMasser, 'To Drive in a sledge,—To bang, to cuff;' and in another sense, "To gather, to collect, or get together," or, as Le Duchat explains it, "C'est proprement, rassembler avec un " balay, qu'en quelques Provinces on nomme un Ramon;" where we see the idea of Dragging or Sweeping upon the Ground. The Etymologists derive it from Rameau, which is probable for one sense; but it does not so aptly apply to the Sledge. An adjacent word to this, in Menage, is RAMAGE, the wild Wood-notes of the Bird; which is acknowledged to belong to Rameau. Chaucer adopts Ramagious, "Sylvestris, indomitus," as the Etymologists understand. The adjacent terms to RAM, &c.. in Junius, which belong to our Element, are "RAMBLE, ROMBLE, "RUMBLE, Personare, strepitum edere; RAME, &c. Vociferari, " clamare; RAME, &c. Manum ad aliquid capiendum exporri-" gere;" which is justly referred to the Islandic Rama, Hrama, " Arripere, Unguibus corripere, quod à Hrammur Unques leonis, "ursi;"

" ursi;" where we see the original idea of Violence, as connected with the action of Scratching or Tearing a surface:—RAMMakin, Virago; RAMPing, RAMPant, Præceps, qui violento impetu fertur; Rampant, (Fr.) &c. Rampire, Munimentum; Rempart, (Fr.) &c. It is not possible to doubt, that the RAM in these various words conveys the same fundamental idea, and in all of them, except in the term RAMPART, we unequivocally see the idea of Violence and Commotion; from whence we shall conjecture, that the sense of Strength, annexed to this term, was originally derived from that of a Violent action. Under RAMBLE, Junius has reminded us of the Greek Rembein and Rombein, (Poußu, In gyrum circumago, - circumvolvo, Temere inambulo, Spatior, vagor, erro, Poμβεω, Volvo et circumago in modum Rhombi); where we see the original idea of Stirring or Turning up-about-round, &c. While I examine these words, in my Greek Vocabulary, I cast my eyes on Romphaia, (Ρομφαια, Romphæa, gladius, Framea,) which is either derived from the idea of the Whirling-about motion of a destroying sword, or from the violent action of Striking, &c. annexed to Rembo, (Psußu, Vagor,) Ramble, will remind us of ROAM, ROVE, the Greek RIMPHA, (Pippa, Leviter, statim, celeriter,) which brings us in contact with RIPTO, (Porto, Jacio.)

In the colloquial or vulgar terms Rumpus, Rumbustious, &c. we see likewise the idea of Agitation, &c.; and we shall find words, under various forms of this sort, conveying a similar idea, which the Reader will instantly refer to this source. I cannot help producing one word of this kind, the verb of the participle, before recorded, RAMP, which not only means "To Rove, frisk, or jump "about," but likewise "To Paw like a mad horse." as N. Bailey explains it; where we see actually the idea of Routing up the In this same column of this writer I find RAMMolade, (in Cookery,) "Sauce, made of parsley, anchovies, "chibbols, pepper, salt;" and in the preceding column in two

API.

separate articles, RAMEkin, (Ramequin, Fr.) and RAMEquins, which are only different forms of each other. The first of these he explains by "Toasted bread and cheese, a Welsh Rabbet;" and the latter by "Small slices of bread covered with a farce of cheese, &c. " baked in a pie-pan." All these terms of Cookery relate to Compositions, in which the parts are RAMMed-Beat or Mixed together. In the Composition of the Ramekin, much Beating or Agitation of the particles is required, in order to make a due mixture: and thus we see, how it coincides in sense with RAMMakin, the Girl in a state of Agitation. The Kin in these words means "Sort, Kind." Dr. Jamieson has more properly explained RAMMekins by "A Dish made of eggs, cheese, and crumbs of " bread, Mixed in the manner of a Pudding;" and an adjacent term is "RAMMEL, RAMBLE, Mixed or blended grain;" where our author has very justly reminded us of Rammeln, (Teut.) "Tumul-"tuari, q. in a confused state, as being blended." All the adjacent Scotch terms, under the form Ram, &c., convey the train of ideas, which I have unfolded, - RAMAgiethan; "A Large raw-boned " person, speaking and acting heedlessly;" which is only another form of RAMMAkin, Virago, -Rambarre, (Rembarrer,) "To stop, "to restrain; also to repulse;" where it is difficult to say, whether the Ram or Rem is significant, or whether the first part be not Re. The second part is Bar-To Stop.—RAME, To Shout, to cry aloud; RAM-feezzled, Fatigued, exhausted, overspent; RAM-forsit, Crammed, stuffed hard, q. RAMMED by force;— RAM-gunshoch, Rugged; -- RAKmasche, Collected; Fr. Ramassé, Rammel, Small branches, belonging, as is understood, to Ramulas, &c.; which I explain in a future page.—RAMMER, A RAM-rod; RAMMIS, To go about in a state approaching to frenzy, &c.;— RAMP, To be Rompish, To Rage; where the Italian RAMPare, To paw like a Lion, is produced, in which word we see the genuine idea, as in the Scotch, To RAME, To Trample. RAMP, Riotous, disorderly, .7 N

" disorderly, Vehement, Violent;—To RAMP. Milk is said to Ramp, "when from some disease in the Cow, it becomes Ropy, and is "drawn out into threads, like any glutinous substance;" where the term relates to the Agitation, which takes place in the action of Curdling.—"RAMPage, To Rage and Storm, to Prance about with " fury; -RAMPar Eel, A Lamprey," which is not a corruption of Lamprey, as Dr. Jamieson thinks, but it means the RAMP, furious Eel, from the quality, which is recorded in a quotation produced by this writer. "It is said, they will attack men, or even black "cattle when in the water." - RAM-Rais, &c. "The act of "running in a Precipitous manner; -- RAMSH, Strong, robust; --RAM = Stam, Forward, thoughtless; - RAMukloch, To sing "RAMukloch, To cry, to change one's tune from mirth to sad-" ness." I shall not attempt to produce any more terms in Scotch, or in other Languages, under the form RM, conveying this train of ideas, as the fundamental sense is so plain and unequivocal.

The words, which we find adjacent to Rumpo, in the order of an alphabetical Vocabulary, convey the same fundamental idea. Thus RUMA, RUMEN, the Breast, Belly, &c. mean the Raised-Swelling-up or almost Bursting-out object; and they appear afterwards to relate to any of the adjacent parts used in Eating-Swallowing, &c. "Rumen est pars colli, quâ esca devoratur, unde "RUMARE dicebatur, quod nunc Ruminare." (Fest. apud Voss.) From hence, as we know, RUMINATE is derived; where we again see, how the most ordinary action supplies Language with one of the strongest terms for mental Exertions.—Rumpus, "Branches, "whereby one vine is brought to another," is acknowledged to belong to Rumpo.—Rumus, the Bramble, does not seem to mean simply the Shoots, but to bear the same sense as Rupes, the Rock, does, 'id quod Ruptum est.' The former signifies the Rough, Jagged Bramble: and the other, the Rough, Craggy, or Scraggy Rock.

The term Rough could be equally applied to both objects; and so may the familiar epithet to Rubus, the Latin Asper, as Asper RUBUS, and Aspera RUPES. RUMex, the Herb, called Sorrel, is acknowledged to be derived from Rumo, Sugo, "quod succus ejus." "exsugi soleret ad levandam sitim." The terms Rufus, Ravus, RAvidus, Rubeo, Ruber, Ruby, belong to the colour of the Ground, under the form RB, just as ERUThros, (Epubleos,) RED, do under their forms 'RT, RD. Whether all these words are to be considered, as attached to the same series, I must leave the Reader to decide. In Rubrica, "Red Earth," we are brought to the original Spot. We know, that Rubric is applied to "Direc-"tions in the Liturgy;" and it means likewise "A special title "or sentence of the civil or canon Law;" and thus we perceive, how by the most obvious process, the Earth or Dirt is applied to purposes most remote from their original materials. Rubico or Robigo, is either derived from Ruber, denoting Red, as the Lexicographers suppose, or from the more original sense of Foul Dirt, as in Rust. R. Ainsworth explains Rosigo in one sense by Foulness; and we know, that Mouldy belongs to Mould, which affords the origin of the Mil in Mildew, one of the significations of Robigo. The Robbin in Robbin Red-breast, does not belong, as the Etymologists appear to imagine to the RB in Rubecula; the sense of which appears in the epithet Red; but to the name for a man, Robbin, as in other instances we find the names of men applied to birds, as Philip to the Sparrow, &c. "Gur. Good leave. " good Philip. Bast. Philip !- Sparrow," (King John, A. I.)

I have shewn, that Ramus and Remus convey the same fundamental idea of Stirring or Raising up, and that Ramus means the Rise, as we express it, or Shoot; and we have seen, that Rames, 'A Pectoral vein, burstedness, Rupture,' and Rumpus, the Vine-branch, belong to Rumpo, Rupi. I might take this occasion of introducing the words, relating to Vegetable Substances,

under the form R, with the Labial sounds succeeding; though I do not attempt to adjust the precise relation, which these various terms may have to each other. The Etymologists remind us, under Ramus; of Orannos, (Openos, Frons, Ramulus,) which connects itself with Oro and Ormeo, (Open, Oppmen, Concito,) under the same idea of the Shoot, In Ono-Damnes, (Opologues, Surculus, Ramusculus,) we seem to have a compound of QRo, (Ope,) and Thamnes, (Quinc, Dumus, Ramulus densus arbori adnatus.) Let us mark in Surrulus a similar idea of the Rise or Shoot, from Surgo. In Ormenos, Ormenoeis, (Opperor, Asparagus sylvestris, Opheros pro Opoperos, Concitatus, Opperose, Qui caulem jam emittit post florem amissum,) we unequivocally see the union of Vegetable Productions with terms of Excitement, as Ono, &c. (Oeu,) and ORMAS, (Ogume,) and in Orminon, (Ogume,) Horminum, we have probably the same idea. While I am examining these words in my Greek Vocabulary, I past my eyes on two other Greek terms, relating to Vegetable productions, as Orobos (Opecos,) Eren-inth-os, (Kestarles, Cicer, Leguminis genus,) Envam, genus leguminis, and Orres, (Oerst, Ramulus, Surgulus.) We shall all acknowledge, I think, that Exvum must belong to Axvum, and so we should conclude, I imagine, with respect to HERRA and ARROY, whatever may be the precise idea, by which they are connected. They might all mean, the productions of the Ground, or, as the other words, they might signify, what Shoots up-Rises or Grows up. If HERBA is not annexed to it in either of these senses, it must belong to it under the idea of a Weed, and then the original meaning will appear in the verb ex-Herbo, To Pluck up Weeds; i.e. To Rout up. The conjecture of the Etymologists, that Arbor was quasi Robur, would of itself be sufficiently probable, if we did not see its relation to these words, and observe its connexion with Arbutus, Arbustum, &c., where we see the idea of Sprigs or Shoots. We must remember too, what even the ordinary Latin

Latin Vocabularies detail to us, that Arror not only means a Tree, but it is likewise, as R. Ainsworth observes, "A general word, "under which Ivy, Osier, and even Reeds are comprehended," The adjacent term Arriter is still connected with Arvum and Aro, in the more violent sense of the Stirrer up—Raiser up or Router about, as denoting the powerful Ruler. In the term Arritrator it is taken in a gentler sense; but as denoting "A Prince, or Ruler," of a violent, turbulent kind—"Regum et gentium Arritra Populus," we see its more original meaning. But Horace, with his curious felicity, has decided on the primitive idea, by actually applying it to the Sway or Dominion exercised in Routing up a surface with the most violent action.

"Quo mon ABBITER Hadrise
"Major Tellere seu ponere vult frete."

The word Orpet, (Open, Ramulus, Surculus, ex radice arboris enatus, stolo,) manifestly connects itself with its adjacent term Orophe, (Open, Contignatio, qualis est tectorum,) the Raised-up part—the Top, &c.; to which we must add its parallels Exerbo. (Epspe, Tego.) Erepte, (Epsare, Edo, Tego.) and the English Roor. In the same column of my Vocabulary with this latter word, I see Erelpo, (Econo, Everto, disturbo, demolior,) where we have the idea of Raising or Routing up with force and violence, for the purpose of destruction. I cannot leave these names for Vegetable productions without noting Ramnos, (Papios, Rhamnus Alba, Spinosa frutex,) which probably means the Prickly -Scratching Plant, as we may conjecture from its adjacent word RAMPhos, (Pauses, Rostrum,) where we unequivocally see the idea of the Scraigher up or Router of the Ground, as we have seen the same idea under the form Restrum. I find next to these words in my Greek Vocabulary, Rhamnousia, (Paprovoia, Rhamnusia, Nemesis,) the Goddess of Vengeance; who is supposed to be so called from the Town Rhammes, in which she was worshipped.

We might consider, whether the Town itself may not have been so called from some word belonging to the Radical RHAMN, as denoting the Router—the Avenger, &c.

We have seen, that in Arabic, , REM, signifies Earth, and that it means likewise, "Breaking, Bruising." Among various other terms in the opening of Mr. Richardson's Dictionary, where this word occurs, relating to the same spot, I find REMS ("Co-" vering with Earth, burying, a sepulchre, a grave;" رسل Remel, Sand; Rемн سرم "Throwing up the gravel with the feet;—Shin-"ing, flashing, (as Lightening);" where we see the same relation, which Mico, To Glitter, has to Mica, Broken,—Scattered or Agitated particles of Dust, &c. I find likewise رمض Remiz, "Hot "from the influence of the Sun, (a day, stones, Sand,) Scorched in "the feet from the intense heat of the Ground; " مضة REMZT, Sandy, torrid (region); ربضا REMZA, Sultry hot from the sun, (Ground.) Hence is derived the month RAMAZAN ربضان, which implies, says Mr. Richardson, a consuming fire; whence it is by some conjectured, that this month was formerly stationary in the most sultry period of the summer, &c.; and our author explains it in one sense by "Sand Shining or Scorched by the reflexion of "the Sun." In the term WARM, and its parallels WEARmian, &c. we must consider the 'R, as denoting Excitement, to be the Elementary character, to which they are attached, whatever may be the precise process, by which they have been formed. Among the Arabic terms for Warm, produced by Mr. Richardson, we have HAURR, HURR, and خرم Gurm, which perhaps may exhibit to us the process, by which the Radical form 'R has passed into the other forms. Mr. Richardson explains - Hurr or HR, by "Heat, WARmth, Fervor, Ander;" where the An in Ander has the same Radical meaning, as in Uro, &c. &c. In one sense, Hurr signifies Pure Clay, &c., where we are brought to the spot, supposed in my hypothesis; and in the same column of Mr. Richard-

son's

son's Dictionary we have Herras, A Farmer. Under Warm, the Etymologists produce the Greek Thermos, (Enquos, Calidus,) and the Æclic f-Ormos, (Enquos,) where I still conceive the Element AR to have originally predominated, whatever may be the precise process, which has taken place in the generation of these words. The term f-Ormos will remind us of the Latin f-ERvor. In the same column of Skinner's Dictionary with Warm is Warf, or Mould-Warf, where we see the Warf actually applied to the Stirring up or Agitation of Dirt; from which I suppose the idea of Warm to be derived.

In the same leaf of Mr. Richardson's Dictionary, from which the above Arabic words, under the form RM, are taken, I find REMI, "Throwing from the hand, darting a javelin, shooting an "arrow, hitting the mark;" and hence in the same column we have the Persian term of Consternation, Remiden, "To be afraid, terri-"fied, seized with horror, to be disturbed, agitated," &c. &c. The Hebrew term, parallel to the Arabic, will sufficiently unfold to us the nature of these words. This term is 707 RMH, which means "To Cast, Throw, Project, &c. - To cast down, &c. &c.;" and among other things it denotes a Worm, the crawler amongst the Dirt or the animal, which Throws about the Dirt in crawling; where we are brought to the spot, supposed in my hypothesis. We observe, that this Hebrew term and woRM, with its parallel wyRM, (Sax.) v-ERMis, (Lat.) oRME, (Dan.) belong to each other. familiar name ORME is derived. The rational Mythologists, as they are called, have converted ORME, the Serpent, the long established Guard of Beauty, into ORME, the name of a Man. On an adventure of this sort the following remark has been made. It happened, that the name of this discourteous officer was "ORME, which in the Islandic Language signifies Serpent. Wherefore, the Scalds, to give the more poetical turn to the adventure.

"adventure, represent the Lady as detained from her father by a dreadful *Dragon*, and that Regner slew the monster to set her at liberty." (*Percy's Reliques*, vol. iii. *Dissertat.* p. 17.)

In Hebrew, was RMS, means 'To move, move along, move itself-To Move in a particular manner, without rising from the Ground, to creep, crawl, to move as Reptiles on the Ground." It is impossible here not to note the terms conveying the same idea; under the form ARP, RP, as ERPO, (Epras,) REPO, REPtile; to which belong the Latin s-Erpo, s-Erpens, &c. &c. I am not here attempting to decide on the precise degree of affinity, which these words have to the Hebrew term; but I only mean to affirm, that they belong to the same Element, conveying the same fundamental idea. The Greek Erro, (Lenu, Serpo,) may be compared with the English wh-ARP, in the Mould-wh-ARP, and perhaps may directly belong to it. The terms which relate to Turning up the Ground, or Dragging-Drawing upon-over, &c. &c. the Ground, are frequently applied to a certain Tract of Country— Turned or Lying Towards a particular quarter. I have here adopted two similar terms, Tract, derived from Traho, Traxi, Tractum, and To-Wards, belonging to Versus, Verto, Vertere Terram. Erro, (Epru,) is used in a sense of this nature.

Αλλος δ' αυ μακρος και αθεσφατος ες νοτον ΕΡΠΕΙ.

"Alius," (Isthmus,) "vero longus et immensus in austrum Serpit," hoc est, Vertitur in austrum, or Est Versus austrum. Whether the Greek Ofis, (Οφις, Serpens,) be quasi Orfis, must be considered in another place. The Greek Erpo, Erpeton, &c. (Ερπω, Serpo, Repo, Eo, Vado, Ερπετον, Reptilis, Bestia quævis,) are applied, we know, to every species of Motion performed on the Ground;— "Ερπειν, apud antiquissimos Græcos Ire significat; quæ significatio vocis hujus remansit apud Doras," &c. &c. (Casaub. ad Athen. I. c. 22.)

The preceding term to the Hebrew won RMS, in Mr. Parkhurst's Lexicon, is pan RMSh, "To tread, trample, as clay, &c., which brings us to the English RAM, To RAM down Earth, Stones; where it is referred to its original spot. Before I quit the Hebrew RMH, To Cast, throw, &c., I ought to remark, that it means in one sense, as a substantive, ממן RMUN, "the Pome-"granate-tree and fruit;" which Mr. Parkhurst thinks to have been so called from "the strong Projection or reflection of light, "either from the fruit, or from the star-like flower, with six leaves "or rays at the top of the fruit." We have seen, that the idea of Brightness or Twinkling has been annexed to these words from the Mication or Agitation of Sand, &c.; and hence, as a noun, this same word por RMN, is RIMMON, the Syrian Idol, which is supposed to represent, according to Mr. Hutchinson, "the Fixed stars "and the reflexion or streams of light from them." It is imagined, that the "brazen Pomegranates, which Solomon placed in the " net-work over the crowns, which were on the top of the two "brazen pillars," were intended to represent "the fixed Stars strongly reflecting light on the Earth and planets." Mr. Parkhurst likewise refers to this Hebrew word the Temple of the Cansanites, dedicated to Dan HRM, the Projector; that is, as he says, "the " Heavens, considered as Projecting, impelling and pushing for-" wards the planetary Orbs in their courses;" and hence he has derived the Egyptian and Grecian HERMes. Our author imagines, that the custom of Throwing a stone at the foot of his statue was derived from this source, and that the idea of his being the God of Cheating has been taken from confounding the different significations of the word; as ПОЛ REMI, in one sense, means "To deceive, cheat, Throw or fling," as we express it; and he supposes, in another place, that even his property of Eloquence arose from confounding his name with a similiar sound ערם HRM, Subtle. By the same mode of reasoning he might have conjectured, 70

tured, that his symbol of the Twined Serpents was derived from the sense of the Worm or Serpent, which he refers to another idea.

The succeeding word to רמה RMH, in Mr. Parkhurst's Lexicon, is Ton RMCh, which in Hebrew means a "Spear, Lance, "or Pike;" i. e. what is Thrown—Cast or Thrust at a person; as Lance, we know, belongs to Lancer, "To Dart, to Throw with "violence, to fling." To this Hebrew term Mr. Parkhurst has referred the Latin Rumen; and they may directly belong to each other, yet the Latin word seems to be more immediately attached to Rumpo, "To Tear the skin, to Wound," &c. The next Hebrew term is רכוך RMK, which, in the plural, means Mares; and in Arabic, as Mr. Parkhurst observes, it particularly signifies "A Brood Mare." Here the term means likewise 'To Throw or 'Cast out,' as young; and hence we have Throws, applied to the pains of Childbirth. In German, a term belonging to this race, as Werfen, "To Throw, cast or fling a thing " somewhither," as my author explains it, means in another sense. "Junge Werfen, "To whelp or bring forth young whelps," Mr. Parkhurst sees no relation between these words; and it is curious, that the Hebrew Lexicographers, who, in many respects are adventurous Etymologists in comparing their terms with words in other Languages, perceive no affinities in their own Language, when the Terms pass into the least difference of form.

The similarity of Worm and Warm will unequivocally shew us, that these words, which are both expressed in Saxon, under the same form Wyrm, contain the same fundamental idea, and that the one signifies the Stirrer up, and the other the Stirred up—the Excited. The succeeding word, in Skinner, to Worm is "Worm-Wood, vel Worm-Wort," as he says; to which the Etymologists have produced, as parallel, the Saxon Wyrm-Wyrt, Were-Mod.

Part,

Were-Mod, the German Wermuth, the Belgic Worm-Moed, the Welsh Wermod, &c. &c.; which some derive from its quality of driving away Worms, though others imagine, with whom I agree, that the Worm, &c. belongs to Warm, from its quality of Warming the Stomach. Yet the second part of the compound in these words does not seem to be the same. The Saxon Wyrm-Wyrt means the Warming-Wort, or Herb; but in the Saxon Weremod, or Werem=Mod, as in the German Wermuth, the Mod or Muth means the Mood or Mind; and the compound denotes "What Warms or refreshes the Mind." It is difficult to say, which of these the Wood in Wormwood expresses.

The adjacent term, in the Lexicon of Mr. Parkhurst, to the Hebrew words above produced, will again illustrate the force of the Element. This term is 57 RM, "To be lifted up, exalted, " elevated;" and among other senses ארטה ARMun signifies, as a substantive, "A raised or lofty building, a turret or tower." Mr. Parkhurst refers to this word the English terms Room and ROOMY, and the Latin RUMA. We have seen, that these English words directly belong to the idea of Routing up the Ground-à Rumpendo, terram. Hence, we see, Ruma is the Bursting-out-Swelling-out object, as I have before observed. The Hebrew Lexicographers will consider, whether on RChM, "the uterus matrix, "womb:" and hence "to be affected and yearn, as the bowels" is not quasi RHM or DTT, as in Arabic it appears under this form , RHM, "The womb, matrix, uterus,—Compassion," &c. In the term RAMPart, or Rampire, (Eng.) Rempart, (Fr.) Riparo, Reparo, (Ital. Span.) we see the genuine idea of the Raised-up Dirt, Bank, or Mound, which likewise appears in the Greek ERMA, (Equa, Fulcrum, stabilimentum. Confidentia, Saburra, Scopulus, Saxum in mari. Inauris, Monile,) as denoting the Heap of Dirt, Sand. Lye thinks, that Rampire belongs to Ram, (Isl.) Validus, and Peer. It is difficult to decide, whether the Pare, Par, or

Part, &cc. be significant, or whether the Art in RAMP-Art does not belong to the 'RK, 'RT in Bul-Wark-Boule v-Ert, &c.; where the Ark, Ert, mean the Raised-up Earth. In a few instances we shall not be able to decide, whether the sense of Strength, annexed to the Element RM, &c. be derived from the idea of the firm Raised-up Mound, or from the general and universal sense of the Element of Strong or Violent Agitation, by Stirring or Routing up a Surface. Among the words denoting the Raised-up Mound, we must class the RAM in piRAMid, (Πυραμις, Pyramis, figura in conum, velut flamma ignis, attenuata.) It should seem, as if the Greeks in giving to a part of this word the form of The had claimed it for their own, under the idea, The pi is the Ægyptian which their interpreters have done. Article, and the RM is the Radical. In the Greek Enumnos, ERUMA, RUMA, ROME, (Equipos, Munitus, Epupa, Tutamen, ab Eguw, Traho, Pupas, Fluentum, Tutamen, munimentum, à Puw, Fluo, Pupp, Robur, vis, à Pau, Roboro, sed pro eo usurpatur Pumpu, vel Parrow, Paspan, Agitor, in med Ruo,) we may perceive a set of words, denoting what is Strong; which are allowed to belong to the simple form 'R, whether by the analogy of the Language, or any other process it is not necessary to decide, and to be annexed to the idea of Commotion-Agitation, as To Draw out, To be Agitated, &c. &c.

In Ronnuo, (Parruw,) we see the n annexed to the simple form R', without any idea of its being an addition from the analogy of the Language. In examining these words, in my Greek Vocabulary, I cast my eyes on Rume, (Pum, Impetus, Vicus, platea, à Pum,) where we have at once the term of Agitation and a Path, or the Ground, that is, the Spot Stirred up by the Feet, or the Spot, with the Dirt Stirred up—off, away, &c., for the convenience of walking. I find likewise in the same opening Rumbos, (Pumbos, Rotula, Turbo, Impetus,) which, in one sense, has precisely the

same idea as Rume, (Puun, Impetus); and yet the former word is referred to Rembo, (Peußw, In Gyrum circumago,) where it is not even conceived, that this is derived from the analogy of the Language. I find likewise in the same opening of my Vocabulary Rumma, (Puppa, Purgamentum, sordes, et id, quo sordes purgantur,) which is derived from Rupto, (Puntu, Sordes eluo, purgo, abstergo,) where we not only see the idea of Stirring upoff, but, moreover, Stirring up or off the Dirt of the Ground, as my hypothesis supposes. In this opening of my Vocabulary we' see the simple form R, with its various adjuncts R{s, &c. n, m, P, &c., all containing the same fundamental idea of Agitation or Stirring up-about-off-away, &c., annexed to 'R, R', as Ruo, Ruomai, Roomai, (Puw, Fluo, Puopai, Eripio, Puopai, Agitor,) Rustaro, (Ρυσταζω, Trahendo;) Rapio; Ronnuo, (Ρωννυω,) Rume, (Ρυμη, Impetus,) Rembos, (Psμβos, Impetus,) Rupto, (Puπτω, Sordes, eluo,) &c. &c.; and let us again note the explanatory term Rario, bearing the same idea.

We see, that Erma, (Ερμα, Saxum in mari.—Inauris, Monile,) signifies a Projecting Rock—the strong Barrier or Mound, against the beating Waves, and a Ear-ring or Necklace, what Incloses-Infolds, as Barriers or Mounds do. This brings us to Ormos, (Opuos, Monile, colli ornamentum, Statio navalis.) If Ormos, (Opmos,) is not formed after this process, we must conceive the original idea to exist in Ormeo, (Oemew, Stationem habeo. Appello, sc. navem in Portum,) in its sense of Appello, To Drive to Land; and thus ORMEO, (Ogusw,) would be attached to ORMAO, ORME, (Ορμαω, Incito, Concito, Impello, Ορμη, Impetus,) where we see the original idea. Under this process the sense of the Necklace would be derived from the Enclosure of the Port, which, in its original idea, meant the place, into which Ships are Driven. It is impossible not to see, how Ormao, (Οςμαω,) connects itself with the words

with the words of Commotion, under the form RM, already produced; and it is equally impossible not to see, how the On in this word, as in Ornumi, (Opropa,) is attached to Oro, (Opa, Concito,) where we have the simpler form. Here too we see, how the forms OR_N^M are related to each other. While I am examining the term ORME, (Opun,) in my Greek Vocabulary, I cast my eyes on Ormeia, (Oemeia, Tenuis funiculus cum virga, quo piscatores e setà equinà contexto pisces venantur,) which probably refers to the Excited—Catching-up motion, if I may so say, by which Fish are caught by the Hook-Orminon, (Opposor, Horminum,) before produced, which is supposed to belong to Ormao, (Oquau, Concito,) 'quod Concitet ad Venerem;' or it may belong to it under the idea of Shooting up or forth, as in Ormenos, (Ορμενος, Asparagus sylvestris, Ορμενος, Excitatus,) — Or Mathos, (Opualos, Ordo, Series, catena, series catenata, Latibulum, lus-I suppose, that the original idea of this race of words relates to the operation of Routing up-Holes-Hollows or Furrows on the Ground. In the sense of Ordo, Series, annexed to Ormathos, (Opualos,) we have perhaps the notion of the Furrow; and in that of Latibulum, lustrum, we have the Hole or Hollow, in general, as in RIMA, (Lat.) &c. &c.

^R{M, B, &c.

Terms signifying 'To Lay waste—Desolate,' &c. Hence, What is in a Desolated or Destitute condition.—What is Desolated, so as to be Solitary; as Night and Darkness.—What is Solitary or Quiet—Undisturbed—at Rest.

EREEMOO, EREEMOS, HERMIT, EREMITE. (Gr. Eng.) Vasto, Desertum reddo, &c. Desertus, solus.

EEREMOS. (Gr.) Quietus.

Eremnos, Erebennos, &c. &c. (Gr.) Tenebricosus.

ORBUS, ORPhanos, ORPhan, &c.

(Lat. Gr. Eng.)

HARM, &c. (Eng.)

ÆRUMna.(Lat.)

Names of Man, the Router— Harrower, &c., the Powerful Being, &c.

рі-Rоміз — Rоме. (Ægyp. Cop. Gyp.)

Rum. (Eng. Cant.)

ERMes. (Gr.) Mercury.

&c. &c.

Under the form 'Rm, 'Rp, &c., with the breathing before the 'R, we have a race of words, signifying To HARRie, Lay waste, Spoil, Desolate, Destroy, Injure, &c.; and hence what is in a Desolate or Destitute condition—What is Desolate—Solitary, as in a state of Night or Darkness; and hence what is Dark—the Night, &c., what is Desolated, so as to be Solitary, Quiet, at Rest, &c. &c. Among these terms we may class the following; Ereemoo, (Egnuos, Vasto, Desertum reddo, derelinquo,) Ereemos, (Egnuos, Desertus, solus, solitarius, inhabitatus, incultus, præsidio destitutus,—omninoque carens aliquâ re utili, necessariâ,) to which, we know, belong Eremite, Hermit, &c. &c. Eeremos, (Hermos, Quietus,) Eremnos

EREMnos, EREBennos, EREBos, ORPhne, (Epeuros, Tenebricosus, Epe-Gerros, Furvus, obscurus, Epelos, Erebus, Orci tenebræ et caligo, Oppra, Tenebræ, obscuritas, nox,) ORPHANOS, (Oppavos, Orbus parente vel parentibus, pupillus Orphanus; Orbus quavis re, viduus, carens,) the Orpham, the person in a Desolated state; Orbo, Orbus, (Lat.) EREMBOI, (Ερεμίους, Τους, Τρωγλοδυτας,) the Troglodytes, living in Dark Holes or Caverns: where we scarcely know, whether the idea of Darkness prevails, or that annexed to the primitive sense, the Terra EREEME, EREMne, (Emply, Losury,) the 'Terra Rimata,' the Rommaged-out Ground or Hole; שרב HRB, "The Evening-"A wilderness, a desert, uncultivated country," according to Mr. Parkhurst. The original sense of this Hebrew term, "To "mix, mingle. As a N. 'A mixture, mixed multitude, Rabble,' (which " English word may, by the way, be derived from Heb. ב" RB, "Great, and בל" BL, "Mixture) of men," as Mr. P. observes, In the sense of "To Mix, Mingle," we see the original idea of Stirring up or together, as Dirt, &c., according to my hypothesis. In Rabble, where the l is an organical addition to the B, we see the true idea; as in Rubbish, RIFF-RAFF, &c. I shall shew, that Turbo, To Disturb, confuse, mix; Turbidus, Muddy, and Turba, the Crowd, belong to the Turf.—ARM, (Germ.) Pauper; ARMen, Misereri, "ut Latinis Misereri, à Miser,"-Arbeit, (Ger.) "Labor, " Arumna, labor ex afflictione," which is nothing but the Orbit, in the Latin Orbitas; and hence, in German, we have the compound Erb-Armen, Irp-Armen, which means To pity, Armen, the ERB, ORBI, the Afflicted, Destitute, &c.; though Wachter derives it from Er-Be-Armen, which is not improbable.—HARM, (Eng.) with its parallels HEARMan, HARMen, (Sax. Germ.) &c. HARMi=Scara, (Wachter,) "Poena arbitraria," &c., the second part of which belongs to Scar, Score, &c. &c.—ÆRUMna, (Lat.) of which the original sense appears in ÆRUMnula, Furcilla, the Fork, the Stirrer up of the Ground, though afterwards applied to other purposes,

purposes, as to carry burdens. The Etymologists have referred it to the more simple form, when they derive it from AIRO, (Apa,) and "Eruo, quod mentem Eruat;" where we have the true metaphor.— EARM, (old Eng.) Poverty; YRMth, (Sax.) "Miseria, Arumna, &c. "YRMian, (Sax.) Miserum facere. Vexare, affligere, Desolare," as Lye explains them; who has likewise produced a phrase under the latter word, where we are brought to the Spot and the very idea supposed in my hypothesis, "Lytesna ofer ealne YRMenne "Grund. Propemodum per totam Desolatam Terram;" where the force of the YR in YRmian still remains as it does in the terms, which I see in the opening, now before me, of Lye's Dictionary, YRRe, Ire, Ira, YRth, EARth, "Fundus arabilis, ager novalis," all belonging ultimately, as I conceive, to the EAR'd, ARata, ERa, (Rea,) or EARth, if I may so say.—ערם ARM, To be naked.—Naked, Uncovered, Stripped, &c., to which Mr. Parkhurst has justly referred Eρημος, Eremite, Hermit, Earm, (old Eng.) This Hebrew word is brought to its original spot and true sense, when it signifies in Nehemiah iii. 34, "Dust and Rubbish," whether the speaker uses a Dialectic sense or not. From the Heap of Dirt is taken the Hebrew sense of a Heap of any thing, Corn, &c.

The consideration of the Teutonic Arms will enable us to understand a Scythian term, recorded by Herodotus, which is entirely a Teutonic composition. Herodotus tells us, that Arimaspu means One-eyed; and he derives it from Arima, which, as he says, is a Scythian term for One, and Spu another Scythian term for Oculus. Wachter derives this imaginary term for One from the negative a and Rim, numerus; and the part Spu he justly refers to the German Spahen, which corresponds with our word Spy. Arima Spu means Arms, Destitute or Deficient, in Spy or Sight, that is, 'Having some Deficiency in Seeing.' The term Spy pervades a great variety of Languages, as the Etymologists understand. Hence Spae, (Scotch, &c.) means 'To Foretel,' and Spay-Man

means "A Prophet," &c. Some have understood, that the Spa in Volu=Spa, the name of the Book, containing the Scandinavian Mythology, belongs to this idea; but they have not seen, that Sibylla is quasi Sby-Bylla, or Spa-Bylla, the Spa-Volu in Volu-Spa. In the celebrated Fragment, from which Gray has taken his Fatal Sisters, one of the Prophetesses is called Svipula, which I conceive to be quasi Spa-Pula, or Spa-Volu; and from this form we directly get the Sibylla.

This Hebrew word ערב ARM, is only another form of ערב ARB, 'A Wilderness, Desert,'&c. Under the simpler form 'R, in Hebrew, we have a similar meaning of Stripping, &c., as ארה ARH. "To Pluck off, or Crop, as from a tree," &c.; which I have before produced. In Hebrew too, and cHRB, means "To be or lie "waste or Desolate," which belongs to yor ARB. The term comes to its original sense of Stirring up or Cutting up a surface, when it signifies, as a substantive, "A Knife—a Tool to cut " stones with, a Chisel—and an Ax, or Pick-Ax;" where we are brought to the very Spot. In Arabic these Hebrew words HRM, and שרב HRB, have a variety of parallel terms, some of which Castell Mas collected. The term | ERMA, means "Desert, "Desolate, barren, empty, vacant; URMA, Any, any one;" that is, a person standing Desolate or Alone; and among the various senses of ارب Erb, we have "Desert, Desolate, laid waste," which is the original idea. The Arabic Scholars must seek from hence the various senses belonging to this word and other similar terms. In the same opening of Mr. Richardson's Dictionary I find the Persian ارام ARAM, "Rest, tranquillity, peace, quiet, repose, cessa-"tion, inaction." Hence is derived the familiar Eastern term HARAM, the apartment for Women, the place of Solitude, Separation, and Quiet. The preceding term to the Arabic Erma, Desert, &c., just produced, is ارم ARM, &c., which among other senses means "Prisons, chambers, closets, women's apartments," as likewise "Consuming,

"Consuming, ruining, destroying;" where we have the original idea. In the next column of Mr. Richardson's Dictionary I find () ERMAN, (Pers.) which means in some of its senses, "Labour, exer-"cise, grief, anxiety, trouble," where we have the precise idea of the Latin ÆRUMna; which, says R. Ainsworth, "is used for Toil, " Hard labour, and by consequence Affliction, wretchedness, an-"guish, any thing that is Grievous." Cicero defines it "Agritudo, " laboriosa." In the same column I see ارمنيه ARMINIAH, Armenia; and I must here observe, that the Etymologist in considering the names of Places, under the form AR M, B, &c., should first enquire, whether such names may not be derived from the idea of the Desert, as alluding to certain parts of the Land. Thus, I imagine, Arabia means the Desert Country, though some spots included under that name are highly fertile. Thus the term ARAM, in Scripture, is applied to Mesopotamia, because a part of it is Desert; and Padan is added, in order to express the Cultivated part of it; so that Padan-ARAM means, as Bochart justly observes, "Mesopotamiæ culta pars, quæ Desertæ opponitur." Hence the Syrians are called Arimi, Aramai, &c. (Bochart. Geograph. p. 75, &c.)

The form 'RM, RM, supplies the name for Man. Thus ARAM is the name of the son of Shem, and the grandson of Nahor; from which latter word some have derived the name of the Country.— The names for Man, under this Element, have been derived, as I imagine, from the same train of ideas as the words denoting Land, though they are applied to persons in an active sense, under the notion of the Harrower—the Router—the Powerful—Strong Being; and hence the Being in general—Man, &c. To these names for Man we must refer the Egyptian term for a King—Prince—A Great Man, recorded by Herodotus, Pi Romis, (Помис,) where the Pi is the Egyptian article, and not a part of the word, as Herodotus supposes,—the Coptic and the Gypsey Rome—the English

English cant term Rum-the Eastern Conqueror Ram ---such terms as RAMAS, RAMES, &c.; which, as Mr. Bryant has seen, signify something High and Great, though we must observe, that some words, denoting High, may be directly connected with the High-Raised Rampart; -- the Egyptian term Hennes, Ermes, (Rouge,) The English cant term Rum was originally dej-Eremiah, &c. rived from the Gypsies. Rum is interpreted by Mr. Grose "Fine, "good, valuable," who has collected fifty-two examples of its ap-To this term belong the names for the Liquors called RUM and RUMBO, which will be manifest by observing, among the examples, quoted by Mr. Grose, the adjective Rum as applied to Liquors, as "Rum, Booze, Wine, or any good Liquor-Rum Guttlers, Canary Wine.-Rum Nantz, Good French Brandy.-"Rum Squeeze, Much Wine, or good liquor, given among Fid-"dlers.—Rum Hoppers, A Drawer at a Tavern." Castell, under DYN HRM, the Chaldee word, has produced Hormis, as the name of a Demon-the country Armenia, and the sense of Deus-Dominus; and among the parallel terms we have a Syriac word denoting Equip, Mercurius—Fontis, potens, validus, &c. &c. with various other terms, which will be found, when examined, to come within the sphere of my explanation.

This name of a Demon will remind us of the Persian Aherman "A Demon, spirit, giant, satyr. The principle of Evil, "in opposition to Ormuzd, the principle of Good," Here, however some difficulty presents itself; not indeed, as to the original idea or the ultimate Radical, but as to the mode of conceiving the precise nature of the composition. The first point to decide is, whether the formen part of the word is Aher or Aherm; that is, whether it belongs to the simple form 'R, or to Rim; and the second point is, whether the n be an organical addition to the m, or whether the MN be not significant, under the idea of the MAN; as we must ever bear in mind, that the Persian is a Teutonic Dialect.

Nerh

Dialect. The OR or ORM in Ormund has surely the same meaning of the Potent Being, applied in its good sense. I must first observe, with respect to Ormand, apply that the word preceding it, in Mr. Richardson's Dictionary, is Uhman, Difficulty, Trouble, and likewise "A forest, wood, retreat, or haunt of wild beasts;"? in which latter bense we unequivocally see the original idea of the Wild-Desolate-Desert Spot; and in the former sense it agrees with the Persian term, before produced. Enman, Trouble. Here we have the form 'RM. The same idea however appears under the form Aur, the first letters of the Persian Ormuze of Aurmuzd in the familiar veriti إركان Aurden, To Bring, &ci Move, &c.—Throw, &c., which I have shewn to relate to an action of Force and Violence. The second part Muzd of Ormund seems to belong to on MRD, (Pers.) "A Man, a hero!" The term Murd, which is nothing but the Mort in Mortalis; is known to exist in another word for a Demon, as کیاہوں Div-Mard, " A wild "man, a monster, a sutyr." With respect to Aherman, I must observe, that the Man seems to be significant, and to mean Man, the Being, whether the former part be Aher or Ahorm. In the Persian terms for a Hero, Waherman, a delebrated fabulous Hero of Persia, and Behman, a King, Monarch, &c.—Name of a Demon or Genius, &c. I think we unequivocally see the MAN, the Personage; the Beh is the BA, or BR, denoting Great, in a variety of Languages, July Bar, (Pers.) &c.; and the Kaher belongs to an Arabio word, adopted by the Persians, in the same column of Mr. Richardson's Dictionary, Kehr, Force, Violence-Kenr kirdn, (Pers.) To conquer, &c. Under Caherman is a Persian quotation, which Mr. Richardson translates by "The Caherman " of his times, and the Neriman of his age, (used comparatively as "we do Alexander, Cæsar, &c.;)" where let us note in Neriman, that the Man again appears. The Neri in Neriman belongs to a term in the same column of Mr. Richardson's Dictionary

Nerh oji "Membrum virile cujusvis animantis," or to its parallel term in the preceding column , NER, "Male, masculine-Mem-" brum virile." To this belongs the German Narr, Stultus, to which. Wachter can find no parallel in the Gothic and Saxon The Nar, the Male and the Fool, means the gNar, the Hard substance, as the "gNarled Oak," &c. kNorre, (Germ.) "A kNur, kNurl, gNar," &c. &c. Whatever may be the origin of the Persian Aherman, such I imagine to be that of the German HERMAN, ARMINIUS, &c. &c. In German, as Wachter observes, HERMAN signifies " Aries, vir gregis," which he very naturally derives from Her, Grex, and Man, Mas, quasi Vir gregis. Nothing can be more probable; and yet the preceding word in Wachter's Glossary, is HERM, HARM, Aries; where we have the form 'RM, as in HARM, under the idea of the HARMer, the Router, Butter. Yet in the same column we have HERMAN, Miles, Vir exercitus, which he still very properly, as it seems, refers to HER quatenus Exercitum notat. He seems to doubt, whether Arminius belongs to Herman, or to the Celtic Aer, Prælium, and Man. The Celtic Aer and the German Her, belong, as we have seen, to each other, under the idea of HARROWING, HARRYING. Such are all the facts, belonging to the formation of these words HERMAN, &c., and the Reader must form his own opinion. The g-Ermani mean the Arminii, &c. &c. If we suppose, that the Ger belongs to Ger or Wer, bellum, and Man, we come to the same thing, as we see in w-ER, how we are brought to the form ^R. column of Wachter we have HERMen, "Sich Hermen, Contristari;" which he justly refers to HARM, Luctus; and here the addition of the N arises from the Infinitive termination. We have likewise " Ermelin, Hærmlein, Mus Ponticus. Gallis Ermine ab Armenia " dictus, quod inde ejusmodi murium pelles in Europam advehe-" rentur." This Etymological conjecture depends on an Historical fact, which should be well examined. I am disposed to think,

that ERMINE, (Fr.) &c. means the Mouse, as denoting the Scratcher, &c.; and the French-Etymologists will see, that with this idea it agrees with a word in their Language, under the same, form, Ermine, "Instrument de menuisier pour degrosser "le bois;" where the term actually signifies the Scraper. But what is curious, these terms are directly brought in French to the idea of the Desolated Ground, as Enmes denotes "Terres en "friches;" which Menage derives from EREEMA, (De 70 Epqua.) The Ermine, the Fur, is supposed to be derived from the Mouse, which is probable; yet this depends on Historical evidence. I shall shew, that in general the sense of the Furry substance is derived from the idea of what is Rough, and that this is connected with the Ground in a Rough state. This is the origin of Fur, which, we know, is at once applied to the Stuff, and the Dirt concretion, as the Furred tea-kettle. I shall shew too, that Sable, black, and Sable, the Stuff, belong to Sabulum, for the same reason. Bochart has referred the French word ERMINE, the Instrument, to an Arabic term of a similar meaning; and we shall understand, after the above observations on Eastern terms, how this relation takes place. We cannot but observe, that the name of the Great nation, the Romans,—Romani, belongs to our Element RM; and Romani is the name, by which the Gipseys distinguish their own Tribe. This is certainly a very curious. coincidence; and I must leave the Reader to his own reflexions. respecting the cause of its existence, on which I have ventured to offer a suggestion on a former occasion, (p. 320.) We shall find, as we proceed forward in our Researches, that the secret History of mankind is deposited in the Elements of Language.

To carrie

.

Words relating to the Ground, and to the action of Stirring is up, as by the Instruments of Husbandry—the HARRow, Sc. &c. Terms, which are connected with these words. and which express actions of Violence - Commotion - Agitation, as signifying To Pluck -Tear-Sweep up-off, away, &c. &c.

ARv-um. (Lat.) The Ager AR-atus, or EAR'd Land. ORva, URva. (Teut.) Glebas vomere Aratri proscindere, dentatis Rastris vertere et minuere.

IRP-ex, URP-ex, &c. (Lat.) A Rake, or Harrow.

ARP, URF, &c. (Teut) Any Rustic Instrument or apparatus.

ARMa. (Lat.) Any Tool, Instrument.

To Throw, cast up, as the Ground, in Mould=w-ARP.

> wh-ARr &c. (Eng. &c.) The Thrown up Ground.

wher, &c. (Eng.) To Throw, Cast over, or about.

HARVEST, REAP, &c. (Eng. &c.) ARPE-ARrage. (Gr.) A Reaping-Hook, and an Instrument for Raking the Ground.

ARPazo,

Rapio. (Gr. Lat.) To Sweep off, away.

Rob, Rapine, Ravish,

RAvage,

Ravenous,

RAVE, RIP.

Rive, &c. &c. (Eng. &c. &c.)

RIFF=RAFF,

Rubbish, &c.

RBL.

RABBLE, RAFFLE, RUPPLE, RUM-PLE, RIFFLE.

&c. &c. &c.

It is impossible, I think, not to grant, with the Lexicographers and Etymologists, that ARvum, "Properly Land Ploughed, but "unsown, but in general any Field, Ground or Land," belongs to Here we at once see, how the form 'RB, Rv, &c. is connected with the simple form 'R. Vossius likewise reminds us of the Greek Aros, (Apos,) for which the Æolians said ARBos. (AgGos.) An adjacent word to this in our Latin Vocabularies, is ARvi=pendium -ARBi=pendium, or ARa=pennis, A Measure of Land; to which have been justly referred the terms in modern Languages, as AR=pent, (Fr.) AER=pant, (Belg.)&c. The former part of these words belongs to ERa, (Epa,) ARvum, EARth, &c.; and the Pant, Pen, signifies, as the Etymologists say, 'Ambitum,' where it agrees with various names, denoting an Enclosure, Boundary, &c., as Pen, (Eng.) Penes, Penus, (Lat.) the Store-House; Finis, (Lat.) &c. Another adjacent word to ARvum is ARvina, or ARBina, which means "Pingue durum quod est inter "cutem et viscus;" and here the Etymologists inform us, that ARBina is a Sicilian word for the Flesh, (Αρδινα, κρεας, Σικελος,) though some propose a different idea. These terms seem to mean only the Rising-up, Swelling-out Extremity, like the ARvum —the Ridges of a Ploughed Field. We have seen, that Ruck, the back, means the Ridge. We have seen likewise, that in Armoric ERo, ERvv, ERven, means "A Ridge, or (high) Furrow;" where we again perceive, how the forms 'R, Rv, pass into each other. Wachter, under ERBe, placed in different articles, signifying Hæres, Hæreditas, "Possessio viventis, mobilis et immobilis," has produced various terms, as ORre, Pecus, Pecunja; YRr, YRre, "Pecus, bona, res, universa suppellex rustica, et prædiorum dos;" EReve, Hæreditas; and ORva, or URva, "Glebas vomere aratri " proscindere, dentatis Rastris vertere, et minuere;" where we see the original idea. It should seem, as if these words, denoting

the Heir, Property, the Instruments of Husbandry, belonged directly to the idea of the Field or ARvum; and thus perhaps we should imagine, that Heir, Hæres, &c. did not belong immediately to the same series of terms, as ERBE. Yet this distinction is minute, as we have seen, that Hæres itself is derived from the action of Stirring up the Ground, whatever may be the precise idea by which it is connected with that action. When the writer has performed his duty by producing all the facts, relating to the matter; the Reader must be contented to take his share in deciding on the question. In the German term Arbeit, Labor, and its parallels Erfide, &c., we are again brought to the Ground; and Wachter has justly reminded us, under this word, of the various forms Ar, Terra; Erw, (Celt.) Jugerum; Erwen, Terram vertere; Urfa, Orva, &c. &c.

While I am examining these words, in Wachter, I cast my eyes on ARF, "Telum missile," &c., which he has justly compared with the Celtic Arf, the Saxon Arwe, Erwe, Sagitta; the English Arrow, &c.; which, as he says, some derive from Werfen, Jaculari, and others from YRA, Vibrare, and which has found its way into proper names; as Arbogastes, teli potens, &c., and Arabo, " fluvius, in Danubium sese effundens, nunc Rabe," &c. He does not appear to understand, that ARF, in this sense, belongs to the succeeding word Arr, "Instrumentum Rusticum," which he has properly referred to URF, Universa supellex rustica; ORVA, Arare. The original idea, we see, is that of a Rustic Instrument for Ploughing the Ground; and hence any weapon in general. In the Latin IRP-ex, URP-ex, HURP-ex, "A Rake with Iron teeth to pull " up Herbs by the Roots, a HARRow," as R. Ainsworth explains it, we are brought to the very spot, supposed in my hypothesis. We now perceive, if Arrow be directly connected with these words, and is, quasi Arrov, or Arror, that it is ultimately attached tached to the Arvum, remote as it may seem from this idea. It is impossible now not to see, that Arma, Arms, &c., are only different forms of Arf, Urf, and that they are attached to Armentum, Cattle, which the Etymologists understand to belong to Aro. R. Ainsworth explains Arma, in one sense, by "All "manner of Tools for all arts, mysteries, occupations, and diver- sions;" and he produces two familiar passages, where we are brought to the genuine idea of Rustic Instruments, "Dicendum et quæ sint duris Agrestibus Arma.—Cerealia Arma." It is not necessary to multiply quotations on so familiar an application of the term. The Armus, the Arm of a Man, is the effective Instrument, with which he performs actions. I shall shew, that Tool, Telum, belong to Till, and oPLon, (Onlow,) To Polee, (Πολεω, Aro,) To Plough, for the same reason.

In the Dialects of the Celtic I find for ARMa, in Lhuyd, the Welsh ARVE, the Irish ARM, and the Armoric ARMel. The forms, under which the term ARVE appears in the Welsh Dictionaries, are ARF, "A Weapon, Tool;" EIRF, YRF; and we find likewise Armeth, A Preparing, preparation, provision; and Anmerth, To Knead dough, &c.; where we come to the more original idea of Preparing plastic materials, as in the Cultivation of Land. In Armoric, the term Armoniou, means Arms; and Armel, An Ambry, cup-board; where let us note the term AMBRY or AMBER, &c., which the Etymologists have justly referred to Armarium; (Lat.) Aumoire, Armoire, (Fr.) &c. the Repository for ARMS of every sort, Instruments, Vessels, &c. In the Greek ARMA, (Αρμα, Currus Vehiculum, et Αρμα, Onus, τα αρματα, Arma,) we have the Rustic Instrument of the Cart, &c.; and in Armalia. (Aqualia, Cibus, Alimentum demensum,) we have the Prepared Provision, as contained in the Repository of the ARMEL. Thus we see, what we should naturally expect, à priori, to find, that the terms for Instruments-Tools, &c., by which things are effected,

Made—Prepared, belong to that important action of Cultivating or Preparing the Land, to which they were originally more particularly applied.

The term w-ARP must be referred to the Element ARP, and its true idea is that of Stirring-Throwing-Turning or Casting up—about, &c. It was originally applied, as I imagine, to the action of Throwing up the Ground, ARVum, &c., as in ORVa, URVa, Vertere Terram. Its genuine sense appears in the term WARP, as applied to the Mole, or the Mould=WARP. The word Mole belongs to Mould, for a similar reason. Junius, and his Commentator, Lye, have placed WARP in five different articles, under the senses of "Conjicere"—"Ovum parere, excludere" for "WRAP"—" Incurvescere"—" WARP in cloth, Stamen;" which latter word Junius has justly referred to the parallel terms, signifying "To Throw," in various Languages, as Weorpan, (Sax.) Werfen, (Germ.) Wairpan, (Goth.) Jacere, conjicere. The Etymologists, however, seem to understand, that in all these senses, except in that of WRAP, the term contains the same fundamental idea. In the sense of the 'WARP'd Pannel' we see that of an uneven surface, when it is Thrown up in Ridges—Protuberances, In German, WERFen, 'To Throw, cast or fling a thing,' &c. means, in one sense, the same as the English WARP, applied to Wood, as "Die Schwelle hat sich ein wenig geworfen, The "threshold has Cast or WARPD a little," as my Lexicographer explains it*.

Wachter

^{*} We shall now understand the beauty of a celebrated passage in Shakspeare; who has applied WARP to that state of a Surface, as water, when it is Stirred up or Forced from its naturally smooth condition by the action of a violent agent, as a Freezing Wind or Frost in general, to which, under all its operations, we have ever annexed the idea of Corrugating or Shrivelling up a Surface.

Wachter has derived Weorf, Warf, circulus, from the Latin Orbis, which he refers to Urbus, Curvus, and Urbare, Circulum describere. These words certainly all belong to the terms w-Erfen, w-Erben, Vertere; Orva, Urva, Vertere Terram. We shall now understand most fully, how Orbo, Orbus, are attached to Orbis, under the idea of Stirring up—Routing or Turning up or over, so as to make Desolate, according to my conjecture in another place, just as Verto signifies "To Turn," and "To over-"throw, to Cast down, to Turn upside down," as R. Ainsworth explains it. We shall now at once agree, that Urbs belongs to these words Orbis, &c., and that it means the Circumference or the Surrounding Boundaries of a City. We are here again brought to the Ground; as the Etymologists acknowledge, that Urbs belongs to Urbum or Urvum, "Aratri Curvatura, pars Aratri,

" quo

(As You Like it.)

We must observe, on all these occasions, that the mind does not confine itself to a single idea, or to one mode of operation existing in a certain action; but it embraces at once, and without deliberation, the various modes, under which that action familiarly operates. The Bitter or Freezing Sky is sometimes accompanied by the Freezing Wind, during the action of which we see the smooth surface of the Water WARP'D-Agitated or Stirred up in Wrinkles or Corrugations; and again the Bitter Sky, with or without Wind, Stirs up or together-Turns-Draws up or together, or Contracts the same smooth surface into a clodified state, if I may so say; which Clodified state we have ever been accustomed to connect with the action of Throwing up or together the Clods or Dirt of the Earth, in Heaps-Ridges-Rucks, &c. If the Poet had used the word Corrugated instead of WARP'D it would have expressed every idea, which we annex to the action of Frost upon the Water; and we know, that Corrugated is derived from the action of Throwing up a surface in Rucks and Ridges. In short, however we may reason on the peculiar application of WARP, in this passage, we must refer the idea to its familiar, and, as I imagine, original sense, when it is applied in the combination Mould-WARP, to the action of WARPing up the Mould in Heaps, or into a Mass, &c.

[&]quot; Freeze, Freeze, thou bitter sky,

[&]quot;Thou dost not bite so nigh,
"As benefits forgot:

[&]quot;Though thou the Waters WARP,

[&]quot;Thy sting is not so sharp,

[&]quot; As friend remember'd not.

"quo muri designabantur." We cannot but note, how c-Urvus seems to connect itself with these words, either by the vowel breathing passing into the harder sound C, or by the Teutonic addition of the Ge, ge-Worr. We shall find many words under the form CRV, &c., which seem to bear the same relation, but we cannot well decide on these points till the Element CR, CRB, shall be fully unfolded. In the Greek RAIBOS, RAIBOO, (Paulog, Incurvus, Paulow, Incurvo,) the breathing before the R does not appear, but in the old English word Wrabbed it is visible. An ancient comic writer, speaking of women, says,

- "Be theyr condicions so croked and crabbed,
- "Frowardly fashionde, so wayward and Whabbed.

(Old Plays, Vol. i. p. 9.)

Mr. Steevens observes on this passage, that Wrabbed is "a word "coined for the sake of the rhime." Let us mark the explanatory term c-Rabbed, which should likewise seem to belong to these words. Wachter, under Wrf, Circulus, reminds us of the English Wharf, and its parallels Hweorfa, (Sax.) Crepido, littoris, Ripa; Werf, (Belg.) &c. We see, how the Wharf relates to the Raised-up Spot by the water side, because it means the Warf'd or Thrown-up Earth, in making the Furrow—Channel—Hollow, in which water is made to pass. Skinner has rightly explained Wharf by "Agger factitius in flumine prominens;" and has referred it, as Junius has done, to the German Werfen, Jacere, &c., though they have forgotten the kindred term in English Warf. Here again we cannot but note, how c-^Repido agrees in sense with Wharf; and let us note a similar apparent relation of c-Aryb-dis to Hw-Eorf-Pole.

WERF, WARF, mean, in German, "Circulus, circuitus," what Turns round, or Surrounds; which Wachter has not referred to Werfen, but to Werben, Vertere. We shall now understand, that

that these verbs are only different forms of each other. This sense of Werben, Vertere, is the original idea; and yet nothing, on the first view, can appear more remote from the primitive notion than the various significations of WERBen, which means "To traffick, "trade, &c.-To woo or court a lady-To levy or raise soldiers," The sense of Commerce is derived from the idea of Change or Turning things about, so as to pass into different In the sense of Courting we still see the idea of Turning or Going round or about, as the Latins use, says Wachter, Ambire. (Ambire amorem puellæ,) i.e. Circumire for Circumeundo petere. The sense relating to Soldiers, as connected with the original idea of Stirring-Turning or Raising up, is manifest from the explanatory words Levy and Raise, which both belong to the notion of Stirring up. Under WERBen, Verti, in gyrum moveri, Wachter produces HWEORF-Pole, Carybdis, which we call WHIRL-Pool & where we see, how the 'R imparts its sense to these words, and that the r and L are merely organical additions, as likewise WIRBEL, Vertex, where the l is again an organical addition to the We have the simpler form of these words, signifying "To "Turn up-round-about-aside," &c., in Wrie, Virer, &c.: and thus we see, how in all the various forms, the AR may be considered, as imparting and preserving the original force and spirit of the Element, as w-Rie, viRer, &c. veRto, wReath, &c. weRBen, we Rren, &c. All this is perfectly visible, without any confusion or embarrassment; and we all acknowledge the relation, which these words ultimately bear to each other, and we sufficiently perceive the different degrees of affinity, by which the various members in this common family have been thus related. The succeeding word, in Junius, to WHARF, is "WHARF first, second, third, Vices " primæ, secundæ, tertiæ. V. Turn;" where, under Turn, he refers us justly to the Teutonic Unarben, Vertere, though he does

not see any relation between Wharf, Vices, and Wharf, Moles, the *Turned* up or Cast up Ground.

The Latin RIPA, we shall now see, means the whaRr or Castout Soil or Mound, from the Channel or Hollow. Some explain RIPÆ by "Pinnacula terræ juxta fluvium," where we see the idea of the whaRr more fully. RIPA has been referred to Rivus; and we shall now see, that Rivus, the River, is the Excavated Channel, of which RIPA is the Mound or Bank. From Rivus is supposed to be derived Rivalis, the Rival, the contending Partner in the Water-Course, that necessary object in the cultivation of Dry Lands, where Rivus appears in its more humble and original In Euripos, (Eugenos, Euripus, Fretum reciprocum, quale est inter insulam Eubæam et Atticam; Fretum quodvis:—Stagnum seu fossa, aquâ plena in hortis,) we see the Rivus with a breathing before the 'Rv, and it is brought to its primitive idea, when it means the Channel in a garden. I shall shew, that the explanatory term Fretum, under the Element FRT, belongs, for the same reason, to the English Fret, &c. 'To Scratch out Hol-'lows,' &c.—"Fret Channels in her cheeks," &c. We shall now see, that the Ribs, with its parallels Ribble, (Sax. and Belg.) Rippe, (Germ.) &c. &c. mean nothing but the RIPE, or Bounds, including the Hollow of the Abdomen. In Shakspeare, the Ribs and the RIPE are united, when he describes our Island,

"As Neptune's park, RIBBED and paled in
"With rocks unscaleable." (Cymbel. A. III. S. 1.)

The terms belong to Rivus, appear, we know, in various Languages, Riviere, &c. (Fr.) &c.; and in the Spanish Rio we have the simpler form, which brings us to Reo, (Pea.) The term Arrive, and sometimes Rive, are acknowledged to belong to Ripa; and in old English we have Rivage, ("O', do but think you stand upon the Rivage." Hen. V. A. III. S. 1.) which is immediately derived

derived from the French word under the same form. Let us mark the term, adopted in the latter sentence, de-RIVE, so familiar and important in these discussions; which term, we know, belongs to the race of words before us; and which may shew us, by another striking example, to what remote purposes the actions performed on the Ground may be applied. It is curious too, that we are brought back in this word to the more original sense of the Channel of Water-" deRivatus, deRived, drawn down in Channels." I cannot omit observing in this place, that a word under the same form, as Rib, which I supposed to be ultimately taken from the idea of the Earth Thrown up, so as to form Mounds, actually signifies in Scotch the Ridge formed by ploughing up the Land, "To RIB, "To Rib Land, to give it half plowing. S. Belg. ge-Rib, "Ridged." To the above words, denoting a Channel, we must refer, I imagine, the English term RABBet, and the Belgic Robbe, Robbeken; just as the Latin Cuniculus, the Coney, means the Hole, the Channel, and the Animal. - This idea will make it agree with the verb To RABBet; which, among Carpenters, means, says N. Bailey, "To Channel boards;" and in RABBetting the Shipwright term, "The letting-in the planks into the keel," we have a similar idea of close union by a Hellow. The Etymologists derive RABBet from the Hebrew term RBA, To Increase; which I consider on a future occasion.

We have seen in Gawin Douglas, that Warp is used for WRAP; and we shall now understand, that they are only different forms of each other. Skinner smiles at Minshew for deriving WRAP from the Belgic Werp, Stamen, or the German Raffen, though he himself derives it from the Saxon Hweorfian, Vertere, which belongs to Werp, Warp, &c. In the German Raffen, Corripere, or, as my Lexicographer explains it, "To Sweep, take or "Rake together," we see the genuine idea in its stronger sense; and we cannot help noting, how the explanatory word cor-Ripere,

RAPio, &c. belongs to it. Junius, under WRAP, refers to the Danish Wreffler sammen, implicare. To this idea of Wrapping round must be referred the terms for Garments-Substances used for Tying, &c., as Robe, and its parallels, produced by the Etymologists, Robbe, (Fr.) Robbe, Ropa, (Ital. Span.) Reaf, (Sax. and old Eng.) Vestis; Riband, (Eng.) Ruban, (Fr.) &c., which is not derived from Re and Bind.—RIFT, (apud Jun.) Velum, Velamen; RIF, (Belg.) Involucrum, &c. &c. Rope, (Eng.) with its parallels in various Languages, as Raips, (Goth.) Rap, (Sax.) Reeb, (Dan.) Rhaff. (Celt.) &c. &c. The succeeding word to Rope, in Junius, is Ropes, or Rappes, Exta, Intestina,; which mean substances of a Rops-like or String-like nature. In Belgic, Rop=Sack, or ROMP-Sack, means Venter, that is, the Sack or Bag for the ROPES or Intestines. No term can be imagined more appropriate to the Circumvolutions of the Intestines, than one, which belongs to the idea of Wrapping round and round. In Galic, Roradh is "A Rope; "Ropan, A little Rope; ROBA, A Robe; Roppan, To entangle, "Ravel; RUIBIN, A Riband;" where the forms Ruibin and Ropan will shew us, that Riband and Ruban have nothing to do with Bind or Band, though the form Band was probably adopted on this conception. Let us mark the term Ravel, another of these In the combination Ropey-Matter we see the idea annexed to Rope, brought back to its original Spot. Lye explains RAPE, in one of its senses, by "Comitatûs portio, cujusmodi sunt "sex portiones in agro Sussex." Somner derives this from RAP, Funis; but Lye refers it to the Islandic REPP, "Districtum vel "Tractum Terræ notat;" where we are brought to the Spot, supposed in my hypothesis; and we see in the explanatory words Districtus and Tractus, which refer in some of their senses to an action of Violence in Tearing up a surface, how RAPE, in this signification, coincides with Rape, belonging to Rapio.

In old English, Ropery and Rope-Tricks occur, as in Shakspeare,

speare, &c. "What saucy merchant was this, that was so full of "his ROPERY?" (Rom and Jul.)—"An he begin once, he will "rail in his Rope-Tricks." (Taming of the Shrew, A. I. S. 2:) Mr. Malone observes, that these terms "originally signified abusive " language, without any determinate idea; such language as " parrots are taught to speak;" and he produces the combination "Rope-Ripe chiding, and Rope-Ripe terms." Mr. Steevens conceives, that Ropery is used for Roguery, and that Rope Tricks means "Tricks, of which the contriver may deserve the Rope." This is plausible; and it might seem, that the combination Rope=Ripe confirmed this idea, and meant Tricks Ripe for the Rope. writers might perhaps so conceive it; yet this, I imagine, is not the original idea. Rope belongs probably to the terms for Crying out, which appear under our Element in the Teutonic Dialects, as the German Rufen, "To cry or clamour," the Belgic Roopen, the Swedish Ropa, the Saxon Rof, Hrop, Hropen, Clamare, &c. produced by Wachter. These terms for Noise are connected with the idea of Agitation in Routing up a Surface. In the English congenial terms Roar and Rear the simple form 'R is doubled; and in Up-Rore we cannot distinguish between the action of Routing up a surface and Noise. In Rip and Roar we see the same combination; and the Roep in Roepen, &c. had precisely, I imagine, the idea conveyed by Rip. In German, Roppen or Ruppen, means " Evellere, Falcare segetem;" where again we have the true idea, which brings us to the English Reap, &c. Perhaps Rope Ripe is the same as RIP and Roar in an inverted order. In a Dutch translation of Virgil now before me, the "Undique usque adeo "Turbatur agris" of this Poet is expressed by "Naerdien al het " lant dus in Rep en Roer is," 'All the land is thus in RIP and ' Roar.' Wachter cannot help granting, that RUFF, Fama, &c. has something to do with Rumor and Rumpo; where we see the same idea of Noise connected with Breaking up a surface. In the

same opening of Wachter's Dictionary I see Rum, clamor; Rumen, Laudare; Rump, "Truncus, et quicquid mutilo simile. Belgis "Romp. Utrumque a Rumpo, qua truncus est pars à toto avulsa. Suecis Rompa est cauda;" where we are brought to the English Rump, which belongs, we see, to the Trunk or Stock, the part Broken off, or to be Broken, Rooted or Routed up;—Rumppen, "Corrugare frontem, crispare os vel nasum;" where in Corrugare we have the true idea of Routing up a surface into Ridges, Ruga, with words of a similar kind, produced on another occasion.

Under the form RM we have terms, which signify 'What 'infolds, confines, ties,' &c. The Rim, Margo, Crepido, &c. seems to belong to this idea, as Lye has referred it to the Saxon Rima, Rimsa, (Swed.) Reim, (Isl.) Ligula, instita, fimbria. The RIM might have been attached to the RIMA, the Bounding or Confining Hollow. The REEM of Paper seems to relate to 'The Packet of Paper, Wrapped up-about or together, just as Volumen belongs to Volvo. The term appears in the French Rame, and the Italian and Spanish Risma, Resma, and has been compared by the Etymologists with these terms for 'Ligamentum,' as Ream, (Sax.) Riem, (Belg.) Lorum; the Welsh Rhwym, Ligula, &c.; who have remarked likewise, that the Latin Remus means Lorum, that such is the sense of the Greek Ruma, (Pupa, Fluentum,—Tractus, Funis ad Remulcum trahendum); and that from The Greek Ruma, (Pupa,) is taken hence Remulcum is derived. from the idea expressed by Tractus, which relates to the action of Dragging upon a surface. Under the same form as REAM, relating to Paper, we have REAM, bearing the same sense as c-REAM, where we see, that as the one relates to the idea of the Swellingobject, as of that, which is Rolled—Turned or Stirred up—about round, &c., so the other relates likewise to the thick Roll-form, as it were, the Conglomerated substance—Swelling or Rising up on the surface. We see, that the simpler form of c-REAM and its parallels

parallels Cresme, Creme, (Fr.) Cresima, Crema, (Ital.) &c., appears in the term Rame, the Belgic Room, the Saxon Ream, &c. &c.; and here, as it should seem, we unequivocally see the form c-RM connected with RM. These terms however have some difficulty. The Cremor of the Latins, "The thick juice of Barley, panada water, gruel of Frumenty," we should at once conceive to be attached to these words; yet we should likewise imagine, that this term belonged, as the Etymologists suppose, to the Greek Krimnon, (Koupoor, Farina crassior, Hordeum,) which we naturally refer, as they do, to Kri, (Ko, Hordeum.)

Terms of Agitation—Commotion—Violence, &c. under the form ^R, R\v.

I shall now more particularly consider that Race of words, which express actions of Agitation—Commotion—Violence, &c. in various degrees, and in various manners, as commonly signifying 'To • Rout—Pluck—Tear—Sweep up, off, away, &c., which are inseparably connected with the Terms, already produced, relating to the Ground, and to the action of Routing or Stirring it up, by the Instruments of Agriculture, as ARvum, ORva, URva, "Glebas " vomere Aratri proscindere, dentatis Rastris Vertere, et minuere," -IRPex, URPex, HuRpex, &c. "A Rake with Iron teeth, to pull "up Herbs by the Roots, a Harrow," as R. Ainsworth explains the word under the first of these forms. We cannot but note the term HERB or HERBA, used in this explanation; from whence we should be inclined to think, that the HERB meant the object, which was to be Raked or Routed up, just as Root belongs to the verb • To Root or Rout up.' If this should be the case, the original sense of the word will appear in the verb exHERBO, "To pluck

"up Herbs or weeds." I have already produced various Terms, relating to a similar idea of Routing up—out, &c, so as 'To Deso'late—lay waste,' &c., under the form 'R}M, B, &c., which are derived from the same source, and which I have assigned to a separate place, only because, in certain cases, they appear to bear a turn of meaning somewhat different, and because from the variety of the Terms to be examined, it was necessary to adopt some species of Division.

The Etymologists acknowledge the connection of IRPER with ARPAZO, ARPE, ARPAZ, ARPAGE, (Αρπαζω, Rapio, Αρπη, Falk, Avis quædam, Harpe, è genere aquilarum, Αρπαγη, Harpago, Irpex.) We cannot but perceive, how one of the words ARPE, (Αρπη, Falk,) actually relates to an instrument employed for removing objects from the ARVum; and the Etymologists have produced a passage, in which ARPage, (Αρπαγη,) relates to an Instrument, Raking over the Ground.

Σαιρείν σιδηρη τηδε μ' ΑΡΠΑΓΗ δομούς.

The Etymologists produce likewise the term Sirpices, or s-Invices, Harrows, which belongs to the IRPIOES, just as s-Enro does to ERPO, (Eomw.) The next word to Inpex, in Martinius, is Inpini, which the Samnites call IRPi, as denoting Welves; which words he has only referred to each other through the medium of April. The HARPY, the Bird, &c. is the Seizing animal; and we may mark, how under another Element, the Falcon belongs to such words as Falk, for the same reason. The Harp, the Instrument, with its parallels Haerper (Sax.) &c. is not derived from Apralle, or April, because it Ravishes the Soul, or is Crooked like the Falz, as the Etymologists imagine; but because the Strings are sometimes Snatched up or Swept with a quick-violent motion. HARPSIcord is acknowledged to belong to the HARP. may perhaps mean the HARPer. The HARPing Iron, HARPoons, are duly referred by some Etymologists to HARPago. The Sea term

term Harrings is "the breadth of a Ship at the bow, or the "ends of the timbers called Bends," says N. Bailey, belongs to the Radical idea probably in the explanatory term Bends, the parts, which Hook in—Grasp, Confine. In Greek, Arris, (Apris, Crepida, aut calcei genus,) means a species of Shoe; that is, the Grasper of the feet; though the Lexicographers derive it from Panisw, Suo.

All the Etymologists acknowledge, that the terms Arrazo ARPE, &c. (Apraza, Aprin, &c.) connect themselves with Rapio; and thus we see, how the forms 'RP, RP pass into each other. It is impossible, moreover, not to perceive, that HARVest and REAP belong likewise to each other by a similar process, and that they both relate to the action of Clearing the surface of the Anvum. The forms Harvest and Reap bear the same relation as the substantive, the Crop, does to the verb 'To Crop,' under the Element CRP. The term HARVEST, with its parallels Harfest, (Sax.) Herbst, (Germ.) &c. has been derived from Herthæ Festum, or from Ar, "Annona sive annuus terræ proventus;" and Fest from Fon, Capere. We here see, that the simpler form AR is likewise brought to its true sense, as denoting the produce of the Era, (Ερα,) or Ground. The genuine idea of Herbst appears in the verb Herbsten, Vindemiare. In German, Herb signifies "Harsh, rough, sharp, acerb, Eager," &c. &c., as my Lexicographer explains it, which belongs to the metaphor of Scratching up a surface; and thus we see, how it is attached to the HERB in I have shewn, that HARSH is to be referred to the form ARS, to the Hense, the Haryow, for the same reason. German Here is not derived, I imagine, from the Latin Acerbus. as Wachter conceives; who calls it Vor nove. Yet if that should be the fact, still ERB in the Latin Ac-ERBus belongs to the same idea, and must be referred to Anyun. The term REAP occurs in a variety of Languages, Ripan, Hriopan, (Sax.) Raupjan, (Goth.) &c. &c.,

&c. &c., which some derive from Drepo, (Δρεπω,) and which others understand to be connected with RAPio. Whether d-REPO, (Δρεπω,) belongs to these words must be considered on a future Some produce with these words the term, in Hesychius and Suidas, Robden, (Polony, δαψιλως, η ταχυτητι, η μετ'ηχου σφοδρου,) where we have a term of Agitation and Commotion. The succeeding word to the Saxon Ripan, To Reap, is Ripe, Ripe, Maturus, which may belong to each other, as Skinner imagines. Perhaps RIFE, Largus, copiosus, abundans, &c. may refer to the idea of the Abundant Crop or Rip, (Sax.) "Messis, Micel Rif, multa messis." The Etymologists compare RIFE with the Saxon Ryfe, the Belgic Riife, the Welsh Rhef, Crassus, magnus; which the Celtic scholars must consider. Junius suggests, that the Welsh Rhy, Rhwy, Rhwyf, nimium, belong to each other; and I have shewn, that RHY is attached to the Intensive particles, under the Elementary form 'R'. The term RIFE might however be referred to the idea of the RIFF-RAFF Stuff-the Common Stuff, of which there is RIFE is often applied to objects of Commotion, as in abundance. Milton:

Mr. Warton has produced two passages, in which the term is referred to a Report, "So Rife—a Fame," &c., as in our ordinary phrases, 'The Report—the Story was Rife,' which bring us to the senses of the German Ruff, fama, &c., before produced. Ripe might directly belong to Rife, 'What is common.' The very word Tumult, Tumultus, belongs to Tumulus; and such, I imagine, is the relation of Rife to the terms under the form Rf, &c., signifying Dirt. I shall shew in a future page, that the Hebrew RBH, "To be, or become many or great, to increase, multiply, magnify," belongs to the Heap of Dirt for a similar reason.

[&]quot;Whence even now the Tumult of loud mirth

[&]quot; Was RIFE."

Among the terms, which are connected with Rapio, Rapina, &c. &c., signifying To Rout up-about-off, &c. To Seize-Tear, &c. &c., and expressing actions of Violence-Commotion, &c. are the following; as Ros, (Eng.) with its parallels Reapian, (Sax.) Robber, (Fr.) Rauben, (Germ.) &c. &c. RAPE, RAPine, RAVine, RAVE, RAVage, RAVish, RAVenous, RAVen, &c., with their various parallels, produced by the Etymologists, Ravir, Ravineux, (Fr.) Raperies, (Lye in Jun.) Latrones; be-Reave, (English,) be=RAUBen, (Germ.) &c. Perhaps the Latin p-Rivo, To de p=Rive, is directly taken from the Teutonic be=RBAVe, &c. Privus, Particular, single, &c.; Private means that, which is Privatum, Deprived of attendant objects, so as to be Single, &c. R. Ainsworth explains Privo by "To take away, Deprive, Bereave."-di-Ribeo, To Separate, a similar composition to di-Ripio, To tear asunder, with less idea of Violence; though as applied to the action of Separating a Turbulent Mob, we see the full force of the Element. -Rove, "Huc illuc Vagari et discursari, præsertim Prædandi causa, "à Dan. Roffver, Prædari," &c., as Skinner observes; who refers us at last to Rob. It is impossible not to see, how ROAM belongs to Rove.—Robur, Robustus, &c. (Lat.) Robust, &c.—Ruff, Ruffian; where in the former we see the idea of the Corrugated surface; and in the latter we have the metaphorical application, relating to the action of Violence.—RAVE up, (Eng.) "vox in " agro Linc. usitatissima pro Explorare, immissa manu Explo-" rare," says Skinner; which he has justly referred to the German RAFFen, "To Sweep, take, or Rake together;" and he might have added, that such is the precise relation of Scrutor to Scruta.— RAPidus, (Lat.) RAPid, (Eng.) &c. RABies, RABidus, RAvio, (Lat.) To RAVE; RAVUS, (Lat.) "Hoarse;" i.e. the Harsh Noise, just as Hoarse and Harsh belong to the Herse, (Fr.) the Harrow, &c.-Rub, (Eng.) with its parallels Reiben, (Germ.) To grate a thing; Wriiven, (Belg.) Atterere, &c.; where we actually see the action

of Scratching upon a surface.—RIP, (Eng.) Hrypan, (Sax.) &c. RIVE, (Eng.) which the Etymologists have justly referred to Reafian, Rapere, RIFT, (Eng.) Rima; RIFT, "vox agro Linc. "usitatissima pro Ructare," says Skinner; which he has properly referred to Resp, where we see at once the addition of the f and s to the Elementary R. I have shewn, that such words as RUCTO, &c. belong to the metaphor of Stirring or Breaking up a surface, with the idea of Noise, attached to that action. next word, in Lye, to RIFTE, Rima, is RIFTE, Velum; RIF, (Belg.) Involucrum; which means, what is Stirred or Turned up-about, over, &c. We cannot but see, how RIVE brings us to RIMA; and among the parallel terms to RIVE, as Riffue, (Dan.) &c. we have the Belgic RIIVE, "Rastrum, instrumentum Rusticum, quod "glebas Radendo comminuit;" where we have the true idea.-Rivet, (Eng.) River, (Fr.) What is Rived or Driven in with Violence, though for a different purpose.—RAP, (Eng.) which signifies a Blow, where we have the gentler sense; but in the phrase "RAP and Rend," we see the most violent sense, as in RAPIO. My German Lexicographer explains "RIPS, RAPS, (in meinem " sack,) What I can RAP and Rend, catch and snatch, I'll put "into my pocket." In the phrase "To RAP out an oath," we see, how the idea of violence or vehemence, is connected with that of Stirring up—out, &c., where we have the original idea. This term for a Blow will bring us to the Greek RAPizo, RAPis, RABdizo, RABdos, (Paniζω, Virga cædo, Paniς, Virga, Paldiζω, Virgis cædo, Paccos, Virga,) Roptron, Ropalon, (Ροπτρον, Ροπαλον, Clava.) The term Rapis, (Panis,) not only signifies the Rapper or Striker, but it means likewise RAPhis, (Papis, Acus, Subula,) the Striker of another kind, the Sharp Instrument, the Needle, &c. the Piercer; and hence we have RAPto, (Paπτω, Suo, Consuo.) While I am examining these words I perceive a kindred term RIPto, (PITTO). Jacio, dejicio, projicio, &c.) in which, and in its derivatives RIPE, RIPIZO,

Ripizo, (Piπη, Impetus Venti, Piπίζω, Ventilo, flabello ventulum factito,) we see the strongest idea of Agitation. The term RIPS, (Pol, Poros, Ramus salignus, vimen flexile,) likewise signifies a flexible withy, from its property of Whipping or Lashing; and in Ripis, (Pinis, Flabellum, Vas ex vimine contextum,) we have at once the idea of Excitement, and the Flexible Twig. Casaubon observes, "Proprie Pimes sunt vimiua et οι της οισυας λυγοι," (Not. ad Athen. Lib. II. c. 19.) It is curious, that Wachter should not have produced this word, as a kindred term to the German Rebe, "Palmes, surculus vitis, et vitis ipsa," though he has not omitted to note Pacoc. The succeeding word, in Wachter, is Reb=Hun, Perdix, which some derive from Rebe, the Grape, and Wachter from Ryp, (Ang. Sax.) Seges. Perhaps the Rebe belongs to the general sense of the Element Rob, Rapio, &c., as denoting the destructive bird. While I am examining these words in Wachter I cast my eyes on RAUPE, Eruca, which some derive from Rauben, Rapere, and others from Repo. Under the idea of the Striker or the Piercer we must class the English RAPier and its parallels, produced by the Etymologists, Rapier, (Fr.) Rapiir, sometimes Rampier, (Belg.) the Greek Romphe or Romphaia, (Poμφη, Ρομφαια, Gladius,) to which might have been added Roipeir, (Gal.) A tuck, Rapier; ROPAIRE, (Gal.) "A Rapier, treacherous, violent person." To these Galic words we may add other kindred terms, in that Language, corresponding with Rapio, &c., as Reabam, Reubam, "To "tear, rend; Robuin, Robbery; Roboidam, To Riot, Revel." Adjacent to these words I find, in Mr. Shaw's Dictionary, Robнar, A Sieve; RIOBHAT, A Sieve, Honeycomb, and Riobhlach, A Rival. Sieve is generally taken from the idea of Stirring Agitation, as of about the Dirt, for the purpose of separating one part from another, as I have shewn under the form RD, in Rid, Riddle. Let us here note RIOBLach, which, we see, belongs to the idea of Rioting, or REVELLing; and I must leave the Reader to consider, whether

whether the Latin RIVALis does not belong to this Celtic term. If this should be the case, it has nothing to do with the Rivus, as the Latins have imagined, and have endeavoured, as it seems, to confirm, by giving it a similar form in the adoption of the same vowel i before the V. While I am examining the Greek Rapizo, (Panue,) I cast my eyes on Rapus, (Panue, Rapa,) which will remind us of its parallels Raphanos, Raphane, (Panue, Brassica, Raphanus, Radix, (Ang.) Radish, Panaen,) (Rape, (Eng.) Raib, (Gal.) Rape; Raibe, (Gal.) A Turnip; Rapum, (Lat.) which latter word the Etymologists derive from Rapio, To pluck up.

Among the following words we actually see the term relating to Dirt and its Agitation, as RIFF-RAFF, RUBBISH, which connects itself in form with Rub - Ruffian, with its parallels Ruff, Ruffien, (Fr.) &c. &c., which some derive from Rof. Fornix, Lupanar; and others from the Swedish Rofa, Rapere.—Ruff, Collare, Rugatum, which the Etymologists justly compare with who have recorded likewise the Armoric RUFFLE, Rugare; Ruff is explained by some, in one sense, Rouffen, Rugæ. Porculus, seu Porcellus, Piscis; which is referred to Rough, Piscis Hispidus. The terms Ruff and Rough belong to each other, as derived from the Elementary 'R, with the additions of F and G. RIBBLE RABBLE, the Etymologists justly compare with the Latin RABULA; who remind us likewise of a kindred term ARABeo, (ApaGew, Strepitum edo.) While I examine this Greek word in a Vocabulary of that Language, I cast my eyes on Arbelos, (Apliance, Scalprum, culter sutorius,) which means the Scraper or Cutter, and ARBULe, (Actua, genus quoddam calceamenti cavi et profundi, idoneique in primis ad Lutum calcandum,) where we see the idea of the Shoe calculated for the Dirt.—RIBALD, RIBALDTY, Rigard with their parallels Ribauld, (Fr.) &c. should be referred to Rabble, and not to Re and Bauld.—Rupos, Rupao, Rupto, (Puros, Squalor sordes, Ρυπταω, Sordeo, Ρυπτω, Sordes eluo,) actually,

actually, we see, relate to Dirt; and ROPHEO, (Popew, Sorbeo, Sorbillo, Haurio,) Rumphaino, (Ρυμφαινώ, Sorbeo, Haurio,) must belong to these words, &c., either as signifying 'To Draw out-up or off, 'as foul matter, from a surface,' just as Sup belongs to Sap, To Dig; or it relates to a vortex of Foul matter, Drawing or Sucking in; as we see the idea in Voro, To Swallow, and Vorago, "A gulph "or whirlpool, a quagmire or bog."—Rops, Ropos, Ropeuo, (Put, Pωπος, Merx, parvi pretii, Pωπευειν, Vilia scruta vendere,) are likewise terms relating to Rubbish, which are derived by the Lexicographers from Repo, (Penu, Vergo, Propendeo,) which in its original idea is attached to an action of some Agitation and Impetuosity, as in the very phrase produced in my Greek Vocabulary, Πληθος Ερρεπε προς τους θρασυτερους, which directly expresses the Desultory action of a RABBLE. The term REPO, (Peru,) is only another form of Ripto, (Pinto,) and means 'To Fall, or be Cast 'down—on—forward, with violence.' When the term is applied to the Balance, as in ROPE, &c. (Ponn, Libramentum, Præponderatio, Momentum,) we have the same idea, as when we talk in English of the Scales Plumping down, and, in vulgar Language, of Flopping down, and again of Knocking or Kicking up; and in the Latin word Momentum we have a strong term expressing Excitement and Force. While I examine Rupto, (Pomru,) in my Greek Vocabulary, I cast my eyes on Rupapai, (Punanau, Acclamatio nautica,) where we see the idea of Excitement. I cannot help again reminding my Reader of the German RAFFen, To Sweep or Rake together, as Dirt, &c. The Etymologists have seen, that Rubbish belongs to Rupto, (Ρυπτω,) &c. to Ereipion, Ereipo, (Εφειπιον, Ruinæ; Ædificii Rudera, Equinu, Everto, &c. &c.); and Skinner perceives, that it has some connexion with Rudera. The Elementary R, we see, preserves and represents the affinity between these words.

It is impossible not to observe, how the words under the form RBL, RML, &c. with the L annexed to the Labial, inseparably connect

connect themselves with those belonging to the form RB, under the same train of ideas. We at once acknowledge the words, just produced, RIBBLE, RABBLE, RABULA, RIBALD; and we remember those, which were exhibited on a former occasion, as RUMPLen, (Germ.) Impetum facere, Strepitare; Das Rumplen eines karn, The Rattling of a Cart; RAMMELN, To RAM piles into the Ground; RAMBLE, RUMBLE, ROMBLE. To these we must add the following; RIVEL, "To contract into Wrinkles;" RUFFLE, RAFFLE, which the Etymologists have justly compared with Ruyffelen, (Belg.) Terere, Verrere, Rugare; Reffen, (Germ.) Flache Reffen, Fr. G. RAFFer du lin, Linum depectere, &c.-RAVEL, Ravelen, (Belg.) &c.—REVEL; which Skinner has referred to Reveiller, (Fr.) &c. RIFLE; which the Etymologists have compared with the terms Riiffelen, (Belg.) Riffler, Rhyffelu, (Welsh,) Bellum gerere; and have seen, that it belongs to ROB, &c. The next word, in Junius, is RIFLE, "at Dice," which we call RAFFLE, where we have the term of Agitation; and which he refers to Ripto, (Pinto, Jacio,) - RIPPLE, RIMPLE, RUMPLE, which latter word the Etymologists have justly referred to the Saxon Hrympelle, Rugæ; geHrumpen, the Belgic Rompeln, Rompen, the German Rumpffen, &c. Corrugare; Rimpe, Rimpel, (Belg.) Ruga, &c. &c. The Etymologists cannot but see likewise, that the German Runtzel, Ruga, has some relation to these words, though they have not seen, that Ruga, a term of the same meaning, is a branch likewise of the same family. I have before produced from Wachter the terms adjacent to the German Rumpfen, as Rumplen, Impetum facere; Rumplen, Strepitare; as likewise the English Rumble, and its kindred term of Agitation RAMBLE, which brings us to the sense of ROAM, ROVE. &c. The succeeding words to RAFFLE, in Skinner, are RAFTE, Ratis, and RAFTER, Tignus; in the sense of the former of which we are brought to the original idea of Passing with some Commotion over a surface, " quod "quod per aquam Rapitur," as I have shewn Ratis to belong to Rado, &c.; and in the latter we see simply the idea of being Extended on the Surface or Top, without motion. In the familiar term, the 'Ruffle of a Shirt,' we see nothing but the Plaited or Corrugated Surface; but it was anciently used as a term expressive of the greatest Violence and Commotion. On the night, in which Lear is exposed, Gloster observes,

- " Alack, the night comes on, and the Bleak Winds
- " Do sorely RUFFLE."

This is the reading of the Folio, but the Quarto reads Russel; i.e. Rustle. "Ruffle," says Mr. Malone, "is certainly the true "reading. A Ruffler, in our author's times, was a noisy "Boisterous Swaggerer." This writer informs us in another place, that Ruffle and Hurly burly are synonymous.

In Hebrew, רבה RBH, signifies "To be or become many or "great, to increase, multiply, magnify;" and, as a substantive, "Multitude, number, magnitude, abundance, enough." This term denoted in its primary idea, as I imagine, 'A Heap or Mass of Dirt or Rubbish-Riff-Raff;' though in the Eastern Languages the idea of the Heap or Mass is frequently referred to what is Much or Great, under the idea of Respect. Hence, in Chaldee, Syriac and Arabic, it signifies the Illustrious—the Chief Personage, &c.; and hence we have the terms RABBI, RABBIN. A Teacher, Doctor, &c. Mr. Parkhurst has referred to this Hebrew term the English "Rabbet, from their great increase," and he adds likewise "Rabble and Rubble, from ב" RB, "great; " and ב' BL, " mixture, confusion." The adjacent terms, under the form RB, in Mr. Parkhurst's Lexicon, are רבע RBH, "To " Agitate, actuate;" where, in the sense of Agitation, we have the true idea,—רבץ RBZ, "To lie, lie down, couch, as a beast;" where we are brought to the Ground-רבק RBK, which occurs not as a V. in Heb.; but in Arabic signifies "To tie, bind, tie up, as cattle

"cattle by the neck;" where the term seems to express the idea of Violence, as of Pulling-Plucking, &c., attached to this Race of words, as in Rapio, &c., just as Αρπεδονη, Laqeus, funis, Αρπεδονίζω, Prædor, Illaqueo, belong to Aemazu, Rapio. - RBD, "To "wreathe, intwine, weave, interweave;" where we have the idea of Mingling or Mixing, as into one Mass, as we have seen in the parallel term ערב HRB, which Mr. Parkhutst explains by "To " Mix, Mingle," and which as a noun means, says this Lexicographer, "A Mixture, Mixed Multitude, RABBLE;" where we actually see the idea, supposed in my hypothesis.—בר RB, "To "Strive, contend;" where we again see the idea of Commotion-Agitation, &c. I find likewise, as an adjacent term, רבק RBK, "To Bake or Fry," which belongs probably to the form BK, Bake, &c. To these words, under the form RB, denoting Multitude, belong terms in the Eastern Languages, denoting Four, as likewise many Thousands, "an infinite or indefinitely great number " or multitude;" and I must leave the adepts in these Languages to decide, whether the term was formed in that state of Society, when counting as far as the number Four, appeared to express a great quantity.

In Arabic, the Element RB bears the same fundamental idea, which I have just unfolded. The term Rebb, means "God," and Rebbani, "Divine, Godly.—A Doctor of Divinity, "a Rabbi; Rubbani, The Master of a Ship." The succeeding word to this Arabic term in Mr. Richardson's Dictionary, is the Persian Rubaniden, "To order to Rob;" and in the same column we have L. Reba, in Arabic, which signifies among other things, 'Amassing, &c.—Excess—Much Wealth,' &c.; and in Persian, under the same form we have the sense of "Robbing, "stealing, carrying off by violence," from Rubuden, "To Rob, "seize, Ravish;" when in Rob, Ravish we have the idea expressed by the Race of words just examined. In the same opening

opening of Mr. Richardson's Dictionary we find the Arabic Renaji, "Stiff, dry Soil, between cultivated and desert "Ground;" where we are brought to the true idea—REBZ "A Crowd, or Troop-Wealth-That part of a thing, which "touches or is nearest to the Ground"— Rebik, "Weak, silly, " idle; Ribekh, Confused in business; Rabk, Mixing."—, Rebou, "Increased, Multiplied -Growing, rising, a Hill, Tumulus, a " Heap;" сыры Rububyet, "Dominion, supreme power.— А The succeeding term to which is \$4.9 "Deity, Divinity." RIBU-et, "A Hill, a rising Ground, a Heap.—Ten thousand drams;" where, in the 'Rising Ground or Heap of Dirt,' we are brought to the true idea of the Rubbish. I cannot leave this opening of Mr. Richardson's Dictionary without observing another term RUBB, (Ar.) "Decoction of the juice of citrons, and other fruits, " for seasoning victuals; where the sense of Decection is derived from the idea of concentrating into one Mass the virtues of any substance or substances. Hence has been derived our term in Cookery 'Ross and Yellies.' In the kindred term 'Jellies' we see the idea of the Mass more strongly, as likewise in the ordimary interpretation of "Rob, Inspissated Juice," as N. Bailey explains it. I shall not produce any more terms in Arabic belonging to the Element RB, containing this train of ideas, as those under the forms وأب أرب RAB, ARB, &c. &c., since the adept in this Language will be enabled, I trust, under the leading idea, which I have now unfolded, to unravel the various senses, which this Element exhibits.

I have before produced a Race of Words, under the form AR, R}M, denoting Man—the Illustrious—Powerful Personage, &c., which I have supposed to be derived from the idea of the Bouter—the Destroyer, &c. We have here seen in the Eastern Languages, under the form RB, some terms, denoting a 'Chief—' a High—Exalted Personage,' which appear to be derived from

the Raised Heap of Dirt or Ground. There are various terms, in the Eastern and other Languages, under the form RB, which denote Man, some of which perhaps should be referred to the terms just examined, the RABBI, &c.; or some of them may perhaps belong to the idea of the Desolater-Destroyer, &c., as explained on a former occasion. In Arabic, عاف Araf, means "A Priest, an Augur, a Physician," to which name the term Onpheus may belong, though I have suggested in another place, that he may possibly mean 'The HARPer;' yet it is probable, I think, that he denotes the Priest, Wise Man, &c. The Arabic term means likewise "The next in rank to a commander or Chief "judge, a lieutenant, a deputy." The succeeding word to this, in Mr. Richardson's Dictionary, is عانم ARAFij, "Pathless De-" serts;" where we see the idea of Desolation, which might lead us to think, that the sense of the Chief personage, expressed by the former word, was originally derived from that of the Desolater. Again, in Arabic, عارف ARIF, means "Knowing, perceiving, scientific, wise, skilful, capable.—A penetrating, intelligent, m ingenious man—A Head man." The Fish Oπphos, (Ορφως,) was so called from Orpheus, the Priest, on account of some supposed Prophetic quality, as appears from Athenaus, Liquis yas not autour OPΦΩΣ του θεσω. (Lib. vii. c. 18.) Casaubon reads Ιερος, and observes, "Refero enim ad extuoparteia, id est, divinationem, qua "fiebat ex piscibus, Orpho maxime." I have expressed on a former occasion, (page 287,) a difficulty respecting the origin of Merops, (Meeol, Divisam vocem habens. Mepanes, Hominum Epith. Homines,) and Anthropos, (Ανθρωπος, Homo, Μεροπων Ανθρωπων,) whether the Op or the Rop in these words be the part denoting Being. It is likewise difficult to decide, whether the M in Merops be an articular addition, as in Pirom-is, or whether the Mer be not a significant portion, denoting Great, as in our words Morethe name Moore, &c., which I have illustrated on a former occasion, (p. 151.) To Merops, (Mserol), belong the names Merops, Merope; and I must add, that one character under the name of Merops is a Soothsayer. The English names for a Man, Rosin and Rosers seem to belong directly to the terms of Violence in our Language, Ros, &c.

In old English, REEVE is a Bailiff, which the Etymologists have justly referrred to g-RAVe, ge-REFA, (Sax.) g-RAF, (Germ.) from which Land-Graff, Mar-Graff, &c. are derived, all which the Etymologists justly refer to the terms of Violence, REAFian, (Sax.) Spoliare; RAPere, (Lat.) We might enquire, whether MER-ROPS, &c. was not taken from the Teutonic MAR-g-RAFF or MAR-RAF. The Sherif is acknowledged to be the Shire-REEVE, the Scire-ge-REFA, (Sax.) The original sense of g-RAF is that given by Wachter, "Exactor pecuniæ, tam publicæ, quam privatæ;" and in English, REEVE has the same sense, as REAVE in be-REAVE. Wachter explains Graf, in one sense, by "Dux, Satrapa," &c.; and I must leave the Persian Scholar, who is skilled in the more ancient part of the Language to decide, whether Satrap, "سترب Sitreb, Satrap, "(obsolete)" says Mr. Richardson, be not, quasi ste-RAP, as in g-RAF. If this be not the composition, the RAP has yet, I imagine, the same sense as RAF, which appears, as we have seen, in the Persian ارب Ruba, " Robbing, Stealing, carrying off by vio-"lence." The first part of the composition, the Sit or Sitr in Sitreb, might belong to the terms of Violence, adjacent to this word, in Mr. Richardson's Dictionary, as سندن Siteden, " To take, " Seize, Carry off," where we must mark, how Seize belongs to this Persian word; and ستردن Siturden, "To Shave, &c. " to erase, to cancel, to abolish, to cut off." GRAF, in German, signifies, in one sense, "Comes, Socius," for which Wachter has added the due reason, "Unus ex Nobilioribus, qui Principem vel "Regem ubique Comitantur," as in the Latin Comes. He adds moreover, "Vix ulla vox est in universa Lingua Germanica, qui " ingenia

"ingénia veterum et recentiorum magis exercuerit, et minore cum fructu veritatis." We cannot but see, how the sense of Graf, the Exactor, belongs to the sense of Gripe, Greiffen, (Germ.) Capere, prensare, invadere, &c., which are attached to a great race of words under the same form, Gravis, (Lat.) Grieve, &c.; and here again I must suggest to the Readen, whether they were not all originally derived from the form RB, with the Prafix ge, &c. On this we cannot decide, till the form GRF shall be fully unfolded.

I shall now examine the words under the form of RP, in Hebrew, which we shall unequivocally see to contain the fundamental: meaning, which I have supposed to be annexed to the Element. The first term, which occurs in the Lexicon of Mr. Parkhurst, is RPA, which he explains by "To Restore, or " reduce to a former state or condition. Restaurare, restituere, re-"ducere; and most generally To Restore to health and soundness, "to heal." The sense of Restoring or making whole-Of Sewing gormants, as the parallel terms signify in Æthiopic-Arabic, &c. seems to be derived from the idea of Putting or Throwing together, as into one whole Heap or Mass. In Ezekiel we are brought to the Spot, supposed in my hypothesis, whatever may be its precise Taylor, explains the word, in one sense, by "To mend "bad Ground." The next words in the Lexicon of Mr. Parkhurst are ארם RPD; " To Strew, Spread, &c.; ארם RPH, To give way, " relan, slacken, &co. N.—Pounded Corn—To be Dissolved, as "chaff on fire—non RPP, To yield, give way, very much, tremble, "as from fear;" under which word Mr. Parkhurst has seen the prevailing idea of the Element, and has accordingly referred it to Penu, Purru, Rumpo, Rupi, Rip, Rive, Reave, Reft, Bereave, Bereft. In all this there is no difficulty. The fundamental sense of the Element is that of Throwing together, about, &c., as in a Heap; from whence we have the idea of a Whole or Compact Mass, or

for the purpose of Dispersion, from which we have the idea of Breaking-Dissolving, &c. Nay, even the very word, which signifies 'To Restore, means, as a Noun, "Dead Bodies Reduced," says Mr. Parkhurst; or, as he better explains it, "Resolved into their' " original Dust." The other Hebrew terms in this writer's Lexicon, under RP, are ADD RPT Stalls for Oxen, which he refers to רפה RPH, To Relax, Remit, because the animals have there Remission from their labours—PBT RPK, which some explain by Innixa, and others by "Adjungens sese." This word I must leave the adepts in the Hebrew Language to reconcile with the Elementary sense; yet I must observe, that we are brought to the spot, supposed in my hypothesis, in the Chaldee word, which Castell produces as parallel, and which he explains by "Fodit, "Sarrivit." If we add to this interpretation, "Open Incumbit— Fodiendo, Sarriendo, we shall see, how the sense of Innixa or Incumbers and Adjungers sese, may be produced. Under this metaphor, the imagery of Solomon will exhibit great force and spirit, "Who is this that cometh up from the wilderness, Leaning upon " her beloved"—Amasio suo tota Incumbens—ei scilicet nunquam' non Inhians et Intenta—quasi Fossor operi suo Incumbens, et The two following Hebrew terms will unequivocally shew us the original idea, from which these words are derived— RPS, To Tread, Trample, Tramp, and To RPS, "To Foul or e make Muddy."

Let us mark an explanatory term, before produced, Restaurare, To Restore. I shall shew, that Stauro and Store belongs to Struo, To heap up; but whether they do or do not, it is acknowledged, that Struo, the term relating to Repairing or Making up, "To pile up," belongs to the terms of Dispersion, Stroo, Storeo, (Στροω, Στορεω, Sterno); and it is for the same reason, which I have above unfolded; namely, because the one signifies 'To Throw together,' and the other 'To Throw down—about,' &c. The Greek Rapto,

(Ραπτω,

(Paπτω, Suo,) I have supposed to be attached to a peculiar idea of the Element; yet it might be referred to the general sense of Throwing together, as in a Heap. The term Suo and Sew would demand some trouble to explain; yet we cannot but see, how Cobble and Patch present to us the idea of the Lump; and we certainly come to the Spot, which I suppose, when we talk of A Patch of Ground.' I cannot forbear producing the observation of Mr. Parkhurst on the Hebrew word RPA, signifying To Heal; who remarks, that in the Language of Otaheite, RAPAOO is a Physician. The parallel terms in Arabic to this Hebrew word are زنا Reffa, "Mending a garment, Cementing broken friend-"ship; Refa, A Mender of Garments," as Mr. Richardson explains it; and it; REFF, "Sewing any thing to a garment," &c., which means likewise "A High Heap of Sand." The Reader will not wonder, that I refer these terms, under the Element RF, which express Consolidation to such words as Rubbish, when he remembers, that the explanatory word Cementing belongs to Cæmentum, "Rubbish, Shards," &c. &c., as R. Ainsworth interprets it. The next term in Mr. Richardson's Dictionary is Refat, "Any thing Broken, Bruised or Pounded," where we have the idea of Dispersion, before exhibited; and in the same column we find the Persian رنتن Reften, "To walk, go, proceed, de-" part, pass along, travel; Ruften, To Sweep.—To clean the teeth " with the tooth-pick, called "where in the sense of Sweepand Cleaning the Teeth, we are brought to the genuine idea of Scratching upon a surface, to Rub, &c., and we see, that the sense of Passing along is taken from the metaphor of 'Sweeping along,' as we express it. This Persian term directly belongs to the German RAFFen, "To Sweep, take or Rake together."—I have now, as I trust, sufficiently elucidated the Race of Words, in which the Elementary R is succeeded by the Labials; and at this point therefore the labours of the present Work are brought to their destined termination.

CONCLUSION.

In concluding the first portion of a work, in which a new world of ideas has been unfolded to our view, we shall be naturally disposed to turn our eyes over the scenes which we have passed; and we might be edified by a train of reflexions, formed and enlightened by an ample prospect of the general question, in all its relations, and through all its dependencies. Our modes of conceiving a subject may be varied, as the theory itself is expanded; and the writer might perhaps be permitted, at the close of a long—a laborious and a temperate discussion, to pursue the illustration of his theory amidst the wilds of fancy, without deviating from the paths of truth or the guidance of reason. In these wanderings of the imagination; even the Topics, which are most remote from the nature of the argument, might be summoned to adorn the theme; nor would the picture be less impressive or instructing, because the objects of comparison were distant and dissimilar. If the ideas, which are exhibited on this occasion, should be attached to a wild and visionary theory, they will be still more congenial with the spirit of an allusion, which professes only to amuse by a new and unexpected combination of fanciful imagery.

The Doctrine of Transmigration, which in the dreams of the Poet or the Philosopher describes the progress of the Soul through various stages of existence, would afford a rich and abundant vein of materials for the elucidation of our Theory; if the occasion demanded or permitted the expansion of this idea, and if the powers of the Writer were duly adapted to the embellishment of a splendid topic. Even in the familiar language, which

has ever been attached to the subject of these enquiries, a similar comparison has already been adopted; and when we remember, that Letters are defined to be the *Elements* of Speech, we shall perceive a metaphorical allusion, which is involved in the same train of imagery. From Grammarians I differ only by supposing, that the *Elements* of Letters, before they are formed into words, represent, record, and propagate ideas; and on this plain and simple principle my Theory of Languages has been founded.

The Element, by which a race of words is generated and preserved, may be compared to that primitive and unperishing particle, in which, according to the doctrine of these visionary Philosophers, consists the Essence of the Soul-The original and abstract idea, impressed on this Element, may likewise be compared to that innate and unalterable propensity of the Soul, which, amidst all changes and chances of external objects, is still found to controul and predominate in every form, to which it is attached, imparting to the Being its appropriate nature and disoriminating qualities. The material vesture, with which the divine particle is enveloped, and through which it communicates with the world around it, is ever passing into an infinite variety of shapes and appearances; but the Soul itself still continues to preserve inviolate its peculiar force and characteristic energy. The Beings, which it animates, are ever found distinct from others and similar to themselves. The Transmigration of the Soul affects only the exterior form, with which it is invested, or diverts the application of its powers; but the original particle remains eternally the same, neither suffering decay, nor subject to extinction. Through the long progress of perpetual change, the elastic principle of its essence still continues unwearied and unimpaired: It is now obedient to contraction, and again prompt for expansion: It now crawls a reptile on the Earth, and again it soars an Eagle in the Skies: We now behold it groveling in the condition

of a sordid slave; and again it assumes the port and person of a Monarch. Still, however, the same propensities pursue the Being under every form, and infuse kindred qualities in every change. The indelible impression of its original energy is graven in deep and distinct characters on all the modifications of matter, into which it may be wrought,—imposing and preserving the property of SELF. It is this seal of identity, which etamps and claims the creature for its own, under every varying and disguising garb of quaint and of curious shape; recording in remote periods of time and distant regions of space, that the Being of perpetual change remains eternally the same.

Such are the reflexions, which might amuse or enlighten our minds, when we meditate on that wondrous process, by which Languages have been formed propagated and preserved. It will surely be acknowledged, that the doctrine of these visionary Philosophers affords a strong and striking resemblance to the principles of that Theory, which in the present Volume I have laboured with such solicitude to unfold and establish. The Elements of Lauguage and of Life are employed in the same work, and their operations are directed to the same purpose. Let us mark with attention the changing forms and different offices, which the same Element assumes in the propagation of a race of Words; and we shall perceive, that the original impression still remains, through every variety of appearance and of meaning. When we examine with a curious eye these numerous changes, with all their diversity of signification; we shall discover, that they are all impregnated with the same train of ideas-that they all preserve a peculiar cast and species of meaning, appropriate to themselves and distinct from others; by which they are ever recognised as the productions of the same cause, and as portions of the same general idea. The Element indeed is perpetually passing into fresh combinations,—discharging new offices and personating different

different characters; yet all these various parts and functions must be referred to the workings of the same primitive idea:-They are the natural and necessary consequences of one common principle; nor would this series of varieties have existed, unless the same constant cause had operated in their production. Enclosed in one form, the Element may represent a crawling reptile; and, in another, the soaring eagle: It may now personate the groveling slave, and again the swelling Monarch: still, however, these dissimilar creatures have all arisen from the same source; and have been produced only, because the Element infused into each form the force and spirit of the original idea. Thus we may understand, how a few simple principles have operated in forming and conducting the most important and complicated artifice among the inventions of Man;—that wondrous work—the great machinery of Languages! In this simple process we perceive the same mode of action, which is visible in the material Nature is a 'thrifty goddess,' and deals out blessings and world. principles with a sparing hand. Her infinite variety is effected only by the powers of modification; and as we advance forward in the knowledge of her mysterious workings, the Elements diminish, and the Combinations multiply around us.

Strong and impressive as the resemblance is between the Doctrine of the Soul's Transmigration, and the Theory of Elementary Language; still, however, there are some bearings of the subject, in which it is inadequate and deficient. The divine particle cannot at the same time animate different systems of matter; and it is necessary that one mass should be dissolved, before the functions of life can be imparted to another. But in this creation of the World of Words, the Element is enabled to animate at once myriads of various forms: It is unceasingly employed in propagating its own powers, and continually impressing new orders of Words with its peculiar force and appropriate quality;—itself still occupied

occupied in all, and constituting by its own presence the life and spirit of these unnumbered combinations. Thus it is, that the Element may be said to 'extend its influence through all extent;' perhaps in every quarter and region of the globe, wherever Man is found and Speech is uttered, 'living, as it were, through 'all life—spreading undivided—and operating unspent.' Though the comparison between the Elements of Life and Language has in this point of the argument been deficient; yet another topic might be urged, in which the resemblance is again full and perspicuous. In the Doctrine of Transmigration, the Soul never dies, but is for ever busied in animating new and perishing systems of matter; nor can its immortal essence be affected by' the most violent shocks or convulsions of the material world, with which it is surrounded.

Such reflexions might be present to the mind, when we cast our eyes over the eventful History of Human Speech. Languages, or the forms, which the Elements assume, are subject to perpetual fluctuation, and exposed to all the numerous accidents, which Man is destined to experience; but the Elements themselves still survive unaltered and unimpaired, amidst every revolution of Nature and of Life. The physical and moral evils of the world all prey upon Languages; and even the caprices and follies of Man himself, as they appear on the familiar occasions of ordinary life, are busily employed in producing those insensible mutations, which the forms of Speech incessantly experience. Folly and caprice are powerful agents in the operations of change;—controlling or rather suggesting the customs of Mankind; and Custom, as we have ever heard, is the Tyrant of Languages. Powerful however as these agents may be imagined-Folly, Caprice, Custom, or by whatever name they shall be called; still we must observe, that their powers are limited and directed by a superior necessity, which sways with irresistible controul the destiny of Languages.

Their

Their agency is confined to the simple changes of modification only, nor are they able to disturb the Original Elements either of Languages or of Life. The wildest sallies of caprice are confined and governed by the same laws, as the gravest suggestions of design; and they are only to be considered as different modes of acting on the same materials, invested with the same properties. Wherever there is Mind, the effects of design must always be produced; and whenever Man becomes intelligible to Man, whether in moods of sport or of gravity, of caprice or of meditation; the terms, which he employs, must be adapted to a train of ideas already formed, and derived from words already existing. must be significant, and consequently must be analogous to a certain order or series of things, which had been previously established. Man may combine into new forms—he may enlarge or contract—he may change by every variety of modification; but he can produce no effects on the existence or the spirit of the Original Elements. They are removed from the sphere of his action, and are governed by a superior authority.

When these observations have been duly weighted and understood; we shall be enabled to comprehend, why the mutations in the forms of Human Speech have been oftentimes so rapid, and always so progressive; while in tracing the *Elements* themselves through all these mutations, or through the various Languages, arising from this perpetual change; we find, that the same sense has uniformly prevailed, and been regularly propagated, unaltered and unimpaired. With the mutability and variety of Languages we have ever been familiar; but this principle of their uniformity, by which they are all connected with each other, has, I trust, for the first time, been duly conceived and explained in the discussions of the preceding Volume. The experience of nearly four thousand years, in which we have been witness to the propagation of numberless forms of Speech, has established the fact, which

attests the permanency of Elementary Language, beyond all possibility of doubt or error. Without involving ourselves in the remote ages of Hindoo Chronology, we may appeal to the writings of Moses, as they are delivered down to us in their genuine Elementary state—unincumbered with those unnecessary symbols, which vainly attempt to record the fleeting sounds of a vowel breathing. We there discover the same Elements bearing the same meanings; which compose at this moment the familiar Language of the English nation; and which, as we have seen, are employed to represent the same train of ideas over all the regions of the globe, with which we are most conversant.

On considering therefore this universal diffusion and unchangeable permanency of Elementary Speech while we observe at the same time the incessant mutability of Languages; we shall be enabled to throw light on a confusion of ideas, which appears to have clouded all former investigations on this subject. The similitude between various Languages has been perpetually observed; though it will be acknowledged, I trust, if these speculations are founded on truth, that our enquirers were totally unacquainted with the nature and the extent of the resemblance. Their speculations have been employed in discovering the Original Language, from which all these forms of Speech were derived; and to the Celtic the Arabic the Hebrew—the Gothic, &c. and even to the Greek itself, has this distinguished honour been respectively attributed. Nothing, we shall readily agree, can be more idle and unmeaning, than to talk of an Original form of Speech, when we all know, that these forms are perpetually changing. We may decide indeed by historical evidence and by other modes of reasoning, on a recent combination; but the idea of an Original form to a fluctuating object, in which no period is fixed for its commencement, we instantly perceive, is absurd and ridiculous.

We may still however direct our enquiries, with the most:

anxious curiosity, to a wondrous fact, which is deeply involved with the fate and fortunes of the Human Race. We may enquire, I must repeat, with the most anxious curiosity, whence it has arisen, that the same Elementary Language has been thus universally diffused, almost through every region of the globe, to which the discoveries of Europeans have yet extended. On this important question, I dare not venture even to interpose a conjecture. Our enquiries into these subjects can at present scarcely be regarded even as commencing; and the decision of a question, like this, would be the last result of meditation on the accumulated facts, which long and laborious researches had finally collected. It will be perhaps at last discovered, that the History of Man is deposited in the Elements of Language: -It is at least certain, that we shall vainly endeavour to trace the progress of Human Speech, in the migration of different nations through the various regions of the Earth; till we are furnished with the most ample materials for investigating the principles of that universal Language, which is the object of our search.

Though we are unable to discover, by what important event this wide diffusion of Elementary Speech was effected among the inhabitants of the Earth; and though we cannot form any possible conjecture on the remote periods of its origin, still however we may venture to hazard a prediction on the limits of its duration. If Languages shall continue to be propogated by the same mode, with which alone we are acquainted,—passing from mouth to mouth, through successive generations; and if men should continue to be endued with the same mind and the same organs; there is no reason to believe, that the Elementary Language, now existing, will ever perish or be impaired in its progress. The experience of four thousand years, in which we have not even perceived any properties of change or decay, will lead us to conclude in the most temperate spirit of calm investigation, that

the same *Elements* will continue to preserve the same meanings, through every period of succeeding generations.

Thus, at last, we perceive, that a system, formed without contrivance, and propagated without design—the baseless fabric (as it might seem) of chance and of change, has alone remained constant, inviolate and immutable; when all around has dissolved and disappeared. The Arts and the Institutions of Man have perished with their inventors:—The monuments of his glory, his science and his superstition,—the palaces and the temples have crumbled into dust; and the proud cities, in which the wonders of his atchievements were exhibited, are buried for ever under their own ruins:—All however is not lost:—The original Elements of Language, which were once vocal with the inventions and emotions of primeval Man, still survive amidst the ravages of time:—They still continue to be instinct with the energies of mind; and to record in mystic, though in faithful characters, the secret History of the Ancient World.

The distance of the Author from the Press has operated in causing the following and many other typographical mistakes, which the Reader will readily correct.—The Indexes will be found extremely deficient: The English—Latin, and Greek words are detailed in the first index, with tolerable precision; but the words in øther Languages are only occasionally noted, and the Celtic terms, which have been perpetually introduced in the Work, are seldom to be found. The words in the Eastern Languages, which have been likewise examined with great diligence, are not noted at all in the Index. As the Work advances in its progress, and begins to fulfil the purposes of an Universal Repository of words, the Indexes should then be most copious and accurate. In the present state of the discussion, the form, which they now bear, will perhaps be sufficiently minute for the purposes of the general Scholar.
